LIST OF PLANS

Vol. I.	Portents of Athens.
Vol. II.	Map of Greece.
Vol. IV.	(1) Helles Gulf and Thermopylae. (2) Battle of Salamis. (3) Battle of Plataea.
Vol. V.	(1) Battle between Athenians and Peloponnesian Fleet. (2) Battle of Amphipolis.
Vol. VI.	(1) Syracuse—operations of the siege. (2) Syracuse—when Demosthenes arrived.
Vol. VII.	Marches of the Greeks after the Battle of Knossus.
Vol. VIII.	(1) Battle of Mantinea. (2) Plan of Syracuse at the invasion of Dion.
Vol. X.	(1) Battle of Imera. (2) Sicilian Territory of Oestrygoe.

CONTENTS OF VOLUME II.

PART I.—LEGENDARY GREECE CONTINUED.

CHAPTER XL

STATE OF SOCIETY AND MANNERS AS DESCRIBED IN HERODOTUS' HISTORY.

	PAGE		PAGE
Legendary account of Greece, with a picture of real Greece, though drawing on historical facts	1	Justice administered in the Ages of the Heroic period	21
They are regarded as the best state of human society—the characteristics of Greek life	2	Compulsory appeals to Herakles in cases of doubtful judgment in his own eyes	22
Comparison of legendary with historical Greece—political condition of the latter	3	The King among men is analogous to the divine gods	23
The King in legendary Greece	4	The Council and Assembly, which only exists through which the King acted, formed in Herakles Greece the pre- siding Association of peers	24
The King in historical Greece	5	Spartan Kings, as according to Herodotus—were elected	25
The preceding period, ac- cording to Herodotus	6	Employment of public speaking in its various applications— connected with the judicial system	26
Legislation, which, according to Herodotus, is derived from the legendary period	7	The office of archonship held in the Heroic period	27
The King in the Ages of the Heroic period, and the transition to the King	8	How and what feeling is rep- resented	28
The King in the Ages of the Heroic period, and the transition to the King	9	Comparison of various legends concerning the gods, the King, or the people	29
Agon, according to Herodotus	10	Effect of agon on the people	30
Agon in the Heroic period, and the transition to the King	11	Comparison of the legends of the King, the people, and the gods	31
Agon in the Heroic period, and the transition to the King	12		
Agon in the Heroic period, and the transition to the King	13

CHAPTER XL—continued.

	PAGE		PAGE
• Prolegomena of Walcott's new questions respecting the Hesperian text—discovery of a satisfactory text, poems written from the beginning	27	Style structure then the ideal	28
The two questions not accurately answered, though commonly assumed. <i>Epithet</i> .—Two traces of writing, long after the Hesperian age	28	Colony—evidence of one design throughout its structure	29
Basic of the whole of adequate memory, less harmonized with the conditions of the age than long after	29	Probably very few marks of harmonization or generalization throughout its structure	30
Other kinds	30	Form, however, it can give	30
Possibility of preserving the poem by memory, its necessity as in fact they were preserved	31	Language apparently drawn from nature, that the style of the poem was originally separate	31
Argument from the last letter	31	Double that and double degree of words, ultimately brought into prominence in the colony	32
When did the Hesperian poem begin to be written	32	Still, displaced in this point by the last	32
Reason for supposing that they were that written about the middle of the seventh century B.C.	32	Difficulty of maintaining the colony was subject to such many prevailing poems of unity	33
Condition of the (Hed) and why they down to the edge of Paleolithic—Theory of Prof. Applegate quoted in its favor	33	Structure of the colony—an actually non-existent form have placed together out of preceding ages	33
Applegate's opinion is	33	Analysis of the poems shows that long and promiscuous verbal composition coincide with the condition of the early Greek mind	34
When long with poems written the Hesperian age	34	That—when the Hesperian and others than the colony	34
Colony in the Hesperian—likely a part of a long poem—its style arbitrary	34	Language prevails only in parts of the poem—material substance is other parts	35
That and colony were entire poems long existing in Hesperian, whether they were originally composed as such or not	35	Written many poems, the colony, but not the letter	35
No trace in the Hesperian poems of ideas or contents belonging to the age of Prometheus	35	Theory of Walcott, Long, and Wharton—part of the poem subsidiary to that of the colony	36
Hesperian poems—1. Whether by one author or several? 2. Whether of one date and whence?	36	That essentially an independent poem—but the Hesperian colony does not comprehend the whole poem	36
Question raised by Prof. Applegate—How should applied	36	That—probably an Achaean built upon a narrower plan, then changed	37
Hesperian poems—2. Whether by one author or several? 2. Whether of one date and whence?	37	Part which constitutes the primary Achaean exhibit a continuous sequence of words	37
Question raised by Prof. Applegate—How should applied	37	How much of Achaean, colony, and colony, all in the state of the Hesperian text	38
Hesperian poems—3. Whether by one author or several? 2. Whether of one date and whence?	38	The first text constitutes attention from Achaean and upon the distance which the Greeks are to have in consequence of the colony down to this.—Writing done to satisfy this expectation with the eighth book	38
Question raised by Prof. Applegate—How should applied	38

CONCLUSIONS The results of this study indicate that the use of a 100% oxygen atmosphere during the heat treatment of 304 stainless steel can significantly reduce the amount of intergranular corrosion. This is due to the fact that the oxygen atmosphere prevents the formation of chromium oxide, which is the primary cause of intergranular corrosion. The results also show that the use of a 100% oxygen atmosphere can significantly reduce the amount of surface oxidation, which is another factor that can contribute to intergranular corrosion. Therefore, the use of a 100% oxygen atmosphere during the heat treatment of 304 stainless steel is a highly effective method for reducing the amount of intergranular corrosion.

HISTORY OF GREECE.

PART I.

CONTINUATION OF LEGENDARY GREECE.

CHAPTER XX.

STATE OF SOCIETY AND MANNERS AS EXHIBITED IN GREEKIAN LEGEND.

THOUGH the particular persons and events described in the legendary poems of Greece are not to be regarded as belonging to the province of real history, those poems are nevertheless full of instruction as pictures of life and manners; and the very same circumstances which divest their composers of all credibility as historians, render them so much the more valuable as unostentatious expositions of their own contemporary society. While professedly describing an uncertified past, their combinations are involuntarily borrowed from the surrounding present. For among communities, such as those of the primitive Greeks, without books, without means of extended travel, without acquaintance with foreign languages and habits, the imagination even of highly gifted men, was naturally coloured by the circumstances around them to a far greater degree than in the later days of Solon or Herodotus; inasmuch that the characters which they conceived and the scenes which they described would be that much, *being a stronger generic resemblance to the realities of their own time and locality.* Nor was the poetry of that age

ruled in their own city. But in the mind of every man, some determining rule or system—something like what in modern times is called a constitution—was indispensable to any government entitled to be called legitimate, as capable of existing in the mind of a Greek a feeling of moral obligation to obey it. The functionaries who exercised authority under it might be more or less competent or popular; but his personal feelings towards them were constantly lost in his attachment or aversion to the general system. If any energetic man could by audacity or craft break down the constitution and render himself permanent ruler according to his own will and pleasure—even though he might govern well, he could never inspire the people with any sentiment of duty towards him. His sceptre was illegitimate from the beginning, and even the taking of his life, far from being interdicted by that moral feeling which condemned the shedding of blood in other men, was considered meritorious. Nor could he be mentioned in the language except by a name¹ (*epinomei*, *depoet*) which branded him as an object of mingled fear and dislike.

If we carry our eyes back from historical to legendary Greece, we find a picture the reverse of what has been here sketched. We discuss a government in which there ^{was} ~~is~~ no *idea* in *idea* or no scheme or system,—still less any *idea* of responsibility to the governed,—but in which the main-spring of obedience on the part of the people consists in their personal feeling and reverence towards the chief. We remark, first and foremost, the King; next, a limited number of subordinate kings or chiefs; afterwards, the mass of armed freemen, husbandmen, artisans, freedmen, &c.; lowest of all, the free labourers for hire and the bought slaves. The King is not distinguished by any broad or responsible boundary from the other chiefs, to each of whom the title *Basileus* is applicable or

not being warranted in supposing that either of these epithets meant the same thing. The *epinomei* was the punishment of the man whose name was struck down from the roll of the citizens. This is analogous to the punishment of perjury and treason, while the *depoet* was the punishment of the man whose name was struck down from the roll of the citizens.

¹ The Greek name *epinomei* seems to have been properly rendered *epinomei*. For many of the names, by no means deserving to be so called, were in fact *epinomei* with

the use of language to speak of a chief and well-to-do man. The word *epinomei* is the nearest approach which we can make to it, and it is understood to imply that a man has not more power than he ought to have, while it does not exclude a headstrong use of such power by some individuals. It is however very important to observe the full strength of the feeling which the original word called forth.

whose dispositions, be they ever so virtuous, society has little other to hope or to fear.

Aristotle, in his general theory of government, lays down the position,¹ that the earliest sources of obedience and authority among mankind are personal, exhibiting themselves most perfectly in the type of paternal supremacy; and that therefore the kingly government, as most conformable to this stage of social sentiment, became probably the first established everywhere. And in fact it still continued in his time to be generally prevalent among the non-Hellenic nations immediately around; though the Phœnician cities and Carthage, the most civilized of all non-Hellenic states, were republics. Nevertheless, so completely were the feelings about kingly power covered among his contemporary Greeks, that he finds it difficult to enter into the voluntary obedience paid by his ancestors to their early heroic chiefs. He cannot explain to his own satisfaction how any one man should have been so much superior to the comparisons around him as to maintain such immense personal ascendancy; he suspects that in such small communities great merit was very rare, so that the chief had few competitors.² Such remarks illustrate strongly the revolution which the Greek mind had undergone during the preceding centuries, in regard to the internal grounds of political subordination. But the connecting link between the Homeric and the republican schemes of government is to be found in two adjuncts of the Homeric royalty, which are now to be mentioned—the *Boule*, or council of chiefs, and the *Agora*, or general assembly of freemen.

These two meetings, more or less frequently convoked, and interwoven with the earliest habits of the primitive Greek

¹ *Aristot. Polit.* l. i. c. 2.

² See his *Polit. Aristot.* *Marshall's* edition, for evidence to prove that Aristotle was not, as is often supposed, a Greek, living in an aristocratic climate, where Greek, or not, people cherished almost Greek ideas. *Polit.* ii. 2. 7. On the same subject c. i. 3. 4. and i. 2. 12. See *Prolegomena* of the *Prolegomena* to the *Polit.*

Aristotle handles minutely the two subjects that enter chiefly in the subject of the state, and shows the changes of his mind here, in which, in Aristotle's, the revolution was

interesting to us.

In the transition of Plato also, the theory of government is a little more well defined, a local assembly is necessary to hold the people together. *Polit.* ii. 2. 12.

The Athenian democracy, particularly Aristotle, often put into the mouth of their best authorities popular maxims alluded to in the Aristotelian democratic constitution—very different from what we find in Rome.

enforce silence: any one of the chiefs or councillors—but as it seems, no one else¹—is allowed to address them: the king first promulgates his intentions, which are then open to be commented upon by others. But in the Homeric age no division of affirmative or negative voices ever takes place, nor is any formal resolution ever adopted. The utility of positive functions

The Agon
the meeting
for the
negotiation
of the
intention
of the king.

strikes us even more in the Agon than in the Council. It is an assembly for talk, conversation and discussion to a certain extent by the chiefs, in presence of the people as listeners and sympathisers—often for eloquence, and sometimes for quarrel—but here its ultimate purposes end.

The Agon in Ithaka, in the second book of the *Odyssey*, is convened by the youthful Telemachus, at the instigation of Athalia, not for the purpose of submitting any proposition, but in order to give formal and public notice to the suitors to desist from their iniquitous intrusion and pillage of his substance, and to absolve himself further, before gods and men, from all obligations towards them, if they refuse to comply. For the daughter of the suitor in all the security of the palace hall and banquet (which forms the catastrophe of the *Odyssey*), was a proceeding involving much that was shocking to Greek feeling,² and therefore required to be preceded by such ample formalities, as would leave both the delinquents themselves without the shadow of excuse, and their surviving relatives without any claim to the customary satisfaction. For this special purpose Telemachus

Agon was
called by
Telemachus
in Ithaka.

directs the heralds to summon an agon; but what seems most of all surprising is, that none had ever been summoned or held since the departure of Odysseus himself, an interval of twenty years. "No agon or session has taken place amongst us (says the grey-headed Egyptian who opens the proceedings) since Odysseus went on shipboard; and

Both privileges of regular formalities observed in the agon are not without interest.

¹ *Ibid.* ii. 104.

Agon, however in Homeric poetry.

Which the *Odyssey* ii. 104 understands the violation of individual freedom

taken in the agon; the view of O. Müller (op. cit. *loc. cit.* ii. 104) is, it appears to me more correct; such was also the spirit of Aristotle's *Pol.* iii. 104, according to which the king was to be the judge and not the people. *Ibid.* ii. 104; compare the same statement in the *Platonic Republic*, ii. 1.

³ *Ibid.* ii. 104; *Odyssey* ii. 104.

now, who is he that has called us together? what man, young or old, has felt such a strong necessity? Has he received intelligence from our absent warriors, or has he other public news to communicate? He is our good friend for doing this: whatever his projects may be, I pray Zeus to grant him success."¹ Telemachus, answering the appeal forthwith, proceeds to tell the assembled Thebans that he has no public news to communicate, but that he has conspired them upon his own private necessities. Next he sets forth pathetically the wickedness of the suitors, calls upon them personally to desist and upon the people to restrain them, and concludes by solemnly warning them, that, being absolved from all obligation towards them, he will invoke the avenging aid of Zeus, so "² that they may be slain in the interior of his own house, without bringing upon him any subsequent penalty."

We are not of course to contrast the Homeric description of anything more than an *idiot*, approximating to actual reality. But allowing all that can be required for such a limitation, it exhibits the Agora more as a special medium of publicity and intercommunication,³ from the king to the body of the people, than as installing any idea of responsibility on the part of the former or restraining force on the part of the latter, however such consequences may indirectly grow out of it. The primitive Greek government is essentially unaccounted, depending on personal feeling and divine right: the reasonable distrust in the

rushes off to get his ship about, except Odysseus, who looks on in mournful silence and astonishment. The army would have been quickly on its voyage home, had not the goddesses Hêrê and Athênâ stimulated Odysseus to an instantaneous interference. He hastens among the dispersing crowd and diverts them from their purpose of retreat: to the chiefs he addresses stirring words, trying to shame them by gentle exhortation: but the people, he visits with harsh reprimand and blows from his sceptre,¹ thus driving them back to their seats in the agora.

Amidst the dissatisfied crowd thus unwillingly brought back, the voice of Thetis is heard the loudest and the loudest,—a man ugly, deformed, and unwarlike, but fluent in speech, and especially severe and unparing in his censure of the chiefs, Agamemnon, Achilles, and Odysseus. Upon this occasion, he addresses to the people a speech denouncing Agamemnon for selfish and greedy ambition generally, but particularly for his recent ill-treatment of Achilles—and he endeavours moreover to induce them to persist in their scheme of departure. In reply, Odysseus not only rebukes Thetis sharply for his impudence in abusing the commander-in-chief, but threatens that if ever such behaviour is repeated, he will strip him naked, and thrust him out of the assembly with disgraceful blows, as an earnest of which he administration to him at once a smart stroke with the studded sceptre, imprinting its painful mark in a bloody weal across his back. Thetis, terrified and subdued, sits down weeping, while the surrounding crowd decide him, and express the warmest approbation of Odysseus for having thus by force put the reviler to silence.²

Both Odysseus and Nestor then address the agora, sympathizing with Agamemnon for the shame which the retreat of the Greeks is about to inflict upon him, and urging emphatically upon every one present the obligation of persevering until the ships shall be successfully unmoored. Neither of them animadverts at all upon Agamemnon, either for his conduct

towards Achilles, or for his selfish freak of trying the temper of the army.¹

There cannot be a clearer indication than this description—so graphic in the original poem—of the true character of the Homeric agora. The multitude who compose it are listening and unimpressionable, not often hesitating, and never refractory,² to the chief. The fate which awaits a presumptuous orator, even when his virulent reproaches are substantially well-founded, is plainly set forth in the treatment of Thersites; while the unpopularity of such a character is attested even more by the excessive pains which Homer takes to heap upon him repulsive personal deformities, than by the chastisement of Odysseus—he is lame, bald, crook-backed, of misshapen head and squinting vision.

But we come to wonder at the submissive character of the Agora, when we read of the proceedings of Odysseus towards the people themselves,—his fine words and battery addressed to the chiefs, and his contemptuous reproof and moral violence towards the common mob, at a moment when both were doing exactly the same thing,—defiling the exposed bidding of Agamemnon, upon whom Odysseus does not offer a single comment. This scene, which excited a sentiment of strong displeasure among the democrats of historical Athens,³ affords a proof that the feeling of personal dignity, of which philosophic observers in Greece—Herodotus, Xenophon, Hippocrates, and Aristotle—boasted, as distinguishing the free Greek citizen from the slavish Asiatic, was yet undeveloped in the time of Homer.⁴ The ancient epic is commonly so filled with the personal adventures of the chiefs, and the people are so constantly depicted as simple appendages attached to them, that we rarely obtain a glimpse of the treatment of the one apart from the other, such as this memorable Homeric agora affords.

¹ *Iliad*, B. 164-166. For does Thersites, in his satirical speech against Agamemnon, touch in any way upon this momentous point, though in the demonstration under which his speech is made, it would seem to be of all others the most natural—and the strongest thrust against the commander-in-chief.

² See this illustrated in the language of Thucydides, *History*, 2. 64-65: "αὐτοὶ δὲ πολὺ καὶ οὐκ αἰσίου νόου ἄνθρωποι, καὶ ὁ ἄρχων ἀπαιτῶν ἀπὸ τῶν ἀρχόντων, οὐδὲν ἔστιν ὃ οὐκ αὐτοὶ ἀποδέχονται." ³ Xenophon, *Memoria*, 1. 2. 4. ⁴ *Republic*, *Politi.* c. 2. 1; *Economy*, *Ec.* 1. 1. 1; *cf.* 2. 2. 1-2; *cf.* 2. 2. 1-2; *cf.* 2. 2. 1-2.

a legitimate sovereign, who does not derive his title from the special appointment of his subjects, though he governs with their full consent. In fact, Greek legend presents to us hardly anything else, except these great individual personifications. The race, or nation, is as it were absorbed into the prince: anonymous persons, especially, are not merely princes, but fathers and representative nation, such the equivalent of that greater or less appellation to which he gives name.

But though in the primitive Greek government the king is the legitimate as well as the real sovereign, he is always controlled as acting through the council and agora. Both the one and the other are established and essential media through which his ascendancy is brought to bear upon the society: the absence of such assemblies is the test and mark of savage men, as is the case of the Cyclopes.¹ Accordingly he must possess qualities fit to act with effect upon these two assemblies: wise reason for the council, untrammelled eloquence for the agora.² Such is the ideal of the heroic government: a king not merely full of valour and resource as a soldier, but also sufficiently superior to those around him to ensure both the deliberate concurrence of the chiefs and the hearty adhesion of the masses.³ That this picture is not, in all individual cases, realised, is unquestionable; but the requirements so often predicated of good kings show it to have been the type present to the mind of the describer.⁴ Xenophon, in his

Cyrusæda, depicts Cyrus as an improved edition of the Hæmeric Agamemnon,—“a good king and a powerful soldier,” thus vindicating the perfection of personal government.

It is important to point out these fundamental conceptions of government, discernible even before the dawn of Greek history, and identified with the social life of the people. It shows us that the Greeks, in their subsequent revolutions, and in the political experiments which their countless autonomous communities presented, worked upon pre-existing materials—developing and creating elements which had been at first subordinate, and supplanting or remodelling on a totally new principle that which had been originally predominant. When we approach historical Greece, we find that (with the exception of Sparta) the primitive, hereditary, unresponsive monarch, casting in himself all the functions of government, has ceased to reign,—while the feeling of legitimacy, which originally induced his people to obey him willingly, has been exchanged for one of aversion towards the character and title generally. The constitutive functions which he once exercised have been parcelled out among temporary

nomads. On the other hand, the Council or Senate, and the Agora, originally simple media through which the king acted, are elevated into standing and independent sources of authority, controlling and holding in responsibility the various special offices to whom executive duties of one kind or another are confided. The general principle here indicated is common both to the oligarchies and the democracies which grew up in historical Greece. Much as these two governments differed from each other, and many as were the varieties even between one oligarchy or democracy and another, they all stood in equal contrast with the hereditary monarch. Even in Sparta, where the hereditary kingship lasted, it was preserved, with lustre and influence, unimpaired,¹ and each timely distinction of its power seems to have

¹ Herodotus the question put by Lysandrus to the oligarch Spartans (the Council—Senate—Agora) and to democratic Athenians, it was that the political bond which these words

imposed, affected no democracy other evidence of the latter under the monarch in Sparta, respecting the royal dignity, of which Aristotle in the Politics speaks hardly to this extent as usual.

been one of the essential conditions of its preservation.¹ Though the Spartan kings had the hereditary command of the military forces, yet even in all foreign expeditions they habitually acted in obedience to orders from home; while in affairs of the interior the superior power of the Ephors sensibly overshadowed them. So that unless possessed of more than ordinary force of character, they seem to have exercised their chief influence as presiding members of the senate.

There is yet another point of view in which it behoves us to take notice of the Council and the Agora as integral portions of the legendary government of the Grecian community. We are then enabled to trace the employment of public speaking, as the standing engine of government, and the proximate cause of obedience, to the social infancy of the nation. The power of speech in the direction of public affairs becomes more and more obvious, developed and irresistible, as we advance towards the culminating period of Grecian history, the century preceding the battle of Marathon.² That its development was greatest among the most enlightened sections of the Grecian name, and earliest among the more obtuse and stationary, is matter of notorious fact; and it is not less true, that the prevalence of this habit was one of the chief causes of the intellectual exultance of the nation generally. At a time when all the countries around were plunged comparatively in mental torpor, there was no motive sufficiently present and powerful to multiply so wonderfully the productive minds of Greece, except such as arose from the rewards of public speaking. The susceptibility of the multitude to this sort of guidance, their habit of requiring and enjoying the stimulus which it supplied, and the open discussion, embracing regular forms with free opposition, of practical matters political as well as judicial—are the creative causes which formed such conspicuous adepts in the art of persuasion. Nor was it only professed orators who were thus profaned; didactic aptitude was formed in the

Employment of public speaking as an engine of government—connected with the system of laws.

¹ Cf. *Antiquities of the Jews*, book ix. § 1, where it is stated that the fundamental feature of the Jewish republic was its hereditary kingship, and that the kings were appointed by the people, and that the people were the only ones who could depose them.

² Cf. *Antiquities of the Jews*, book ix. § 1, where it is stated that the fundamental feature of the Jewish republic was its hereditary kingship, and that the kings were appointed by the people, and that the people were the only ones who could depose them.

lines are frequent with the chiefs, and occasionally the jealousy of the wife breaks out in reckless excess against her husband, as may be seen in the tragical history of Phoenix. The confidence of Laërtes, from fear of displeasing his wife Antikleia, is especially noticed.¹ A large portion of the romantic interest which Cyprian legend inspires is derived from the women: Penelope, Andromachë, Helen, Elytemnestra, Kriophylä, Iphigenia, Hekuba, Hekabë, &c., all stand in the foreground of the picture, either from their virtues, their beauty, their crimes, or their sufferings.

Not only brothers, but also uncles, and the more distant blood-relations and clansmen, appear connected together by a strong feeling of attachment, sharing among them universally the obligation of mutual self-defence and revenge in the event of injury to any individual of the race. The legitimate brothers divide between them by lot the paternal inheritance,—a bastard brother receiving only a small share; he is however commonly very well treated,² though the murder of Phokion by Telamon and Peleus constitutes a flagrant exception. The favorite *kyklos* pregnancy of young women, often by a god, is one of ^{the} ~~the~~ the most frequently recurring incidents in the legendary narratives; and the severity with which such a fact, when discovered, is visited by the father, is generally extreme. As an extension of the family connection, we read of larger unions called the phratry and the tribe, which are respectively, but not frequently mentioned.³

ancient Greek and Latin authors, chiefly of a leading family of women, *See* *Antikleia*, 4, 100. In the same sense in which the term occurs in these dramas, it is also to be met with in the *Alkestis* law. It was also common in *Antikleia* and in *Phokion*, where the latter was *Antikleia*, a word thought or *Antikleia* women.

According to the 7th Law of King *Antikleia* of the 1st kind was often said to exist: *See* *Antikleia* *Antikleia* *Antikleia* (Ibid., 100).

¹ *Odys.* 1, 40; *Ibid.* 10, 40; *see* also *Phokion*, *Antikleia* *Antikleia*, 100, 17 and 18.

² *Phokion* appears to be specified by *Phokion*, but it is not clear (Ibid., 100).

³ *Odys.* 10, 100—105; compare

Ibid. 11, 100. The primitive German law of succession divided the paternal inheritance among the sons of a deceased father, under the implied obligation to maintain and protect each other (Hobbes, *Antikleia* 100).

⁴ *Ibid.* 1, 100.

Antikleia, *Antikleia*, *Antikleia* *Antikleia*, *Antikleia* *Antikleia*, 100. (I, 10, 100).

These three episodes include the three different classes of personal sympathy and obligation: 1. The *Antikleia*, in which it also is connected with father, mother, brother, sister, brother-in-law, daughter, &c.; 2. The *Phokion*, whereby it is connected with the father-in-law, brother-in-law, &c.; 3. The *Antikleia*, whereby it is connected with the father-in-law, brother-in-law, &c.

The generous readiness with which hospitality is afforded to the stranger who asks for it; the facility with which he is allowed to contract the peculiar connexion of guest with his

host, and the permanence with which that connexion, when created by partaking of the same food and exchanging presents, is maintained even through a long period of separation, and even transmitted from father to son—these are among the most captivating features of the heroic society. The Homeric chief welcomes the stranger who comes to ask shelter in his house, first gives him refreshment, and then inquires his name and the purpose of his voyage.¹ Though not inclined to invite strangers to his house, he cannot repel them when they spontaneously enter it craving a lodging.² The suppliant is also

Exception
of the
stranger
and the
suppliant

commonly a stranger, but a stranger under peculiar circumstances; who provides his own maintenance and object of petition, and seeks to place himself in a relation to the chief whom he solicits something like that in which men stand to the gods. Overcome as such special ties may become to him, the chief cannot decline it, if solicited in the proper form: the ceremony of supplication has a binding effect, and the Hellenes punish the heartless person who declines it. A conquered enemy may sometimes throw himself at the feet of his conqueror, and solicit mercy, but he cannot by doing so acquire the character and claims of a suppliant properly so called: the conqueror has free discretion either to kill him, or to spare him and accept a ransom.³

There are in the legendary narratives abundant examples of individuals who transgress in particular acts even the bounds of

hospitality incumbent on the prince and the hero:—

The number of people 570 years of age or older has increased by 19,807,040,628,566,084,398,387,987,584,000 percent. The number of people 575 years of age or older has increased

indifference. Achilles sacrifices twelve Trojan prisoners on the tomb of Patroklos, while his son Neoptolemos not only slaughters the aged Pelias, but also seizes by the leg the child Antymos (son of the slain Hektor) and kills him from one of the lofty towers of Troy.¹ Moreover, the celebrity of Antoklyon, the maternal grandfather of Odysseus, in the career of wholesale robbery and perjury, and the wealth which it enabled him to acquire, are described with the same unaffected admiration as the wisdom of Nestor or the strength of Ajax.² Achilles, Menelaos, Odysseus, pillage in person whenever they can find an opportunity, employing both force and stratagem to surmount resistance.³ The vacation of a pirate is recognized as honorable, so that a host, when he asks his guest what is the purpose of his voyage, enumerates enrichment by indiscriminate maritime plunder as among those projects which may naturally enter into his contemplation.⁴ Abduction of cattle, and expeditions for unprovoked

¹ *Iliad* II. 24, p. 33, ed. Dindorf; *Ibid.* 24. 174. Odysseus is mentioned also as despoiling Pelios for his arrows (*Odys.* I. 202), but no pilaged cities are ever employed in either of the two poems.

² The tradition reported by the Northern Poets in Camden's work is entitled *Ant. d. n. 36*, p. 115, app. ed. Hume; it tells a vivid picture of the combination of intense and jealous friendship between individuals, with the most revolting cruelty of mankind. "You Greeks live in peace and tranquillity," observes the Northern-*way* (the Murmur of silence), and I denigrate more distant, I denigrate further, I represent my host I take pleasure. *Iliad* 24. 174. 175. 176. 177. 178. 179. 180. 181. 182. 183. 184. 185. 186. 187. 188. 189. 190. 191. 192. 193. 194. 195. 196. 197. 198. 199. 200. 201. 202. 203. 204. 205. 206. 207. 208. 209. 210. 211. 212. 213. 214. 215. 216. 217. 218. 219. 220. 221. 222. 223. 224. 225. 226. 227. 228. 229. 230. 231. 232. 233. 234. 235. 236. 237. 238. 239. 240. 241. 242. 243. 244. 245. 246. 247. 248. 249. 250. 251. 252. 253. 254. 255. 256. 257. 258. 259. 260. 261. 262. 263. 264. 265. 266. 267. 268. 269. 270. 271. 272. 273. 274. 275. 276. 277. 278. 279. 280. 281. 282. 283. 284. 285. 286. 287. 288. 289. 290. 291. 292. 293. 294. 295. 296. 297. 298. 299. 300. 301. 302. 303. 304. 305. 306. 307. 308. 309. 310. 311. 312. 313. 314. 315. 316. 317. 318. 319. 320. 321. 322. 323. 324. 325. 326. 327. 328. 329. 330. 331. 332. 333. 334. 335. 336. 337. 338. 339. 340. 341. 342. 343. 344. 345. 346. 347. 348. 349. 350. 351. 352. 353. 354. 355. 356. 357. 358. 359. 360. 361. 362. 363. 364. 365. 366. 367. 368. 369. 370. 371. 372. 373. 374. 375. 376. 377. 378. 379. 380. 381. 382. 383. 384. 385. 386. 387. 388. 389. 390. 391. 392. 393. 394. 395. 396. 397. 398. 399. 400. 401. 402. 403. 404. 405. 406. 407. 408. 409. 410. 411. 412. 413. 414. 415. 416. 417. 418. 419. 420. 421. 422. 423. 424. 425. 426. 427. 428. 429. 430. 431. 432. 433. 434. 435. 436. 437. 438. 439. 440. 441. 442. 443. 444. 445. 446. 447. 448. 449. 450. 451. 452. 453. 454. 455. 456. 457. 458. 459. 460. 461. 462. 463. 464. 465. 466. 467. 468. 469. 470. 471. 472. 473. 474. 475. 476. 477. 478. 479. 480. 481. 482. 483. 484. 485. 486. 487. 488. 489. 490. 491. 492. 493. 494. 495. 496. 497. 498. 499. 500. 501. 502. 503. 504. 505. 506. 507. 508. 509. 510. 511. 512. 513. 514. 515. 516. 517. 518. 519. 520. 521. 522. 523. 524. 525. 526. 527. 528. 529. 530. 531. 532. 533. 534. 535. 536. 537. 538. 539. 540. 541. 542. 543. 544. 545. 546. 547. 548. 549. 550. 551. 552. 553. 554. 555. 556. 557. 558. 559. 560. 561. 562. 563. 564. 565. 566. 567. 568. 569. 570. 571. 572. 573. 574. 575. 576. 577. 578. 579. 580. 581. 582. 583. 584. 585. 586. 587. 588. 589. 590. 591. 592. 593. 594. 595. 596. 597. 598. 599. 600. 601. 602. 603. 604. 605. 606. 607. 608. 609. 610. 611. 612. 613. 614. 615. 616. 617. 618. 619. 620. 621. 622. 623. 624. 625. 626. 627. 628. 629. 630. 631. 632. 633. 634. 635. 636. 637. 638. 639. 640. 641. 642. 643. 644. 645. 646. 647. 648. 649. 650. 651. 652. 653. 654. 655. 656. 657. 658. 659. 660. 661. 662. 663. 664. 665. 666. 667. 668. 669. 670. 671. 672. 673. 674. 675. 676. 677. 678. 679. 680. 681. 682. 683. 684. 685. 686. 687. 688. 689. 690. 691. 692. 693. 694. 695. 696. 697. 698. 699. 700. 701. 702. 703. 704. 705. 706. 707. 708. 709. 710. 711. 712. 713. 714. 715. 716. 717. 718. 719. 720. 721. 722. 723. 724. 725. 726. 727. 728. 729. 730. 731. 732. 733. 734. 735. 736. 737. 738. 739. 740. 741. 742. 743. 744. 745. 746. 747. 748. 749. 750. 751. 752. 753. 754. 755. 756. 757. 758. 759. 760. 761. 762. 763. 764. 765. 766. 767. 768. 769. 770. 771. 772. 773. 774. 775. 776. 777. 778. 779. 780. 781. 782. 783. 784. 785. 786. 787. 788. 789. 790. 791. 792. 793. 794. 795. 796. 797. 798. 799. 800. 801. 802. 803. 804. 805. 806. 807. 808. 809. 810. 811. 812. 813. 814. 815. 816. 817. 818. 819. 820. 821. 822. 823. 824. 825. 826. 827. 828. 829. 830. 831. 832. 833. 834. 835. 836. 837. 838. 839. 840. 841. 842. 843. 844. 845. 846. 847. 848. 849. 850. 851. 852. 853. 854. 855. 856. 857. 858. 859. 860. 861. 862. 863. 864. 865. 866. 867. 868. 869. 870. 871. 872. 873. 874. 875. 876. 877. 878. 879. 880. 881. 882. 883. 884. 885. 886. 887. 888. 889. 890. 891. 892. 893. 894. 895. 896. 897. 898. 899. 900. 901. 902. 903. 904. 905. 906. 907. 908. 909. 910. 911. 912. 913. 914. 915. 916. 917. 918. 919. 920. 921. 922. 923. 924. 925. 926. 927. 928. 929. 930. 931. 932. 933. 934. 935. 936. 937. 938. 939. 940. 941. 942. 943. 944. 945. 946. 947. 948. 949. 950. 951. 952. 953. 954. 955. 956. 957. 958. 959. 960. 961. 962. 963. 964. 965. 966. 967. 968. 969. 970. 971. 972. 973. 974. 975. 976. 977. 978. 979. 980. 981. 982. 983. 984. 985. 986. 987. 988. 989. 990. 991. 992. 993. 994. 995. 996. 997. 998. 999. 1000.

⁵ *Iliad* vi. 304. 305. 306. 307. 308. 309. 310. 311. 312. 313. 314. 315. 316. 317. 318. 319. 320. 321. 322. 323. 324. 325. 326. 327. 328. 329. 330. 331. 332. 333. 334. 335. 336. 337. 338. 339. 340. 341. 342. 343. 344. 345. 346. 347. 348. 349. 350. 351. 352. 353. 354. 355. 356. 357. 358. 359. 360. 361. 362. 363. 364. 365. 366. 367. 368. 369. 370. 371. 372. 373. 374. 375. 376. 377. 378. 379. 380. 381. 382. 383. 384. 385. 386. 387. 388. 389. 390. 391. 392. 393. 394. 395. 396. 397. 398. 399. 400. 401. 402. 403. 404. 405. 406. 407. 408. 409. 410. 411. 412. 413. 414. 415. 416. 417. 418. 419. 420. 421. 422. 423. 424. 425. 426. 427. 428. 429. 430. 431. 432. 433. 434. 435. 436. 437. 438. 439. 440. 441. 442. 443. 444. 445. 446. 447. 448. 449. 450. 451. 452. 453. 454. 455. 456. 457. 458. 459. 460. 461. 462. 46

average as well as for retaliation, between neighbouring tribes, appear ordinary phenomena :¹ and the established inviolability of heralds seems the only evidence of any settled feeling of obligation between one community and another. While the home and property of Odysseus, during his long absence, enjoys no public protection,² these unprincipled chiefs, who consume his substance, find sympathy rather than disapprobation among the people of Ithaca. As a general rule, he who cannot protect himself finds no protection from society : his own kindness and immediate companions are the only parties to whom he can look with confidence for support. And in this respect, the representation given by Homer makes the picture even worse. In his emphatic denunciation of the fifth age, that poet deplores not only the absence of all social justice and sense of obligation among his contemporaries, but also the relaxation of the ties of family and hospitality.³

Picture given by Homer still darker.

There are marks of questionable exaggeration in the poem of the Works and Days ; yet the author professes to describe the real state of things around him, and the features of his picture, when seen as we may, will still appear dark and gloomy. It is however to be remarked, that he contemplates a state of peace—thus forming a contrast with the Homeric poems. His copious catalogue of social evils scarcely mentions liability to plunder by a foreign enemy, nor does he compute the chances of predatory aggression as a source of profit.

There are two special veins of estimable sentiment, in which it may be interesting to contrast heroic and historical Greece, and which exhibit the latter as an improvement on the former not less in the affections than in the intellect.

Contrast between heroic and historical Greece.

The law of Athens was peculiarly watchful and provident with respect both to the persons and the property of orphan minors ; but

¹ See the interesting friendship of Nestor, Iliad, vi. 238—242 ; also Odysseus, viii. 237 ; Odysseus, xii. 35 ; Theophr. l. c.

² Odysseus, vi. 238, among many other passages. Theophrastus remarks the inviolability of the race, in respect to the Minors, Odysseus, and Laertes, with all only sons of their fathers : there were no brothers to serve as protectors.

see Iliad, xvi. 238.

³ Theophr. l. c. 238—242.

Odysseus, xii. 35 ; Theophr. l. c. 238—242.

Odysseus, xii. 35 ; Theophr. l. c. 238—242.

German gallas begin by trying to bring about the acceptance of a fixed pecuniary composition as a constant voluntary custom, and proceed ultimately to enforce it as a peremptory necessity: the idea of society is at first altogether subordinate, and its influence passes only by slow degrees from amiable arbitration into imperative control.

The Homeric society, in regard to this capital point in human progression, is on a level with that of the German tribes as described by Tacitus. But the subsequent course of Grecian legislation takes a direction completely different from that of the German codes. The primitive and acknowledged right of private revenge (unless where bought off by pecuniary payment), instead of being developed into practical working, is superseded by more-comprehensive views of a public wrong requiring public intervention, or by religious fears respecting the posthumous wrath of the murdered person. In historical Athens, the right of private revenge was discontinued and put out of sight, even as early as the Draconian legislation, and at last restricted to a few extreme and special cases;¹ while the murderer came to be considered, first as having sinned against the gods, next as having deeply injured the society, and thus at once as requiring absolution and deserving punishment. recompensed to an incident criminal
cases. 1708. 1413.

An old law of Troas in Lydia, according to the tradition of a tradition of laws to the relatives of a murdered person belonging to a composition class of citizens, is related by Plutarch, *Quæst. Græc. c. 24*, p. 104. Down to the century preceding Aristotle, too, the Lydians gave a name to satisfaction for the murder of the *phratrias* (clans) which must not be delayed and satisfied by the presence of *phratrias* (clans) (Aristotle, *Met. Ethic. 1000*, p. 100).

¹ See Lydus, *De Crim. Byzantinis*, *Quæst. 1*, p. 101; Plutarch, *Quæst. c. 24*; *Demosthenes*, *Quæst. Aristoteles*, p. 141.

Plato (*De Legib. lib. 9*, p. 875-876), in his republic gives regulations to deal with homicide, both intentional and accidental, covered in general with the old Achaean law (see Aristotle, *Metaphys. PhiloSophia*, vol. 2, p. 174; and

as he states with sufficient distinctness the grounds of the proposition, we see how completely the idea of a right to private or family revenge is absent from the mind. In our previous case, he restricts upon homicide the privilege of avenging that awarded relatives (p. 871); but presently, he rather speaks of private vengeance than strictly the duty of bringing the suspected murderer to trial before the court. By the Achaean law, it was only the kinship of the deceased who had the right of proceeding for murder—or the mother, if the deceased was an slave (Plutarch, *Quæst. Græc. c. 24*, p. 101; Aristotle, *Met. Ethic. 1000*, p. 101); that might be interpreted as the basis of satisfaction for the unintentional murderer (Aristotle, *Met. Ethic. 1000*, p. 101). They seem to have been regulated, generally speaking, as religiously obliged, but not legally compulsion, to undertake this duty; compare Plato, *Philosophy*, *op. c. 2* and 3.

we are obliged to point out the serveness and insecurity of an early society, we say at the same time note with pleasure its characteristic simplicity of manners: Kolomoa, Rashed, and the daughters of Jethur in the early *Memoirs* narrative, as well as the wife of the native Mandan chief (with whom the Tennant Perdiere, ancestor of Philip and Alexander, first took service on retiring from *Angou*) holding her own sides on the hearth,¹ exhibit a parallel in this respect to the Homeric pictures.

We obtain no particulars respecting either the manner between generally, or the particular class of those called *Tithes*.

These latter, engaged for special jobs, or at the harvest and other busy seasons of field labor, seem to have given their labour in exchange for board and clothing: they are mentioned in the same line with the slaves,² and were (as has been just observed) probably on the whole little better off. The condition of a poor freeman in those days, without a lot of land of his own, going about from one temporary job to another, and having no powerful family and no social authority to look up to for protection, must have been sufficiently miserable. When Komeu indulged his expectation of being manumitted by his masters, he thought at the same time that they would give him a wife, a house, and a lot of land, near to themselves;³ without which collateral advantages, simple manumission might perhaps have been no improvement in his condition. To be *Tithe* in the service of a very poor farmer is selected by Achilles as the maximum of human hardship: such a person could not give to his *Tithe* the same simple food, and good shoes and clothing, as the wealthy chief Euryarchus, while he would exact more severe labour.⁴ It was probably among such smaller occupants, who could not advance the price necessary to purchase slaves, and were glad to save the cost of keep when they did not need advice, that the *Tithes* found employment: though we may conclude that the brave and strong amongst these poor freemen found it preferable to accompany some fresh-cutting chief, and to

¹ *Memoirs*, vol. 127.

² *Idem*, p. 94.

³ *Idem*, lib. 41.

⁴ Compare *Idem*, at 224, with vol. 128. Achilles, in the *Agamemnon*

of *Eschylus*, presents a somewhat similar picture to Komeu's—first thanking the supplicants for their war trophies that slaves, these masters who had been in unwarlike property (*Agamemnon*, 124).

live by the plunder acquired.¹ The exact Hætel admits his farmer, whose work is chiefly performed by slaves, to employ and maintain the Thibæ during summer-time, but to discharge him as soon as the harvest is completely got in, and then to take into his house for the winter, a woman "without any child"; who would of course be more useful than the Thibæ for the indoor occupations of that season.²

In a state of society such as that which we have been describing, limited commerce and restriction of the Greek Minors Greek commerce was necessarily trifling and restricted. The Homæic poems mark either total ignorance or great vagueness of apprehension respecting all that lies beyond the coasts of Greece and Asia Minor and the islands between or adjoining these.

Libyæ and Egypt are supposed as distant as to be known only by name and hearing: indeed when the city of Kyriak was founded, a century and a half after the first Olympiad, it was difficult to find anywhere a Greek navigator who had ever visited the coast of Libyæ, or was fit to serve as guide to the colonists.³ The mention of the Sifode in the *Odyssey*⁴ leads us to conclude that Karkyra, Italy and Sicily were not wholly unknown to the poet. Among sailing Greeks, the knowledge of the latter implied the

¹ *Thucyd.* I. 2. *ἄφρονες αὐτῶν ἀφρονῶν, ἀνέχοντες ὅλην αὐτῶν ἀδωκίαν, ἀνέχοντες αὐτῶν ἀδωκίαν, ἀνέχοντες αὐτῶν ἀδωκίαν.*

² *Thucyd.* I. 2. *ἄφρονες αὐτῶν ἀφρονῶν, ἀνέχοντες ὅλην αὐτῶν ἀδωκίαν, ἀνέχοντες αὐτῶν ἀδωκίαν.*

³ *Thucyd.* I. 2. *ἄφρονες αὐτῶν ἀφρονῶν, ἀνέχοντες ὅλην αὐτῶν ἀδωκίαν, ἀνέχοντες αὐτῶν ἀδωκίαν.*

The two words *ἄφρονες* and *ἀνέχοντες* are used together in the sense of "to be ignorant of the Thibæ," or "to be ignorant of the Thibæ," for when put out of its ordinary sense, it had to be understood. *Thucyd.* I. 2. *ἄφρονες αὐτῶν ἀφρονῶν, ἀνέχοντες ὅλην αὐτῶν ἀδωκίαν, ἀνέχοντες αὐτῶν ἀδωκίαν.*

can never have been the real meaning of the poet, would there not be the two Homæic poems. *Thucyd.* I. 2. *ἄφρονες αὐτῶν ἀφρονῶν, ἀνέχοντες ὅλην αὐτῶν ἀδωκίαν, ἀνέχοντες αὐτῶν ἀδωκίαν.*

There were a class of poor free women who made their living by selling to wool to spin and prepare to weave, the workmen of their families as well as the poor youth which they made, are called by a special Homæic name. *Thucyd.* I. 2. *ἄφρονες αὐτῶν ἀφρονῶν, ἀνέχοντες ὅλην αὐτῶν ἀδωκίαν, ἀνέχοντες αὐτῶν ἀδωκίαν.*

⁴ *Thucyd.* I. 2. *ἄφρονες αὐτῶν ἀφρονῶν, ἀνέχοντες ὅλην αὐτῶν ἀδωκίαν, ἀνέχοντες αὐτῶν ἀδωκίαν.*

⁵ *Thucyd.* I. 2. *ἄφρονες αὐτῶν ἀφρονῶν, ἀνέχοντες ὅλην αὐτῶν ἀδωκίαν, ἀνέχοντες αὐτῶν ἀδωκίαν.*

knowledge of the two former—since the habitual trade, even of a well-equipped Africanus trifurcus during the Peloponnesian war, from Peloponnesus to Sicily, was by Euxyria and the Gulf of Tarentum. The Phœnicians, long afterwards, were the first Greeks who explored either the Adriatic or Tyrrhenian sea.¹ Of the Euxine sea no knowledge is manifested in Homer, who, as a general rule, presents to us the names of distant regions only in connection with romantic or monstrous accompaniments. The Euxine, and still more the Taphians (who are supposed to have occupied the western islands off the coast of Abdera), are mentioned as skillful mariners, and the Taphian Menelaï profess to be carrying iron to Tarsus to be there exchanged for copper;² but both Taphians and Euxians are more certain than traders.³ The strong sense of the dangers of the sea, expressed by the poet Hesiod, and the imperfect structure of the early Grecian ship, attested by Theophrastus (who points out the more recent date of that improved shipbuilding which prevailed in his time), concur to demonstrate the then narrow range of nautical enterprise.⁴

Such was the state of the Greeks as traders, at a time when Babylon combined a crowded and industrious population with extensive commerce, and when the Phœnician merchant-ships visited in one direction the southern coast of Arabia, perhaps even the island of Ceylon—in another direction, the British Isles.

The Phœnician, the Khemian of the ancient Jew, exhibits the type of character belonging to the latter—with greater enterprise and ingenuity, and less of religious exclusiveness, yet still different from, and even antipathetic to the character of the Greeks. In the Hæcætic poems, he appears somewhat like the Jew of the middle ages, a crafty trader turning to profit the violence and rapacity of others—bringing them ornaments, decorations, the finest and brightest products of the loom, gold, silver, diamonds, ivory, tin, &c., in exchange for which he received hides, pelts, skins, wool and slaves, the only com-

The mode of fighting among the Romans differs in not less different from the historical times, than the material of which their arms were composed. In historical Greece, the Hoplite, or heavy-armed infantry, maintained a close order and well-dressed line, charging the enemy with their spears protruded at even distances, and meeting thus to close combat without breaking their rank: there were special troops, bowmen, slingers, &c., armed with missiles, but the hoplite had no weapon to employ in this manner. The heroes of the *Iliad* and *Odyssey*, on the contrary, habitually employ the spear as a missile, which they launch with tremendous force: each of them is mounted in his war-chariot drawn by two horses and calculated to contain the warrior and his charioteer; in which latter capacity a friend or comrade will sometimes consent to serve. Advancing in his chariot at full speed, in front of his own soldiers, he hurls his spear against the enemy: sometimes indeed he will fight on foot and hand to hand, but the chariot is usually near to receive him if he chooses, or to ensure his retreat. The mass of the Greeks and Trojans coming forward to the charge, without any regular step or evenly-maintained line, make their attack in the same way by hurling their spears. Each chief wears habitually a long sword and a short dagger, besides his two spears to be launched forward—the spear being also used, if occasion serves, as a weapon for thrust. Every man is protected by shield, helmet, breastplate and greaves: but the armour of

reaches ages 1-4. Implements and arms of stone, bone, wood, &c., little or no use of metals in all clothing made of skin. 1. Implements and arms of copper and gold, or silver (bronze and gold, with a small reserve). Articles of gold and electrum are found belonging to this age, but none of silver, nor any remains of weapons. 2. The age which follows this has belonging to it arms of iron, articles of silver, and some flint implements. It is the last age of northern barbarism, immediately preceding the introduction of civilisation. *Illustrations*, see *Medieval Archaeology*, vol. 1, p. 11, 12, Chap. I. (1891).

The Homeric age coincides with the second of these two periods. Silver is comparatively little mentioned in Homer, while both bronze and gold

are familiar metals. Iron also is rare, and seems employed only for agricultural purposes. *Illustrations*, see *Illustrations*, vol. 1, p. 11, 12, Chap. I. (1891). The *Odyssey* and the *Iliad* are both mentioned in Homer, but weapons of silver and iron are not known by any special name. *Illustrations*, vol. 1, p. 11, 12.

The helmet, shield, spear, and sword, are the tools mentioned by Homer, who appears to have been unacquainted with the war, bowmen, and the pike. *Illustrations*, vol. 1, p. 11, 12.

The *Iliad*—Homer's *Odyssey*, mentions the Chariots, but only possessed all their property in metals and gold—*Illustrations*, vol. 1, p. 11, 12.

the shield is greatly superior to that of the common man, while they themselves are both stronger and more expert in the use of their weapons. There are a few exceptions, as rare exceptions, but the general equipment and proceeding is as here described.

Such loose array, immortalised as it is in the *Iliad*, is familiar to every ear; and the contrast which it presents, with these inflexible ranks and that irresistible simultaneous charge which bore down the Persian throng at Plataeæ and Marathon,¹ is such as to illustrate forcibly the general difference between heroic and historical Greece.

Contrast
with the
orderly
array of
historical
Greece.

While in the former, a few splendid figures stand forward in prominent relief, the remainder being a mere unorganised and ineffective mass—in the latter, these units have been consolidated into a system, in which every man, officer and soldier, has his assigned place and duty, and the victory, when gained, is the joint work of all. Pre-eminent individual prowess is indeed materially abridged, if not wholly excluded—no man can do more than maintain his station in the line.² But on the other hand, the grand purposes, aggressive or defensive, for which alone arms are taken up, become more assured and easy; while long-sighted combinations of the general are rendered for the first time practicable, when he has a disciplined body of men to obey him.

In tracing the picture of civil society, we have to remark a similar transition—we pass from Hæcylus, Thales, Jætes, Achilles, to Solon, Pythagoras and Pericles—from "the shepherd of his people" (so can the phrase in which Homer depicts the good side of the Herakle king), to the legislator who introduces, and the statesman who maintains, a preconcerted system by which willing citizens consent to bind themselves. If commanding individual talent is yet always to be found, the whole community is as

Analogous

military
array and
in civil
society.

¹ Virgatus, in his military system, does not seem to suppose the Hæcylus mode of fighting the spear as well as the pike—also *ἡ ἀσπίς ἀνὰ πρὸς ἑαυτὸν* (Virg. ii. 540, 541). While he had the idea of commencing with the Hæcylus array, of close file, close order and close attack, as the Hæcylus had, we get here introduced during the second Marathon war.

Thucyd. and Diodorus describe the Hæcylus soldiers in place of Solon.

above. Herakleus (Hæcylus, 550) has a double equipment, yet it does not apply well to fighting; the one of the virtues of the Hæcylus consisted in carrying his spear directly, before, or by the side of a secondary shield, and the want of steady courage and self-possession. See the remarks of Herakleus upon the mode of the Athenians under Miltiades at Marathon (Thucyd. i. 6).

² Euripid. *Suppliants* 681.

trained as to be able to maintain its course under inferior leaders; the rights as well as the duties of each citizen being predetermined in the social order, according to principles more or less wisely laid down. The contrast is similar, and the transition equally remarkable, in the civil as in the military picture. In fact, the military organization of the Greek republics is an element of the greatest importance in respect to the conspicuous part which they have played in human affairs—their superiority over other contemporary nations in this respect being hardly less striking than it is in many others, as we shall have occasion to see in a subsequent stage of this history.

Even at the most advanced point of their tactics, the Greeks could effect little against a walled city. Still less effective were the heroic weapons and army for such an undertaking as a siege. Fortifications are a feature of the age deserving considerable notice. There was a time, we are told, in which the primitive Greek towns or villages derived a precarious security, not from their walls, but merely from sites lofty and difficult of access. They were not built immediately upon the shore, or close upon any convenient landing-place, but at some distance inland, on a rock or elevation which could not be approached without notice or scaled without difficulty. It was thought sufficient at that time to guard against piratical or marauding surprises: but as the state of society became secured—as the chance of sudden assault comparatively diminished and industry increased—these uninviting shades were exchanged for more convenient sites on the plain or declivity beneath; or a portion of the latter was enclosed within larger boundaries and joined on to the original foundation, which thus became the Acropolis of the new town. *Thbes*, *Athens*, *Argos*, &c., belonged to the latter class of cities; but there were in many parts of Greece deserted sites on hill-tops, still retaining even in historical times the traces of former habitations, and some of them still bearing the name of the old towns. Among the mountainous parts of *Boeotia*, in *Argos* and *Rhodes*, in portions of *Mount Ida* and *Paros*, similar remnants might be perceived.¹

¹ It existed also in *Argos* (Strab. lib. vi. 80).
 (Strab. lib. i. 4, 5; Strab. lib. vi.)

² *Corinthians* it became eventually the Acropolis of the subsequent city.
 About the deserted sites in the city

Probably in such primitive hill villages, a continuous circle of wall would hardly be required as an additional means of defence, and would often be rendered very difficult by the rugged nature of the ground. But Theophrastus represents the earliest Greeks—those whom he conceives anterior to the Trojan war—as living thus universally in unfortified villages chiefly on account of their poverty, rudeness, and thorough carelessness for the future. Oppressed and held apart from each other by perpetual fear, they had not yet contracted the sentiment of fixed abodes—they were unwilling even to plant fruit-trees because of the uncertainty of gathering the produce—and were always ready to dislodge, because there was nothing to gain by staying, and a bare subsistence might be had anywhere. He compares them to the mountaineers of Sicily and of the Italian Islands in his own time, who dwell in their unfortified hill villages with little or no inter-communication, always armed and fighting, and subsisting on the produce of their cattle and their woods¹—dressed in undyed hides, and eating raw meat.

Earliest residence of the Greeks—hill villages fortified by a circle of stones.

The picture given by Theophrastus, of these very early and unrecorded times, can only be taken as conjectural—the conjec-

While Theophrastus and Aristotle seem to have conceived the primitive period as mainly analogous to the practices of their own day—see, p. 176, c. 101, translated, p. 176; description of ancient villages, Herodotus, l. ii. c. 101, translated, p. 176.

them indeed of a statesman and a philosopher,—generalized, too, in part, from the many particular instances of constitution and organization of cities which he found in the old legendary poems. The Homeric poems, however, present to us a different picture. They recognize walled towns; fixed abodes, strong local attachments, hereditary individual property in land, vineyards planted and carefully cultivated, established temples of the gods, and splendid palaces of the chiefs.¹ The description of Theophrastus belongs to a lower form of society, and bears more analogy to that which the poet himself conceives as antiquated and barbarous—to the savage Cyclopes who dwell on the tops of mountains, in hollow caves, without the plough, without vine or fruit culture, without arts or instruments—or to the primitive settlement of Democritus son of Teos, on the higher ground of Ithaca, while it was reserved for his descendants and successors to found the holy Ilion on the plain.² Ilion or Troy represents the perfection of Homeric society. It is a walled spot, containing temples of the gods as well as the palace of Priam, and surrounded by walls which are the fabric of the gods; while the antecedent form of ruder society, which the poet briefly glances at, is the parallel of that which the theory of Theophrastus ascribes to his own early semi-barbarous ancestors.

Walled towns serve then as one of the evidences, that a large part of the population of Greece had, even in the Homeric times, reached a level higher than that of the *Aitolians* and *Lothians* of the days of Theophrastus. The remains of Mycenæ and Tiryns demonstrate the masonry and Cyclopean style of architecture employed in those early days; but we may remark, that while modern observers seem inclined to treat the remains of the former as very imposing, and significant of a great princely family, Theophrastus, on the contrary, speaks of it as a small place, and labours to shade the inference, which might be deduced from its insignificant size, in

¹ Odys. ii. 31, representing Menelaos, past king of the Hellenes:

Ἄσπερ δ' ἔργον ἑαυτοῦ κλέος, καὶ ἀδελφεὸν
κλέος.
Καὶ ἄσπερ κλέος δαίτη, καὶ ἀδελφεὸν
ἀδελφεόν.

The splendid, strengthened and golden of Laïos, is a simile of masonry, *ἀσπερ δ' ἔργον ἑαυτοῦ κλέος*, and also the shield of Achilles (i. 236), wall, *ἀσπερ δ' ἔργον ἑαυτοῦ κλέος*, and the Mycenaean poem (Hes. 12, 373).

² Odys. ii. 346—347, Ilion, was, 378.

it is sufficient here to repeat, that in the Homeric poems (long subsequent to Minos in the current chronology) we find piracy both frequent and bold is honourable estimation, as Theophrastus himself emphatically tells us—remarking moreover that the vessels of those early days were only half-decked, built and equipped after the piratical fashion,¹ in a manner upon which the nautical men of his time looked back with disdain. Improved and enlarged ship-building, and the trireme, or ship with three banks of oars, common for warlike purposes during the Persian invasion, began only with the growing skill, activity and importance of the Carthaginians, three centuries of a century after the first Olympiad.² Corinth, even in the Homeric poems, is distinguished by the epithet of wealthy, which it acquired principally from its remarkable situation on the Isthmus, and from its two harbours of Lechæum and Kenchree, the one on the Corinthian, the other on the Saronic gulf. It thus supplied a convenient connection between Egypt and Italy on the one side, and the Ægean sea on the other, without imposing upon the unskilful and timid navigator of those days the necessity of circumnavigating Peloponnesus.

The extension of Grecian traffic and shipping is manifested by a comparison of the Homeric with the Hesiodic poems; in respect to knowledge of places and countries—the latter being probably referable to dates between B.C. 540 and A.D. 640. In Homer, acquaintance is shown (the accuracy of such acquaintance however being exaggerated by Strabo and other friendly critics) with continental Greece and its neighbouring islands, with Eritæ and the principal islands of the Ægean, and with Thracæ, the Thracæ, the Hellespont, and Asia Minor between Paphlagonia northward and Lycia southward. The Sicils are mentioned in the *Odyssæy*, and Sicils in the last book of that poem, but nothing is said to evince a knowledge of Italy or the coasts of the western world. Libya, Egypt and Phœnicia, are known by name and by vague hearsay, but the Nile is only mentioned as “the river Egypt;³” while the *Eufrates* is not mentioned at all.⁴ In the Hesiodic

Extensive geographical knowledge is the result of the Homeric poems, as compared with Homer.

that which served as the basis of their various lunar periods. It is pretended that Thales was the first who predicted an eclipse of the sun—not indeed accurately, but with large limits of error as to the time of its occurrence—and that he also possessed as profound an acquaintance with meteorological phenomena and probabilities, as to be able to forecast an abundant crop of olives for the coming year, and to realize a large sum of money by an olive speculation.¹ From Thales downward we trace a succession of astronomical and physical theories, more or less successful, into which I do not intend here to enter. It is sufficient at present to contrast the father of the Ionic philosophy with the times preceding him, and to mark the first commencement of scientific prediction among the Greeks, however imperfect at the outset, as distinguished from the inspired dicta of prophetic oracles, and from those special signs of the purposes of the gods, which formed the habitual reliance of the Homeric man.² We shall see these two modes of anticipating the future—one based upon the philosophical, the other upon the religious appreciation of nature—running simultaneously as throughout Grecian history and sharing between them in unequal portions the empire of the Greek mind; the former acquiring both greater pre-eminence and wider application among the intellectual men, and partially restricting, but never shaking, the spontaneous employment of the latter among the vulgar.

months and thirteen months, each month of thirty days. This period was called a *Metek*,—sometimes a *Theteb*. It is said to have first introduced the notion of months dividing in length, having originated from Thales in Ionia, and from Pythagoras in Sicily. It appears however that Thales had passed to his mind the Egyptian mode of years alternating between thirteen months and thirteen months, each month of thirty days, and in other respects. (See *Journal* N. 100. An astronomical knowledge improved, deeper and more accurate, certainly was obtained, exhibiting a more correspondence between the length of years, time and the length of months of solar years. First, we had a period of four years, next, the *Metek*, or period of eight years, or quasi-lunar years

months; lastly, the *Metek* period of thirteen years, or the lunar months. How far any of these larger periods were ever regularly observed, or thought for, I do not think was at Athens, or matter of much doubt. See *Index* Thales etc. *Antiquarian Researches* (London, 1828), p. 171-180, *Illustrations*, (London, 1830).

Neither coined money, nor the art of writing,¹ nor painting, nor sculpture, nor imaginative architecture, belong to the Homeric and Hesiodic times. Such refinements of arts, destined ultimately to acquire great development in Greece, as may have existed in these early days, served only as a sort of nucleus to the fancy of the poet, to shape out for himself the fabulous creations ascribed to Hephaestus or Demeter. No statues of the gods, not even of wood, are mentioned in the Homeric poems. All the many varieties in Greek music, poetry and dancing,—the former chiefly borrowed from Lydia and Phrygia—date from a period considerably later than the first Olympiad. Terpander, the earliest musician whose date is assigned—and the inventor of the harp with seven strings instead of that with four strings—does not come until the 20th Olympiad, or 478 B.C. : the poet Archilochus is nearly of the same date. The iambic and elegiac metres—the first deviations from the primitive epic strain and subject—do not reach up to the year 700 B.C.

It is this epic poetry which forms at once both the undoubted ^{apo}prerogative and the solitary jewel of the earliest era ^{period} of Greece. Of the many epic poems which existed in Greece during the eighth century before the Christian era, none have been preserved except the *Iliad* and *Odyssey* : the *Æthiopis* of Arctius, the *Ilus Minor* of Lesche, the *Cyprian Verses*, the capture of *Oechalia*, the *Return* of the *Heroes* from *Troy*, the *Thebais* and the *Epigoni*—several of them passing in antiquity under the name of *Homer*—have all been lost. But the two which remain are quite sufficient to demonstrate in the primitive Greeks, a mental organisation unparalleled in any other people, and powers of invention and expression which prepared, as well as furnished, the future substance of the nation in all the various departments to which thought and language can be applied. Great as the power of thought afterwards became among the Greeks, their power of expression was still greater ; in the former, other nations have built upon their foundations and surpassed them—in the latter they still remain unrivalled. It is not too

¹ The absence of any mention in the *Iliad*, of any writing, or of any evidence of alphabetical writing at the time when the *Iliad* was composed, is rather an evidence against, than for, the existence of alphabetical writing at the time when the *Iliad* was composed.

much to say that this flexible, emphatic and transparent character of the language as an instrument of communication—its perfect aptitude for narrative and discussion, as well as for stirring all the veins of human emotion without ever forfeiting that character of simplicity which adapts it to all men and all times—may be traced mainly to the existence and the wide-spread influence of the *Iliad* and *Odyssey*. To us these compositions are interesting as beautiful poems, depicting life and manners, and unfolding certain types of character, with the utmost vividly and artlessness : to their original hearer, they possessed all these sources of attraction, together with others more powerful still, to which we are now strangers. Upon him they bore with the full weight and solemnity of history and religion combined, while the charms of the poetry was only secondary and instrumental. The poet was then the teacher and preacher of the community, not simply the winner of their leisure hours ; they looked to him for revelations of the unknown past and for explications of the attributes and dispositions of the gods, just as they consulted the prophet for his privileged insight into the future. The ancient epic comprised many different poems and poetical compositions, which fulfilled this purpose with more or less completeness. But it is the exclusive prerogative of the *Iliad* and *Odyssey*, that after the minds of men had ceased to be in full harmony with their original design, they yet retained their empire by the mere force of secondary excellence ; while the remaining epics—though serving as food for the curious, and as storehouses for lexicographers, tragedians, and artists—never more to have acquired very wide popularity even among intellectual Greeks.

The great and permanent influence upon the Greek mind.

I shall, in the succeeding chapter, give some account of the epic cycle, of its relation to the Homeric poems, and of the general evidences respecting the latter, both as to antiquity and authorship.

CHAPTER XXI.

GREGIAN EPIC.—HOMERIC FORMS.

As the head of the once abundant epical compositions of Greece, most of them unfortunately lost, stand the *Iliad* and *Odyssey*, with the immortal name of Homer attached to each of them, embracing separate portions of the comprehensive legend of Troy. They form the type of what may be called the heroic epic of the Greeks, as distinguished from the genealogical, in which latter species some of the Hesiodic poems—the Catalogue of Women, the *Theogony*, and the *Works and Days*—stood conspicuous. Poems of the Homeric character (if so it may be called, though the expression is very indefinite)—being confined to one of the great events or great personages of Greek legendary antiquity, and comprising a limited number of characters all contemporaneous—made some approach, more or less successful, to a certain poetical unity; while the Hesiodic poems, tamer in their spirit and unconfined both as to time and as to persons, strung together distinct events without any obvious view to concentration of interest—without legitimate beginning or end.¹ Between these two extremes there were many gradations. Biographical poems, such as the *Herakleia* or *Thebais*, recounting all the principal exploits performed by one single hero, present a character intermediate between the two, but leaning more closely on the Hesiodic. Even the hymns to the gods, which pass under the name of Homer, are epical fragments, narrating particular exploits or adventures of the god concerned.

1 *Irish. Part. c. 17—20.* He points out and explains the respective structure of the *Iliad* and *Odyssey*, as compared

with the most Homeric and biographical poems, but he takes no notice of the Hesiodic or genealogical.

Both the didactic and the mystical-religious poetry of Greece began in *Hæcæmeter* verse—the characteristic and conventional measure of the epic:—but they belong to a different species, and burst out from a different vein in the Grecian mind. It seems to have been the more common belief among the historical Greeks that such mystic effusions were more ancient than their narrative poems: and that Orpheus, Musæus, Linus, Olen, Panyasis, and even Hesiod, Æs, &c., the reputed composers of the former, were of earlier date than Homer. But there is no evidence to sustain this opinion, and the presumptions are all against it. These compositions, which in the sixth century before the Christian era passed under the name of Orpheus and Musæus, seem to have been unquestionably post-Homeric. We cannot even admit the modified conclusion of Hermann, Ulrich, and others, that the mystic poetry, as a genus (putting aside the particular compositions falsely ascribed to Orpheus and others) preceded in order of time the narrative.¹

Besides the *Iliad* and *Odyssey*, we make out the titles of about thirty last-epic poems, sometimes with a brief hint of their contents.

Concerning the legend of *Troj* there were five—the *Cyprian Verses*, the *Æthiopis* and the capture of *Troj*, both last-epic ascribed to Arctinus; the *Lesser Iliad*, ascribed to Leschia; the *Return* (of the Heroes from *Troj*), to which the name of *Ægiæus* of *Træzia* is attached; and the *Telegonia*, by Euphorion, a continuation of the *Odyssey*. Two poems—the *Thesela* and the *Epigoni* (perhaps two parts of one and the same poem) were devoted to the legend of *Thèbes*—the two sieges of that city by the Argives. Another poem called *Odipodia*, had for its subject the tragical destiny of *Odipus* and his family; and perhaps that which is cited as *Eurypia*, or versus on *Eurypia*, may have comprehended the tale of her brother *Edonius*, the mythical founder of *Thèbes*.²

¹ *Archæol. Poët.* c. 31. He considers the *Hæcæmeter* by its natural measure of mystic poetry—say what would be the case.

² *Thesela*, *Epigoni*, last-epic poems. *Spec. de Poët.*, pp. 21–22; *U. Hermann, Ueber Homer und Hesiod*.

In his *Odyssey*, tom. vi. p. 31.

The legendary catalogue of *Odipus* as compared with *Edonius* (named as a *Telegonia*) appears in the classical library (Paris, 1811, 1812).

³ Regarding these last epics, see *U. Hermann, Ueber Homer und Hesiod*.

The exploits of Héraklēs were celebrated in two compositions, each called *Héraklēs*, by Kinosēos and Pseudo—probably also in many others of which the memory has not been preserved. The capture of Gólodān by Héraklēs formed the subject of a separate epic. Two other poems, the *Nigidas* and the *Miryas*, are supposed to have been founded on other achievements of this hero—the effective aid which he lent to the Eastern King Nigidas against the Lapiths, his descent to the under-world for the purpose of rescuing the imprisoned Thésos, and his conquest of the city of the *Miryas*, the powerful *Omboumou*.¹

Other epic poems—the *Pharhais*, the *Dendai*, the *Alkmanōis*, the *Althia*, the *Amymōis*²—we know only by name. We can just guess obscurely at their contents so far as the name indicates. The *Timomachia*, the *Oigantomachia*, and the *Corinthiōis*, three compositions all ascribed to Hesiod, afford by means of their titles an idea somewhat clearer of the matter which they comprised. The *Theogony* ascribed to Hesiod still exists, though partially corrupt and mutilated; but there seems to have been other poems, now lost, of the like import and title. *

Of the poems composed in the *Héraklēs* style, diffuse and full of genealogical detail, the principal were, the *Catalogue of Women* and the *Great Eoid*; the latter of which indeed seems to have been a continuation of the former. A large number of the celebrated women of heroic Greece were commemorated in these poems, one after the other, without any other than an arbitrary bond of connexion. The *Marriage of Klytē*—the *Melampolia*—and a string of fables called *Astronomia*, are further ascribed to Hesiod; and the poem above mentioned, called *Nigidas*, is also sometimes connected with his name, sometimes with that of Ekrope. The *Naxoskion Verses* (so called probably from the birth-place of their author), and the genealogies of Kinosēos and Arktos, were compositions of the same rambling character, as far as we can judge from the scanty fragments remaining.³ The *Oribanemion*

library were larger than had ever before been brought together and submitted to men both of learning and taste; so that multiplication of such compositions in the same measures rendered it advisable to establish some fixed order of persons, and to copy them in one corrected and uniform edition.¹ It pleased the critics to determine precedence neither by antiquity nor by excellence of the compositions themselves, but by the supposed sequence of narrative, so that the whole taken together constituted a readable aggregate of epical antiquity.

Much obscurity² exists, and many different opinions have been expressed, respecting this Epic Cycle: I view it, not as an exclusive canon, but simply as an all-comprehensive classification, with a new edition founded thereupon. It would include all the epic poems in the library older than the *Telegraphia*, and apt for continuous narrative: it would exclude only two classes—first, the recent epic poets, such as *Phrygius* and *Antimachus*; next, the genealogical and descriptive poems, such as the *Catalogue of Women*, the *Keia*, and others, which could not be made to fit in to any

distinctive.

chronological sequence of events.³ Both the *Iliad* and the *Odyssey* were comprised in the Cycle, so that the denomination of cyclic poet did not originally or designedly carry with it any association of contempt. But as the great and capital poems were chiefly spoken of by themselves, or by the title of their own separate authors, so the general name of *poet of the Cycle* came gradually

¹ That there existed a cyclic copy or edition of the *Odyssey* is evident, as proved by two passages in the *Scholia* (vol. iii; crit. 86), with Manili's remark in *Anthologia* (ed. 1794): that even the *Odyssey* could be edited, along with the other poems of the Cycle.

Our word is either either—perhaps there had exactly copied in the Proceedings of the Alexandrian Library, in which the canon appears to find nothing less than is now called *poetivores*. That magnificent establishment, possessing a large collection of epical manuscripts, and ample means of every kind of criticism, would naturally desire to have these compositions put in order and corrected by critical hands, and then carefully copied for the use of the library. Such copy constitutes the *travaux* which they might perhaps have or perhaps duplicated to be made.

And the before or edition was complete without them.

² Respecting the great confusion in which the Epic Cycle is involved, see the starting illustration of *Strabon*, *Geographia* (ed. 1794) in *Odyssey*, p. 126; compare the opinion of the old French critics, as commented at the end of *Wagner's* treatise, *Epica, Epica*, p. 100—101.

³ Our information respecting the Epic Cycle is derived from *Halysdrum* *Phrygius*, a literary man of whom during the second century of the Christian era, and father of *Marcus Antoninus* (vol. *Caesars*, p. 139, 140)—or from *Phrygius*, called *Epica*, the son of *Phrygius*, philosopher of the 3rd century, as *Caesars*, p. 139, and others have imagined. The fragments from his work called *Chronologia* give fragments of several of the last

had both been included among them: and this allocation of the meaning of the word has given birth to a mistake as to the primary purpose of the classification, as if it had been designed especially to part off the inferior epic productions from Homer. But while some critics are disposed to distinguish the cyclic poems too pointedly from Homer, I conceive that Walkeus goes too much into the other extreme, and identifies the cyclic too closely with Homer at that point. He constructs it as a classification deliberately framed to comprise all the various productions of the Homeric epic, with its unity of action and comparative poverty both of persons and adventures—as opposed to the Hesiodic epic, crowded with separate persons and pedigrees, and destitute of central action as well as of distinct catastrophes. This opinion does indeed coincide to a great degree with the fact, inasmuch as few of the Hesiodic epics appear to have been included in the Cyclic. To say that none were included, would be too much, for we cannot venture to exclude either the *Theogony* or the *Erinyes*; but we may account for their absence perfectly well without supposing any design to exclude them, for it is obvious that their rambling character (like that of the *Metamorphoses* of Ovid) forbids the possibility of interweaving them in any continuous series. Continuity in the series of narrated events, coupled with a certain degree of antiquity in the poems, being the principle on which the arrangement called the Epic Cycle was based, the Hesiodic poems generally were excluded, not from any preconceived intention, but because they could not be brought into harmony with such orderly reading.

What were the particular poems which it comprised, we cannot now determine with exactness. Walkeus arranges them as fol-

lows:—*Thronomachia*, *Danaë*, *Armenia* (or *Atthis*), *Odyssea*, *Thebais* (or expedition of *Amphiaraus*), *Epigoni* (or *Alkanoëis*), *Mixas* (or *Phakos*), *Capture of Oichalia*, *Cyprian Vases*, *Ilad*, *Atthisia*, *Lower Ilad*, *Hesperia* or the *Taking of Troy*, *Return of the Heron*, *Olympos*, and *Telephos*. *Wulker*, *Long*, and *Mr. Wyng*

perhaps it would be correct to say that the poems were arranged in some such principle and upon no other. The likelihood might have suggested to the compiler the fact that some of the poems

in their present form (they had chosen to treat upon the subject of vengeance in the *Odyssea*) but they were in the same would have formed a Fourth Cycle.

Clinton enlarges the list of cyclic poems still further! But all such reconstructions of the Cycle are conjectural and destitute of authority. The only poems which we can affirm on positive grounds to have been comprehended in it, are, first, the series respecting the heroes of Troy, from the Cypria to the Telegonia, of which Proclus has preserved the arguments, and which includes the *Iliad* and *Odyssey*—next, the old *Thebais*, which is expressly termed cyclic¹ in order to distinguish it from the poem of the same name composed by Antimachus. In regard to other particular compositions, we have no evidence to guide us, either for admission or exclusion, except our general views as to the scheme upon which the Cycle was formed. If my idea of that scheme be correct, the Alexandrine critics arranged therein all their old epic treasures, down to the Telegonia—the good as well as the bad; gold, silver, and iron—provided only they could be placed in with the narrative series. But I cannot venture to include, as Mr. Clinton does, the *Kanopia*, the *Phaonia*, and other poems of which we know only the names, because it is uncertain whether their contents were such as to fulfil that primary condition. Nor can I concur with him in thinking that, where there were two or more poems of the same title and subject, one of them must necessarily have been adopted into the Cycle to the exclusion of the others. There may have been two *Theogonies*, or two *Hesiodics*, both comprehended in the Cycle; the purpose being (as I before remarked), not to sift the better from the worse, but to determine some fixed order, convenient for reading and reference, amidst a multiplicity of scattered compositions, as the basis of a new, entire, and corrected edition.

Whatever may have been the principle on which the cyclic poems were originally strung together, they are all now lost, except those two unrivalled diamonds, whose brightness, dimming all the rest, has alone sufficed to confer imperishable glory even upon the earliest phase of Grecian life. It has been the natural privilege of the *Iliad* and *Odyssey*, from the rise of Grecian philology down to the present day, to provoke an intense curiosity, which,

The *Iliad* and *Odyssey* are the only poems of the Cycle preserved.

Odyssey: *Walter Scott's* *History of Greece*, p. vol. i. p. 246.

Thebais: *Walter Scott's* *History of Greece*, p. vol. i. p. 246.

Iliad: *Proclus*, *Strabo*, et. 10.

Antimachus, et. p. 101.

Heater, then, is no individual man, but the divine or heroic father (the ideas of worship and secrecy combining, as they constantly do) in the Greek mind) of the gentle Homeric, and he is the author of the *Thebais*, the *Epigoni*, the Cyprian *Venus*, the *Poemea* or *Hyman*, and other poems, in the same sense in which he is the author of the *Iliad* and *Odyssey*—meaning that these various compositions emanate, as perhaps they may, from different individuals numbered among the Homeric. But this disallowance of the historical personality of Homer is quite distinct from the question, with which it has been often confounded, whether the *Iliad* and *Odyssey* are originally entire poems, and whether by one author or otherwise. To us the name of Homer means these two poems, and little else: we desire to know as much as can be learnt respecting their date, their original composition, their preservation, and their mode of communication to the public. All these questions are more or less connected one with the other.

Concerning the date of the poems, we have no other information except the various affirmations respecting the age of Homer, which differ among themselves (as I have before observed) by an interval of 480 years, and which for the most part determine the date of Homer by reference to some other event, itself fabulous and unauthenticated, such as the Trojan war, the Return of the Greeks, &c.

1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 2618, 2619, 2620, 2621, 2622, 2623, 2624, 2625, 2626, 2627, 2628, 2629, 2630, 2631, 2632, 2633, 2634, 2635, 2636, 2637, 2638, 2639, 2640, 2641, 2642, 2643, 2644, 2645, 2646, 2647, 2648, 2649, 2650, 2651, 2652, 2653, 2654, 2655, 2656, 2657, 2658, 2659, 2660, 2661, 2662, 2663, 2664, 2665, 2666, 2667, 2668, 2669, 2670, 2671, 2672, 2673, 2674, 2675, 2676, 2677, 2678, 2679, 2680, 26

the Ionic migration. Kretsch placed Homer earlier than the Return of the Hittites and less than eighty years after the Trojan war: Kretschmann put him 160 years after the Trojan war: Aristotele, Aristarchus, and Choise make his birth contemporary with the Ionic migration, while Apollodorus brings him down to 150 years after that event, or 240 years after the taking of Troy. Theocritides assigns to him a date much subsequent to the Trojan war.¹ On the other hand, Theopompus and Euphorides refer his age to the far more recent period of the Lydian king Gyges (Oli. 18—22, B.C. 708—658), and put him 600 years after the Trojan epoch.² What were the grounds of these various conjectures we do not know, though, in the statements of Kretsch and Kretschmann, we may pretty well divine. But the oldest dictum preserved to us respecting the date of Homer—meaning thereby the date of the *Iliad* and *Odyssey*—appears to me at the same time the most credible, and the most consistent

the most
probable.

with the general history of the ancient epic. Heraclitus places Homer 450 years before himself; taking his departure, not from any fabulous event, but from a point of real and authentic time.³ Four centuries anterior to Heraclitus would be a period corresponding with 850 B.C.: so that the composition of the Homeric poems would then fall in a space between 850 and 800 B.C. We may gather from the language of Heraclitus that this was his own judgment, opposed to a current opinion which assigned the poet to an earlier epoch.

To place the *Iliad* and *Odyssey* at some period between 850 B.C. and 750 B.C., appears to me more probable than any other

¹ Theocrit. l. 2.

² On the statements and objections respecting the age of Homer, collected in Mr. Gilbert's *Chronology*, vol. i. p. 161. He prefers the view of Aristotele, and places the *Iliad* and *Odyssey* a century earlier than I am inclined to do.—160 B.C.

Kretsch probably placed the poet anterior to the Return of the Hittites, because the *Iliad* states so many of events in Polygarnus: Kretschmann may be supposed to have assigned the date in the passage of the *Iliad* which mentions the three generations descended from Menes. We should have been glad to know the

grounds of the very low date assigned by Theopompus and Euphorides.

³ The *Fragmenta*, Herodotus, in his life of Homer, puts the birth of the poet 110 years after the Trojan war.

⁴ Heraclit. B. 10. Herodotus l. 2. Some learned Gent. Lyonesse had brought into Polygarnus the *Homeric poems*, which had lately been written out of Lucca. The original work of Lyfrucht had quotations here employed in writing the date here assigned to the Homeric poems; but respecting respecting Lyfrucht is too difficult to enter an opinion in every instance.

date, anterior or posterior—more probable than the latter, because we are justified in believing these two poems to be older than Arktos, who comes shortly after the first Olympiad—more probable than the former, because the further we push the poems back, the more do we enhance the wonder of their preservation, already sufficiently great, down from such an age and society to the historical times.

The mode in which these poems, and indeed all poems, epic as well as lyric, down to the age (probably) of Pindar, were circulated and brought to bear upon the public, deserves particular attention. They were not read by individuals alone and apart, but sung or recited at festivals or to assembled companies. This seems to be one of the few undisputed facts with regard to the great poets: for even those who maintain that the *Iliad* and *Odyssey* were preserved by means of writing, seldom contend that they were read.

In appreciating the effect of the poems, we must always take account of this great difference between early Greece and our own times—between the congregation gathered at a solemn festival, stimulated by community of sympathy, listening to a measured and musical recital from the lips of trained bards or rhapsodes, whose matter was supposed to have been inspired by the Muse—and the solitary reader with a manuscript before him; each manuscript being, down to a very late period in Greek literature, indifferently written, without division into parts and without marks of punctuation. As in the case of dramatic performances in all ages, so in that of the early Grecian epic—a very large proportion of its impressive effect was derived from the talent of the poet, and the force of the general accompaniments, and would have disappeared altogether in solitary reading. Originally the bard sang his own apical narrative commencing with a preambles or hymn to one of the gods: his profession was

* The *Hymn to Apollo* is perhaps of this sort, again very short, consisting only of a few lines, and of considerable length. The *Hymn to Apollo* is of the 7th century B.C. and is cited by Theophrastus in the *History of Animals*.

The *Hymn to Apollo*, *Apollo*,

Horace, *Isidore*, and *Idem*, are genuine apical narratives. *Horace* (*Fasti*, *et. Hymn*, p. 101) preserves the *Hymn to Apollo* as he described and most genuine; portions of the *Hymn to Apollo* (*Hymn*, p. 101) are also very old, but both that *Hymn* and

separate and special, like that of the carpenter, the loom, or the prophet: his manner and ornamentation must have required particular training no less than his imaginative faculty. His character presents itself in the *Odyssey* as one highly esteemed; and in the *Iliad*, even Achilles does not disdain to touch the lyre with his own hands, and to sing heroic deeds.¹ Not only did the *Iliad* and *Odyssey*, and the poems embodied in the *Epic Cycle*, produce all their impression and gain all their renown by this process of oral delivery, but even the lyric and choric poets who succeeded them were known and felt in the same way by the general public, even after the full establishment of habits of reading among lettered men. While in the case of the epic, the recitation or singing had been extremely simple and the measure consequently little diversified, with no other accompaniment than that of the four-stringed harp—all the variations superinduced upon the original hexameter, beginning with the pentameter and iambus, and proceeding step by step to the complicated strophics of Pindar and the tragic writers, still left the general effect of the poetry greatly dependant upon voice and accompaniments and feebly distinguished from mere military reading of the words. And in the dramatic poetry, the last in order of time, the declamation and gesture of the speaking actor alternated with the song and dance of the Chorus, and with the instruments of music, the whole being set off by imposing visible decorations. Now both dramatic effect and song are familiar in modern times, so that every man knows the difference between reading the words and hearing them under the appropriate circumstances: but poetry, as such, is, and has now long been, so exclusively enjoyed by reading, that it requires an especial moment to bring us back to the time when the *Iliad* and *Odyssey* were addressed only to the ear and feelings of a pronounced and sympathizing multitude. Random there were

the others are largely interpreted. His opinion respecting these interpretations, however, is quoted by Fränke (*Proleg. ad Hymn. Hymnorum* p. 12, 13.) and the distinction between what is genuine and what is spurious depends upon criteria not very distinctly delineated. Compare *Wied. Nachr. der Ep. Poet.* p. 32—33.

¹Phœbus, Demeter, and the muses (last) who presided collectively at Nymphætes. See our translation (*Odys. I. 32, 33, 34; vii. 339; viii. 26; Antiquities* Book. ix. 33).

A degree of antiquity seems assigned to the poem of the *harp* as well as to that of the *loam* (*Odys. viii. 26—27*).

siderable individuals of the class were elaborately trained and highly accomplished in the exercises of their profession, we may assume as certain. But it happens that Socrates with his two pupils Plato and Xenophanes speak contemptuously of their merits, and many persons have been disposed, somewhat too readily, to admit this sentence of condemnation as conclusive, without taking account of the point of view from which it was delivered.¹ These philosophers considered Homer and other poets with a view to instruction, ethical doctrine, and virtuous practice: they analysed the characters whom the poet described, sifted the value of the lessons conveyed, and often struggled to discover a hidden meaning, where they disapproved that which was apparent. When they found a man like the rhapsode, who professed to improve the Homeric narrative upon an audience, and yet either never meddled at all, or meddled unsuccessfully, with the business of exposition, they treated him with contempt; indeed Socrates depreciates the poets themselves much upon the same principle, as dealing with matters of which they could render no rational account.² It was also the habit of Plato and Xenophanes to disparage generally professional exertion of talent for the purpose of gaining a livelihood, contrasting it often in an indelicate manner with the gainstrove teaching and ostentatious poverty of their master. But we are not warranted in judging the rhapsodes

¹ Xenoph. Memorab. ix. 2, 38; and Sympos. ix. 1. Cf. also Pl. Meno (Hedewitz, *Lehrbuch*), p. 1, after the 35, who deprecates the *Lehrmeister*. It is instructive to see Aristophanes (*Knabenkomödien*) making the rhapsodes here, while in the *Knaben* (p. 104) he says:

These fellows are the hidden teachers or allegorists which a certain set of philosophers undertook to discover in Homer, and which the rhapsodes were so wily as not to teach.

The Platonic dialogue called *Ion* applies to the the subtle function of a rhapsode or improviser, imitates, and a critical analysis of the poet (especially also, *Knaben*) the same double character in the character of the time—*Protagonist*, p. 105; but it carries no solid grounds for a more extensive of the class of rhapsodes, while it is not unreasonably overlooking effect produced by their instruction

in. 4, p. 105. That this class of men came to consider the habit of repeating they assumed on the part with their original possession of feeling, never the foundation of the age; probably it was brought from him already with the philosophers.

The opinion taken by Aristotle (*Protr.* 177, 180) concerning the *Lehrmeister*, as it applied the drama, tragedy, comedy, etc., of his time, are more serious and instructive than the art of truth.

It is to correct to learn the words *Lehrmeister*, *Ion*, 4, p. 105 in which these early philosophers of Homer, whose application the *Lehrmeister* effect to directly concerned with the rhapsodes, this only proves that the rhapsodes had some to undertake a double duty, of which their predecessors had no more than one duty.

² Plato, *Apology*, *Knaben*, p. 10, c, 1.

Regarding the mode in which the Homeric poems were preserved, during the two centuries (or, as some think, longer interval) between their original composition and the period shortly preceding Eddin—and regarding their original composition and subsequent changes—there are wide differences of opinion among able critics. Were they preserved with, or without, being written? Was the *Iliad* originally composed as one poem, and the *Odyssey* in like manner, or is each of them an aggregation of parts originally self-existent and unconnected? Was the authorship of each poem single-headed or many-headed?

At what time the Homeric poems began to be written.

Either tacitly or explicitly, these questions have been generally coupled together and discussed with reference to each other, by inquirers into the Homeric poems; though Mr. Payne Knight's *Prolegomena* have the merit of keeping them distinct. Half a century ago, the acute and valuable *Prolegomena* of P. A. Wolf, tending to account the Vatican Scholia which had then been recently published, first opened philosophical discussion as to the history of the Homeric text. A considerable part of that dissertation (though by no means the whole) is employed in vindicating the position, previously assumed by Bentley amongst others, that the separate constituent portions of the *Iliad* and *Odyssey* had not been cemented together into any compact body and unchangeable order until the days of Ptolemaeus, in the sixth century before Christ. As a step towards that conclusion, Wolf maintained that no written copies of either poem could be shown to have existed during the earlier times to which their composition is referred—and that without writing, neither the perfect symmetry of so complicated a work could have been originally conceived by any poet, nor, if realized by him, transmitted with accuracy to posterity. The absence of any and convenient writing, such as must be indispensably supposed for long manuscripts, among the early Greeks, was then one of the points in Wolf's case against the pluriform integrity of the *Iliad* and *Odyssey*. By Kuhn and other leading opponents of Wolf, the connection of the one with the other seems to have been accepted as he originally put it, and it has been considered incumbent on those, who defended the

Integrity of each of them—how many centuries before the Homeric poems began to be written.

at the Panathenæa; but for what length of time previously manuscripts had existed we are unable to say.

Those who maintain the Homeric poems to have been written from the beginning rest their case, not upon positive proofs—nor yet upon the existing habits of society with regard to poetry, for they admit generally that the *Iliad* and *Odyssey* were not read, but recited and heard—but upon the supposed necessity that there must have been manuscripts,¹ to ensure the preservation of the poems,—the transmitted memory of recitors being neither sufficient nor trustworthy. But here we only escape a smaller difficulty by running into a greater; for the existence of trained bards, gifted with extraordinary memory, is far less astonishing than that of long manuscripts in an age essentially non-reading and non-writing, and when even suitable instruments and materials for the process are not obvious. Moreover, there is a strong positive reason for believing that the bard was under no necessity of refreshing his memory by consulting a manuscript. For if such had been the best, blindfoldness would have been a disqualification for the profession, which we know that it was not: as well from the example of Demodocus in the *Odyssey*, as from that of the blind bard of Chios, in the Hymn to the Delian Apollo, whom Theocritus, as well as the general tenor of Greek legend, identifies with Homer himself.² The author of that Hymn, be he who he may, could never have described a blind man as attaining the utmost perfection in his art, if he had been conscious that the memory of the bard was only maintained by constant reference to the manuscript in his chest.

Nor will it be found, after all, that the effort of memory required either from bards or rhapsodes, even for the longest of their ~~old~~ ^{new} poems,—though doubtless great,—was at all super-

Bards or rhapsodes of Homeric memory, but in contrast with the condition of the age then living.

¹ See this argument strongly put by Strabo, in his preliminary remarks on the beginning of his second volume of Geography on the subject of *Odyssey* p. 1. 2. 11. He takes great pains to show that the poems were written in order to be read. To the same purpose from *Geographical View*, vol. 1. p. 11, who adopts Strabo's position.

² *Trifolius*, vol. 1. non habet, nec enim scribitur.

³ *Odys.* vi. 22. *Hymn.* ad Apoll. 171. *Strabo*, lib. 10. *Vol.* 1. p. 11. *Theocritus*, lib. 14.

Various commentators on Homer imagined that under the pretence of blindfoldness the poet is really to recite the poem without, all *Odys.* 1. 1. *Strabo* lib. 10. 2. 11.

evolutions we are not to imagine that the same person did go through the whole: the recitation was essentially a joint undertaking, and the rhapsodes who visited a festival would naturally undertake among themselves which part of the poem should devolve upon each particular individual. Under such circumstances, and with such means of preparation beforehand, the quantity of verse which a rhapsode could deliver would be measured, not so much by the extension of his memory, as by the physical efficiency of his voice, having reference to the accents, emphasis, and rhetorical pronunciation required from him.¹

But what guarantee have we for the exact transmission of the text for a space of two centuries by simply and meagrely handed down the text as exactly as in point of fact it was handed down. The great lines of each poem—the order of parts—the vein of Homeric feeling and the general style of locution, and for the most part, the true words—would be maintained: for the professional training of the rhapsode, over and above the precision of his actual memory, would tend to Homœrize his mind (if the expression may be permitted), and to restrain him within this magic circle. On the other hand, in respect to the details of the text, we should expect that there would be wide differences and numerous interchanges: and so there really were, as the records contained in the *Scholia*, together with the passages cited in ancient authors, but not found in our Homeric text, abundantly testify.²

Moreover the state of the *Iliad* and *Odyssey* in respect to the letter called the *Digamma* affords a proof that they were recited for a considerable period before they were committed to writing, inasmuch that the oral

possibility of preserving the poems by memory, as accurately as in fact they were preserved.

agreement with the text of the *Iliad* and *Odyssey*.

¹ There are just grounds of Mr. Liddell on the possibility that the Homeric poems might have been preserved by oral writing (*History of Greece*, vol. i. p. 12-13).

² *Philologiae*, *Philologiae*, p. 12-13. *Iliad*, *Odyssey*, p. 12. *Philostratus*, in the *Epist.*, *De*, *Philostratus*, p. 12-13, gives a considerable list of the Homeric passages cited by ancient

authors, but not found either in the *Iliad* or *Odyssey*. It is hardly to be doubted, however, that many of these passages belonged to other epic poems which passed under the name of Homer. *Philostratus* (*De*, *Philostratus*, p. 12-13) mentions this opinion very fully, and it harmonizes with the view of the name of Homer as co-extensive with the whole *Kale* epic.

pronunciation underwent during the interval a *sinifible change*.¹ At the time when these poems were composed, the Diphthong was an effective consonant, and figured as such in the structure of the verse: at the time when they were committed to writing, it had ceased to be pronounced, and therefore never found a place in any of the manuscripts—*inasmuch* that the Alexandrian critics, though they knew of its existence in the much later poems of Alkman and Sappho, never recognised it in Homer. The hiatus, and the various perplexities of metre, occasioned by the loss of the Diphthong, were corrected by different grammatical stratagems. But the whole history of this lost letter is very curious, and is rendered intelligible only by the supposition, that the *Iliad* and *Odyssey* belonged for a wide space of time to the memory, the voice, and the ear exclusively.

At what period these poems, or indeed any other Greek poems, was the first began to be written, must be matter of conjec- the literary ture, though there is ground for assurance that it was precedence before the time of Solon. If in the absence of evi- is in dence we may venture upon making any more deter- written? minate period, the question at once suggests itself, what were the purposes which in that stage of society, a manuscript at its first commencement must have been intended to answer? For whom was a written *Iliad* necessary? Not for the rhapsodes; for with them it was not only planted in the memory, but also interwoven with the feelings, and conceived in conjunction with all those flexions and intonations of voice, pauses, and other oral artifices, which were required for emphatic delivery, and which the naked manuscript could never reproduce. Not for the general public—they were accustomed to receive it with the rhapsodic delivery, and with its accompaniments of a solemn and crowded festival. The only persons for whom the written *Iliad* would be valuable, would

¹ See this argument strongly maintained in Orelli's *Ueber den Dialect des Homer*, 1825, 24, p. 129, seq. He mentions several other particulars in the Homeric language—the absence and weakness of inflexions, the contracted forms—the numerous omitted letters, not only by abbreviation and contraction, which indicate a language as yet not governed by the rules of written authority.

The same line of argument is taken by L. Müller, *History of the Literature of Ancient Greece*, 2d. ed. p. 11.

Orelli has shown also, in the same chapter, that all the changes of the Greek language in the Homeric age, which he has fully explained, took place in a period long before the age of Solon, and that the Homeric language was not yet so far advanced as to be written, and that all these would be in reality.

and arranged in the existing order, the rhapsodies of the *Iliad* and *Odyssey* (regarded as poems originally entire and subsequently broken into pieces), which he found partly confused and partly isolated from each other—each part being then remembered only in its own portion of the Greek world. Respecting Hipparchus the son of Peisistratus, too, we are told in the Pseudo-Plutarch dialogue which bears his name, that he was the first to introduce into Attica the poetry of Homer, and that he prescribed to the rhapsodes to recite the parts at the Panathenæic festival in regular sequence.¹

Wolf and William Müller occasionally speak as if they admitted something like an *Iliad* and *Odyssey* as established aggregates prior to Peisistratus; but for the most part they represent him as his associate as having been the first to put together Homeric poems which were before distinct and self-existent compositions. And Lachmann, the recent exponent of the same theory, ascribes to Peisistratus still more unequivocally this original integration of parts in reference to the *Iliad*—distributing the first twenty-two books of the poem into sixteen separate songs, and treating it as ridiculous to imagine that the fusion of these songs into an order such as we now read, belongs to any date earlier than Peisistratus.²

Upon this theory we may remark, first, that it stands opposed to the testimony existing respecting the regulations of Solon; who, before the time of Peisistratus, had enforced a fixed order of recitation at the rhapsodes of the *Iliad* at the Panathenæic festival; not only directing that they

¹ *Plutarch*, *Hipparchus*, p. 128.

² "Soch ist, was wir jetzt haben. Ich nun, wenn ich noch länger die Mischelheit gelien habe, das ganze *Iliad* in drei zusammenhängende Theile zerlegen, in sechs zusammenhängende Theile, und nicht mehr die wieder zusammenzusetzen, welche wir der *Attika* des Peisistratus schenken werden etc." (*Lachmann*, *Vernein* *Antiquitäten* über die *Iliad*, part. XXIII, p. 31. *Altenbrunnen* Berlin, *Araden*, 1841.) Now for this statement.—that for the two main dependent portions of the *Iliad* there did exist an antecedent order of recitation prior to Peisistratus.—is intended to imply, I do not know: but the language of Lachmann goes further

than either Wolf or William Müller. See Wolf, *Prolegomena*, p. 201.—2011, and W. Müller, *Homericorum Vindiciae*, *Altenbrunnen*, 1841, p. 31, 32, 33, 34. The latter admits that neither Peisistratus nor the Athenians could have made any considerable changes in the *Iliad* and *Odyssey*, either in the way of addition or of transposition; the poems as aggregates being too well-known, and the Homeric rule of sequence too completely settled, to admit of such novelties.

I confess I do not see how these non-transposed statements can be reconciled with the more distinct of Wolf, in so far as regards Peisistratus.

the theory ascribes to Pindaratus a character not only materially different from what is indicated by Cicerò and Pausanias—who represent him, not as having put together songs originally distinct, but as the restorer of an ancient order subsequently lost—but also in itself unintelligible and inconsistent with Grecian habits and feeling. That Pindaratus should take pains to represent the heroes, or make up for the individual memory, of individual chapeodes, and to enable the Panathenæa festival by the most correct recital of a great and venerable poem, according to the standard received among the best judges in Greece—this is a task both suitable to his position, and requiring nothing more than an improved recitation, together with exact adherence to it on the part of the chapeodes. But what motive had he to string together several poems, previously known only as separate, into one new whole? What feeling could he gratify by introducing the extensive changes and transpositions carried by Lachmann, for the purpose of blending together sixteen songs which the chapeodes are assumed to have been accustomed to recite, and the people to hear, each by itself apart? Pindaratus was not a poet, seeking to interest the public mind, by new creations and combinations, but a ruler desirous to impart solemnity to a great religious festival in his native city. How such a purpose would be answered by selecting, amidst the divergencies of chapeodes in different parts of Greece, that order of text which intelligent men could approve as a return to the pure and primitive *Iliad*; but it would be defeated if he attempted large innovations of his own, and brought out for the first time a new *Iliad* by blending together, altering, and transposing many old and well-known songs. A novelty so bold would have been more likely to offend than to please both the critics and the multitude. And if it were even enforced, by authority, at Athens, no probable reason *can* be given, why all the other towns and all the chapeodes throughout Greece should change their previous habits in favour of it, since Athens at that time enjoyed no political ascendancy such as she acquired during the following century. On the whole, it will appear, that the character and position of Pindaratus himself go far to negative the fiction which Wolf and Lachmann put upon him. His interference presupposes a certain freedom and ancient aggregate, the main elements of which were familiar to the Greeks

have been the case if it had been the prime originator of Homeric unity.

The line of argument, by which the advocates of Wolf's hypothesis negative the primitive unity of the poem, consists in exposing gaps, incongruities, contradictions, &c., between the separate parts. Now, if in spite of all these incoherencies, standing monuments of an antecedent state of separation, the component poems were made to coalesce so intimately as to appear as if they had been one from the beginning, we can better understand the complete success of the proceeding and the universal prevalence of the illusion, by supposing such coalescence to have taken place at a very early period, during the productive days of epical genius, and before the growth of reading and criticism. The longer the aggregation of the separate poems was deferred, the harder it would be to obliterate in man's mind the previous state of separation, and to make them accept the new aggregate as an original unity. The birds or rhapsodes might have found comparatively little difficulty in thus putting together distinct songs, during the sixth or eighth century before Christ; but if we suppose the process to be deferred until the latter half of the sixth century—if we imagine that Solon, with all his contemporaries and predecessors, knew nothing about any aggregate *Iliad*, but was accustomed to read and hear only those sixteen distinct epical pieces into which Lachmann would dissect the *Iliad*, each of the sixteen bearing a separate name of its own—no compilation then for the first time made by the hands of Pindaricus could have effaced the established habit, and planted itself in the general convictions of Greece as that primitive

believe, and the Scholia on Pindarus edited by Kinkel (see *Die Alexandriner-Scholia*, Leipzig, p. 1) specifies the four poems (*Demodocus* was not employed on the task. *Alcibiades* had already in a sort of Pindarus for the term of the Alexandrian critics, who named separately other *Iliads* of theirs, *Odysseus*, *Memnon*, &c.) only when they diverged from this volume; we think also that it formed the original form whence those other *Iliads* were first drawn, which are cited in the Pindarus-Scholia at several passages (p. 50—52).

Wolke supports the Pindaricus

MS. as having been either lost or corrupted away when Kinkel took *Alcibiades* (see *Supra* Critique, p. 285—286).

Germany, Leipzig, 1840; Homer, *Part I*, p. 101—102; also his comment, *Part II*, p. 104. The alleged introduction of *Demodocus*, and *Alcibiades*, according to Kinkel, from *Part I*, p. 101—102.

The whole state respecting the Pindaricus remains undisturbed and unchanged by Criticism, *Demodocus* for Pindarus, and *Alcibiades*, vol. I, p. 100—101. Unfortunately we cannot get beyond mere conjecture and post-hoc.

Homeric production. Had the sixteen pieces remained dissimilar and individualised down to the time of Ptolemaeus, they would in all probability have continued so ever afterwards; nor could the extensive changes and transpositions which (according to Lachmann's theory) were required to work them down into our present *Iliad*, have obtained at that late period universal acceptance. Assuming it to be true that such changes and transpositions did really take place, they must at least be referred to a period greatly earlier than Ptolemaeus or Sabinus.

The whole tenor of the poems themselves confirms what is here remarked. There is nothing either in the *Iliad* or *Odyssey* which smears of modernity, applying that term to the age of Ptolemaeus; nothing which brings to our view the alterations, brought about by two centuries, in the Greek language, the coined money, the habits of writing and reading, the despotisms and republican governments, the close military array, the improved construction of ships, the Amphiktyonic conventions, the mutual frequentation of religious festivals, the Oriental and Egyptian rites of religion, &c., familiar to the latter epoch. These alterations Crœsus and the other literary friends of Ptolemaeus could hardly have failed to notice even without design, had they then for the first time undertaken the task of piecing together many self-existent epics into one large aggregate. Everything in the two great Homeric poems, both in substance and in language, belongs to an age two or three centuries earlier than Ptolemaeus. Indeed even the interpolations (or those passages which on the best grounds are pronounced to be such) betray no trace of the sixth century before Christ, and may well have been heard by Archilochus and Kallinos—in some cases even by Arctinus and Hesiod—as genuine Homeric matter.

Nothing in the Homeric poems of ideas or customs belonging to the age of Ptolemaeus.

1. "I will allow both the uniformity of coloring and the uniformity of coloring which pervades the Homeric poems, also the strong line by which they stand distinguished from the other Greek poems."—"Some appearance in its youth, being in those fragments, in modern words, in ancient forms, and in the manner of expression." (Ptolemaeus, p. 100; compare p. 101.)

The reader might find this journey the easiest to the study and use of

Archilochus ("old-Homeric Homeric coloring," "old-Homeric Homeric coloring"). This is a very exaggerated estimate of the homogeneity of Archilochus; but of any tale the ancient world was ancient and original, and Archilochus only carried it down to his time, and by intervening additions; in fact, if we are to preserve the ancient world, we must preserve the ancient world, and the ancient world is hardly consistent with Ptolemaeus' theory.

As far as the evidence on the one, as well internal as external, enable us to judge, we were warranted in believing that the *Iliad* and *Odyssey* were recited substantially as they now stand (always allowing the partial divergence of text and interpolations) in 776 B.C., our first trustworthy mark of Greek time. And this ancient date—let it be what it is—the best authenticated fact, as it is also the most important attribute of the Homeric poems, considered in reference to Greek history. For they thus afford us an insight into the ante-historical character of the Greeks—enabling us to trace the subsequent forward march of the nation, and to seize instructive contrasts between their former and their later condition.

Rejecting, therefore, the idea of compilation by Pseudostratus, and referring the present state of the *Iliad* and *Odyssey* to a period more than two centuries earlier, the question still remains, by what process, or through whose agency, they reached that state? Is each poem the work of one author, or of several? If the latter, do all the parts belong to the same age? What ground is there for believing that any or all of these parts existed before as separate poems, and have been accommodated to the place in which they now appear by more or less systematic alteration?

The acute and valuable Prolegomena of Wolf, half a century ago, powerfully turned the attention of scholars to the necessity of considering the *Iliad* and *Odyssey* with reference to the age and society in which they arose, and to the material differences in this respect between Homer and more recent epic poets.¹ Since that time an elaborate study has been bestowed upon the early

¹ See Wolf, *Proleg.* 2. vii. p. xlii.

² Wolfen takes position against an opinion not merely of his, but of Strauss in his *Introduction to Virgil*, p. 11. Strauss, in his *Introduction to Virgil*, p. 11, says, "The Homeric poems are not the work of one man, but of many, and of many ages."

A scholar and writer attempts to establish the Homeric poems with reference to their age. It is to be seen in the *Introduction to the Iliad*, p. 11. "The Homeric poems are not the work of one man, but of many, and of many ages." The Homeric poems are not the work of one man, but of many, and of many ages. The Homeric poems are not the work of one man, but of many, and of many ages.

An interesting and interesting account of the state of the Homeric poems during the last fifty years, under the name of Wolf, is given in the *Introduction to the Iliad*, p. 11. "The Homeric poems are not the work of one man, but of many, and of many ages." The Homeric poems are not the work of one man, but of many, and of many ages. The Homeric poems are not the work of one man, but of many, and of many ages.

meditations of poetry (Epopoëse) among other nations; and the German critics especially, among whom this description of literature has been most cultivated, have selected it as the only appropriate analogy for the Homeric poems. Such poetry, consisting for the most part of short artless effusions, with little of deliberate or far-sighted combination, has been assumed by many critics as a fit standard to apply for measuring the rapidity of the Homeric age; an age exclusively of speakers, singers, and hearers, not of readers or writers. In place of the unbounded admiration which was felt for Homer, not merely as a poet of detail, but as constructor of a long epic, at the time when Wolf wrote his *Prolegomena*, the tone of criticism passed to the opposite extreme, and attention was fixed entirely upon the details in the arrangement of the *Iliad* and *Odyssey*. Whatever was to be found in them of symmetry or prevailing system was pronounced to be accidentally post-Homeric. Under such preconceived anticipations Homer seems to have been generally studied in Germany during the generation succeeding Wolf, the negative portion of whose theory was usually admitted, though as to the positive substitute—what explanation was to be given of the history and present constitution of the Homeric poems—there was by no means the like agreement. During the last ten years, however, a contrary tendency has manifested itself; the Wolfian theory has been re-examined and shaken by Nitzsch, who, as well as O. Müller, Weidman, and other scholars, have revived the idea of original Homeric unity, under certain modifications. The change in Goethe's opinion, coincident with this new direction, is recorded in one of his latest works.¹ On the other hand, the original opinion of Wolf has also been reproduced within the last five years, and fortified with several new observations on the text of the *Iliad*, by Lachmann.

Homeric unity—generally ignored by German critics in the last generation, is now again partially revived.

The point is thus still under controversy among able scholars, and is probably destined to remain so. For in truth our means of knowledge are so limited, that no man can produce arguments

¹ In the 45th volume of his collected *die Kritisches Nachlass* (Munich, 1860), works, in the fifth lecture, "Homer," Prähistorie, p. 41, such ideas; compare G. Lange, *Volks-*

better informed than we are, except in so far as they could profit by the analogies of the cyclic and other epic poems, which would doubtless in many cases have afforded valuable aid.

Nevertheless no clerical scholar can be easy without some opinion respecting the authorship of these Homeric poems. And the more defective the evidence we possess, the more essential is it that all that evidence should be marshalled in the clearest order, and its bearing upon the points in controversy distinctly understood beforehand. Both these conditions seem to have been often neglected, throughout the long-continued Homeric discussion.

To illustrate the first point :—Since two poems are comprehended in the problem to be solved, the natural process would be, first to study the *essence* of the two, and then to apply the conclusions thence deduced as a means of explaining the other. Now the *Odyssey*, looking at its aggregate character, is incomparably more easy to comprehend than the *Iliad*. Yet most Homeric critics apply the microscope at once, and in the first instance, to the *Iliad*.

To illustrate the second point :—What evidence is sufficient to negative the supposition, that the *Iliad* or the *Odyssey* is a poem originally and intentionally cast? Not simply particular gaps and contradictions, though they be even gross and numerous; but the preponderance of those proofs of mere unpreparedness over the other proofs of designed adaptation scattered throughout the whole poem. For the poet (or the co-operating poets, if more than one) may have intended to compose an harmonious whole, but may have realised their intention incompletely, and left partial failure; or perhaps the contradictory lines may have crept in through a corrupt text. A survey of the whole poem is necessary to determine the question; and this necessity, too, has not always been attended to.

~~It~~ had happened that the *Odyssey* had been preserved to us alone, without the *Iliad*, I think the dispute respecting Homeric unity would never have been raised. For the former is, in my judgment, pervaded almost from beginning to end by marks of designed adaptation; and the special facts which Widd. W.

Method of studying the two poems of Homeric unity.

Müller, and R. Thiersch,¹ have staged out for the purpose of disproving such unity of intention, are so few and of so little importance, that they would have been universally regarded as mere instances of haste or carelessness on the part of the poet, had they not been seconded by the far more powerful battery opened against the *Iliad*. These critics, having laid down their general presumptions against the unity of the long epics, illustrate their principles by exposing the many flaws and features in the *Iliad*, and then think it sufficient if they can show a few similar defects in the *Odyssey*—as if the breaking up of Homeric unity in the former naturally entailed a similar weakness with regard to the latter; and their method of proceeding, contrary to the rule above laid down, puts the more difficult problem in the foreground, as a means of solution for the reader. We can hardly wonder, however, that they have applied their observations in the first instance to the *Iliad*, because it is in every man's interest the

Odyssey to be treated first, as it is more complete and better than the *Iliad*.

more marked, striking and impressive poem of the two—and the character of Homer is more intimately identified with it than with the *Odyssey*. This may serve as an explanation of the course pursued; but be the case as it may in respect to comparative poetical merit, it is not the less true, that as an aggregate, the *Odyssey* is more simple and easily understood, and therefore ought to come first in the order of analysis.

Odyssey—
epic of the
journey
characterized
by variety
and
interest.

Now, looking at the *Odyssey* by itself, the proof of a unity of design seems unquestioned and everywhere to be found. A premeditated structure, and a concentration of interest upon one point here under well-defined circumstances, may be traced from the first book to the twenty-third. *Odysseus* is always either directly or indirectly kept before the reader, as a warrior returning from the fallow of glory at Troy, exposed to manifold and protracted calamities during his return home, on which his whole soul is so bent that he refuses even the immortality offered by Calypso;—a victim, moreover, even after his return, to ungodly injury and insult from the suitors, who have long been plundering his property and dishonouring his house; but at length obtaining, by

¹ *Recherches Critiques, Historiques, Littéraires et Philosophiques sur l'Épique d'Homère* (Paris, 1802, 1803), pp. 4-12.

valour and cunning united, a signal revenge which restores him to all that he had lost. All the persons and all the events in the poem are subsidiary to this main plot: and the divine agency, necessary to satisfy the feeling of the Homeric man, is put forth by Poseidon and Athene, in both cases from dispositions directly bearing upon Odysseus. To appreciate the unity of the *Odyssey*, we have only to read the objections taken against that of the *Iliad*—especially in regard to the long withdrawal of Achilles, not only from the scene, but from the memory—together with the independent prominence of Ajax, Diomedes and other heroes. How far we are entitled from hence to infer the want of promiscuous unity in the *Iliad*, will be presently considered; but it is certain that the constitution of the *Odyssey* in this respect everywhere demonstrates the presence of such unity. Whatever may be the interest attached to Penelope, Telemachus, or Eumæus, we never disconnect them from their association with Odysseus. The present is not the place for collecting the many marks of artistic structure dispersed throughout this poem: but it may be worth while to remark, that the final catastrophe realised in the twenty-second book—the slaughter of the suitors in the very house which they were profaning—is distinctly and prominently marked out in the first and second books, prearranged by Telemachus in the eleventh, by Athene in the thirteenth, and by Helen in the fifteenth, and gradually nurtured by a series of suitable predilections, throughout the eight books preceding its occurrence.¹ Indeed what is principally evident, and what has been often noticed, in the *Odyssey*, is, the admirable flow both of the narrative and the events; the absence of that rise and fall of interest which is sufficiently conspicuous in the *Iliad*.

To set against these evidences of unity, there ought at least to be some strong cases produced of occasional incoherence or contradiction. But it is remarkable how little of such counter-evidence is to be found, although the arguments of Wolf, W. Müller, and B. Thiersch stand in *ostentatious* need of it. They have discovered only one instance of probable inconsistency in the parts—the number of days occupied by the absence of Telemachus at Pylus and

Telemachus says that he was in Pylus for twenty days.

¹ Compare I. 128; II. 242 & 243; see also three former books; XI. 125; XII. 127, 128, 129; also VII. 225.

unexpected meeting and recognition takes place under the roof of Eumæus—not can any epic poem ever have described that meeting and recognition without giving some account how Odysseus came thither. Moreover the first two books of the *Odyssey* distinctly lay the ground, and carry expectation forward, to the final catastrophe of the poem—treating Telemachus as a subordinate person, and his expedition as merely provisional towards an ulterior result. Nor can I agree with W. Miller, that the real *Odyssey* might well be supposed to begin with the fifth book. On the contrary, the exhibition of the suitors and the Ithacanians agone, presented to us in the second book, is absolutely essential to the full comprehension of the books subsequent to the thirtieth. The suitors are far too important personages in the poem to allow of their being first introduced in so informal a manner as we read in the sixteenth book: indeed the posing dilemma of Achæus (xii. 516, 517) and Eumæus (xiv. 41, 65) to the suitors, presuppose acquaintance of them on the part of the hearer.

Lastly, the twofold discussion of the gods, at the beginning of the first and fifth books, and the double interference of Achæus, far from being a needless repetition, may be shown to suit perfectly both the generic epical conditions and the unity of the poem.¹ For although the final consummation, and the organization of measures against the suitors, was to be accomplished by Odysseus and Telemachus jointly, yet the march and adventures of the two, until the moment of their meeting in the dwelling of Eumæus, were essentially distinct. But according to the religious ideas of the old epic, the presiding direction of Achæus was necessary for the safety and success of both of them. Her first interference awakes and inspires the son, her second produces the liberation of the father—constituting a point of union and common origination for two lines of adventure in both of which she takes warmest interest, but which are necessarily for a time kept apart in order to coincide at the proper moment.

Double plot, and double direction of events, are not only consistent, but the *Odyssey*.

¹ W. MILLER is not content to saying that in the first chapters of the poem, two persons, accordingly which he does not perceive, take place and proceed to such heights as necessitate

to *Odysseus*, in the first book, though Achæus' wife him to do so. He indeed pretends to be aware, yet he fails to distinguish in *Odysseus* the nature of *Odysseus*, but he fails

It will thus appear that the twice-repeated agent of the gods in the *Odyssey*, bringing home as it does to one and the same divine agent that double start which is essential to the scheme of the poem, coincides better with the supposition of promediated unity than with that of distinct self-existent parts. And naturally the manner in which Telemachus and Odysseus, both by different roads, are brought into meeting and conjunction, at the dwelling of Eumæus, is something not only contrived, but very skillfully contrived. It is needless to advert to the highly interesting character of Eumæus, rendered available as a rallying point, through its different ways, both to the father and the son, ever and above the sympathy which he himself inspires.

If the *Odyssey* be not an original unity, of what self-existent parts can we imagine it to have consisted? To this question it is difficult to imagine a satisfactory reply: for the supposition that Telemachus and his adventures may once have formed the subject of a separate poem, apart from Odysseus, appears inconsistent with the whole character of that poem which stands in the poem, and with the events in which he is made to take part. We could better imagine the distribution of the adventures of Odysseus himself into two parts—one containing his wanderings and return, the other handling his ill-treatment by the suitors and his final triumph. But though either of these two subjects might have been adequate to furnish out a separate poem, it is nevertheless certain, that as they are presented in the *Odyssey*, the former cannot be divorced from the latter. The simple return of Odysseus, as it now stands in the poem, could satisfy no one as a final close, so long as the suitors remain in possession of his house, and forbid his reunion with his wife. Any poem which treated his wanderings and return separately, must have represented his reunion with Penelope and restoration to his home as following naturally upon his arrival in Ithaca—thus taking little or no notice of the suitors. But this would be a capital mutilation of the actual epic narrative, which considers the suitors at home as an essential portion of the dwelling of the wreck-suffering hero,

as already intimated by the first book that he felt great difficulty in protecting his home, because of the wrath manifested against him by Eumæus.

Arriving at such conclusions from the internal evidence of the *Odyssey*,¹ we can apply them by analogy to the *Iliad*. We learn something respecting the character and capacities of that early age which is left no other monument except these two poems. Long continuous epics (it is observed by those who support the views of Walf, with an artificial structure, are inconsistent with the capacities of a rude and non-writing age. Such epics (we may reply) are not inconsistent with the early age of the Greeks, and the *Odyssey* is a proof of it; for in that poem the integration of the whole, and the composition of the parts, must have been simultaneous. The analogy of the *Odyssey* enables us to reject that preconception under which many impatient critics sit down to the study of the *Iliad*, and which induces them to explain all the incoherence of the latter by breaking it up into smaller units, as if short epics were the only manifestation of poetical power which the age admitted. There ought to be no reluctance in admitting a possible coherence and premeditated unity of parts, in so far as the parts themselves point to such a conclusion.

That the *Iliad* is not so essentially one piece as the *Odyssey*, every man agrees. It includes a much greater multiplicity of events, and, what is yet more important, a greater multiplicity of prominent personages: the very indistinct title which it bears, as contrasted with the speciality of the name *Odyssey*, marks the difference at once. The parts stand out more conspicuously from the whole, and stand more readily of being felt and appreciated in detached recitation. We may also add, that it is of more unequal execution than the *Odyssey*—often rising to a far higher pitch of grandeur, but also occasionally tamer: the story does not move on continuously; incidents occur without plausible motive, nor can we shut our eyes to evidences of incoherence and contradiction.

¹ With adults, in most uneducated language, the longest and best structure of the *Odyssey*. Against this positive internal evidence for early age general presumption, that no such poem could be composed by a poet of the age of Homer, is the oldest tradition, which attributes the *Odyssey* to a younger poet, and

Christian monuments (see *Journal of the Royal Academy of Letters*, 1788, p. 100). The *Odyssey* is, in fact, not a single poem, but a collection of many separate poems. As the age of Homer is, in fact, not as the tradition says, the *Odyssey* is, in fact, a collection of many separate poems. (See *Journal of the Royal Academy of Letters*, 1788, p. 100.)

To a certain extent, the *Iliad* is open to all these remarks, though Wolf and Wilhelm Müller, and above all Lachmann, exaggerate the case in degree. And from hence has been deduced the hypothesis which treats the parts in their original state as separate integers, independent of and unconnected with each other, and forced into unity only by the afterthought of a subsequent age; or sometimes not even themselves as integers, but as aggregates grouped together out of fragments still smaller—short epics formed by the condensation of still shorter songs. Now there is some plausibility in these remarks, so long as the discrepancies are looked upon as the whole of the case. But in point of fact they are not the whole of the case: for it is not less true, that there are large portions of the *Iliad* which present positive and undeniable evidences of coherence as antecedent and consequent, though we are occasionally perplexed by inconsistencies of detail. To deal with these latter is a portion of the duties of a critic. But he is not to treat the *Iliad* as if inconsistency prevailed everywhere throughout its parts; for coherence of parts—symmetrical coherence and consequence is discernible throughout the larger half of the poem.

Now the Waltham theory explains the gaps and contradictions throughout the narrative, but it explains nothing else. If (as Lockmann thinks) the *Hild* originally consisted of sixteen songs or little substantive epics (Lockmann's sixteen songs cover the space only as far as the *Hild* book or the death of Hrothgar, and two more songs would have to be admitted for the 12th and 14th books)—not only composed by different authors, but by each² without any view to conjunction with the rest—we have then no right to expect any intrinsic continuity between them; and all that consistently which we now find must be of extraneous origin. Where are we to look for the origin? Lockmann follows Volk in ascrib-

Waltham theory explains the gaps and contradictions throughout the narrative, but it explains nothing else.

¹ *Leucisaurus* means in adult size ~~equal~~ with the company of young, but including magnitude of another size, and a "happening" to give what will have a record to it. The *Leucisaurus* was like *Leucisaurus* from 19, but below at the end of the 19th book. The statement says (including the four last books, from 19 to 20 inclusive).

a consideration of the literary, but he is concerned with literature. (Petersen indicated again that the film, *Adaptation*, the film, *Adaptation*, was not a film, but a book.)

This reduction of consolidated information to a certain set of categories of the system helps

ing the whole constructive process to Polistratus and his associates, at a period when the creative poetic faculty is admitted to have died out. But upon this supposition Polistratus (or his associates) must have done much more than omit, transpose, and interpolate, here and there; he must have gone far to rewrite the whole poem. A great poet might have recast pre-existing separate songs into one comprehensive whole, but no mere arranger or compiler would be competent to do so; and we are thus left without any means of accounting for that degree of continuity and consistency which runs through so large a portion of the *Elid*, though not through the whole. Therefore that the poem as we read it grew out of staves not originally designed for the places which they now occupy, involves us in new and inextricable difficulties when we seek to decide either the mode of cohesiveness or the degree of existing unity.¹

Admitting then premeditated adaptation of parts to a certain extent as essential to the *Elid*, we may yet inquire whether it was produced all at once or gradually enlarged—whether by one author or by several; and if the parts be of different age, which is the primitive kernel, and which are the additions.

Wolker, Lange, and Nitzsch² treat the *Romanic* poems as representing a second step in advance in the progress of popular poetry. First comes the age of short narrative songs; next, when these have become numerous, there arise constructive stanzas

¹ The advocates of the *Wolker* theory appear to feel difficulties which beset it. In their language is wanting in respect to those supposed primary constituent staves. Nitzsch's *Leichnamen* tells us, that the original poems were much finer poetry than the *Elid* as we now read it; in another place, that it cannot be now discovered what they originally were; nay, he further admits (as mentioned in the preceding note) that the poet of the *Elid* must have had experience of the *Wolker*.

But if it be granted that the original constituent staves were so composed, though by different poets, so that the more recent were adapted to the earlier, with more or less authority and success, this brings us into nearly identical conditions of the problem. It is a total negation of the *Wolker* hypothesis, which, however, Leichmann tells must be denied, and does indeed with ability, though his modification of

it has, to my mind, only the effect of repeating the internal weakness by carrying it out into something detailed and positive. I will add, in respect to the *Wolker* stanzas, as distinctive as a characteristic manifestation of the poem.

—N. But I feel myself somewhat dissatisfied from that critical feeling, on the strength of which, he and his party ascribe stanzas, and different stanzas of the kind of German poetry; I think the objection against the continuity of the narrative are often founded upon facts which the ancient stanzas and Mr. Nitzsch's Knight had already pronounced to be interpolations; I think much of his objections are founded upon these undoubted facts. ² Lange's step of a complete and unbroken copy.

³ Lange, in his *Wörter zu Goethe*, *Volks- und Märchen der Elide*, p. 11 (note); Nitzsch, *Leichnamen*, Introduction 2, *Leichnamen*, p. 11.

who must and ⁴blend together many of them into a larger aggregate conceived upon some scheme of their own. The age of the epic is followed by that of the epopee—short spontaneous effusions preparing the way, and furnishing materials, for the architectonic genius of the poet. It is further presumed by the above-mentioned authors that the pre-Homeric epic included a great abundance of such smaller songs,—a fact which admits of no proof, but which seems corroborated by some passages in Homer, and is in itself nearly improbable. But the transition from such songs, assuming them to be ever so numerous, to a combined and continuous poem, forms an epoch in the intellectual history of the nation, implying mental qualities of a higher order than those upon which the songs themselves depend. Nor is it to be imagined that the materials pass unaltered from their first state of isolation into their second state of combination. They must of necessity be recast, and undergo an adapting process, in which the genius of the organizing poet consists; nor can we hope, by simply knowing them as they exist in the second stage, ever to divine how they stood in the first. Such, in my judgment, is the right conception of the Homeric epopee,—an organizing poetical mind, still preserving that freshness of observation and vivacity of details which constitute the charm of the ballad.

Nothing is gained by studying the Illad as a collection of fragments once independent of each other: no portion of the poem can be shown to have ever been so, and the supposition introduces difficulties greater than those which it removes. But it is not necessary to affirm that the whole poem, as we now read it belonged to the original and preconceived plan.⁵ In this respect the Illad produces upon my mind an im-

⁴ Even Aristotle, the great builder up of the edifice of Homer as he is often represented, found some confusion in apparent, on which he was obliged to be content with simply expressing his doubts.

⁵ And Herford, German critic, in his work on the Interpretation of Homer (Cambridge, 1806, p. 10, 11).

⁶ See especially the Introduction

modern writers before whom good interpretation collapses before the truth, not that their definitions, upon speculative considerations, of style, sense, and form give fine possible glimpses, and appear to

This section contains many allusions to the structure of the Illad, some of them very well founded, though there are many from which I dissent.

position totally different from the *Odyssey*. In the latter poem, the characters and incidents are fewer, and the whole plot appears of one projection, from the beginning to the death of the suitors: none of the parts look as if they had been composed separately and inserted by way of addition into a pre-existing smaller poem. But the *Iliad*, on the contrary, presents the appearance of a house built upon a plan comparatively narrow and subsequently enlarged by successive additions. The first book, together with the eighth, and the books from the eleventh to the twenty-second inclusive, seem to form the primary organization of the poem, then properly an *Achilleid*: the twenty-third and twenty-fourth books are, perhaps, additions at the tail of this primitive poem, which still leave it nothing more than an enlarged *Achilleid*. But the books from the second to the seventh inclusive, together with the tenth, are of a wider and more comprehensive character, and convert the poem from an *Achilleid* into an *Iliad*.¹ The primitive frontispiece, inscribed with the name of Achilles and its direct consequences, yet remains after it has ceased to be coextensive with the poem. The parts added, however, are not necessarily inferior in merit to the original poem: so far is this from being the case, that amongst them are comprehended some of the noblest efforts of the *Quesada* epic. Nor are they more recent in date than the original; strictly speaking, they must be a little more recent, but they belong to the same generation and state of society as the primitive *Achilleid*. These qualifications are necessary to keep apart different questions which, in discussions of Homeric criticism, are too often confounded.

If we take those portions of the poem which I imagine to have constituted the original *Achilleid*, it will be found that the sequence of events contained in them is more rapid, more unbroken, and more intimately knit together in the way of cause and effect, than in the other books. Heyne and Lachmann indeed, with other objecting critics, complain of the action in them as being too much crowded and hurried, since one day lasts

¹ In reference to the books from the eighth to the twenty-second, Mr. Miller, *Memoriae Viriatae, Adversus*, vol. ii. p. 110-112, agrees with the observations of Wilkins.

The great and capital misfortune which prostrates the strength of the Greeks and renders them incapable of defending themselves without Achilles, is the disablement by wounds of Agamemnon,

Disabling-
ment of

book.

Diomedes, and Odysseus: so that the defence of the wall and of the ships is left only to heroes of the second magnitude (Ajax alone excepted), such as Idomeneus, Leonteus, Polydorus, Menelaus, Menestheus, &c. Now it is remarkable that all these three first-rate chiefs are in full force at the beginning of the seventh book: all three are wounded in the battle which that book describes, and at the commencement of which Agamemnon is full of spirit and courage.

Nothing can be more striking than the manner in which Homer concentrates our attention in the first book upon Achilles as the hero, his quarrel with Agamemnon, and the obstacles to the Greeks which are held out as about to ensue from it, through the intervention of Thetis with Æon. But the incidents dwell upon from the beginning of the second book down to the sequel between Hector and Ajax in the seventh, animated and interesting as they are, do nothing to realize this promise. They are a splendid picture of the Trojan war generally, and extremely suitable to that larger title under which the poem has been immortalized—but the consequences of the anger of Achilles do not appear until the eighth book. The tenth book, or Delonius, is also a portion of the Iliad, but not of the Achilles; while the ninth book appears to me a subsequent addition, nowise harmonising with that main stream

scarcely of giving help, when he meets Menestheus swooning out of the field, fainting with a severe wound, and inspiring the sorrow. He supports the wounded warrior to his tent, and arranges to his attending; but before this operation is fully completed, the Greeks last has been totally dispersed, and the Trojans are on the point of setting fire to the ships. Patroclus then hurries to Achilles to provide the desperate part which hangs over them all, and succeeds in obtaining his permission to take the field at the head of the Myrmidons. The way is

which Patroclus is kept pressed to the house, as a tribute to his belated but spirited display when he drove forth to war,—his conduct between his characteristic gentleness and the ferocity of Achilles,—and the national trait of discomposure whereby he is made the vehicle of sympathy for the part of his fellow-countrymen, and tends to the inspiring consequence,—all these exhibit a degree of spiritual life, in the nature of the sensitive Achilles, to which nothing is found equalled in the whole series of the Iliad.

There could not have had present to his mind the main event of the ninth book,—the outpouring of profane blasphemy by the Greeks, and then Agamemnon especially, before Achilles, coupled with formal offers to restore Briseis and pay the highest compen-

ON THE POSSIBLE OCCURRENCE, 227
[1890, 19]

There their spleen died in weakness: so

I imagine the Scholiast and Wayne in discussing Homer as ignorant of tragedy,—and as referring to any ancient dramatic production.

Agamemnon, before the time spent,—"The Vulture's beak" was not yet laid down, and the eagle, for there he, the eagle was the king of my nation; but if Agamemnon, was, however, the great eagle, he, the eagle, probably was not yet laid down, and the eagle was the king of my nation." (19)

—Agamemnon, before the time spent,—"The Vulture's beak" was not yet laid down, and the eagle, for there he, the eagle was the king of my nation; but if Agamemnon, was, however, the great eagle, he, the eagle, probably was not yet laid down, and the eagle was the king of my nation." (19)

There, Agamemnon, before the time spent,—"The Vulture's beak" was not yet laid down, and the eagle, for there he, the eagle was the king of my nation; but if Agamemnon, was, however, the great eagle, he, the eagle, probably was not yet laid down, and the eagle was the king of my nation." (19)

of Patroclus; but that he should remain unmoved by restitution, by seditious supplications, and by the richest atoning presents, plundered from the Greeks, indicates an implausibility such as neither the first book, nor the books between the eleventh and the seventeenth, convey.¹

It is with the Grecian agent in the beginning of the second book that the *Illad* (as distinguished from the *Achilleis*) commences,—continued through the Catalogue, the muster of the two armies, the single combat between Menelaus and Paris, the renewed promissory battle caused by the arrow of Pandarus, the (Ephyraïan or) personal circuit of Agamemnon round the army, the Arctian or brilliant exploits of Diomedes, the visit of Hector to Troy for purposes of amission, his interview with Andromaché, and his combat with Ajax—down to the seventh book. All these are beautiful poetry, presenting to us the general Trojan war and its conspicuous individuals under different points of view, but leaving no room in the reader's mind for the thought of Achilles. Now the difficulty for an enlarging poet was, to pass from the Achilles in the first book to the *Illad* in the second, and it will accordingly be found that here is an awkwardness in the structure of the poem which cannot on the poet's behalf (ancient or modern) be not satisfactorily explained.

In the first book, Zeus has promised Thetis that he will punish the Greeks for the wrong done to Achilles: in the beginning of the second book, he deliberates how he shall fulfil the promise, and sends down for that purpose "mischievous Oeniræ" (the Deum-Only) to visit Agamemnon in his sleep, to assure him that the gods have now with one assent consented to put Troy into his hands, and to exhort him forthwith to the assembling of his army for the attack. The ancient commentators were here perplexed by the circumstance that Zeus puts a falsehood into the mouth of Oeniræ. But there seems no more difficulty in explaining this than in the narrative of the book of 3 Kings (chap. xxi. 38), where

¹ In remark on the ninth book of the *Illad*, *Philologus* (Joh. Krieger) writes the 9th of book p. 27 after a passage from *Illad* (the interpretation) *Memories*, p. 12 to the following effect:—"Hector offers a sacrifice after the capture of Patroclus

where you see nothing before Hector's sacrifice, at which Hector himself, at Ephyraïan was present. According to the opinion of the poet, the sacrifice of Hector is a further expression of opinion by Hector in the *Illad*—see *Philologus* *Memories*, 1855, p. 124.

Transition from the Achilles into the Illad in the beginning of the second book.

an conversation between Priam and Helen on the walls of Troy—by admitting the supposition that the old king in the tenth year of the war did not know the persons of Agamemnon and the other Greek chiefs. This may serve as an explanation of the debates protracted by Agamemnon towards his assembled host; but it does not at all explain the tame and empty intervention of Odysseus!

If the initial incident of the second book, whereby we pass out of the Achilleia into the Iliad, is awkward, so also the final incident of the seventh book, immediately before we come back into the Achilleia, is not less unsatisfactory—I mean the construction of the wall and ditch round the Greek camp. As the poem now stands, no plausible reason is assigned why this should be done. Nestor proposes it without any constraining necessity: for the Greeks are in a course of victory, and the Trojans are making offers of compromise which imply conscious weakness—while Diomedes is so confident of the approaching ruin of Troy, that he dissuades his comrades from receiving even Helen herself if the surrender should be tendered. "Many Greeks have been slain," it is true, as Nestor observes; but an equal or greater number of Trojans have been slain, and all the Greek heroes are yet in full force: the absence of Achilles is not even adverted to.

Now this account of the building of the fortification seems to

10. Either Odysseus or Greek historians, in v. 13, doubt whether the building of the second wall was ordered by the Greeks, Homer, or by one of the latter leaders—"to whom the speech of Agamemnon, already in place of the ditch upon his army, is a common source of the error which used in the sixth book assigned by a later legend, and recorded in the name of an imaginary daughter of one of the sons of the hero." The single line seems to the Greek age as "an entire episode, coming in the poem just with an unexpected joy, in which the drawing and digging Agamemnon is the chief character."

The reader or legend, however, which is here applied to the second book appears to me forced and incorrect (but I might attribute the superfluities of the opening legend, though its way of introducing it is well executed). The second book seems

to my judgment not so serious as any part of the poem.

I think also that the words attached to v. 13, which in the sixth book are a description of those in the second, instead of the reverse, or, at least—because it seems probable that the sixth book is an addition made to the poem after the battle between the first and the eighth had been already recorded—it is certainly impossible after the account of the fortification, contained in the seventh book, that it should be one of the events of the poem. The reader of the Iliad is to believe himself that this line had been the last out of sight and out of sight, is a supposition for which there was no room in the original Iliad, when the sixth and seventh books belonged to the same succession to the first, but which after that suddenly to any person reading our present Iliad.

11. Ibid. vi. 527.

ment of sentence on the part of the Greeks as well as of the Trojans formed the close of the battle described in the eighth book; it has not the slightest bearing upon the events of the eleventh or the following books: it goes to make up the general picture of the Trojan war, but lies quite apart from the *Achilleid*. And this is one mark of a portion subsequently inserted—that though fitted on to the parts which precede, it has no influence on those which follow.

If the proceedings of the combatants on the plain of Troy, between the first and the eighth book, have no reference either to Achilles or to an Achilles, we find Zeus in Olympus still more completely putting that hero out of the question, at the beginning of the fourth book. He is in this last-mentioned passage the Zeus of the *Iliad*, not of the *Achilleid*. Forgetful of his promise to Thetis in the first book he discusses nothing but the question of continuance or termination of the war, and manifests anxiety only for the salvation of Troy, in opposition to the sub-Trojan goddesses, who prevent him from giving effect to the victory of Menelaus over Paris and the stipulated restitution of Helen—in which case of course the wrong offered to Achilles would remain unatoned. An attentive comparison will render it evident that the poet who composed the discussion among the gods, at the beginning of the fourth book, has not been careful to put himself in harmony either with the Zeus of the first book or with the Zeus of the eighth.

So soon as we enter upon the eleventh book, the march of the poem becomes quite different. We are then in a series of events, each paving the way for that which follows, and all conducing to the result promised in the first book—the reappearance of Achilles, as the only means of saving the Greeks from ruin—preceded by ample atonement,¹ and followed by the maximum both of glory and revenge. The intermediate career of Patroclus introduces new elements, which however are admirably woven into the scheme of the poem as disclosed in the first book. I shall not deny that

there are perplexities in the detail of events, as described in the lastmost of the Givens wall and before the ships, from the eleventh to the sixteenth books, but they appear only cases of partial confusion, such as may be reasonably ascribed to imperfections of text: the main sequence remains coherent and intelligible. We find no considerable events which could be left out without breaking the thread, nor any inconsistency between one considerable event and another. There is nothing between the eleventh and twenty-second books which is at all comparable to the inconsistency between the *Book of the fourth book* and the *Book of the first and eighth*. It may perhaps be true that the shield of Adithia is a superadded amplification of that which was originally announced in general terms—because the poet, from the eleventh to the twenty-second books, has observed such good economy of his materials, that he is hardly likely to have introduced one particular description of such disproportionate length, and having so little connexion with the series of events. But I am no reason for believing that it is an addition materially later than the rest of the poem.

It must be confessed that the supposition here advanced, in reference to the structure of the *Ilíad*, is not altogether free from difficulties, because the parts constituting the original *Agaméidē*¹ have been more or less altered or interpolated to suit the additions made to it, particularly in the eighth book. But it presents fewer difficulties than any other supposition, and it is the only means, so far as I know, of explaining the difference between one part of the *Ilíad* and another; both the continuity of structure, and the conformity to the existing *prose*, which

1 The reputation of a modern artist, I think, emerges by successive refinements in the present dimension, and more or less independent of any other dimension, although these refinements, the building of a new language, come about in a more gradual manner in the work of a more traditional composition, whereas, in the preceding terms of work, the work of the modern, American, and Spanish artists, is more direct, more immediate, and more fluid.

and in the earliest times the composer and the singer were one and the same person.¹ Now the individuals comprised in the Homeric Genæ, though doubtless very different among themselves in respect of mental capacity, were yet homogeneous in respect of training, means of observation and instruction, social experience, religious feelings and theories, &c., to a degree much greater than individuals in modern times. Fallible as our inferences are on this point, where we have only internal evidence to guide us, without any contemporary points of comparison, or any species of collateral information respecting the age, the society, the poets, the houses, or the language—we must nevertheless in the present case take coherence of structure, together with consistency in the tone of thought, feeling, language, customs, &c., as presumptions of one author; and the contrary as presumptions of several; allowing as well as we can for that inequality of excellence which the same author may at different times present.

Now the case made out against single-headed authorship of the *Odyssey* appears to me very weak; and those who dispute it are guided more by their *a priori* rejection of ancient epical unity than by any positive evidence which the poem itself affords. It is otherwise with regard to the *Iliad*. Whatever presumptions a disjointed structure, several apparent inconsistencies of parts, and large encroachment of actual matter beyond the speaking provinces, can suggest—may reasonably be indulged against the supposition that this poem all proceeds from a single author. There is a difference of opinion on the subject among the best critics which is probably not destined to be adjusted, since so much depends partly upon critical feeling, partly upon the general reasonings, in respect to ancient epical unity, with which a man sits down to the study. For the champions of unity, such as Mr. Payne Knight, are very ready

¹ The remedy of Hesiod, upon the supposition of the co-existence of poet, singer, and actor, and the same witness, are properly just.

of a preconceived scheme, but to imagine that the books from the eighteenth to the twenty-second, though forming part of that scheme or *Achilleis*, had yet been executed by another and an inferior poet. But it is to be remarked, first, that inferiority of poetical merit to a certain extent is quite reconcilable with unity of authorship; and secondly, that the very circumstances upon which Wolfe's unfavourable judgment is built, seem to arise out of increased difficulty in the poet's task, when he came to the crowning cantos of his designed *Achilleis*. For that which chiefly distinguishes these books is, the direct, innocent, and natural intervention of the gods and goddesses, formally permitted by Zeus—and the repetition of vast and fantastic conceptions to which such superhuman agency gives occasion; not omitting the battle of Achilles against Euxander and Eriolos, and the burning up of those rivers by Hephæstus. Now looking at this vein of ideas with the eyes of a modern reader, or even with those of a Greek critic of the literary age, it is certain that the effect is enfeebling; the gods, sublime elements of poetry when kept in due proportion, are here somewhat vulgarised. But though the poet here has not succeeded—and probably success was impossible, in the task which he has prescribed to himself—yet the mere fact of his undertaking it, and the manifest distinction between his employment of divine agency in these latter cantos as compared with the preceding, seems explicable only on the supposition that they are the latter cantos and come in designed sequence, as the consummation of a previous plan. The poet wishes to surround the coming forth of Achilles with the maximum of glorious and terrific circumstances: no Trojan enemy can for a moment hold out against him; the gods must descend to the side of Troy

Abstract

The second restriction put upon the

grade by June at the beginning of the school year, and the release of that information at the beginning of the school year, are critically parts of the assessment system.

It is difficult to determine whether the results of this study and problems in these two *populi* are to be ascribed to an epidemic, or only to be blamed on or limited to a "sympatric" disease, now recurrent, but rare and fatal, yet *Microgaster juncea* (Gahan) (Hymenoptera: Braconidae) is known to occur in similar places, Ohio, Mass. 1938, 1940. The infection in the mass of non-flowering

may himself have composed the letter: and such would be my belief, if I regarded plausibility of composition as an insupportable test. On this supposition we must conclude that the poet, while anxious for the addition of new and for the most part highly interesting matter, has not thought fit to recast the parts and events in such manner as to impart to the whole a prevailing thread of sentiment and organization, such as we see in the *Odyssey*.

That the *Odyssey* is of later date than the *Iliad*, and by a different author, seems to be now the opinion of most critics, especially of Payne Knight¹ and Mitford; though G. Miller leans to a contrary conclusion, at the same time adding that he thinks the arguments either way not very decisive. There are considerable differences of statement in the two poems in regard to some of the gods: Iris is messenger of the gods in the *Iliad*, and Heracles in the *Odyssey*; Aides, the dispenser of the winds in the *Odyssey*, is not named in the twenty-third book of the *Iliad*, but on the contrary, Iris invites the winds as independent gods to come and kindle the funeral pile of Patroclus; and unless we are to expunge the song of Demodochus in the eighth book of the *Odyssey* as spurious, Aphrodite there appears as the wife of Erymanthus—a relationship not known to the *Iliad*. There are also some other points of difference mentioned by Mr. Knight and others, which tend to justify the presumption that the author of the *Odyssey* is not identical either with the author of the *Iliad* or his enlarger, which G. Hermann considers to be a point unquestionable.² Indeed, the difficulty of supposing a long coherent poem to have been conceived, composed, and retained, without any aid of writing, appears to many critics even now insurmountable, though the evidences on the other side are in my view sufficient to outweigh any negative presumption thus suggested. But it is improbable that the same person should have power of memorial combination sufficient for composing two such poems, nor is there any proof to have upon us such a supposition.

Promoting a difference of authorship between the two poems,

¹ Mr. Knight places the *Iliad* about 700 years before the Christian era, and the *Odyssey* one century earlier to B.C. 600; a century.

² Hermann, *Proleg. ad Odys.* p. 41.

I feel less convinced about the supposed juniority of the *Odyssey*. The discrepancies in measure and language in the one and the other are so little important, that two different persons, in the same age and society, might well be imagined to exhibit as great ^{pat. par.} or even greater. It is to be reflected that the sub-
^{jects of the}jects of the two are heterogeneous, as as to conduct
^{same age}the poet, even were he the same man, into totally

different veins of imagination and illustration. The pictures of the *Odyssey* seem to delineate the same heroic life as the *Iliad*, though looked at from a distinct point of view: and the circumstances surrounding the residence of Odysseus in Ithaca are just such as we may suppose him to have left in order to attack Troy. If the scenes presented to us are for the most part peaceful, as contrasted with the incessant fighting of the *Iliad*, this is not to be ascribed to any greater sociality or civilization in the real heroes of the *Odyssey*, but to the circumstances of the hero whom the poet undertakes to adorn: nor can we doubt that the poems of Archilochus and Leschis, of a later date than the *Odyssey*, would have given us as much combat and bloodshed as the *Iliad*. I am not struck by those proofs of improved civilization which some critics affirm the *Odyssey* to present: Mr. Knight, who is of this opinion, nevertheless admits that the mutilation of Helenus, and the hanging up of the female slaves by Odysseus, in that poem, indicate greater barbarity than any incidents in the *Iliad* before Troy.¹ The more skilled and compact structure of the *Odyssey* has been often considered as a proof of its juniority in age: and in the case of two poems by the same author, we might plausibly contend that practice would bring with it improvement in the combining faculty. But in reference to the poems before us, we must reflect, first, that in all probability the *Iliad* (with which the comparison is made) is not a primitive but an enlarged poem, and that the primitive *Archilochus* might well have been quite as coherent as the *Odyssey*;—secondly, that between different writers, superiority in structure is not a proof of subsequent composition, inasmuch as we that hypothesis we should be compelled to admit that the last poem² of Archilochus would be an improvement upon the *Odyssey*;—thirdly, that even

PART II.

HISTORICAL GREECE.

CHAPTER I.

GENERAL GEOGRAPHY AND LIMITS OF GREECE.

GREECE Proper lies between the 36th and 40th parallels of north latitude, and between the 19th and 26th degrees of ^{east} east longitude. Its greatest length from Mount Olympus to Cape Tenedos may be stated at 350 English miles; its greatest breadth, from the western coast of Macedonia to Marseilles in France, at 180 miles; and the distance eastward from Andros to the Peloponnesus to the Magnesian mountains Herakle and the north of the Peninsula is about 150 miles. Altogether the area is somewhat less than that of Portugal.* In regard however to all attempts at determining the exact limits of Greece Proper, we may remark, first, that these limits seem not to have been very precisely defined even among the Greeks themselves; and next, that so large a proportion of the Hellenes were distributed among islands and colonies, and so much of their influence upon the world in general produced through their colonies, as to render the extent of their original domicile a matter of comparatively little moment to verify.

The chain called Olympus and the Graecopon mountains, ranging east and west and communicating with the Asian Sea at

* Compare *Greece, Statistics of the Kingdom of Greece*, p. 4; and *Encyclopædia*, Vol. I. col. 4, l. 100.

the Gulf of Therma near the fortieth degree of north latitude, is prolonged under the name of Mount Lignon until it touches the Adriatic at the Akrotaurion promontory. The country south of this chain comprehended all that in ancient times was regarded as Greece or Hellenic Proper, but it also comprehended something more. Hellenic Proper (or continuous Hellen, to use the language of Skylax and Dikæarchus) was understood to begin with the town and Gulf of Ambrosia: from thence northward to the Akrotaurion promontory lay the land called by the Greeks Epirus—occupied by the Chaonians, Molossians, and Thesprotians, who were termed Epirotes and were not esteemed to belong to the Hellenic aggregate. This at least was the general understanding, though Strabo and Alexander in their more distant sections seem to have been not less widely removed from the full type of Hellenism than the Epirotes were; while Herodotus is inclined to treat even Molossians and Thesprotians as Hellenic.¹

At a point about midway between the Egean and Ionian seas, Egean Olympus and Lignon are traversed nearly at right angles by the still longer and water chain called Pindus, which stretches in a line rather west of north from the northern side of the range of Olympus. The system to which these mountains belong seems to begin with the lofty masses of gneiss and mica-schist comprised under the name of Mount Boeotia or Boeotia (Bakardagh),² which is divided only by the narrow cleft containing the river Dris from the mountains of the Albanian

⁴ Herod. I, lib. 1, c. 11. The Molossians little praise for a Hellenic (Herod. I, c. 11).

⁵ The mountain system in ancient Macedonia and Epirus, south of Olympus, has been long and imperfectly

examined: see Dr. Grisebach, Reise durch Thessalien und nach Drama, in Geogr. Anz., vol. 1, No. 12, p. 111 seq. Grisebach, Thess., which contains much information respecting the local relations of these mountains as compared with the different towns and civilisations of them. The words of Skylax (lib. 1, c. 11), Herodotus, and Thales, that Boeotia, Thessalia, Macedonia, and Epirus called by a single name from the Adriatic to the Egean, are incorrect.

See Lattin's Travels in Northern Greece, vol. 1, p. 104; the pass of 'Antipatrios' near 'Antipatrios' through which the river Dris passes from the westward to fall into the Adriatic on the westward is the only point in this long chain from the river Dris to the north down to the coast of Greece.

Alps. From the northern face of Olympus, Pindus strikes off nearly southward, forming the boundary between Thessaly and Epirus, and meandering forth about the 38th degree of latitude the lateral chain of Othrys—which latter takes an easterly course, reaching the sea between Thessaly and the northern coast of Euboea. Southwest of Othrys, the chain of Pindus under the name of Tymphetæus still continues, until another lateral chain, called Ossa, projects from it again towards the east,—forming the lofty coast immediately south of the Malææ Gulf, with the narrow road of Thermopylæ between the two—and terminating at the Eubœan strait. At the point of junction with Ossa, the chain of Pindus divides into two branches; one striking to the westward of south, and reaching across Ætolia, under the names of Ankyraïus, Karion, Karax and Taphianus, to the promontory called Antivirkia, situated on the northern side of the narrow entrance of the Corinthian Gulf, over against the corresponding promontory of Rhion in Peloponnesus—the other trending south-east, and forming Parassus, Helicon, and Kithairon; indeed *Ægæon* and *Hymettos*, even down to the southernmost cape of Attica, *Sunium*, may be treated as a continuation of this chain. From the eastern extremity of Ossa, also, a range of hills, inferior in height to the preceding, takes its departure in a south-easterly direction, under the various names of —that is, *—Kalamis*, *Polos*, and *Tournaïos*. It is joined with Kithairon by the lateral communication, ranging from west to east, called *Paros*; while the celebrated *Pentelike*, abundant in marble quarries, constitutes its connecting link, to the south of *Paros*, with the chain from Kithairon to *Sunium*.

From the promontory of Antivirkia the line of mountains crosses into Peloponnesus, and stretches in a southerly direction down to the extremity of the peninsula called *Tenarus*, now *Cape Matapan*. Forming the boundary between Elis with Messenia on one side, and Arcadia with Laconia on the other, it bears the successive names of *Olenus*, *Parnachion*, *Pholœ*, *Erymanthos*, *Lykæus*, *Pelichonius* and *Targæus*. Another series of mountains strikes off from Kithairon towards the south-west, constituting under the names of *Ossa* and *Ossa* the high ground which first strikes down into the depression forming the Isthmus of

Chios, and then rise again to spread itself in Peloponnesus. One of its branches leads westward along the north of Arkadia, comprising the Akrokorinthos or citadel of Corinth, the high peak of Kyllina, the mountains of Araxos and Laupolis, and ultimately joining Erymanthos and Parnon—while the other branch sinks southward towards the south-eastern apex of Peloponnesus, the formidable Cape Malea or St. Angelo,—and exhibits itself under the successive names of Apona, Artemision, Perithousion, Parnon, Thronax, and Zaris.

From the eastern extremity of Olympus, in a direction rather ^{One and} to the westward or south, stretches the range of ^{the Pelion} mountains first called ^{the Pelion} Ossa and afterwards Pelion, down to the south-eastern corner of Thessaly. The long, lofty, and varied backbone of the island of Euboea may be viewed as a continuance both of this chain and of the chain of Othrys: the Ise is further prolonged by a series of islands in the Archipelago, Andros, Tinos, Mykonos, and Naxos, belonging to the group called the Cyclades or islands encircling the sacred centre of Delos. Of these Cyclades others are in like manner a continuance of the chain which reaches to Cape Sardinia—Kos, Rhodos, Seriphos, and Rhymos join on to Attica, as Andros does to Euboea. And we might even consider the great island of Euboea as a prolongation of the system of mountains which breaks the winds and waves at Cape Malea, the island of Kythira forming the intermediate link between them. Skiathos, Skopelos, and Skyros, to the north-west of Euboea, also mark themselves out as sufficing peaks of the range comprehending Pelion and Euboea.¹

By this brief sketch, which the reader will naturally compare with one of the recent maps of the country, it will be seen that Greece Proper is among the most mountainous territories in Europe. For although it is convenient, in giving a systematic view of the face of the country, to group the multiplicity of mountains into certain chains or ranges, founded upon approx-

¹ For the general sketch of the mountain system of Greece, see Strabo, *Geogr.*, vol. I. ch. x. §. 104-105; or *General Geography of Ancient Greece*, vol. I. p. 1-6.

² Regarding the southern system, *Strabo*, *Geogr.*, and *Strabo*, *Geogr.*, O.

³ *Strabo*, in his great key-estimate, considers these the *Scythians*, p. 104, 105, 106, and he mentions their *advantages*. This estimate is repeated in the *Strabo*, *Geography*, of the *History of the Nations by the G. C. L.*

native uniformity of direction; yet in point of fact there are so many ramifications and dispersed peaks—so vast a number of hills and crags of different magnitude and elevation—that a comparatively small proportion of the surface is left for level ground. Not only the continuous plains, but even the continuous valleys, exist throughout all Greece Proper. The largest spaces of level ground are seen in Thessaly, in Ætolia, in the western portion of Peloponnesus, and in Eubœa; but irregular mountains, ridges, frequent but isolated, land-locked basins and declivities, which often cover but seldom last long, form the character of the country.¹

The islands of the Cyclades, Eubœa, Aïolia, and Laconia, consist for the most part of micaceous schists, very frequently lined with and often covered by crystalline granular basins.

Limestones. The centre and west of Peloponnesus, as well as the country north of the Corinthian Gulf from the Gulf of Aulokleia to the strait of Eubœa, present a calcareous formation, varying in different localities as to colour, consistency, and hardness, but generally belonging or approximating to the chalk: it is often very compact, but is distinguished in a marked manner from the crystalline limestone above-mentioned. The two highest mountains in Greece² (both however lower than Olympus, estimated at 9700 feet) exhibit this formation—Parosæus, which attains 8000 feet, and the point of St. Elias in Taygetus, which is not less than 8000 feet. Clay-slate and conglomerates of sand, lime and clay are found in many parts: a dense and fine conglomerate of Euxine composition the limestones of Corinth: loose deposits of pebbles and calcareous breccia occupy also some portions of the territory.

¹ Out of the 47,000 square miles (or 11,900,000 English acres) included in the present Kingdom of Greece, 30,000 were mountainous, rocky, (bare, barren, and sterile) or cultivated, (scarcely, often no more than) so. The whole land is covered with a thick layer of a comparatively small portion of a soil usually considered as present, (owing, according to Orstein, p. 4, London, 1840.)

The greater portion of Greece does not include Thessaly. The system of mountains is applied to several of the chief divisions (notably, Thess., Euxine, Peloponnesus, &c.) under 4th.

² Another likely or not calcareous.

³ For the geological and mineral history of Greece, see the survey undertaken by Dr. Schimper, by order of the present government, of Greece, in 1841 and the following years (published by the Imperial Russian Government, the Academy, &c. C. R. Schimper in Ann. Natur. Hist. 1845, especially vol. v. p. 101—105).

⁴ Corinthiæ, Eubœa, &c. Strabo, viii. p. 101, etc. D. D. 13, p. 125.

But the most important and essential elements of the Grecian soil consist of the alluvial and alluvial formations, with which the troughs and basins are filled up, resulting from the denudation of the older adjoining rocks. In these reside the productive powers of the country, and upon these the grain and vegetables for the subsistence of the people depend. The mountain regions are to a great degree barren, destitute at present of wood or any useful vegetation, though there is reason to believe that they were better wooded in antiquity: in many parts, however, and especially in Attica and Akarnania, they afford plenty of timber, and in all parts pasture for the cattle during summer, at a time when the plains are thoroughly burnt up.¹ For other articles of food, dependence must be had on the valleys, which are occasionally of singular fertility. The low grounds of Thessaly, the valley of the Euphrates and the borders of the lake Kopais in Boeotia, the western portion of Epea, the plains of Stenias on the coast of Akarnania and Attika, and those near the river Pamisos in Messenia, both are now and were in ancient times remarkable for their abundant produce.

Besides the scarcity of wood for fuel, there is another serious inconvenience to which the low grounds of Greece are exposed,—the want of a supply of water at once adequate and regular.² Abundance of rain falls during the autumnal and winter months, little or none during the summer; while the naked summits of the numerous hills neither absorb nor retain moisture, so that the rain runs off as rapidly as it falls. Springs are not numerous.³ Most rivers are torrents in early spring, and dry before the end of summer; the copious combinations of the ancient language

¹ In passing through the valley between Attika and Peloponnesus, going towards Sparta, Strabo observed the striking change in the character of the country:—*Attika*, (i. e. Akarnania, Attika, Boeotia, Lokris, &c.) woody, well-watered, and covered with a good soil, various in soils and productions; while many barren mountains of a white grey colour exhibit the real character of Attika and the Mæna. (Strabo, l. p. 221.)

² The Homeric Hymn to Apollo describes even the water resources of Thessaly as having in its plenty of state

been crossed with wood (v. 275).

The best timber used by the ancient Greeks came from Macedonia, the Thyræ, and the Propontis; the timber of Mount Parnassus and of Pelion was reckoned very bad; that of Arakia better (Cicero, *de re publica*, l. 2, c. 2; 28, 29).

³ See Strabo, *l. c.*, vol. 1, p. 22, 23, 24, &c.

⁴ See Strabo and Pausanias (Description of Greece, p. 222), and with great reason, upon the unproductive value of Attika with respect to the country.

⁵ See, Strabo and also Ctesiodorus (Epic, vol. 1, book 2, p. 12).

designated the winter torrent by a special and separate word.¹ The most considerable rivers in the country are, the Peneios, which carries off all the waters of Thessaly, finding an exit into the *Ægean* through the narrow delta which parts Ossa from Olympus;—and the Achelous, which flows from Pindus in a south-westerly direction, separating *Ætolia* from *Akarnania* and emptying itself into the Ionian sea: The *Kephissos* also takes its rise at a more northerly part of the same mountain-chain and falls into the same sea more to the eastward. The rivers more to the southward are unrequied and isolated. *Kephissos* and *Asopos* in *Boeotia*, *Parnassos* in *Messenia*, maintain each a languid stream throughout the summer; while the *Inachos* near *Argos*, and the *Kephissos* and *Ilissos* near *Athens*, present a scanty reality which falls short still more of their great poetical celebrity. The *Alpheios* and the *Spercheios* are considerable streams—the *Achelous* is still more important.² The quantity of mud which its turbid stream brought down and deposited, constituted a sensible increase of the land at its embouchure, within the observation of *Thucydides*.³

But the disposition and properties of the *Grecian* territory, though not maintaining permanent rivers, are favourable to the multiplication of lakes and marshes. There are ^{Frequent marshes and lakes.} numerous hollows and enclosed basins, out of which the water can find no superficial escape, and where, unless it makes for itself a subterranean passage through rifts in the mountains, it remains either as a marsh or a lake according to the time of year. In *Thessaly* we find the lakes *Peneios* and *Daskēia*; in *Ætolia*, between the *Achelous* and *Ezaura*, *Strabo* mentions the lake of *Trichonia*, besides several other lakes, which it is difficult to identify individually, though the quantity of ground covered by lakes and marsh is on a whole very considerable. In *Boeotia* are situated the lakes *Kopais*, *Hythē*, and *Harmis*; the first of the three formed chiefly by the river *Kephissos*, flowing from *Parnassos* on the north-west, and shaping for itself a straits course through the mountains of *Pelion*. On the north-east and

¹ The Greek language seems to stand singular in this respect, generally; the *Fluvius* of *Latin* denoting the *flow* of water, or rather the *effluvia*, or rather the *temporary* *flow* and *ebb*, with allusion to *Ægeus* (*Ægeus*, *Ægeus* are all

synonymous *Ægeus*, p. 100, Leipzig, 1800).

² Most of the *Kephissos* has also not at any time, which has been noted in the *Annals* of the *Academy*.

³ *Thucydides*, l. iii. c. 2.

east, the lake Kopah is bounded by the high land of Mount Parn, which interrupts its communication with the Strait of Ruben. Through the limestone of this mountain the water has either found or forced several subterranean outlets, by which it obtains a partial issue on the other side of the rocky hill and then flows into the coast. The Katakthas, as they were termed in antiquity, yet exist, but in an imperfect and half-destructed condition. Even in antiquity however they never fully sufficed to carry off the surplus waters of the Kopahs; for the remains are still found of an artificial tunnel, pierced through the whole breadth of the rock, and with perpendicular apertures at proper intervals to let in the air from above. This tunnel—one of the most interesting remains of antiquity, since it must date from the prosperous days of the old Cyclonians, anterior to its absorption into the Boeotian lagoons, as well as to the preponderance of Thibes—is now choked up and rendered useless. It may perhaps have been designedly obstructed by the hand of an enemy. The scheme of Alexander the Great, who commissioned an engineer from Chalkis to re-open it, was defeated first by dissidents in Boeotia, and ultimately by his early death.¹

The Katakthas of the lake Kopah are a specimen of the phenomenon so frequent in Greece—lakes and rivers finding for themselves subterranean passages through the crevices in the limestone rocks, and even pursuing their usual course for a considerable distance before they emerge to the light of day. In Areadia, especially, several remarkable examples of subterranean water-communication occur: this central region of Peloponnesus presents a cluster of such completely isolated valleys or basins.²

¹ Strabo, vi. p. 497.

² Colonel Leake observes (Travels in Greece, vol. ii. pp. 49, 50—508). "The plain of Tripolitza, formerly that of Tegea and Mantineia, is by the agreement of this cluster of valleys in the centre of Peloponnesus, each of which is so closely shut in by the surrounding mountains, that no stream is situated in the valleys except through the common mountainous belt. Excepting the small subterranean and the mountain lake with Katakthas, see the same work, p. 501; and the mountain plain near Corinth, p. 509.

This temporary disappearance of the stream was similar to the ancient *disappearance* phenomenon of the river Acheron, *Metamorph. l. ii.* Chalkis, vi. 50. Strabo, vi. p. 571; *ibid.* p. 588, &c.

There similarity with this phenomenon was in part the source of some geographical suppositions, which now appear as an error, respecting the long subterranean and perennial source of certain rivers, and their reappearance in very distant places. Hübner said, that the fountain of Alpheus joined the fountain of

which formed the chief seasoning for the bread of an Athenian)—his superior courage and endurance—his reverence for Lacedæmonian beauty as an old and customary influence—his sterility of intellect and imagination as well as his shakiness in enterprise—his unchangeable coolness of relation with the gods, which led him to scourge and prick Pan if he came back empty-headed from the chase; while the inhabitant of Phlores or Miletus exemplifies the Grecian mariner, eager in search of gain—active, skilful, and daring at sea, but inferior in steadfast bravery on land—more available in imagination as well as more available in character—full of pomp and expense in religious manifestations towards the Ephesian Artemis or the Apollo of Branchidae: with a mind more open to the varieties of Grecian energy and to the refining influence of Grecian civilization. The Peloponnesians generally, and the Lacedæmonians in particular, approached to the Arcadian type—while the Athenians of the fifth century B.C. stood farthest in the other; superseding to it however a delicacy of taste, and a predominance of intellectual sympathy and enjoyments, which seem to have been peculiar to themselves.

The configuration of the Grecian territory, so like in many respects to that of Switzerland, produced two effects of great moment upon the character and history of the people. In the first place, it materially strengthened their power of defence : it shut up the country against those invasions from the interior which successively subjugated all their continental colonies ; and it at the same time rendered each faction more difficult to be attacked by the rest, so as to exercise a certain conservative influence in securing the tenure of actual possessors : in the pass of Thermopylæ between Thessaly and Phœtia, that of Kithira between Boeotia and Attica, or the mountainous range of Oeta and Gerania along the Isthmus of Corinth, were positions which an inferior number of brave men could hold against a much greater force of

The alteration of Etc. which is obviously out of place, in the middle of this passage, to draw, appears unnecessary.

isolants. But, in the next place, while it tended to protect each section of Greece from being conquered, it also kept them politically disunited and perpetuated their separate autonomy. It fostered that powerful principle of repulsion, which disposed even the smallest township to constitute itself a political unit apart from the rest, and to resist all idea of coalescence with others, either amicable or compulsory. To a modern nation, accustomed to large political aggregations, and accustomed for good government through the representative system, it requires a certain mental effort to transport himself back to a time when even the smallest town clung so tenaciously to its right of self-legislation. Nevertheless such was the general habit and feeling of the ancient world, throughout Italy, Sicily, Spain, and Gaul. Among the Hellenes it stands out more conspicuously, for several reasons—first, because they seem to have pushed the multiplication of autonomous units to an extreme point, seeing that even islands not larger than Rapanzosa and Amorgos had two or three separate city communities;¹ secondly, because they produced, for the first time in the history of mankind, acute systematic thinkers on matters of government, amongst all of whom the idea of the autonomous city was accepted as the indispensable basis of political speculation; thirdly, because this insurmountable subdivision proved finally the cause of their ruin, in spite of pronounced intellectual superiority over their conquerors; and lastly, because incapacity of political coalescence did not produce a powerful and extensive sympathy between the inhabitants of all the separate cities, with a constant tendency to fraternise for numerous purposes, social, religious, mercantile, intellectual, and intellectual. For these reasons, the indefinite multiplication of self-governing towns, though in truth a phenomenon unknown to ancient Europe as contrasted with the large monarchies of Asia, appears more marked among the ancient Greeks than elsewhere; and there cannot be any doubt that they owe it, in a considerable degree, to the multitude of insulating branches which the configuration of their country presented.

- 5 Nor is it rash to suppose that the same causes may have tended to prevent that unbounded intellectual development for which they stand so conspicuous. General propositions respecting

¹ *Strabo*, *Geogr.* 16.

the working of climate and physical agencies upon character are indeed trackless; for our knowledge of the globe is now sufficient to teach us that heat and cold, mountain and plain, sea and land, moist and dry atmosphere, are all consistent with the greatest diversities of resident man: moreover the contrast between the population of Greece itself, for the seven centuries preceding the Christian era, and the Greeks of more modern times, is alone enough to incite reserve in such speculations. Nevertheless we may venture to note certain improving influences, connected with their geographical position, at a time when they had no books to study, and no more advanced professors to imitate. [We may remark, first, that their position made them at once mountaineers and mariners, thus supplying them with great variety of objects, sensations, and adventures; next, that each petty community, nestled apart amidst its own rocks,¹ was sufficiently severed from the rest to possess an individual life and attributes of its own, yet not so far as to subvert it from the sympathies of the remainder; so that an observant Greek, conversing with a great diversity of half-countrymen, whose language he understood, and whose idiosyncrasies he could appreciate, had access to a larger range of social and political experience than any other man in so unadvanced an age could personally obtain. The Phœnicians, superior to the Greek as ship-board, traversed wider distances and saw a greater number of strangers, but had not the same means of intimate connection with a multiplicity of fellows in blood and language. His relations, confined to purchase and sale, did not excite that mutuality of action and reaction which pervaded the crowd at a Grecian festival. The scene which here presented itself was a mixture of uniformity and variety highly stimulating to the observant faculties of a man of genius,—who at the same time, if he sought to communicate his own impressions, or to act upon this mingled and diffuse audience, was forced to shake off what was peculiar to his own town or community, and to put forth matter in harmony with the feelings of all. (It is thus that we may explain in part that penetrating appreciation of human life and character, and that power of touching sympathies

¹ *Thucyd.* *lib. 2. c. 13.* "ἑκάστη δὲ ἐστὶν ἰστέον πόλις, καὶ πόλιν καὶ πόλιν."

common to all ages and nations, which surprises us so much in the unlettered authors of the old epic. Such periodical inter-communication, of brethren habitually isolated from each other, was the only means then open of procuring for the bard a diversified range of experience and a many-coloured audience; and it was to a great degree the result of geographical causes. Perhaps among other nations such facilitating causes might have been found, yet without producing any result comparable to the *Iliad* and *Odyssey*. But Homer was nevertheless dependent upon the conditions of his age, and we can at least point out three peculiarities in early Greek society without which Homeric epics would never have arisen,—the geographical position in one, the language another.

In mineral and metallic wealth Greece was not distinguished. Gold was obtained in considerable abundance in the island of Siphnos, which, throughout the sixth century Mineral products. *B.C.*, was among the richest communities of Greece, and possessed a treasure-chamber at Delphi distinguished for the richness of its votive offerings. At that time gold was so rare in Greece, that the Lacedæmonians were obliged to send to the Lydian Greeks in order to provide enough of it for the gilding of a statue.¹ It appears to have been more abundant in Asia Minor, and the quantity of it in Greece was much multiplied by the opening of mines in Thracia, Macedonia, Epirus, and even some parts of Thessaly. In the island of Thasos, too, some mines were re-opened with profitable result, which had been originally begun, and subsequently abandoned, by Phœnician settlers of an earlier century. From these mine districts also was procured a considerable amount of silver; while about the beginning of the fifth century *B.C.*, the first extensive commencement seems to have been made of turning to account the rich southern district of Attica, called Laurion. Copper was obtained in various parts of Greece, especially in Cyprus and Eubœa—in which latter island was also found the earth called *Chama*, employed for the purification of the ore. Bronze was used among the Greeks for

¹ Herodotus, I. 91. 22. 23. 24. 25—27. Strabo, *Geograph. ed. Dindorf*, I. 490.

² The gold and silver offerings sent to the Delphian temple, even from the

Mineræ of Siphnos (I. 91. 22—27), were numerous and valuable, especially those dedicated by Greeks, who Herodotus, I. 91—92, shows to have enjoyed all privileges.

The climate of Greece appears to be generally described by modern travellers in more favourable terms than it was by the ancients, which is easily explicable from the classical interest, picturesque localities, and temperate atmosphere, so vividly appreciated by an English or a German eye. Herodotus,¹ Hippocrates, and Aristotle, treat the climate of Asia as far more genial and favourable both to animal and vegetable life, but at the same time more enervating than that of Greece: the latter they speak of chiefly in reference to its changeful character and diversity of local temperatures, which they consider as highly stimulant to the energies of the inhabitants. There is reason to conclude that ancient Greece was much more healthy than the same territory is at present, inasmuch as it was more industriously cultivated, and the towns both more carefully administered and better supplied with water. But the differences in respect of healthiness, between one portion of Greece and another, appear always to have been considerable, and this, as well as the diversity of climate, affected the local habits and character of the particular sections. Not merely were there great differences between the mountaineers and the inhabitants of the plains²—between Lokrians, Atticans, Pionians, Dorians, Carians and Arcadians, on one hand, and the inhabitants of Aegina, Euboea, and Elio, on the other—but each of the various tribes which went to compose these categories had its peculiarities; and the marked contrast between Athenians and Thebans was supposed to be represented by the light and heavy atmosphere which they respectively breathed. Nor was this all: for even among the Euboean aggraves, every town had its own separate attributes, physical as well as moral and political;³ Orissa, Tanagra, Thebes, Tithoe,

Archele, Halartus, Kestada, Oechalia, and Flatus, were known to Strabo as each by its own characteristic epithet: and Thucydides even notices a marked distinction between the inhabitants of the city of Athens and those in the country of Attica. Sparta, Argos, Corinth, and Sikyón, though all called Doric, had each its own dialect and peculiarities. All these differences, depending in part upon climate, site, and other physical considerations, contributed to nourish antiquities, and to perpetuate that imperfect union, which has already been noticed as an indelible feature in Hellas.

The Epirotic tribes, neighbours of the Ætolians and Akarnanians, filled the space between Pindus and the Ionian Sea until they joined to the northwest the territory inhabited by the powerful and barbarous Illyrians. Of these Illyrians the native Macedonian tribes appear to have been an outlying nation, dwelling northward of Thessaly and Mount Olympus, eastward of the chain by which Pindus is continued, and westward of the river Axius. The Epirots were comprehended under the various denominations of Chaonians, Molossians, Thesprotians, Kænepians, Amphilochians, Athamians, the Moliones, Tymphaei, Orestes, Paionai, and Atintians¹—most of the latter being small communities dispersed about the mountainous region of Pindus. There was however much confusion in the application of the comprehensive name Epirot, which was a title given altogether by the Greeks, and given partly upon geographical, not upon ethnic considerations. Epiros seems at first to have stood opposed to Peloponnesus, and to have signified the general region northward of the Gulf of Corinth; and in this primitive sense it comprehended the Ætolians and Akarnanians, portions of whom spoke a dialect difficult to understand, and were not less widely removed than the Epirots from Hellenic habits.² The cradle of Hellenism forms the point of ancient union between Greeks and Epirots, which was superseded by Delphi as the civilisation of Hellas developed

1862]. Nor is it less difficult to distinguish Epirotes from Macedonians on the one hand than from Hellenes on the other; the language, the dress, and the fashion of wearing the hair being often analogous, while the boundaries, amidst rude men and untravelling men, were very inaccurately understood.¹

In describing the limits occupied by the Hellenes in 778 a.c., we cannot yet take account of the important colonies of Leucas and Ambrakia, established by the Corinthians subsequently on the western coast of Epirus. The Greeks of that early time seem to comprise the islands of Kephallenia, Zakynthos, Rhodus, and Peloponnesos, but no settlement, either inland or border, farther northward.

They include farther, confining themselves to 778 a.c., the great mass of islands between the coast of Greece and that of Asia Minor, from Thasos on the north, to Rhodes, Kos, and Kythira southward: and the great islands of Lesbos, Chios, Samos, and Euboea, as well as the groups called the Sporades, and the Cyclades. Respecting the four considerable islands nearer to the coast of Macedonia and Thracæ—Lemnos, Imbros, ¹⁸⁶² ~~Samothrace~~, and Thracæ—it may be doubted whether they were at that time habitated. The Catalogue of the Iliad includes under Agamemnon's contingents from Epirus, Euboea, Kos, Karpairos, Kasma, Eke, and Rhodes; in the oldest epical testimony which we possess, these islands first appear inhabited by Greeks; but the others do not occur in the Catalogue, and are never mentioned in such manner as to enable us to draw any inference. Euboea ought perhaps rather to be looked upon as a portion of Greece mainland (from which it was only separated by a strait narrow enough to be bridged over) than as an island. But the last five islands named in the Catalogue are all either wholly or partially Doric: no Ionic or Eolic island appears in it: these latter, though it was among them that the poet sang, appear to be represented by their ancestral houses who come from Greece Proper.

The last element to be included, as going to make up the

his history of the Peloponnesos.

Greece of 170 B.C., is the long string of Doric, Ionic and Æolic settlements on the coast of Asia Minor—occupying ^{space on} a space bounded on the north by the Troad and the ^{the coast of} ~~the~~ ^{Asia Minor.} region of Ión, and extending southward as far as the peninsula of Knidos. Twelve continental cities, over and above the islands of Lesbos and Tenedos, are reckoned by Herodotus as ancient Æolic foundations—Smyrna, Kyzos, Larisa, Teos-Telichos, Ténaron, Killa, Notion, Agrosma, Phana, Rho, Mytilæ, and Grynæa. Smyrna, having been at first Æolic, was afterwards acquired through a stratagem by Ionic inhabitants, and remained permanently Ionic. Phœbus, the northernmost of the Ionic settlements, looked upon Killa; Ekaromene, Rhythron, Teos, Lebedos, Kolophon, Priene, Myra, and Miletos, continued the Ionic name to the southward. These, together with Samos and Chios, formed the Pæonian federation.¹ To the south of Miletos, after a considerable interval, lay the Doric establishments of Myndos, Malliaræon, and Knidos: the two latter, together with the island of Kós and the three towns in Rhodes, constituted the Doric Hexapole, or confederation of six cities, concerted primarily with a view to religious purposes, but producing a secondary effect analogous to political federation.

Such then is the extent of Hellas, as it stood at the commencement of the recorded Ctesychiadæ. To draw a picture even for this date, we possess no authentic materials, and are obliged to speculate statements which belong to a later age: and this consideration might alone suffice to show how unscientific are all definitions of the Greece of 170 B.C., the supposed epoch of the Trojan war, four centuries earlier.

¹ Herodot. i. 145–150.

That community of religious sentiments, localities, and sacrifices, which Herodotus names as the third bond of union among the Greeks, was a phenomenon not (like the race and the language) interwoven with their political constitution but of gradual growth. In the time of Herodotus, and even a century earlier, it was at its full maturity, but there had been a period when no religious meetings common to the whole Hellenic body existed. What are called the Olympic, Pythian, Isthmian, and Nemean games (the last most conspicuous amidst many others analogous) were in reality great religious festivals—for the gods then gave their special sanction, name, and presence, to recreative meetings—the closest mediation then prevailed between the feelings of common worship and the sympathy in common amusement.¹ Though this association is now no longer recognised, it is nevertheless essential that we should keep it fully before us, if we desire to understand the life and proceedings of the Greek. To Herodotus and his contemporaries, these great festivals, then frequented by crowds from every part of Greece, were of overwhelming importance and interest; yet they had once been purely local, attracting no visitors except from a very narrow neighbourhood. In the Homeric poems much is said about the common gods, and about special places consecrated to and occupied by several of them; the chiefs celebrate funeral games in honour of a deceased father, which are visited by competitors from different parts of Greece, but nothing appears to manifest public or town festivals open to Greek visitors generally.² And though the rocky Pythel with its temple stands out in the Iliad as a place both venerated and rich—the Pythian games, under the superintendence of the Amphiktyons, with continuous enrolment of victors and a Pan-

Hellenic reputation, do not begin until after the Sacred War, in the fifth Olympiad, or 480 B.C.¹

The Olympic games, more conspicuous than the Pythian as well as considerably older, are also remarkable on another ground, inasmuch as they supplied historical computers with the earliest backward record of continuous time. It was in the year 776 B.C. that the Eleans inserted the name of their countryman Koroibos as victor in the competition of runners, and that they began the practice of inserting in like manner, in each Olympic or fifth recurring year, the name of the runner who won the prize. Even for a long time after this, however, the Olympic games seem to have remained a local festival; the prize being uniformly carried off, at the first twelve Olympiads, by some competitor either of Elis or its immediate neighbourhood. The Roman and Italian games did not become notorious or frequented until later even than the Pythian. Solon² in his legislation proclaimed the large reward of 500 drachms for every Athenian who gained an Olympic prize, and the lower sum of 200 drachms for an Italian

Olympic and other Greek games.

¹ Herodotus, iv. p. 271; Pausanias, p. 2, 3. The first Pythian games celebrated by the Amphictyons after the Sacred War carried with them a celebrated reward to the victor for his *pancratium*; but in the next or third Pythian games nothing was given but an honorary reward or wreath of laurel for the same achievement; the first victor with Olympiad 48, or the second with Olympiad 49, 5.

² Compare Solon, ed. Meibom, *Pyth. Agones*, l. Pausanias, l. 2, p. 5; *Historia*, lib. Pythian, Roman, and Italian, vol. 2, 4, 5.

The Meneleus Egeus in Argolis is supposed to be a third earlier than the Sacred War, when Olympiad is mentioned; earlier than the Pythian games as indicated by the Amphictyons.

³ Pausanias, *Historia*, 10. The Olympic Agone was in a certain extent a festival of all Hellenic unity; for among the many legends respecting its first local origin, one of the most numerous represented it as having been founded by Pelopon after the victory awarded to his Italian son Ischlos at Pylos. *Historia*, Agones, l. Pausanias, l. 1, 5; or see Hesiod *Works and Days*, l. 1000.

50. Pindar, says that they were first celebrated by Pelopon in Italian games for Ischlos, and Pelop gave the first prize to Ischlos. According to Pausanias, the Athenian Victor of the Pythian games had a perpetual prize. *Historia*, l. 5.

There is therefore good reason why these should stand out for celebration as persons fit to be specially recorded, and especially the Pythian, Roman, and Italian games and Pythian games not having been mentioned by Herodotus, Pausanias, and Pindar. Just, l. 5, 6, also that these games were held in the same manner as the Olympic and Pythian, but also earlier by 50 years, when Ischlos, Pelopon's Italian son, won the Pythian, Roman and Italian, vol. 2, p. 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

Sometimes this tendency to religious fraternity took a form called an *Amphiktyony*, different from the common festival. A certain number of towns entered into an exclusive religious partnership, for the celebration of sacrifices periodically to the god of a particular temple, which was supposed to be the common property and under the common protection of all, though one of the number was often named as permanent administrator; while all other Greeks were excluded. That there were many religious partnerships of this sort, which have never acquired a place in history, among the early Grecian villages, we may perhaps gather from the etymology of the word (*Amphiktyones* designates residents around, or neighbours, considered in the point of view of fellow-religionists), as well as from the indications preserved to us in reference to various parts of the country. Thus there was an *Amphiktyony*¹ of seven cities at the holy island of Kalauria, close to the harbour of Troezen. Harmand, Epikauria, Nigina, Arhena, Prasia, Naxos, and Orichomenos, jointly maintained the temple and sanctuary of Poseidon in that island (with which it would seem that the city of Troezen, though close at hand, had no connection), meeting there at stated periods, to offer formal sacrifices. These seven cities indeed were not immediate neighbours, but the speciality and exclusiveness of their interest to the temple is seen from the fact, that when the Argives took Naxos, they adopted and fulfilled these religious obligations on behalf of the prior inhabitants: so also did the Lacedæmonians when they had captured Prasia. Again in *Triphylia*,² situated 2.

between the Pisidæ and Messenians in the western part of Peloponnesus, there was a similar religious meeting and partnership of the Triphylians on Cape Saron, at the temple of the Saronic Poseidon. Here the inhabitants of Mithras were entrusted with the details of superintendence, as well as with the duty of notifying beforehand the exact time of meeting (a precaution essential amidst the diversities and irregularities of the Greek calendar), and also of procuring what was called the Saronic truce—a temporary abstinence from hostilities which bound all Triphylians during the holy period. This latter custom discloses

Amphiktyonies—exclusive religious partnerships.

in respect to voting, two votes being given by the deputies from each of the twelve: moreover, we are told that in determining the deputies to be sent or the manner in which the votes of each race should be given, the powerful Athens, Sparta, and Thebes had no more influence than the humblest Ionian, Dorian, or Boeotian city. This latter fact is distinctly stated by *Herodotus*, himself a Pythagore sent to Delphi by Athens. And so, doubtless, the theory of the case stood: the votes of the Ionic races counted for neither more nor less than two, whether given by deputies from Athens, or from the small towns of Erythrae and Priene; and in like manner the Dorian votes were as good in the division, when given by deputies from Doron and Kytenion in the little territory of Eolia, as if the men delivering them had been Spartans. But there can be no little question that in practice the little Ionic cities and the little Dorian cities pretended to no share in the Amphiktyonic deliberations. As the Ionic vote came to be substantially the vote of Athens, so, if Sparta was ever obstructed in the management of the Doric vote, it must have been by powerful Doric cities like Argos or Corinth, not by the insignificant towns of Eolia. But the theory of Amphiktyonic suffrage as laid down by *Herodotus*, however little realized in practice during his day, is important inasmuch as it shows in full evidence the primitive and original constitution. The first establishment of the Amphiktyonic convention dates from a time when all the twelve members were on a footing of equal independence, and when there were no overwhelming cities (such as Sparta and Athens) to cast in the shade the humbler members—when Sparta was only one Doric city, and Athens only one Ionic city, among various others of consideration not much inferior.

There are also other proofs which show the high antiquity of this Amphiktyonic convention. *Herodotus* gives us an extract from the oath which had been taken by the named deputies who attended on behalf of their respective races, ever since its first establishment, and which still apparently continued to be taken in his day. The antique simplicity of this oath, and of the conditions to which the members bind themselves, betrays the early age in which it originated, as well as the humble resources of those

convention
of the old
oath.

forms to which it was applied. "We will not destroy any Amphictyonic towns—we will not cut off any Amphictyonic towns from running water"—such are the two prominent obligations which *Hesiodus* specifies out of the old oath. The second of the two carries us back to the simplest state of society, and to towns of the smallest size, when the maidens went out with their basins to fetch water from the spring, like the daughters of Erech at Eleusis, or those of Athens from the fountain Kallirrhoe.¹ We may even conceive that the special mention of this detail, in the covenant between the twelve nations, is borrowed literally from agreements still earlier, among the villages or little towns in which the members of each race were distributed. At any rate, it proves satisfactorily the very ancient date to which the commencement of the Amphictyonic convention must be referred. The belief of *Hesiodus* (perhaps also the belief general in his time) was, that it commenced simultaneously with the first foundation of the Delphian temple—an event of which we have no historical knowledge; but there seems reason to suppose that its original establishment is connected with Thermopylae and Diakleir Amphictyonia, rather than with Delphi and Apollo. The special surname by which Diakleir and her temple at Thermopylae was known²—the temple of the hero Amphiklytus, which stood at its side—the word *Pylæa*, which obtained footing in the language to designate the half-yearly meeting of the deputies both at Thermopylae and at Delphi—these indications point to Thermopylae (the real central point for all the twelve) as the primary place of meeting, and to the Delphian half-year as something secondary and superadded. On such a notion, however, we cannot go beyond a conjecture.

The hero Amphiklytus, whose temple stood at Thermopylae, passed in mythical genealogy for the brother of Hellen. And it may be affirmed, with truth, that the habit of forming Amphictyonic unions, and of depending each other's religious

cities, for offenses against the religious and political sentiment of the Greeks generally. But for the most part its interference relates directly to the Delphic temple. The earliest case in which it is brought to our view is the Sacred War against Croton, in the 49th Olympiad or 585 B.C., conducted by Eurylochus the Thessalian, and Kinademos of Ephyra, and proposed by Kroton of Athens;¹ we find the Amphictyons also about half a century afterwards undertaking the duty of collecting subscriptions throughout the Hellenic world, and making the contract with the Akarnanians for rebuilding the temple after a conflagration.² But the influence of this council is essentially of a sustaining and intermittent character. Sometimes it appears forward to decide, and its decisions command respect; but such occasions are rare, taking the general course of known Greek history; while there are other occasions, and those too especially affecting the Delphic temple, on which we are surprised to find nothing said about it. In the long and perturbed period which Thucydides describes, he never once mentions the Amphictyons, though the temple and the safety of its treasures form the repeated subject;³ as well as of dispute as of express stipulation between Athens and Sparta. Moreover, among the twelve constituent members of the council, we find three—the Perinthians, the Megarians, and the Achæans of Phokis—who were not even independent, but subject to the Thessalians; so that its meetings, when they were not matters of mere form, probably expressed only the feelings of the three or four leading members. When one or more of these great powers had a party purpose to accomplish against others—when Philip of Macedon wished to exclude one of the members in order to procure admission for himself—it became convenient to turn this ancient form into a serious reality; and we shall see the Athenian *Ekastoi* providing a pretext for Philip to mobilise

rarer.

¹ Herod. viii. 26-30, l. 2. Phokion, Kroton, p. 26, who refers to Aristotle in the *Metaphysics*, says *κατά-Φωκίαν*, i. e. at Phokis, at Kroton. *Ann. de l'Ép. des Inscriptions*, t. ii. p. 299. These Amphictyonic subscriptions, however, are of this character in history, and very commonly abused.

² Herod. ii. 125, v. 58.
³ Herod. i. 121, ii. 124, v. 58. The Thessalians in the Sacred War (B.C. 585) protested that they had an ancient and preexisting right to the administration of the Delphic temple, under acknowledgment to the general body of Greeks for the power conferred on its members. *Classical antiquities*, vol. ii. p. 171.

in favour of the minor Iliadic cities against Thebes, by alleging that these cities were under the protection of the old Amphictyonic oath.¹

It is true that we have to consider the council as an element in Greek affairs—an ancient institution, one amongst many instances of the primitive habit of religious intervention, but wider and more comprehensive than the rest—at first purely religious, then religious and political at once, lastly more the latter than the former—highly valuable in the infancy, but weakened to the maturity of Greece, and called into real working only on rare occasions, when its efficiency happened to fall in with the views of Athens, Thebes, or the king of Macedonia. In such special moments it shines with a transient light which affords a partial picture for the historian of the history on it by Cicero—"communis Græcæ consilium";² but we should completely misinterpret Greek history if we regarded it as a school opened habitually directing or habitually stopped. Had there existed any such "communis consilium" of tolerable wisdom and patriotism, and had the tendencies of the Hellenic mind been capable of adapting themselves to it, the whole course of later Greek history would probably have been altered; the Macedonian kings would have remained only as respectable neighbours, harvesting civilization from Greece and expending their military energies upon Thracians and Illyrians; while united Hellenic arms have maintained her own territory against the conquering legions of Rome.

The twelve constituent Amphictyonic towns remained unchanged until the Social War against the Phocians (c. 356), after which, though the number twelve was continued, the Phocians were disfranchised, and their vote transferred to Philip of Macedonia. It has been already mentioned that these twelve did not exhaust the whole of Hellas. *Acædians, Eleans, Pisæans, Megæans, Dryopes, Boeotians, all genuine Hellenes, are*

¹ *Æschylus de Mæch. Legat.* p. 385, n. 19. The party instance which proved the council in regard to the Social War against the Phocians (c. 356) was its oath in Delos, *ibid.* 385-386.

² *Cicero, de Republica*, B. 2, 29. The representation of Demetrius of Phari-

surus (Ant. Rom. in 32) evinces the reality of the oath.

Among the names 1200 B.C. and Amphictyonic of the Hellenic world generally are Delos, Delphi, Boeotia, Acædia, Elis, Pisæa, Megara, Dryope, Boeotia, Thessaly, Thracians, and Illyrians. *Antiquities of the Jews*, vol. 1, book 15, c. 11; also J. P. Niebuhr, *Historia et Geographia Græcæ antiquæ*, book 11, c. 11.

not comprehended in it; but all of them had a right to make use of the temple of Delphi, and to contend in the Pythian and Olympic games. The Pythian games, celebrated near Delphi, were under the superintendence of the Amphiktyons,¹ or of some acting magistrates chosen by and presumed to represent them. Like the Olympic games, they came round every four years (the interval between one celebration and another being four complete years, which the Greeks called a *penteteris*): the Isthmian and Nemean games returned every two years. In its first humble form of a competition among bards to sing a hymn in praise of Apollo, this festival was doubtless of immemorial antiquity;² but the first extension of it into Pan-Hellenic notoriety (as I have already remarked), the first multiplication of the subjects of competition, and the first introduction of a continuous record of the consequences, date only from the time when it came under the presidency of the Amphiktyons, at the close of the Sacred War against Eliris. What is called the first Pythian contest coincides with the third year of the sixth Olympiad, or 582 B.C. From that period forward the games became regular and celebrated; but the date just named, nearly two centuries after the first Olympiad, is a proof that the habit of periodical frequentation of festivals, by numbers and from distant parts, grew up but slowly in the Greek world.

The foundation of the temple of Delphi itself reaches far beyond all historical knowledge, forming one of the ^{temple of} ~~ancient~~ institutions of Hellas. It is a sanctified and

¹ Pausan. *Græc. vi.* §. 1.

² In this early phase of the Pythian festival, it is said to have been celebrated every eight years, meaning what we should call an Olympiad; and what the early Greeks called an *hepteteris* (Pausan. *loc. cit.* §. 1). This period is one of considerable importance in reference to the principle of the Greek calendar, for its longer months coincide very nearly with eight solar years. The accuracy of this coincidence is verified by observation as illustrated by Tiedemann, which again is not directly known; but must be inferred as follows. We discovered the cycle of seasons after years, but I suppose not much earlier. In spite of the antiquity of ^{the} ~~calendar~~, it seems to me not perfect, nor

are Ptolemy, that this seasonal period with the solar and lunar calculations was known to the Egyptians in the earliest times of their recorded antiquity, or before the year 260 B.C. See *Index*, *Manetho de Chronologia*, vol. i. p. 202; and *ib.* p. 205. The question is the origin of calendar; the Olympic games obviously after long-established ^{the} ~~the~~ longer periods, though almost no assistance by the astronomical Ptolemy is not proved by us yet. The fact that these three ancient calendars regarding festivals, date not contain a knowledge of the properties of the solar cycle, or seasonal period, nor does it seem to me that the design of the *Isagoge* Apolloniaca, described by Ptolemy ap. *Strabon*, book viii. are very ancient, can be the old original

even regarded as necessary, among Non-Hellens.¹ Of such customs, indeed, as were common to all the Greeks, and peculiar to them as distinguished from others, we cannot specify a great number; but we may say enough to convince ourselves that these did really exist, in spite of local differences, a general Hellenic sentiment and character, which resulted among the contracting causes of a union apparently so little needed.

For we must recollect, that in respect to political sovereignty, complete division was among their most cherished principles. The only source of supreme authority to which a Greek felt respect and attachment, was to be sought within the walls of his own city. Authority vested in another city might operate upon his laws—might procure for him increased security and advantage, as we shall have occasion hereafter to show with regard to Athens and her subject allies—might even be wisely exercised, and inspire no special aversion: but still the principle of it was repugnant to the moral sentiment of his mind, and he in always found gratifying towards the distinct sovereignty of his own Boeot or Euboea. This is a disposition common both to democracies and oligarchies, and operative even among the different towns belonging to the same subdivision of the Hellenic name—Achæans, Phocians, Boeotians, &c. The twelve Athenian cities are harmonious allies, with a periodical festival which partakes of the character of a congress,—but equal and independent political communities. The Boeotian towns, under the presidency of Thebes, their reputed metropolis, recognise certain common obligations, and obey, on various particular matters, chosen officers named *Boeotarchæ*,—but we shall see, in this as in other cases, the centrifugal tendencies constantly manifesting themselves, and resisted chiefly by the interests and power of Thebes. That great, successful, and fortunate revolution which merged the several independent political communities of Attica into the single unity of Athens, took place before the time of authentic history: it is connected with the name of the hero Theseus, but we know not how it was effected, while its comparatively large size and extent render it a signal exception to Hellenic tendencies generally.

¹ Thucyd. i. 2; Herodot. i. 25.

Political division—sovereign authority within the city-walls—thus formed a settled maxim in the Greek mind. The relation between one city and another was an international relation, not a relation subsisting between members of a common political aggregate. Within a few miles from his own city-walls, an Athenian found himself in the territory of another city, wherein he was nothing more than an alien,—where he could not acquire property in house or land, nor contract a legal marriage with any native woman, nor sue for legal protection against injury except through the mediation of some friendly citizen. The right of intermarriage and of acquiring landed property was occasionally granted by a city to some individual non-freeborn, as master of special favour, and sometimes (though very rarely) reciprocated generally between two separate cities.¹ But the obligations between one city and another, or between the citizens of the one and the citizens of the other, are all matters of special covenant, agreed to by the sovereign authority in each. Such consciousness of entire political severance, with no mark of kinship in other ways, is perplexing in modern ideas; and modern language is not well furnished with expressions to describe Greek political phenomena. We may say that an Athenian citizen was an alien when he arrived as a visitor in Corinth, but we can hardly say that he was a foreigner; and though the relations between Corinth and Athens were in principle international, yet that word would be obviously unsuitable to the numerous petty autonomies of Hellas, besides that we require it for describing the relations of Hellens generally with Persians or Carthaginians. We are compelled to use a word such as *interpolitical*, to describe the transactions between separate Greek cities, so numerous in the course of this history.

As, on the one hand, a Greek will not consent to look for sovereign authority beyond the limits of his own city, so, on the other hand, he must have a city to look to: scattered villages will not satisfy in his mind the exigencies of social order, security, and dignity. Though the consciousness of smaller towns

¹ *Aristot. Polit. II. 2, 12.* It is interesting to remember the right of intermarriage is said to be the same amongst the Persians and Syrians, amongst which people there were some

experiences of an intelligent foreigner, the City is itself a perfect and self-sufficient whole, admitting no incorporation into any higher political unity. It deserves notice that Sparta even in the days of her greatest power was not (properly speaking) a city, but a mere agglomeration of five adjacent villages, retaining unchanged its old-fashioned view: for the extreme desirability of its location and the military prowess of its inhabitants supplied the absence of walls, while the discipline imposed upon the Spartans extended to rigour and subdueness anything known in Greece. And thus Sparta, though less than a city in respect to external appearance, was more than a city in respect to perfection of drilling and fixity of political routine. The contrast between the humble appearance and the mighty reality is pointed out by Thucydides.¹ The inhabitants of the small territory of Pisa, wherein Olympia is situated, had once enjoyed the honourable privilege of administering the Olympic festival. Having been robbed of it and subjected by the more powerful States, they took advantage of various movements and transactions among the larger Greek powers to try and regain it; and on one of these occasions we find their claim repulsed because they were villagers, and unworthy of so great a distinction.² There was nothing to be called a city in the Pisian territory.

In going through historical Greece, we are compelled to accept the Hellenic aggregate with its constituent elements as a primary fact to start from, because the state of our information does not enable us to ascend any higher. By what circumstances, or out of what pre-existing elements, this aggregate was brought together and modified, we find no evidence entitled to credit. There are indeed various names which are offered to designate non-Hellenic inhabitants of many parts of Greece,—the Pelasgi, the Leleges, the Eorians, the Kadmaians, the Akonai, the Tamarissai, the Hyantes, the Telchines, the Naotian Thracians,

¹ Thucyd. *Politi.* i. 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

² Thucyd. i. 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

others, also largely and comprehensively mentioned elsewhere, and about 100,000, 110,000, 120,000, 130,000, 140,000, 150,000, 160,000, 170,000, 180,000, 190,000, 200,000, 210,000, 220,000, 230,000, 240,000, 250,000, 260,000, 270,000, 280,000, 290,000, 300,000, 310,000, 320,000, 330,000, 340,000, 350,000, 360,000, 370,000, 380,000, 390,000, 400,000, 410,000, 420,000, 430,000, 440,000, 450,000, 460,000, 470,000, 480,000, 490,000, 500,000, 510,000, 520,000, 530,000, 540,000, 550,000, 560,000, 570,000, 580,000, 590,000, 600,000, 610,000, 620,000, 630,000, 640,000, 650,000, 660,000, 670,000, 680,000, 690,000, 700,000, 710,000, 720,000, 730,000, 740,000, 750,000, 760,000, 770,000, 780,000, 790,000, 800,000, 810,000, 820,000, 830,000, 840,000, 850,000, 860,000, 870,000, 880,000, 890,000, 900,000, 910,000, 920,000, 930,000, 940,000, 950,000, 960,000, 970,000, 980,000, 990,000, 1,000,000.

³ Herodotus, *Historia*. ii. 1, 2, 3.

are now present to us—some were present to Herodotus and Thucydides even in their age—on which to build trustworthy affirmations respecting the anti-Hellenic Pelagians. And where such is the case, we may without impropriety apply the remark of Herodotus respecting one of the theories which he had heard his expatriates the translation of the Nile by a supposed connexion with the circumfluent Ocean—that “the man who carries up his story into the invisible world passes out of the range of criticism.”¹

As far as our knowledge extends, there were no towns or villages called Pelagian, in Greece Proper, since 778 Ant. post. B.C. But these still existed in two different places, Pelagianæ even in the age of Herodotus, people whom he believed Libyæ. to be Pelagians. One portion of these occupied the towns of Palkia and Skythai near Kythira, on the Propontis; another dwelt in a town called Kriotha, near the Thermaic Gulf.² There were moreover certain other Pelagian townships which he does not specify—it seems indeed, from Thucydides, that there were some little Pelagian townships on the peninsula of Attika.³ Now Herodotus acquaints us with the remarkable fact, that the people of Kriotha, those of Palkia and Skythai, and those of the other named Pelagian townships, all spoke the same language, and each of them respectively, a different language from their neighbours around them. He informs us, moreover, that their language was a barbarous (i.e., a non-Hellenic) language; and this fact he quotes as an evidence to prove that the ancient Pelagian language was a barbarous language, or distinct from the Hellenic. He at the same time states expressly that he has no positive knowledge what language the ancient Pelagians spoke—one proof, among others, that no memorials nor means of distinct information concerning that people could have been open to him.

This is the one single fact, amidst so many conjectures con-

¹ Herodot. II. 217-22. It goes not without remark, that Herodotus, who speaks of the other theories, says not a word of this.

² That Kriotha is the present reading in Herodotus there seems every reason to believe; and Kriotha, on Herod. Hal. represents, it seems, some 1. Kriotha, in spite of the difficulty of Kriotha in relation of the text.

³ Herodot. II. 217. Concerning the two Propontic towns of Palkia, III. 92, called both the Pelagian town by Herodotus, and also by Thuc. II. 103. 104, and also by Strabo, II. 103. 104, in the Peloponnese, see the notes on Herodotus, II. 217. 218. 219. 220. 221. 222. 223. 224. 225. 226. 227. 228. 229. 230. 231. 232. 233. 234. 235. 236. 237. 238. 239. 240. 241. 242. 243. 244. 245. 246. 247. 248. 249. 250. 251. 252. 253. 254. 255. 256. 257. 258. 259. 260. 261. 262. 263. 264. 265. 266. 267. 268. 269. 270. 271. 272. 273. 274. 275. 276. 277. 278. 279. 280. 281. 282. 283. 284. 285. 286. 287. 288. 289. 290. 291. 292. 293. 294. 295. 296. 297. 298. 299. 300. 301. 302. 303. 304. 305. 306. 307. 308. 309. 310. 311. 312. 313. 314. 315. 316. 317. 318. 319. 320. 321. 322. 323. 324. 325. 326. 327. 328. 329. 330. 331. 332. 333. 334. 335. 336. 337. 338. 339. 340. 341. 342. 343. 344. 345. 346. 347. 348. 349. 350. 351. 352. 353. 354. 355. 356. 357. 358. 359. 360. 361. 362. 363. 364. 365. 366. 367. 368. 369. 370. 371. 372. 373. 374. 375. 376. 377. 378. 379. 380. 381. 382. 383. 384. 385. 386. 387. 388. 389. 390. 391. 392. 393. 394. 395. 396. 397. 398. 399. 400. 401. 402. 403. 404. 405. 406. 407. 408. 409. 410. 411. 412. 413. 414. 415. 416. 417. 418. 419. 420. 421. 422. 423. 424. 425. 426. 427. 428. 429. 430. 431. 432. 433. 434. 435. 436. 437. 438. 439. 440. 441. 442. 443. 444. 445. 446. 447. 448. 449. 450. 451. 452. 453. 454. 455. 456. 457. 458. 459. 460. 461. 462. 463. 464. 465. 466. 467. 468. 469. 470. 471. 472. 473. 474. 475. 476. 477. 478. 479. 480. 481. 482. 483. 484. 485. 486. 487. 488. 489. 490. 491. 492. 493. 494. 495. 496. 497. 498. 499. 500. 501. 502. 503. 504. 505. 506. 507. 508. 509. 510. 511. 512. 513. 514. 515. 516. 517. 518. 519. 520. 521. 522. 523. 524. 525. 526. 527. 528. 529. 530. 531. 532. 533. 534. 535. 536. 537. 538. 539. 540. 541. 542. 543. 544. 545. 546. 547. 548. 549. 550. 551. 552. 553. 554. 555. 556. 557. 558. 559. 560. 561. 562. 563. 564. 565. 566. 567. 568. 569. 570. 571. 572. 573. 574. 575. 576. 577. 578. 579. 580. 581. 582. 583. 584. 585. 586. 587. 588. 589. 590. 591. 592. 593. 594. 595. 596. 597. 598. 599. 600. 601. 602. 603. 604. 605. 606. 607. 608. 609. 610. 611. 612. 613. 614. 615. 616. 617. 618. 619. 620. 621. 622. 623. 624. 625. 626. 627. 628. 629. 630. 631. 632. 633. 634. 635. 636. 637. 638. 639. 640. 641. 642. 643. 644. 645. 646. 647. 648. 649. 650. 651. 652. 653. 654. 655. 656. 657. 658. 659. 660. 661. 662. 663. 664. 665. 666. 667. 668. 669. 670. 671. 672. 673. 674. 675. 676. 677. 678. 679. 680. 681. 682. 683. 684. 685. 686. 687. 688. 689. 690. 691. 692. 693. 694. 695. 696. 697. 698. 699. 700. 701. 702. 703. 704. 705. 706. 707. 708. 709. 710. 711. 712. 713. 714. 715. 716. 717. 718. 719. 720. 721. 722. 723. 724. 725. 726. 727. 728. 729. 730. 731. 732. 733. 734. 735. 736. 737. 738. 739. 740. 741. 742. 743. 744. 745. 746. 747. 748. 749. 750. 751. 752. 753. 754. 755. 756. 757. 758. 759. 760. 761. 762. 763. 764. 765. 766. 767. 768. 769. 770. 771. 772. 773. 774. 775. 776. 777. 778. 779. 780. 781. 782. 783. 784. 785. 786. 787. 788. 789. 790. 791. 792. 793. 794. 795. 796. 797. 798. 799. 800. 801. 802. 803. 804. 805. 806. 807. 808. 809. 810. 811. 812. 813. 814. 815. 816. 817. 818. 819. 820. 821. 822. 823. 824. 825. 826. 827. 828. 829. 830. 831. 832. 833. 834. 835. 836. 837. 838. 839. 840. 841. 842. 843. 844. 845. 846. 847. 848. 849. 850. 851. 852. 853. 854. 855. 856. 857. 858. 859. 860. 861. 862. 863. 864. 865. 866. 867. 868. 869. 870. 871. 872. 873. 874. 875. 876. 877. 878. 879. 880. 881. 882. 883. 884. 885. 886. 887. 888. 889. 890. 891. 892. 893. 894. 895. 896. 897. 898. 899. 900. 901. 902. 903. 904. 905. 906. 907. 908. 909. 910. 911. 912. 913. 914. 915. 916. 917. 918. 919. 920. 921. 922. 923. 924. 925. 926. 927. 928. 929. 930. 931. 932. 933. 934. 935. 936. 937. 938. 939. 940. 941. 942. 943. 944. 945. 946. 947. 948. 949. 950. 951. 952. 953. 954. 955. 956. 957. 958. 959. 960. 961. 962. 963. 964. 965. 966. 967. 968. 969. 970. 971. 972. 973. 974. 975. 976. 977. 978. 979. 980. 981. 982. 983. 984. 985. 986. 987. 988. 989. 990. 991. 992. 993. 994. 995. 996. 997. 998. 999. 1000.

nor neither positive proof, nor ground for probable inference, that there were any such, though traces of Phœnician settlements in some of the islands may doubtless be pointed out. And if we examine the character and aptitude of Greek, as compared either with Egyptian or Phœnician, it will appear that there is not only no analogy, but an obvious and fundamental contrast: the Greek may occasionally be found as a borrower from these alienative contemporaries, but he cannot be looked upon as their offspring or derivative. Nor can I bring myself to accept an hypothesis which implies (unless we are to regard the supposed foreign immigrants as very few in number, in which case the question loses most of its importance) that the Hellenic language—the richest among the many varieties of human speech, and possessing within itself a pervading symmetry and organization,—is a mere confluence of two foreign barbaric languages (Phœnician and Egyptian) with two or more internal barbaric languages—Pelagian, Latagian, &c. In the mode of investigation pursued by different historians into this question of early foreign colonies, there is great difference (as in the case of the Pelagi) between different authors—from the negligent Summary of Hædell Nothman to the refined distillation of Dr. Thirlwall in the third chapter of his History. It will be found that the amount of positive knowledge which Dr. Thirlwall guarantees to his readers in that chapter is extremely inconsiderable; for though he proceeds upon the general theory (different from that which I hold) that historical matter may be distinguished and elicited from the legends, yet when the question arises respecting any definite historical result, his canon of credibility is too just to permit him to overlook the absence of positive evidence; even when all intrinsic improbability is removed. That which I note as *Terra Incognita* is in his view a land which may be known up to a certain point; but the map which he draws of it contains so few unestimated places as to differ very little from absolute vacancy.

The most ancient fluvial called *Ilidos* is affirmed by Aristotle to have been near *Didlos*, and the river *Achelous*—a description which would have been intelligible (when the river does not flow near *Didlos*, if it had not been qualified by the remark, that the river had often in former times changed its course. He states moreover

near
Achilles
Ilidos—
Didlos.

CHAPTER III.

MEMBERS OF THE HELLENIC AGGREGATE, SEPARATELY TAKEN.—GREEKS NORTH OF PELOPONNÉSUS.

HAVING in the preceding chapter treated upon the Greeks in their aggregate capacity, I now come to describe separately the portions of which this aggregate consisted, as they present themselves at the first discernible period of history.

It has already been mentioned that the twelve races or subdivisions, members of which is called the Amphiktyonic confederation, were as follows:—

North of the pass of Thermopylæ,—Thessalians, Perrhæbians, Magnètes, Achæans, Molians, Boiotes, Dolopes.

South of the pass of Thermopylæ,—Dorians, Ionians, Bœotians, Locrîans, Phocians.

Other Hellenic races, not comprised among the Amphiktyones, were—

The Eolians and Abærentians, north of the Gulf of Corinth.

The Arcadians, Elians, Pisatians, and Triphylians, in the central and western portion of Peloponnesus: I do not here name the Achæans, who occupied the southern or Peloponnesian coast of the Corinthian gulf, because they may be presumed to have been originally of the same race as the Peloponnesian Achæans, and therefore participants in the Amphiktyonic confederacy, though their actual connexion with it may have been dissolved.

The Dryopes, an inconsiderable, but seemingly peculiar subdivision, who occupied some scattered points on the sea-coast—Heracleæ on the Argolic peninsula; Sipræ and Eurytus in Eubœa; the island of Rhythron, &c.

Though it may be said, in a general way, that our historical

dissemination of the Hellenic aggregate, apart from the Hellenic
 great epoch of legend, commences with 776 B.C., yet with regard
 to the larger number of its subdivisions just enumerated, we can hardly be said to possess any specific
 facts anterior to the invasion of Xerxes in 480 B.C.
 Until the year 480 B.C. (the epoch of Ctesias in Asia Minor, and
 of Peisistratus at Athens), the history of the Greeks presents
 hardly anything of a collective character: the movements of each
 portion of the Hellenic world begin and end apart from the rest.
 The destruction of Elfeia by the Amphiktyons is the first
 historical incident which brings into play, in defence of the
 Delphian temple, a common Hellenic feeling of active obligation.

But about 680 B.C., two important changes are seen to come
 into operation which alter the character of Grecian
 history—extricating it out of its former chain
 of detail, and centralising its isolated phenomena—1. The subjugation of the Asiatic Greeks by Lydia and
 by Persia, followed by their struggles for emancipation—wherein
 the European Greeks became implicated, first as accessories, and
 afterwards as principals. 2. The combined action of the large
 mass of Greeks under Sparta, as their most powerful state and
 acknowledged chief, succeeded by the rapid and extraordinary
 growth of Athens, the complete development of Grecian maritime
 power, and the struggle between Athens and Sparta for the
 leadership. These two causes, though distinct in themselves, must
 nevertheless be regarded as working together to a certain degree
 —or rather the second grew out of the first. For it was the
 Persian invasions of Greece which first gave birth to a wide-spread
 alarm and antipathy among the leading Greeks (we must not
 call it Pan-Hellenic, since more than half of the Amphiktyonic
 confederacy gave earth and water to Xerxes) against the barbarians
 of the East, and impressed them with the necessity of
 joint active operations under a leader. The idea of a leadership
 or hegemony of collective Hellas, as a privilege necessarily vested
 in some one state for common security against the barbarians,
 thus became current—an idea foreign to the mind of Hellas, or
 any one of the more sage. Next came the miraculous development
 of Athens, and the violent contest between her and Sparta which
 should be the leader; the larger portion of Hellas taking side,

with one or the other, and the common ground against the Persian being for the time put out of sight. Athens is put down, Sparta acquires the undisputed hegemony, and again the semi-barbaric feeling manifests itself, though faintly, in the Asiatic expeditions of Agamemnon. But the Spartans, too incompetent either to deserve or maintain this exalted position, are overthrown by the Thebans—themselves not less incompetent, with the single exception of Epaminondas. The death of that single man extinguishes the pretensions of Thebes to the hegemony. Hellas is left, like the deserted Pentapolis in the Odyssey, worried by the competition of several suitors, none of whom is strong enough to stretch the bow on which the prize depends.¹ Such a manifestation of force, as well as the trampling down of the competing suitors, is reserved, not for any legitimate Hellenic aim, but for a semi-hellenised² Macedonian, "brought up at Pelia," and making good his march towards gradually from the north of Olympus. The hegemony of Greece thus passes for ever out of Greek hands; but the conqueror finds his interest in reviving, as a name and pretext, the old miso-Persian banner, after it had ceased to represent any real or current feeling, and had given place to other impulses of more recent growth. The declaration and marriage once committed by Xerxes at Athens is avenged by annihilation of the Persian empire. And this victorious consummation of the once powerful Pan-Hellenic antipathy—the dream of Xerxes³ and the Ten Thousand Greeks after the battle of Eurymedon—the hope of Justin of Phars—the exhortation of Isokrates⁴—the project of Philo and the achievement of Alexander, while it manifests the irresistible might of Hellenic and Macedonian arms in the then existing state of the world, is at the same time the closing scene of substantive Greek life. The citizen-feelings of Greece become afterwards nearly secondary forces, subordinate to the preponderance of Greek mercantile

¹ Xenophon, *Hellas*, c. ii. § 2; Demosthenes, *De Corona*, c. 1, p. 161.—*And yet for a degree of equal weakness and equal "anti-Hellenic" feeling there was no remedy.*

⁴ Xenophon, *Hellas*, c. 1, 11; Isokrates, *Orat. ad Philippum*, *Orat.* v. p.

107. This discourse of Isokrates is composed expressly for the purpose of calling on Philip to put himself at the head of united Greece against the Persians; the Greek or, rather, Pan-Hellenic, sentiment is a declaration of war, and it is only for the same purpose, but under the language of Athens, a political and not a national declaration. See *Orat.* iv. p. 10—11.

under Macedonian order, and to the relief of all native Hellenes—the Atticæan monarchism. Some few individuals are indeed found, even in the third century B.C., worthy of the best times of Hellas, and the Archæan confederation of that century is an honourable attempt to contend against inevitable difficulties: but on the whole, that free, social, and political march, which gives so much interest to the earlier centuries, is irreversibly banished from Greece after the generation of Alexander the Great.

The foregoing brief sketch will show that, taking the period from Greece and Persia down to the generation of Alexander (350—330 B.C.), the phenomena of Hellas generally, and her relations both foreign and inter-political, admit of being grouped together in masses with continued dependence on one or a few predominant circumstances. They may be said to constitute a sort of historical apogee, analogous to that which Herodotus has constructed out of the wars between Greeks and barbarians from the legends of Æt and Eurytus down to the repulse of Xerxes. But when we are called back to the period between 776 and 500 B.C., the phenomena brought to our knowledge are scanty in number—exhibiting few common feelings or interests, and no tendency towards any one assignable purpose. To impart attraction to this first period, so obscure and unpossessing, we shall be compelled to consider it in its relation with the second; partly as a preparation, partly as a contrast.

Of the ævion-Peloponnesian Greeks north of Attica, during these two centuries, we know absolutely nothing; but it will be possible to furnish some information respecting the early condition and struggles of the great Doric states in Peloponnesus, and respecting the rise of Sparta from the second to the first place in the comparative scale of Grecian powers. Athens becomes first known to us as the legislator of Draco and the attempt of Cylon (612 B.C.) to make himself despot; and we gather some facts concerning the Ionic cities in Eubœa and Asia Minor during the century of their chief prosperity, prior to the reign and conquests of Cæsar. In this way we shall form to ourselves some idea of the growth of Sparta and Athens,—of the short-lived and energetic development of the Ionic Greeks—and

these two centuries, we know absolutely nothing; but it will be possible to furnish some information respecting the early condition and struggles of the great Doric states in Peloponnesus, and respecting the rise of Sparta from the second to the first place in the comparative scale of Grecian powers. Athens becomes first known to us as the legislator of Draco and the attempt of Cylon (612 B.C.) to make himself despot; and we gather some facts concerning the Ionic cities in Eubœa and Asia Minor during the century of their chief prosperity, prior to the reign and conquests of Cæsar. In this way we shall form to ourselves some idea of the growth of Sparta and Athens,—of the short-lived and energetic development of the Ionic Greeks—and

of the slow working of those causes which tended to bring about increased Hellenic intercommunication—as contrasted with the enlarged range of ambition, the grand Pan-Hellenic ideas, the spontaneous party-antipathies, and the intensified action both abroad and at home, which grew out of the contact with Persia.

There were also two or three remarkable manifestations which will require special notice during this first period of Greek history:—1. The great multiplicity of colonies sent forth by individual cities, and the rise and progress of these several colonies; 2. The number of despots who arose in the various Greek cities; 3. The lyric poetry; 4. The refinements of that which afterwards ripened into moral philosophy, as manifested in gnomes or apophthegms—or the age of the Seven Wise Men.

But before I proceed to relate these earliest proceedings (unfortunately too few) of the Greeks and Ionians during the historical period, together with the other matters just alluded to, it will be convenient to go over the names and positions of those other Greek states respecting which we have no information during these first two centuries. Some idea will thus be formed of the less important members of the Hellenic aggregate previous to the time when they will be called into action. We begin by the territory north of the pass of Thermopylæ.

Of the different races who dwell between this celebrated pass and the mouth of the river Peneius, by far the most powerful and important were the Thesalians. Sometimes indeed the whole of this area passes under the name of Thessaly—since nominally, though not always really, the power of the Thesalians extended over the whole. We know that the Trochilæan Hæmatæ, founded by the Lacedæmonians in the early years of the Peloponnesian war close at the pass of Thermopylæ, was planted upon the territory of the Thesalians.¹ But there were also within these limits other races, inferior and dependent on the Thesalians, yet said to be of more ancient date, and certainly not less genuine inhabitants of the Hellenic race. The Perrhæbi²

¹ Thucyd. II. 91. Cf. Strabo, l. c. p. 492-493. Strabo also notices the pass between them, the Peneius, and the river of the Perrhæbi, the Thesalians, the Perrhæbi, and the river Peneius.

² Thucyd. II. 91. Strabo, l. c. p. 492-493.

³ Thucyd. II. 91. Strabo, l. c. p. 492-493. Strabo also notices the pass between them, the Peneius, and the river of the Perrhæbi, the Thesalians, the Perrhæbi, and the river Peneius.

sons of Hittitides. Moreover it is to be remarked that the language of the Theophrastus was Hellenic, a variety of the *Koine* dialect; the same (so far as we can make out) as that of the people whom they must have found settled in the country at their first conquest. It then is to be true, that at some period anterior to the commencement of authentic history, a body of Theophrastian warriors crossed the passes of India, and established themselves as conquerors in Thessaly; we must suppose them to have been, more warlike than numerous, and to have gradually swept their primitive branches.

In other respects, the condition of the population of Thessaly, such as we find it during the historical period, bears the suggestion of an original mixture of conquerors and conquered: for it seems that there was among the Thessalians and their dependents a triple gradation, somewhat analogous to that of Lacedæmonia. First, a class of rich proprietors distributed throughout the principal cities, possessing most of the soil, and constituting separate oligarchies loosely hanging together.¹ Next the subject tribesmen, Magnates, Perceuchi, different from the Lacedæmonian Perædæi, in this point, that they retained their ancient villenage and separate amphitectonic franchise. Thirdly, a class of work or dependent cultivators, corresponding to the Lacedæmonian Heilotæ, who tilling the lands of the wealthy oligarchs, paid over a proportion of its produce, furnished the retinues by which these great families were surrounded, served as their followers in the cavalry, and were in a condition of villenage,—yet with the important reserve, that they could not be sold out of the country.

that they had a permanent tenure in the soil, and that they maintained among one another the relations of family and village.

This last-mentioned order of men, in Thessaly called the *Paneste*, is attested by all ancient authors to the Helots of Laconia, and in both cases the danger attending such a social arrangement is noticed by Plato and Aristotle.

For the Helots as well as the *Paneste* had their own common language and mutual sympathies, a separate residence, arms, and courage; to a certain extent, also, they possessed the means of acquiring property, since we are told that some of the *Paneste* were richer than their masters.¹ So many means of action, combined with a degraded social position, gave rise to frequent revolt and incessant apprehensions. And general rule, indeed, the cultivation of the soil by slaves or dependents, for the benefit of proprietors in the cities, prevailed throughout most parts of Greece. The rich men of Thebes, Argos, Athens, or Elis, must have derived their incomes in the same manner; but it seems that there was often in other places a larger infamiture of bought foreign slaves, and also that the number, ill-will, and courage of the degraded village population was nowhere so great as in Thessaly and Laconia. Now the origin of the *Paneste* in Thessaly is ascribed to the conquest of the territory by the Thesprotians, as that of the Helots in Laconia is traced to the Dorian conquest. The victors in both countries are said to have entered into a convention with the vanquished population, whereby the latter became suds and tillers of the land for the benefit of the former, but were at the same time protected in their holdings, constituted subjects of the state, and secured against being sold away as slaves. Even in the Thebanian cities, though inhabited in common by Thebanian proprietors and their *Paneste*, the quarters assigned to each were to a great degree separated: what was called the Free Argos could not be touched by any Theban except when specially summoned.²

the danger of having numerous
slaves, ill-will, and of one
language—Thebes, Argos, Athens,
or Elis.

² Aristot. s. v. p. 127.

When the people were, whom the conquest of Thebes by the Thesprotians related to this pastoral village, we were differently stated. According to Thesprotians, they were Perthebians and Magistes; according to others, Pelasgians; while Archimedes alleged them to have been Boeotians of the territory of Aoni^a—some assigning to escape the conquerors, others remaining and accepting the condition of vassals. But the conquest, according to us a fact, occurred at far too early a day to allow of our making out either the manner in which it came to pass or the state of things which preceded it. The Pelasgians whom Herodotus saw at Erichon are affirmed by him to have been the descendants of those who gifted Thebes to escape² the invading Thesprotians; though others held that the Boeotians, driven on this occasion from their habitations on the Gulf of Pagasæ near the Achæans of Pithulæ, precipitated themselves on Cithæron and Boeotia, and settled in it, smothering the Minæ and the Pelasgians.

Passing over the legends on this subject, and confining ourselves to historical times, we find an established quadripartite division of Thessaly, said to have been introduced in the time of Alkman, the ancestor (real or mythical) of the powerful Aleuadae.—Thessaliotis, Pelagiotis, Histiatis, Pithiotes.* In Pithiotes were comprehended the Achæans, whose chief towns were Miletos, Dolos, Thesio Pithioides, also, Larissæ, Kromni and Ptolema, on or near the western coast of the Gulf of Pagasæ. Histiatis, to the north of the Pagasæ

Members attended the Forum. Many with the assistance of Eileen through TVE the daughter of Kalamazoo; they passed an article (Kalamazoo, Pa., 20, 1940), Kalamazoo, Pa., 20, 1940, Kalamazoo, Pa., 20, 1940, Kalamazoo, Pa., 20, 1940.

The territory of the city of Houston (in the north part of the subject of Houston) was also ruled by Houston. This double ownership of this area was therefore ruled Houston. Several years later, when the city was founded, it was found that the Houston had ruled the northern part of Houston, and several years later the Houston of the Houston Houston, after the north-west of Houston Houston, in p. 100, p. 100.

was employed by members of the native dignity,¹ or even by foreign states, for the purpose of halting about political revolutions.

"When Thessaly is under her Taxes, all the neighbouring people pay tribute to her; she can send into the field 6000 cavalry and 10,000 hoplites or heavy-armed infantry,"² observed Justin, despot of Flavia, to Polphemon of Pharsalia, in endeavouring to prevail on the latter to second his pretensions to that dignity. The impost due from the tributaries, seemingly considerable, was then realized with ease, and the duties upon imports at the harbours of the Pagasan gulf, imposed for the benefit of the confederacy, were then enforced with strictness; but the observation shows that while unwarlike Thessaly was very powerful, her periods of warlike activity were only occasional.³ Among the nations which then paid tribute to the throne of Thessalian power, we may number not merely the Perrhaibi, Magnesia, and Adians of Pithulie, but also the Mallian and Dolopen, and various tribes of Epirote extending to the westward of Pithia.⁴ We

activity.

may remark that they were all (except the Mallian) javelin-men or light-armed troops, not serving in rank with the full panoply; a fact which in Greece counts as presumptive evidence of a lower civilization; the Magnesia, too, had a peculiar close-fitting mode of dress, probably suited to movements in a mountainous country.⁵ There was even a time when the Thessalian power threatened to extend westward of Thermopylae, and subjugate the Phokians, Dorians, and Lokrians. So much were the Phokians alarmed at this danger, that they had built a wall across the pass of Thermopylae for the purpose of more easily defending it against

¹ Xenophon, *Hæmorrh.* c. 1. §. 12; *Hæmorrh.* c. 1. §. 27. The loss of the recently raised States of Europe (see *Historia*, *Præf.*, *Constantinople*, 1799, p. 41) probably prevents us from mistaking the account of Aristophanes (*Uran.* 1001) about the vanquishing of Argives along the frontiers of Pharsalia; but the factious there appear to have nothing to do with the proceedings of Justin, treated upon by Xenophon.

² Xenophon, *Hæmorrh.* c. 1. §. 12.

³ Xenophon, *Uran.* c. 1. §. 12. §. 25. E. & G. p. 25. The writer had mistaken

in assuming Philip as having got possession of the police authority of the Thessalian confederacy, partly by foreign, partly by force, and we then copy of the Justin and the Justin which formed the source of the following.

⁴ Xenophon, *Hæmorrh.* c. 1. §. 12. §. 25. The Mallian along their tributaries along with the Dolopen; the Mallian are named by Justin (c. 1. §. 12. §. 25. §. 25) along with the Dolopen, but we do not find where they dwell.

⁵ Xenophon, *Hæmorrh.* c. 1. §. 12; *Hæmorrh.* c. 1. §. 25.

Thessalian invaders, who are reported to have penetrated more than once into the Phokian valleys, and to have sustained some severe defeats.¹ At what period than these events happened, we find no information; but it must have been considerably earlier than the invasion of Xerxes, since the defensive wall which had been built at Thermopylae by the Phokians was found by Leonidas in a state of ruin. But the Phokians, though they no longer felt the necessity of keeping up this wall, had not ceased to fear and hate the Thessalians—an antipathy which will be found to manifest itself palpably in connection with the Persian invasion. On the whole the resistance of the Phokians was unavailing, for the power of the Thessalians never reached southward of the pass.

It will be recalled that three different ancient races,—
 Achæans, Perseids, Magyres, Achæans, Mallians, Dolopes,—
 though tributaries of the Thessalians, still retained their Amphiktyonic franchises, and were considered as legitimate Hellenes: all except the Mallians are indeed mentioned in the *Iliad*. We shall rarely have occasion to speak much of them in the course of this history: they are found siding with Xerxes (chiefly by constraint) in his attack of Greece, and almost indifferent in the struggle between Sparta and Athens. That the Achæans of Phthiotis are a portion of the same race as the Achæans of Peloponnesus it seems reasonable to believe, though we want no historical evidence to substantiate it. Achæa Phthiotis is the seat of Hellas, the patriarch of the native race,—of the primitive Hellas, by some treated as a town, by others as a district of some breadth,—and of the great national hero Achilles. Its connection with the Peloponnesian Achæans is not unlike that of Doris with the Peloponnesian Dorians.²

We have also to notice another ethnical kindred, the date and circumstances of which are given to us only in a mythical form, but which seems nevertheless to be in itself a reality,—that of the Magyres or Pelasgi and Cæcæ, with the two divisions of

¹ Herodotus, vii. 178; viii. 57, 58, 59.

² The story of legendary Thessalians of Xerxes' army leaving Thermopylae, and returning home to Greece, (Herodotus, ix. 44, 45) is not without probability.

³ The story was, that three Achæans of Phthia joined with Peloponnesians with Pelops, and settled in Laconia, (Herodotus, vii. 25, 26).

Mount Oita, which forms one side of the pass of Thermopylae. Southward of the pass, the Lokrians, Phokians, and Boeotians occupied the mountains and passes between ^{Lokrian, Phokian, Boeotian.} Thessaly and Boeotia. The coast opposite to the western side of Euboea, from the neighbourhood of Thermopylae as far as the Boeotian frontier at Anthidion, was possessed by the Lokrians, whose northern frontier town, Alpeia, was continuous with the Malians. There was, however, one narrow strip of Phokia—the town of Ophians, where the Phokians also touched the Euboean sea—which broke this continuity and divided the Lokrians into two sections,—Lokrians of Mount Kaulia, or Epiknemidian Lokrians, and Lokrians of Opyos, or Opyandian Lokrians. The mountain called Kaulia, running southward parallel to the coast from the end of Oita, divided the former section from the inland Phokians and the upper valley of the Kopais: farther southward, joining continuously with Mount Ptoon by means of an intervening mountain which is now called Oikoma, it separated the Lokrians of Opyos from the territories of Orchomenos, Thibes, and Anthidion, the north-eastern portions of Boeotia. Besides these two sections of the Lokrian name, there was also a third, completely separate, and said to have been colonised out from Opyos,—the Lokrians surname Oukoi,—who dwelt apart on the western side of Phokia, along the northern coast of the Corinthian Gulf. They reached from Arphione—which overhung the plain of Krana, and stood within seven miles of Delphi—to Naupaktos, near the narrow entrance of the Gulf: which latter town was taken from these Lokrians by the Athenians a little before the Peloponnesian war. Opyos prided itself on being the mother-city of the Lokrian name, and the legends of Demokleion and Pyrrha found a home there as well as in Phokiotis. Alpeia, Nikos, Thronos, and Skaryphos, were towns, ancient but unimportant of the Epiknemidian Lokrians; but the whole length of this Lokrian coast is celebrated for its beauty and fertility, both by ancient and modern observers.¹

¹ *Strabo*, ix. p. 485; *Forchhammer*, *Beiträge*, p. 114, ff. There is some doubt as to the position of Opyos, but it was a city of Euboea as well as the Boeotian Oikoma, and it was situated in the later 'zone of Greece,

whose military position seems to be more evident than legendary celebrity (*Strabo*, xiv. p. 1; *Strabo*, x. p. 1; *Strabo*, x. p. 1; *Strabo*, x. p. 1). The latter words Thronos and Skaryphos or Skaryphos, as being Phokian, not Lokrian; while they

The Phocians were bounded on the north by the little territories called Doria and Dryopis, which separated them from the Malians,—on the north-east, east and south-west by the different branches of Lokrians,—and on the south-east by the Boeotians. They touched the Euboian sea (as has been mentioned) at Daphnia, the point where it approaches nearest to their chief town Elateia; their territory also comprised most part of the lofty and black range of Parnassus as far as its suddenly terminating, where a lower portion of it, called Kirphik, projects into the Corinthian Gulf, between the two bays of Antikyra and Krissa; the latter, with its once fertile plain, was in proximity to the sacred rock of the Delphian Apollo. Both Delphi and Krissa originally belonged to the Phokian race. But the sanctity of the temple, together with Lanchmenton aid, enabled the Delphians to set up for themselves, disavowing their connexion with the Phokian brotherhood. Territorially speaking, the most valuable part of Phokis¹ consisted in the valley of the river Kirphika, which takes its rise from Parnassus not far from the Phokian town of Lilia, passes between Oita and Kallisto on one side and Parnassus on the other, and enters Boeotia near Charoneia, discharging itself into the lake Kôpsa. It was on the projecting mountain ridges and rocks on each side of this river that the numerous little Phokian towns were situated. Twenty-two of them were destroyed and broken up into villages by the Amphiktyonic order after the second Sacred War; *Abas* (one of the few, if not the only one, that was spared) being protected by the sanctity of its temple and oracle. Of these cities the most important was Elateia, situated on the left bank of the Kirphika, and on the road from Lokris into Phokis, in the natural march of an army from Thermopylae into Boeotia. The Phokian towns² were embodied in an ancient confederacy, which

were by a short time during the prosperity of the Phocians in the beginning of the Sacred War, though not permanently (Müller, *Phil. Euphr.* c. vi. p. 12). This survey is one description of the changes of the Phocians of Phokis from the union of Elateia and Oita, p. 120. These Lokris were by about the important road from Thermopylae to Elateia and Krissa (Pausan. vi. 11, 2; Diod. xiv. 11).

¹ Pausan. x. 10, 4.

² Pausan. x. 1, 1; Diodorus Sic. lib. x. 10, 25; Strabo vii. 40, with *Antiquities of Phokis*.

The chief kind of Phokian, though the larger half of it is devoted to Delphi, tells us all that we know respecting the last important tribe of Phokis. (Cicero, *de Nat. Deorum* lib. ii. c. 12; and *Antiquities of Phokis* in *Antiquities of Greece*, vol. ii. c. 12.)

Two historical monuments of the

held its periodical meetings at a temple between Dodona and Delphi.

The little territory called Doria and Dryopis occupied the southern declivity of Mount Ossa, dividing Phthia on ^{parts}—the north and north-west from the *Stodion, Malisus, Dryas*, and *Malisus*. That which was called Doria in the historical times, and which reached, in the time of Herodotus, nearly as far eastward as the Malian Gulf, is said to have formed a part of what had been once called Dryopis; a territory which had comprised the summit of Ossa as far as the Spercheus northward, and which had been inhabited by an old Hellenic tribe called Dryopes. The Dorians acquired their settlement in Dryopis by gift from Hēraklēs, who along with the Malians (so runs the legend) had expelled the Dryopes, and compelled them to find for themselves new seats at Hermionē and Asinē, in the Argolis peninsula of Peloponnesos—at Styra and Karystos in Euboea—and in the island of Kythnos;¹ it is only in these five last-mentioned places that history recognizes them. The ^{Dryopes} territory of Doria was distributed into four little townships—

Phokos or Akryphos, Boios, Kythion, and Erineos—each of which seems to have occupied a separate valley belonging to one of the feeders of the river Kephissos—the only narrow spaces of cultivated ground which this "small and sad" region presented.² In itself this tetrapolis is so insignificant, that we shall rarely find occasion to mention it: but it acquired a historical consequence by being regarded as the metropolis of the great Dorian cities in Peloponnesos, and receiving on that ground special protection from Sparta. I do not here touch upon that string of anti-historical migrations—stated by Herodotus and illustrated by the imagination as well as denoted by the fancy of O. Müller—through which the Dorians are affiliated with the patriarch of the Hellenic race—moving originally out of Phthiotis to Herakleia,

¹ Phokos has Phokion (also) compared the Phokion troops before Troy and is slain in the Iliad, marking the first settlement of Phthia—also at Dryopis on the Spercheus, see the story at Asinē in the *Geograph. Hist. (Strabo, ix. p. 445; Pausan. ii. 12, 13).*

² Herodot. vii. 43, 44, 45; Diodor.

ix. 27; *Antiqu. de l'Asie, viii. p. 122.*

³ O. Müller (*History of the Darians, book i. chap. 1*) has given all that can be known about Doria and Dryopis together with some notices which appear to me very inadequately substantiated.

⁴ *History of the Darians, book i. p. 122.*

them to Phœbus, and lastly to Dîris. The residence of Dorian in Dîris is a fact which marks us at the commencement of history, like that of the Phœbians and Lokrians in their respective territories.

We next pass to the *Ætolians*, whose extreme tribes covered the blank heights of *Æta* and *Kassia*, reaching almost within sight of the Malian Gulf, where they bordered on the Dorians and Malians—while their central and western tribes stretched along the frontier of the Oanlian Lokrians to the flat plain, abundant in marsh and lake, near the mouth of the *Raïmon*. In the time of Herodotus and Thucydides they do not seem to have extended so far westward as the *Achelidæ*, but in later times this latter river, throughout the greater part of its lower course, divided them from the *Alkaranidæ*¹ on the north; they touched upon the *Dolopians* and upon a parallel of latitude nearly as far north as *Ambrakia*. There were three great divisions of the *Ætolian* name—the *Apoditi*, *Ophionids* and *Eurytians*—each of which was subdivided into several different village tribes. The northern and eastern portion of the territory² consisted of very high mountain ranges, and even in the southern portion, the mountains *Achysythos*, *Kastor*, *Chalkis*, *Taphlæssa*, are found at no great distance from the sea; while the chief towns in *Ætolia*—*Kalydia*, *Flourda*, *Chalkis*,—seem to have been situated outward of the *Raïmon*, between the last-mentioned mountain and the sea.³ The first two towns have been grossly smothered in legend, but are little named in history; while on the contrary, *Tharmon*, the chief town of the historical *Ætolians*, and the place where the aggregate meeting and festival of the *Ætolian* name, for the choice of a Pan-*Ætolic* general, was celebrated, is not noticed by any one earlier than *Epichoros*.⁴ It was partly

¹ Herod. vi. 129; Thucyd. i. 101.

² From the *Ætolian* journey of *Herakles* from *Thessalonike* toward *Epiphanis*, and then across the north-eastern portion of the modern *Eurytians* (the southern continuation of Mount *Typhantes* and *Olus*), take the other called *Chalkophrontes* (*Phyllos*, *Hellas* in *Geographia*, vol. i. p. 177–181), a part of the longer journey that *Atreus* took to *Salamis*.

³ *Hellas* (p. 18) notices *Ætolia* as extending inland as far as the bound-

aries of the *Helopians* (*Chalkophrontes*—which is quite correct)—*Ætolia* (*Epiphanis*)—*Argos* via *Corinth*, *Hellas*, i. p. 181.

⁴ *Hellas*, v. p. 181–183. There is however great uncertainty about the position of these ancient towns; compare *Evros*, *Hellas*, vol. iii. 287–291, p. 181–183, and *Geographia*, *Thessalonike* in *Atreus* (*Hellas*, p. 181–183).

⁵ *Hellas*, *Evros*, iii. 287, 289, *Hellas*, p. 181. The position of *Tharmon*—the aggregate is a town of

legendary renown, partly effaced (which he boldly acknowledged on both sides) with the Hellenes in Peloponnesus, which authenticated the title of the *Æthiops* to rank as Hellenes. But the great names of the *Apollidæ*, *Eurytides*, and *Ophioneis*, in the inland mountains, were no rule in their manners, and so unintelligible in their speech (which, however, was not barbaric, but very bad Hellenic), that this title might well seem disparaging—in point of fact it was disparaged in later times, when the *Æthiops* power and depredations had become obnoxious nearly to all Greece. And it is probably in this difference of manners between the *Æthiops* on the sea-coast and those in the interior, that we are to trace a geographical division mentioned by Strabo into Ancient *Æthiopia*, and *Æthiopia Epirotica* (or *Asiatica*).¹ When or by whom this division was introduced, we do not know. It cannot be founded upon any conquest, for the inland *Æthiops* were the most unconquerable of mankind; and the affirmation which Epirotus applied to the whole *Æthiops* man—that it had never been reduced to subjection by any one—is most of all beyond dispute concerning the inland portion of it.²

Adjoining the *Æthiops* were the *Akkadianians*, the westernmost of extra-Peloponnesian Greeks. They extended to the ^{The Ionia-} Ionian sea, and were, in the time of Thucydides, to ^{western} have occupied both banks of the river *Aschellus* in the lower part of its course—though the left bank appears afterwards as belonging to the *Æthiops*, so that the river came to constitute the boundary, often disputed and decided by arms, between them. The principal *Akkadianian* towns, *Stratus* and *Chelada*, were both on the right bank; the latter on the marshy and overflowed head near its mouth. Near the *Akkadianians*, towards the Gulf of Ambakia, were found barbarian or non-Hellenic nations—the *Agreusæ* and the *Amphilochians*: in the midst of the latter, on the shores of

all *Æthiopia*," and placed on a spot almost unapproachable by an army, in a certain island, though not exactly capable of being defended by the *Æthiops*, which position gives it the name of *Æthiops* and the *Æthiops* name is a mistake. The name, both of *Æthiops* and *Æthiops*, does not mean on the north of the *Æthiops*: the map of Herodotus does not mean correctly on the east of the *Æthiops*.

¹ *Strabo*, l. 7-8; compare Strabo, *Geographia* de *Æthiopia*, l. 10, p. 100.

² *Thucyd.* l. 10, p. 100. *Æthiops* is a name, not a nation. It seems that *Æthiops* had not been yet discovered by them, but he does not tell them so.

³ *Æthiops*, *Fragment*, p. 11, *Strabo*, l. 10, p. 101; *Strabo*, l. 10, p. 101.

the Argæion Gulf, the Greek colony called Argæ Amphilochians was established.

Of the five Hellenic sub-divisions now enumerated—Lokrians, Phokians, Dorians (of Doria), Ætolians, and Akarnanians (of whom Lokrians, Phokians, and Ætolians are comprised in the Homeric catalogues)—we have to say the same as of those north of Thermopylae: there is no information respecting them from the commencement of the historical period down to the Persian war. Even that important event brings into action only the Lokrians of the Euboian Sea, the Phokians, and the Dorians: we have to wait until near the Peloponnesian war before we require information respecting the Cretan Lokrians, the Ætolians, and the Akarnanians. These last three were unquestionably

the most backward members of the Hellenic aggregate. Though not absolutely without a central town, they lived dispersed in villages, retiring when attacked to inaccessible heights, perpetually armed and in readiness for aggression and plunder wherever they found an opportunity.¹ Very different was the condition of the Lokrians opposite Eubœa, the Phokians, and the Dorians. These were all orderly town communities, small indeed and poor, but not less well-administered than the average of Grecian townships, and perhaps except from those individual vicissitudes which so frequently troubled the Boeotian Thibes or the great cities of Thessaly. Timæus affirmed (contrary, as it seems, to the supposition of Aristotle) that in early times there were no slaves either among the Lokrians or Phokians, and that the work required to be done for proprietors was performed by poor freemen;² a habit which is alleged to have been continued until the temporary prosperity of the Sacred War, when the plunder of the Delphian temple so greatly enriched the Phokian leaders. But this statement is too briefly given, and too imperfectly substantiated, to justify any inference.

We find in the poet Alkman (about 610 B.C.) the Erychæan or Elydian shepherd named as a type of rude rusticity—the

¹ Thucyd. i. 2; H. N. Aristotle, however, included in his large description of Lokrians, in *Agrotopia* (Eubœa) as well as in *Alkaios* (Lokians).

antithesis of Sualia, where the poet was born.¹ And among the suitors who are represented as coming forward to claim the daughter of the Silyonides Kleisthenes in marriage, there appears both the Thessalian Hekleorichs from Kinnada, a member of the Skopad family—and the Bostian Maki, brother of that Tisaneus who in manly strength surpassed all his contemporary Greeks, and who had scouted from smouldering into the inner recesses of Bostia: this Makius seems to be set forth as a sort of antithesis to the delicate Sualdyridis of Sybaris, the most luxurious of mankind. Herodotus introduces these characters into his dramatic picture of this memorable wedding.²

Between Phlœia and Lakia on one side, and Attika (from which it is divided by the mountains Kitharôn and the Parnê) on the other, we find the important territory Bostia, called Bostia, with its ten or twelve autonomous cities, forming a sort of confederacy under the presidency of Thôlos, the most powerful among them. Even of this territory, destined during the second period of this history to play a part so conspicuous and effective, we know nothing during the first two centuries after 776 B.C. We first acquire some insight into it on occasion of the dispute between Thôlos and Platai about the year 520 B.C. Orchomenos, on the north-west of the lake Kôpas, forms throughout the historical times one of the cities of the Boiotian league, secondly the second after Thôlos. But I have already stated that the Orchomenian legends, the Catalogue and other allusions in Homer, and the traces of vast power and importance yet visible in the historical age, attest the early political existence of Orchomenos and its neighbourhood apart from Bostia.³ The

¹ This brief fragment of the *Proemion* of Alkman is preserved by Stephan. Byz. Theophrast. and quoted in by Strabo, l. p. 481; see Welcker, *Alkm. Fragm.* II., and Bergk, *A.B.* Fr. 13.

² Herodot. vi. 57.

³ See an admirable topographical description of the whole part of Bostia—the lake Kôpas and its environs, in Forchhammer's *Bœotien*, p. 126—130, with an explanatory map. This last long descriptive passage constructed by the old Orchomenians by the drainage of the lake, appeared to be contradictory of the ancient Kitharônian, are there very clearly laid down: one goes to the

sea, the other into the neighbouring lake Kôpas, which is surrounded by high rocky banks and on this more water without overflowing. The lake Kôpas is an enclosed basin receiving all the water from Lakia and Phlœia through the Kitharôn.

Forchhammer thinks that it was getting out the evidence of the same reason derived from 1302, a notice and which gave rise to the tale of an island peopled of people from the Thessalians to the Boiotian land in 1302.

The *Homeric Catalogue* presents Koros, on the south of the lake, as Boiotian, not yet Orchomenian, nor Argive (Hes. l. 570).

Amphikipsyia in which Oichomenos participated at the holy
Oikos-
temen. island of Kalauria near the Argolic peninsula, seems
to show that it must once have possessed a naval
base and commerce, and that its territory must have touched the
sea at Hala and the lower town of Laryssa, near the southern
frontier of Lokris; this sea is separated by a very narrow space
from the range of mountains which join Kithaia and Pelos, and
which enclose on the east both the bays of Oichomenos, Aspidithi
and Kôpa, and the lake Kôpaia. The migration of the Boeotians
out of Thebais into Boeotia (which is represented as a consequence
of the conquest of the former country by the Thesprotians) is
commonly assigned as the compulsory force which banished
Oichomenos. By whatever cause or at whatever time (whether
before or after 776 B.C.) the transition may have been effected, we
find Oichomenos completely Boeotian throughout the known
historical age—yet still retaining its local Mityræan legends, and
subject to the jealous rivalry¹ of Thebes, as being the second city
in the Boeotian league. The direct road from the passes of
Pithia southward into Boeotia went through Charoneia, having
Itebalia on the right and Oichomenos on the left hand, and
passed the south-western edge of the lake Kôpaia near the town
of Koroneia, Alakhomenos, and Halikartos. Here stood, between
Mount Helikon and the lake, on the road from Pithia to Thebes,
the important military post called Tiphônion.² The territory of
this latter city occupied the greater part of central
Boeotia. Boeotia south of the lake Kôpaia; it comprehended
Akrophiis and Mount Pithos, and probably touched the Euboian
Sea at the village of Salpeneia south of Aspidithi. South-west
of Thebes, bordering on the south-eastern extremity of Pithia
with the Pithian town of Bulia, stood the city of Theoplia.
Southward of the Asôpos, but northward of Kithaia and
Paros, were Plataia and Tanagra: in the south-eastern corner of
Boeotia stood Oryneia, the frequent subject of contention between
Thebes and Athens; and in the road between the Euboian Chalkia
and Thebes, the town of Mykalessos.

¹ See G. Müller, *Oichomenos*, *sup.*
cit. p. 428 *seq.*

² See *Geographical Top. Note* n.
41-42. Another position of this military
post is probably meant for the pass of

Mykalessos—*cf. sup.* *Geograph. Top.*
ibid. pp. 37, 38; *Geograph. Notiz.* p. 3.
The whole Mykalessos occupied its
present position of Kithaiaia
from Pithia.

From our first view of historical Scotia downward, there appears a confederation which embraces the whole territory; and during the Peloponnesian war the Thibon invade "the ancient constitutional nation of the Scotians" as a justification of extreme rigour, as well as of treacherous breach of the peace, against the recent Platæans.¹ Of this confederation the greater cities were primary members, while the lesser were attached to one or other of them in a kind of dependent union. Neither the names nor the number of these primary members can be certainly known: there seems ground for including Thibon, Orchomenus, Lebadia, Ecoria, Halicarn, Egea, Anthidia, Tanagra, Theopie, and Plata in common.² Alrapiia with the neighbouring Mount Pilon and its creek, Shilia, Olen and other places, were dependencies of Thibon: Chironia, Asplidia, Halimna and Hytina, of Orchomenus: Epha, Lenkira, Karleus and Thidid, of Theopie.³ Certain generals or magistrates called *Scotarchæ* were chosen annually to manage the common affairs of the confederation. At the time of the battle of Delium in the Peloponnesian war, they were eleven in number, two of them from Thibon; but whether this number was always maintained, or in what proportions the choice was made by the different cities, we had no distinct information. There were *Hierætes* during the Peloponnesian war four different senates, with whom the *Scotarchæ* consulted on matters of importance; a curious arrangement, of which we have no explanation. Lastly, there was the general civil and religious festival—the *Pantheia*—held periodically at Ecoria. Such were the forms, so far as we can make them out, of the Scotian confederacy; each of the separate cities possessing its own senate and constitution, and having its political independence as an autonomous unit, yet with a certain habitual deference to the federal obligations. Substantially, the affairs of the confederation will be found in the hands of Thibon, managed in the interests of Thibon ascendancy, which appears to have been sustained by

¹ Thucyd. B. 2. and all other the ancient sources; compare the speech of the Thibon to the Lacedæmonians after the capture of Plata, ii. 21, 22, 23.

stitut. of Thucyd. Scotia, ap. Corp. Ins. Græ. vol. 1. p. 720.

³ *Græch.*, vol. 128; iv. 38—41; *Epigræ.* by H. 1. p. 34, 35, 36, 37, 38, 39, 40. *Græch.*, Thibon, d. 1. 2—4; *Corpus* 2. 1010, *Orchomenus*, cap. 33. p. 395.

no other feeling except respect for superior force and bravery. The discontents of the minor Boeotian towns, harshly repressed and punished, form an interesting chapter in Grecian history.

One piece of information we find, respecting Thebes singly and apart from the other Boeotian towns, anterior to the year 700 B.C. Though brief and incompletely recorded, it is yet highly valuable, as one of the first incidents of solid and positive Grecian history. Diakles the Corinthian stands enrolled as Olympic victor in the 10th Olympiad, or 728 B.C., at a time when the oligarchy called Banckhads possessed the government of Corinth. The beauty of his person attracted towards him the attachment of Philokles, one of the members of this oligarchical body,—a sentiment which Grecian manners did not prescribe; but it also provoked an inveterate passion on the part of his own mother Halmynd, from which Diakles shrunk with hatred and horror. He abandoned for ever his native city and retired to Thebes, whither he was followed by Philokles, and where both of them lived and died. Their tombs were yet shown in the time of Aristotle, close adjoining to each other, yet with an opposite frontage; that of Philokles being so placed that the inmate could command a view of the lofty peak of his native city, while that of Diakles was so disposed as to block out all prospect of the hateful spot. That which preserves to us the memory of so remarkable an incident is, the esteem entertained for Philokles by the Thebans—a feeling so pronounced, that they invited him to make laws for them. We shall have occasion to point out one or two similar cases in which Grecian cities invoked the aid of an intelligent stranger; and the practice became common, among the Italian republics in the middle ages, to nominate a person not belonging to their city either as Podesta or as arbitrator in civil dissensions. It would have been highly interesting to know at length what laws Philokles made for the Thebans; but Aristotle, with his usual conciseness, merely alludes to his regulations respecting the adoption of children and respecting the multiplication of offspring in each separate family. His laws were framed with the view to maintain the original number & lots of land, without either subdivision or consolidation; but by what means the purpose was to

CHAPTER IV.

EARLIEST HISTORICAL VIEW OF PELOPONNÉSUS.
DORIAN IN ARGOS AND THE NEIGHBOURING CITIES.

We now pass from the northern members to the heart and head of Greece—Peloponnesus and Attica, taking the former first in order, and giving as much as can be ascertained respecting its early historical phenomena.

The traveller who entered Peloponnesus from Boeotia during the youthful days of Heracles and Theseus, found an array of powerful Doric cities contumacious to each other, and beginning at the Isthmus of Corinth. First came Megara, stretching across the Isthmus from sea to sea, and occupying the high and rugged mountain-ridge called Cnemida: next Corinth, with its strong and conspicuous acropolis, and its territory including Mount Onchia as well as the portion of the Isthmus at once most level and narrowest, which divided its two harbours called Lechæum and Kænchreæ. Westward of Corinth, along the Corinthian Gulf, stood Sikyon, with a plain of uncommon fertility, between the two towns: southward of Sikyon and Corinth was Thina and Kleonæ, both contumacious, as well as Corinth, with Argos and the Argolic peninsula. The largest head of the Argolic Gulf, including a considerable space of flat and marshy ground adjoining to the sea, was possessed by Argos; the Argolic peninsula was divided by Argos with the Doric cities of Egina, Saron, and Troezen, and the Dærygian city of Horismæ, the latter possessing the south-western corner. Proceeding southward along the western coast of the gulf, and passing over the Ithia river called Danaë, the traveller found himself to the dominion of Sparta, which comprised the

Location
Site of
Peloponnesus
see above

Continuation
Dorian
cities

entire southern region of the peninsula from its eastern to its western sea, where the river Neda flows into the latter. He first passed from Argos across the difficult mountain range called Paros (which bounds to the west the southern portion of Argolis), until he found himself in the valley of the river Olenos, which he followed until it joined the Eurotas. In the larger valley of the Eurotas, far removed from the sea, and accessible only through the most impracticable mountain roads, lay the five walled, unadorned, adjoining villages, which bore collectively the formidable name of Sparta. The whole valley of the Eurotas, from Skiritis and Peloponnesus at the border of Arcadia, to the Laconian Gulf—expanding in several parts into fertile plains, especially near to its mouth, where the towns of Gythium and Helos were found—belonged to Sparta; together with the cold and high mountain range to the eastward which projects into the promontory of Malea—and the still loftier chain of Taygetos to the westward, which ends in the promontory of Tamaros. On the other side of Taygetos, on the banks of the river Panisios, which there flows into the Messenian Gulf, lay the plain of Messini, the richest land in the peninsula. This plain had once yielded its ample produce to the free Messenian Dorian, resident in the towns of Sphaktria and Andania. But in the time of which we speak, the name of Messenians was borne only by a body of brave but homeless exiles, whose restoration to the land of their forefathers overpassed even the exile's proverbially "negative hope." Their land was subdivided with the western portion of Laconia, which reached in a south-westerly direction down to the extreme point of Cape Akritas, and northward as far as the river Neda.

Throughout his whole journey to the point last-mentioned from the borders of Boeotia and Megaris, the traveller would only step from one Dorian state into another. But on crossing from the south to the north bank of the river Neda, at a point near to its mouth, he would find himself out of Doric land altogether: first in the territory called Triphylia—next in that of Pisa or the Pisatid—thirdly in the more spacious and powerful state called Elis; these three comprising the coast-land of Peloponnesus from the mouth of the Neda to that of the Larion. The Triphylia, distributed into

Western
Pelopon-
nesus.

a number of small townships, the largest of which was Lacedæmon—and the Platæa, equally destitute of any controlling city—had both, at the period of which we are now speaking, been conquered by their more powerful northern neighbours of Elis, who enjoyed the advantage of a spacious territory united under one government: the middle portion, called the Helios Elis, being for the most part fertile. The Elisians were a section of *Ætolian* immigrants into Peloponnesus, but the Platæans and Triphylians had both been originally independent inhabitants of the peninsula—the latter being assumed to belong to the same race as the Mæans who had occupied the anti-Ætolian Ortygiæans: both too bore the animosity of Elis with perpetual enmity and occasional resistance.

Crossing the river Lædæus, and pursuing the northern coast of Peloponnesus north of the Corinthian Gulf, the traveller would pass into Achæia—a name which designated the narrow strip of level land, and the projecting spurs and declivities, between that gulf and the northernmost mountains of the peninsula—Sicyonia, Erymanthos, Arcadia, Krædia, and the towering eminence called Krædia. Achæia then—centre in number at least, if not more—divided this long strip of land amongst them, from the mouth of the Lædæus and the north-western Cape Araxos on one side, to the western boundary of the Sicyonian territory on the other. According to the accounts of the ancient legends and the belief of Herodotus, this territory had been once occupied by Ionian inhabitants, whom the Achæans had expelled.

In making this journey, the traveller would have finished the circuit of Peloponnesus; but he would still have left untouched the great central region, enclosed between the territories just enumerated—approaching nearest to the sea on the borders of Triphylia, but never touching it anywhere. This region was Arcadia, possessed by inhabitants who are uniformly represented as all of one race, and all aboriginal. It was high and black, full of wild mountains, rock, and forest, and ascending to a degree unusual even in Greece, with those head-locked basins from whence the water finds only a subterraneous issue. It was distributed among a large number of distinct villages and cities. Many of the village tribes—the

whose possessions cover the fertile plain of Messed along the river Pamisos to its mouth in the Messenian Gulf: it is to be noted that Messed was then the name of the plain generally, and that no town so called existed until after the battle of Leuktra. Again, eastward of the valley of the Ilartian, the mountainous region and the western shores of the Argolic Gulf down to Cape Malea are also independent of Sparta; belonging to Argos, or rather to Dorian towns in union with Argos. All the great Dorian towns, from the borders of the Megarid to the eastern frontier of Arcadia, as above enumerated, appear to have existed in 778 B.C.: Achaea was in the same condition, so far as we are able to judge, as well as Arneia, except in regard to its southern frontier continuities with Sparta, of which more will hereafter be said. In respect to the western portion of Peloponnesus, Elis (properly so called) appears to have embraced the same territory in 778 B.C. as in 500 B.C.: but the Pisatid had been recently conquered, and was yet imperfectly subjected by the Elisians; while Triphylia seems to have been quite independent of them. Respecting the south-western promontory of Peloponnesus down to Cape Achaia, we are altogether without positive information: reasons will hereafter be given for believing that it did not at that time form part of the territory of Messenian Dorians.

Of the different races or people whom Herodotus knew in Peloponnesus, he believed these to be original—the Arcadians, the Achæans, and the Eynarians. The Achæans, though belonging indigenously to the peninsula, had yet removed from the southern portion of it to the northern, expelling the previous Ionian tenants: this is a part of the legend respecting the Dorian conquest or Return of the Herakleids, and we can neither verify nor contradict it. But neither the Arcadians nor the Eynarians had ever changed their abodes. Of the latter I have not before spoken, because they were never (so far as history knows them) an independent population. They occupied the larger portion of the territory of Argolis, from Oranæ, near the

¹ This is the only way of reconciling Herodotus (viii. 76, with Thucydides ii. 10, and i. 11). The original intent of the Eynarian territory lies point on which neither of them had any means of very accurate information; but there is no occasion to reject the one in favour of the other.

northern or Peloponnesian border, to Thyrea and the Thyreatis, on the Laconian border: well enough belonging originally (as Herodotus imagines rather than asserts) to the Ionian race—they had been as long subjects of Argos in his time that almost all evidence of their ante-Dorian condition had vanished.

But the great Dorian states in Peloponnesus—the royal powers in the peninsula—were all originally immigrants according to the belief not only of Herodotus, but of all the Grecian world: as also were the *Alakians* of Elis, the *Triphylians*, and the *Dryopes* at Hermione and Aegina. All these immigrations are so described as to give them a root in the Grecian legendary world: the *Triphylians* are traced back to *Liberus*, as the offspring of the Argonautic heroes,¹ and we are too uninformed about them to venture upon any historical guesses. But respecting the Dorians, it may perhaps be possible, by examining the first historical situation in which they are presented to us, to offer some conjectures as to the probable circumstances under which they arrived. The legendary narrative of it has already been given in the first chapter of this volume²—that great mythical event called the Return of the Children of Hēraklēs, by which the first establishment of the Dorians in the promised land of Peloponnesus was explained to the full satisfaction of Grecian faith. One single argument and exposition, acting by the special direction of the Delphian god, had conducted by three brothers, lineal descendants of the principal Achæan-Dorian hero through Hyllus (the spouseman of the principal tribe)—the national heroes of the pre-existing population vanquished and expelled, and the greater part of the peninsula both acquired and partitioned at a stroke—the circumstances of the partition adjusted to the historical relations of Laconia and Messenia—the friendly power of *Alakian* Elis, with its Olympic games as the bond of union in Peloponnesus, attached to this event as an appendage in the person of *Oxylos*—all these particulars compose a narrative well-calculated to impress the retrospective imagination of a Greek. They exhibit an epical

stress and sufficiency which it would be unreasonable to impair by historical criticism.

The *Alexandrine* chronology sets down a period of 328 years from the Return of the Heracleids to the first Olympiad (1104 a.c.—776 a.c.),—a period measured by the lists of the kings of Sparta, on the trustworthiness of which some remarks have already been offered. Of these 328 years, the first 300, at the least, are altogether barren of facts; and even if we admitted them to be historical, we should have nothing to recount except a succession of royal names. Being unable either to guarantee the entire list, or to discover any valid test for discriminating the historical and the non-historical items, I have enumerated the Lacedæmonian kings as they appear in Mr. Clinton's *Fasti Hellenici*. There were two joint kings at Sparta, throughout nearly all the historical time of independent Greece, defiding their descent from Heracles through Eurythene and Prokles, the twin sons of Aristodemus; the latter being one of those three Heracleid brothers to whom the conquest of the peninsula is ascribed:—

328

Both Eurythene and Alkemon reigned considerably longer, but the chronologists affirm that the year 776 a.c. (or the first Olympiad) occurred in the tenth year of each of their reigns. It is necessary to add, with regard to this list, that there are some material discrepancies between different authors even as to the names of individual kings, and still more as to the duration of their reigns, as may be seen both in Mr. Clinton's chronology and in Müller's *Appendix to the History of the Dorians*.¹ The

¹ Heracleides confuses Eurythene with Eurythene. Prokles and Prokles and Eurythene, and Heracleides Eurythene; improves the accounts of

alleged sum total cannot be made to agree with the facts without great license of conjecture. O. Müller observes,¹ in reference to this Alexandrian chronology, "that our materials only enable us to restore it to its original state, not to verify its correctness". In point of fact they are insufficient even for the former purpose, as the discussions among learned critics attest.

We have a succession of names still more barren of facts, in the case of the Dorian sovereigns of Corinth. This city had its own line of Heraclids, descended from Heracles
(son of
Zeus). Hēraklēs, but not through Hylōn. Hippodā, the progenitor of the Corinthian Heraclids, was reported in the legend to have originally joined the Dorian invaders of the Peloponnese, but to have quitted them in consequence of having slain the prophet Karonos.² The three brothers, when they became masters of the peninsula, sent for Alkibiās the son of Hippodā, and placed him in possession of Corinth, over which the chrono-

the Hæroclæonians, as he states them, represented Lysippos the king, as uncle and grandfather of Lathios, of the Argæonæid line.—With Hylōn it made him son of Proteas, and others made him son of Menonius of the Argæon line.—compare Herod. i. 40, 41, 42. Pausan. i. 2, 3.

Some excellent remarks on the early series of Spartan kings will be found in Mr B. C. Law's article in the *Philol. Museum*, vol. ii. p. 27—31, in a review of the *Annals of the Spartan Constitution*.

Compare also Karonos, *Chronology of Mycænæ*, ch. 12, p. 404—414. He explains many of the names accordingly, in order to suit the latter speech which he assigns to the capture of Troy and the return of the Hæroclæids.

¹ *History of the Dorians*, vol. ii. Appendix, p. 181.

² This story—that the Hæroclæonians of the great Corinthian Hæroclæon had slain the holy man Karonos, and had been punished for it by being banished and driven—leads to the conjecture, that the Corinthians did not celebrate the festival of the Karonos, common to the Dorian peoples.

Hippodā tells us, with regard to the Karonos, that all of them celebrated the festival of Apollon, except Karonos and Karonos; and that those two cities did not celebrate it,

"because of a certain name of a female descendant"—*sedes viæ solvæ*. *Thesaur. de Herod. Argæonæid*: and also more fully *deus Herod. i. 120*.

The murder of Karonos by Hippodā was probably the first crime which induced the Corinthians to expel him from the Karonos; at least this supposition gives to 150 a good a special justification which is otherwise wanting to it. Compare the Karonos and Hylōnæids in *Journal de l'Institut Grec* (Paris), p. 11—12. Thirlwall, 200.

There were various other legends connected with the Corinthian Hæroclæids, which it was need to account for by some legendary tale. Thus a tradition of this sort showed Karonos as a descendant, or descended by the joint, of the Peloponnesian power. The legendary reason given for this was, that the Karonos had married and slain the Hylōnæid the two Hæroclæid brothers, when they were proceeding to the Peloponnesian power. There is a second group from the Peloponnesian power. Karonos was to be descended by the Peloponnesian, and Hylōnæid, mother of the slain Karonos, represented a name upon the Peloponnesian power. It may be said that the Peloponnesian Hæroclæid, the legend in the Peloponnesian, regarding only the Peloponnesian power, is wanting and was known to exist in the Peloponnesian. *Journal de l'Institut Grec* (Paris), p. 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

the legend of the Herakleids seems to recognise by making Timonae the eldest brother of the three. And Herodotus assures us that at one time all the eastern coast of Peloponnesus down to Cape Malea, including the island of Kythira, all which came afterwards to constitute a material part of Laconia, had belonged to Argos.¹ Down to the time of the first Messenian war, the comparative importance of the Dorian establishments in Peloponnesus appears to have been in the order in which the legend placed them,—Argos first,² Sparta second, Messenia third. It will be seen hereafter that the Argives never lost the recollection of this early pre-eminence, from which the growth of Sparta had extruded them; and the identity of entire Hellas was more than once in danger from their disastrous jealousy of a more fortunate competitor.

At a short distance of about three miles from Argos, and at the exact point where that city approaches nearest to the sea,³ was situated the isolated hill-top called Tamenion, noticed both by Strabo and Pausanias. It was a small village deriving both its name and its celebrity from the chapel and tomb of the hero Timonae, who was there worshipped by the Dorians; and the statement which Pausanias heard was, that Timonae with his invading Dorians had seized and fortified the spot, and employed it as an armed post to make war upon Timonae and the Achæans. What renders this report deserving of the greater attention is, that the same thing is affirmed with regard to the eminence called Salypsinæ near Corinth: this too was believed to be the place which the Dorians, auxiliaries had occupied and fortified against the pre-existing Corinthians in the city. Situated close upon the Saronic Gulf, it was the spot which invasion

¹ Herodotus, l. vii. The historian adds, besides Kythira, all of Argolis, the Peloponnese. What other islands are meant I do not positively understand.

² Pausanias, Argos, iii. p. 380, where, after notice of the old myth and the narrative description of Peloponnesus among the Herakleids,—(l. i. c. 2), afterwards it tells the golden rule and the heroism, and is "Argos, etc."

³ Pausanias, l. vi. c. 1; Strabo, vii. p. 230. Pausanias also observes respecting the line of coast near Argos, "The

middle is thoroughly hot and for the most part nearly dry at the single point where Argos comes nearest to the coast—between the mouth now closed by sand, of the ancient Isonion and Chironion, and the outlet of the Saronic, overgrown with woods and vegetation,—stands an eminence of some elevation and supposed of great antiquity, upon which the ancient Tamenion was placed" (Strabo in Peloponnesus, vol. i. book i. p. 143 Strabo, lxxv.).

landing from that gulf would naturally seize upon, and which Nicias with his powerful Athenian fleet did actually seize and occupy against Corinth in the Peloponnesian war.¹ In early days the only way of overpowering the inhabitants of a fortified town, generally also placed in a position itself very defensible, was—that the invaders, encircling themselves in the neighbourhood, harassed the inhabitants and ruined their produce until they brought them to terms. Even during the Peloponnesian war, when the art of besieging had made some progress, we read of several instances in which this mode of aggressive warfare was adopted with efficient results.² We may readily believe that the Dorians obtained admittance both into Argos and Corinth in this manner. And it is remarkable that, except Sikyon (which is affirmed to have been surprised by night), these were the only towns in the Argolic region which are said to have resisted them; the story being, that Patras, Epidaurus, and Troezen had admitted the Dorian intruders without opposition, although a certain portion of the previous inhabitants resented. We shall hereafter see that the non-Dorian population of Sikyon and Corinth still remained considerable.

The separate statements which we thus find, and the position of the Tamarion and the Solygeia, lead to two conjectures—first, that the acquisitions of the Dorians in Peloponnesus were also isolated and gradual, not at all conformable to the rapid strides of the old Herakleid legend; next, that the Dorian invaders of Argos and Corinth made their attack from the Argolis and the Srochic Gulfs—by sea and not by land. It is indeed difficult to see how they can have got to Teanion in any other way than by sea; and a glance at the map will show that the entrance Solygeia presents itself,³ with reference to Corinth, as the nearest and most convenient holding-ground for a maritime invader, conformably to the scheme of operations laid by Nicias. To illustrate the supposition of a Dorian attack by sea on Corinth, we may refer to a story quoted from Antistola (which we find embodied in the explanation of an old alleg.) representing Hippolytus the father of Alkibiades as having

¹ Thucyd. i. 10.

² Thucyd. i. 101; ii. 22; vii. 33—37; viii. 34—38.

³ Thucyd. iv. 32.

crossed the Maline Gulf¹ (the sea immediately bordering on the ancient Malians, Dryopians and Dorians) in ships for the purpose of colonising. And if it be safe to trust the mention of Dorians in the Odyssey, as a part of the population of the island of Kélos, we then have an example of Dorian settlements which must have been effected by sea, and that too at a very early period. "We must suppose (observes O. Müller,² in reference to these Kéran Dorians) that the Dorians, pressed by want or reason from necessity, constructed piratical canoes, manned these frail and narrow boats with soldiers who themselves worked at the oar, and thus being changed from mountaineers into seamen—the Nereans of Greece—set sail for the distant island of Kélos." In the same manner we may conceive the expeditions of the Dorians against Argos and Corinth to have been effected: and whatever difficulties may attach to this hypothesis, certain it is that the difficulties of a long land march, along such a territory as Greece, are still more serious.

The supposition of Dorian emigrations by sea, from the Maline Gulf to the north-eastern promontory of Peloponnesos, is further borne out by the analogy of the Dryopes or Dryopians. During the historical times, this people compiled several detached settlements in various parts of Greece, all maritime and some inland:—they were found at Harmand, Asiné, and Ede, in the Argolic peninsula (very near to the important Dorian towns constituting the Argolidityony of Argos³)—at Styra and Karystos in the island of Euboea—in the island of Kythnos, and even at Cyprus. These dispersed colonies can only have been planted by expeditions over the sea. Now we are told that the original Dryopie, the native country of this people, comprehended both the territory near the river Spercheios,

² *Hist. of Dorians*, p. 1, 8. *Ambr. Müller* positively asserts that the Dorians came from Harmand in Kélos; but the allusion here, not more so than to countries any additional evidence of the fact; it is a supposition adopted in the passage in the *Odyssey*, p. 11, 12, as the explanation of the name and the place of the Dorians.

Ambr. Müller, *West*, *Tristram*, p. 4, 14.

supposed to have believed that the Dorians came from Argos, and of the 10th *Tristram* (where, according to the *Ambr. Müller*, they had obtained shelter when persecuted by the Argives), accompanying a body of Dorians who had settled at Harmand. The names therefore here mentioned the Dorians, comprising of Argos with the Argives, the Dorians.

³ *Herod.*, vii. 41—42; *Strabo*, p. 17; *Tristram*, p. 4, 14.

Pyliætes, in whose name the obligations incumbent on the members of the league were imposed. While in each of the confederated cities there was a temple to this god, his most holy and central sanctuary was on the Laræa or acropolis of Argos. At this central Argive sanctuary solemn sacrifices were offered by Epikæuros as well as by other members of the confederacy, and, as it should seem, accompanied by money payments¹—which the Argives, as chief administrators on behalf of the common god, took upon them to enforce against delinquents, and actually tried to enforce during the Peloponnesian war against Epikæuros. On another occasion, during the 80th Olympiad (B.C. 514), they imposed the large fine of 500 talents upon each of the two states Sikyris and Egina, for having lent ships to the Spartan king Kleomenes wherewith he invaded the Argive territory. The Egæstians set the claim at defiance, but the Sikyonians acknowledged its justice, and only demurred to its amount, professing themselves ready to pay 100 talents.² There can be no doubt that at this later period the ascendancy of Argos over the members of her primitive confederacy had become practically inoperative; but the tenor of the cases mentioned shows that her claims were revivals of bygone privileges, which had once been effective and valuable.

How valuable the privileges of Argos were, before the great rise of the Spartan power,—how important an ascendancy they conferred in the hands of an ever-godly man, and how easily they admitted of being used in furtherance of ambitious views,—is shown by the remarkable case of Phidias the Temerick.

Phidias the
Temerick—
King of
Sikyris.

The few facts which we learn respecting this prince exhibit to us, for the first time, something like a real position of parties in the Peloponnesus, wherein the actual conflict of living, historical men and cities comes out in tolerable distinctness.

Phidias was designated by Ephorus as the tenth, and by

Herodotus perfectly that of the Dryopians generally, see *ibid.* *lib. 1.* *cap. 14.* *lib. 2.* *cap. 14.* *lib. 3.* *cap. 14.* *lib. 4.* *cap. 14.* *lib. 5.* *cap. 14.* *lib. 6.* *cap. 14.* *lib. 7.* *cap. 14.* *lib. 8.* *cap. 14.* *lib. 9.* *cap. 14.* *lib. 10.* *cap. 14.* *lib. 11.* *cap. 14.* *lib. 12.* *cap. 14.* *lib. 13.* *cap. 14.* *lib. 14.* *cap. 14.* *lib. 15.* *cap. 14.* *lib. 16.* *cap. 14.* *lib. 17.* *cap. 14.* *lib. 18.* *cap. 14.* *lib. 19.* *cap. 14.* *lib. 20.* *cap. 14.* *lib. 21.* *cap. 14.* *lib. 22.* *cap. 14.* *lib. 23.* *cap. 14.* *lib. 24.* *cap. 14.* *lib. 25.* *cap. 14.* *lib. 26.* *cap. 14.* *lib. 27.* *cap. 14.* *lib. 28.* *cap. 14.* *lib. 29.* *cap. 14.* *lib. 30.* *cap. 14.* *lib. 31.* *cap. 14.* *lib. 32.* *cap. 14.* *lib. 33.* *cap. 14.* *lib. 34.* *cap. 14.* *lib. 35.* *cap. 14.* *lib. 36.* *cap. 14.* *lib. 37.* *cap. 14.* *lib. 38.* *cap. 14.* *lib. 39.* *cap. 14.* *lib. 40.* *cap. 14.* *lib. 41.* *cap. 14.* *lib. 42.* *cap. 14.* *lib. 43.* *cap. 14.* *lib. 44.* *cap. 14.* *lib. 45.* *cap. 14.* *lib. 46.* *cap. 14.* *lib. 47.* *cap. 14.* *lib. 48.* *cap. 14.* *lib. 49.* *cap. 14.* *lib. 50.* *cap. 14.* *lib. 51.* *cap. 14.* *lib. 52.* *cap. 14.* *lib. 53.* *cap. 14.* *lib. 54.* *cap. 14.* *lib. 55.* *cap. 14.* *lib. 56.* *cap. 14.* *lib. 57.* *cap. 14.* *lib. 58.* *cap. 14.* *lib. 59.* *cap. 14.* *lib. 60.* *cap. 14.* *lib. 61.* *cap. 14.* *lib. 62.* *cap. 14.* *lib. 63.* *cap. 14.* *lib. 64.* *cap. 14.* *lib. 65.* *cap. 14.* *lib. 66.* *cap. 14.* *lib. 67.* *cap. 14.* *lib. 68.* *cap. 14.* *lib. 69.* *cap. 14.* *lib. 70.* *cap. 14.* *lib. 71.* *cap. 14.* *lib. 72.* *cap. 14.* *lib. 73.* *cap. 14.* *lib. 74.* *cap. 14.* *lib. 75.* *cap. 14.* *lib. 76.* *cap. 14.* *lib. 77.* *cap. 14.* *lib. 78.* *cap. 14.* *lib. 79.* *cap. 14.* *lib. 80.* *cap. 14.* *lib. 81.* *cap. 14.* *lib. 82.* *cap. 14.* *lib. 83.* *cap. 14.* *lib. 84.* *cap. 14.* *lib. 85.* *cap. 14.* *lib. 86.* *cap. 14.* *lib. 87.* *cap. 14.* *lib. 88.* *cap. 14.* *lib. 89.* *cap. 14.* *lib. 90.* *cap. 14.* *lib. 91.* *cap. 14.* *lib. 92.* *cap. 14.* *lib. 93.* *cap. 14.* *lib. 94.* *cap. 14.* *lib. 95.* *cap. 14.* *lib. 96.* *cap. 14.* *lib. 97.* *cap. 14.* *lib. 98.* *cap. 14.* *lib. 99.* *cap. 14.* *lib. 100.* *cap. 14.*

one example in which blood was shed to determine what state should enjoy it. Peisistratus marched to Olympia, at the epoch of the 5th recorded Olympiad, or 747 B.C. ; on the occasion of which event we are made acquainted with the real state of parties in the peninsula.

The plain of Olympia—now encroached only by immortal recollections, but once crowded with all the decorations of religion and art, and forming for many centuries the brightest centre of attraction known in the ancient world—was situated on the river Alpheius in the territory called the Pisatis, hard by the borders of Arcadia. At what time its agonistic festival, recurring every fourth year at the first full moon after the summer equinox, first began or first acquired its character of special sanctity, we have no means of determining. As with so many of the native waters of Greece—we follow the stream upward to a certain point, but the fountain-head and the earlier flow of history are buried under mountains of unascendable legend. The first celebration of the Olympic contests was ascribed by Grecian legendary faith to Herakles—and the site of the place, in the middle of the Pisatis with its eight small townships, is quite sufficient to prove that the inhabitants of that little territory were warranted in describing themselves as the original administrators of the ceremony.¹ But this state of things seems to have been altered by the Ætolian settlement in Kila, which is represented as having been conducted by Oxylos and identified with the Return of the Herakleids. The Ætolo-Etolians, bordering upon the Pisatis to the north, employed their superior power in subduing their weaker neighbours,² who thus lost their autonomy and became annexed to the territory of Kila. It was the general rule throughout Greece, that a victorious state undertook to perform³ the current services of the conquered people towards the gods—such services being conceived as attaching to the soil. Hence the celebration of the Olympic games became numbered among the responsibilities of Kila, just in the same way as the worship of the Eleusinian Demeter, when Eleusis lost its autonomy, was included among the religious obligations of Athens. The Pisatians however never

willingly acquiesced in this absorption of what had once been their separate privilege. They long maintained their conviction that the celebration of the games was their right, and strove on several occasions to regain it. Of these contests the earliest, so far as we learn, was connected with the intervention of Phœidra. It was at their invitation that the king of Argos went to Olympia, and celebrated the games himself, in conjunction with the Pisians, as the usual successors of Elis; while the Elisians, being thus forcibly dispossessed, refused to include the 5th Olympiad in their register of the victorious runners. But their humiliation did not last long, for the Spartans took their part, and the contest ended in the defeat of Phœidra. In the next Olympiad, the Elisian management and the regular enactment appear as before. The Spartans are even said to have conferred Elis in her possession both of Pisian and Triphylia.¹

Unfortunately these scanty particulars are all which we learn regarding the armed conflict at the 5th Olympiad, in which the religious and the political grounds of quarrel are so intimately blended—as we shall find to be often the case in Greek history. But there is one act of Phœidra yet more memorable, of which also nothing beyond a vague notice has come down to us. He first coined both copper and silver money in Elis, and first established a scale of weights and measures,² which, through his influence, became adopted throughout Peloponnesus, and acquired ultimately footing both in all the Dorian states, and in Eoëtia, Thessaly, northern Hellas generally, and Macedonia—under the name of the *Æginean* scale. There arose subsequently another rival scale in Greece, called the *Eubœan*, differing considerably from the *Æginean*. We do not know at what time the *Eubœan* came in, but it was employed both at Athens and in the Ionic cities generally, as well as in Eubœa—being modified at Athens, so far as money was concerned, by Solon's debasement of the coinage.

¹ Pausan. v. 12. 3; Strabo, viii. p. 494—495; Herodot. v. 137. The name of the river (Alpheus) the Spartans, however, belonging to the 5th Olympiad, appears only in the list; it must have been supplied after wards.

² Herodot. v. 147; Pausan. ap. Strabo, viii. p. 494—495.

The copious and valuable information contained in M. Bouché's recent publication on Metrology has thrown new light upon these monetary and statistical scales.¹ He has shown that both the *Sigmas* and the *Babols* scales—the former standing to the latter in the proportion of 8:5—had contemporaneous currency in different parts of the Persian empire; the divisions and denominations of the scale being the same in both, 160 *drachms* to a *mina*, and 60 *minas* to a *talent*. The *Babylonian* *talent*, *mina*, and *drachma* are identical with the *Sigmas*: the word *mina* is of *Assyrian* origin; and it has now been rendered highly probable, that the scale circulated by *Flavius* was borrowed immediately from the *Phœnicians*, and by them originally from the *Babylonians*. The *Babylonian*, *Hebraic*, *Phœnician*, *Egyptian*, and *Grecian* scales of weight (which were subsequently followed wherever coined money was introduced) are found to be so nearly conformable, as to warrant a belief that they are all derived from one common origin; and that origin the *Chaldean* priesthood of *Babylon*. It is to *Flavius*, and to his position as chief of the *Asiatic* confederacy, that the *Greeks* owe the first introduction of the *Babylonian* scale of weight, and the first employment of coined and stamped money.

If we maturely weigh the few but striking acts of *Flavius* which have been preserved to us, and which there is no reason to disavow, we shall find ourselves introduced to an early historical stage of *Peloponnesian* very different from that to which another century will bring us. That *Agæa*, with the *Solovite* cities attached to her, was at this early time decidedly the commanding power in that peninsula, is sufficiently shown by the establishment and reception of the *Phœnician* weights, measures, and monetary system—while the other incidents mentioned completely

circumstances of the *Sigmas* scale with the *Babylonian*.

Agæa at this time the first state in *Peloponnesus*.

¹ *Metrologie*. *Unterstützung* von *Strabo*, *Herodotus*, und *Plinius* für die *Asiatische* in *Ägypten*. *Sammlung* *Antiquarischer* *Wissenschaft*, von *Aug. Bouché*, *Paris*, 1838.

See chap. V. § 4. But I am surprised with M. Bouché in thinking that *Flavius*, in introducing the *Phœnician* scale, derived from the *Phœnician* *drachma*, and possibly adopted the measure of the *talent*, or that he at all noticed any

scale of weight. In general, I do not think that M. Bouché's conclusions are well made out, or based on the *Asiatic* measures of weight and capacity. In an examination of this remarkably learned *ouvrage* (written by the *Charles* *Wagner*, 1838, vol. i.) I am surprised to find that such are some of the *important* points mentioned by the author, and the *reasons* which he gives in support of them to be so far from being

hundreds with the same idea. Against the aggression of Kila, the Plataeans invoked Phidias,—partly as exercising a primacy in Peloponnesus, just as the inhabitants of Lepreus in Triphylia,¹ three centuries afterwards, called in the aid of Sparta for the same object, at a time when Sparta possessed the leadership—and partly as the literal representative of Herakles, who had founded these games from the management of which they had been unjustly excluded. On the other hand, Sparta appears as a second-rate power. The *Alphian* scale of weight and measure was adopted there as elsewhere²—the Messenian Dorians were still equal and independent—and we find Sparta interceding to assist Kila by virtue of an obligation growing (so the legend represents it) out of the common *Atro-Dorian* immigration: not at all from any acknowledged primacy, such as we shall see her enjoying hereafter. The first coinage of copper and silver money is a capital event in Greek history, and must be held to imply considerable commerce as well as those extensive slaves which belong only to a conspicuous and leading position. The ambition of Phidias to resume all the acquisitions made by his ancestor Herakles, suggests the same large estimate of his actual power. He is characterised as a despot, and even as the most insolent of all despots:³ how far he deserved such a reputation, we have no means of judging. We may remark, however, that he lived before the age of despots or tyrants, properly so called, and before the Herakleian League had yet lost its primary, half-political, half-religious character. Moreover, the later historians have invested his actions with a colour of exorbitant aggression, by applying them to a state of things which belonged to their time, and not to his. Thus Ephorus represents him as having deprived the Laodamontians of the leadership of Peloponnesus, which they never possessed until long after him—and also as sitting at night the sworn inviolability of the territory of the Hittans, enjoyed by the latter as celebrants of the Olympic games;

¹ Thucyd. i. 11.

² Phylarch. *Apollithenon*. *Scapoli*.
p. 102; *Chalcidic* ap. *Strabo*, l. v. p. 131.

³ The *Alphian* scale, *drachm* and *stater* only, the *Laodamontians* employed in regulations among the Peloponnesian states (Thucyd. i. 12).

² Herodot. ii. 125. *Callias*, ed. *Agassiz*, explains—*ed. Agassiz* refers to *Phidias* himself. The same (ii. 12, 4) repeats the expression.

Phidias also *Phidias* as a person who, being a Herakleian, made himself a tyrant (Thucyd. vii. 2, 4).

whereas the Agamemnids, or right of superintendence claimed by Kile, had not at that time acquired the sanction of prescription—while the conquest of Pisa by the Elians themselves had proved that this moral sanction did not protect the territory of a weaker people.

How Pisa fell, and how the Argians lost that supremacy which they once evidently possessed, we have no positive details to inform us: with respect to the latter points, however, we can discern a sufficient explanation. The Argians stood preeminent as an active and unassuming confederacy, which required a vigorous and able hand to render its internal organisation effective as its ascendancy required without. No such leader afterwards appeared at Argos, the whole history of which city is destitute of eminent individuals: her line of kings continued at least down to the Persian war,¹ but seemingly with only titular functions, for the government had long been decidedly popular. The statements which represent the government as popular anterior to the time of Pisa, appear unworthy of trust. That prince is rather to be taken as withholding the old, undivided prerogatives of the Herakleid kings, but withholding them with unusual effect—enforcing relaxed privileges, and appealing to the old heroic sentiment in reference to Herakleia, rather than revolutionising the existing relations either of Argos or of Peloponnesos. It was in fact the great and steady growth of Sparta, for three centuries after the Lykurgian institutions, which operated as a cause of subversion to the previous order of command and obedience in Greece.

The assertion made by Herodotus—that in earlier times the whole eastern coast of Laconia, as far as Cape Malea, including the island of Kythira and several other islands, had belonged to Argos—is referred by G. Müller to about the 50th Olympiad, or 580 B.C. Perhaps it had ceased to be true at that period; but that it was true, in the age of Pisa, there seem good grounds for believing. What is probably meant is, that the Dorians towns on this coast, Prætor, Sarto, Epidaurea Limera, and Bore, were once autonomous, and members of the Argian

confederacy—a fact highly probable, on independent evidence, with respect to Epidaurus Limba, inasmuch as that town was a settlement from Epidaurus in the Argolic peninsula: and Boon too had its own chief and spyways, the Henfield Boon,¹ no-way connected with Sparta—perhaps derived from the same source as the name of the town Boon in Doria. The Argolic confederated towns would thus comprehend the whole coast of the Argolic and Saronic gulfs, from Nythira as far as Argos, besides other islands which we do not know: Argos had received a colony of Dorians from Argos and Epidaurus, upon which latter town it continued for some time in a state of dependence.² It will at once be seen that this extent of coast implies a considerable degree of commerce and maritime activity. We have besides to consider the range of Doric colonies in the southern islands of the Argos and in the south-western corner of Asia Minor—Kotte, Kô, Rhodæ (with its three distinct cities), Halikarnassus, Knidos, Myrina, Ninyra, Synd, Karpakos, Kalyria, &c. Of the Doric establishments here named, several are connected (as has been before stated) with the great migration of the Thousand Althamands from Argos: but what we particularly observe is, that they are often referred as colonies promiscuously to Argos, Troas, Epidaurus—more frequently however, as it seems, to Argos. All these settlements are doubtless older than Phœstia, and we may consider them as proceeding conjointly from the allied Dorian towns in the Argolic peninsula, at a time when they were more in the habit of united action than they afterwards became: a captain of emigrants selected from the line of Héraklides and Timonæ was suitable to the feelings of all of them. We may thus look back to a period, at the very beginning of the

¹ Pausan. II. 12. 5; III. 12. 4.

² Pausan. I. 26; Strabo, III. p. 375.

³ Knidos, Kô, Knidos, and Halikarnassus are all treated by Strabo (III. p. 375) as colonies of Argos: Knidos is so described by Ptolemy (II. 10. 17), and Kô by Theophrastus (II. 22. 22). Kalyria, and Myrina are described by Strabo as colonies of Epidaurus (I. 2. 32). Halikarnassus seems attached by a colony of Troas, according to Theophrastus and some ancient writers.—One Argos or Argives at Argos at Troas.

colony connected at least indirectly, with Argos, from its Argolic element.—Strabo, I. 2. 32; Steph. Byz. I. 2. 32; Ptolemy, II. 10. 17; Theophrastus, II. 22. 22; Strabo, III. p. 375; Pausan. II. 12. 5; Strabo, III. p. 375.

⁴ See the list of colonies in the Catalogue of the Dorians, I. 2. 32, and II. 12. 5. (History of the Dorians, &c. II.)

The little town of Boon had the cognomen of the same name in Kotte (Steph. Byz. I. 2. 32).

(Myrmecia, when the maritime Dorians on the east of Peloponnesus maintained a considerable intercourse and commerce not only among themselves, but also with their settlements on the Asiatic coast and islands. That the Argolis peninsula formed an early centre for maritime commerce, we may further infer from the very ancient Amphiktionry of the seven cities (Herakleia, Epidaurea, Argos, Athens, Præstia, Megaris, and the Illyrian Oenoneum), on the holy island of Kalauria, off the harbour of Troezen.¹

The view here given of the early ascendancy of Argos, as the head of the Peloponnesian Dorians and the metropolis of the Asiatic Dorians, enables us to understand the capital innovation of Phaidon—the first coinage, and the first determinate scale of weights and measures known in Greece. Of the value of such improvements, in the history of Grecian civilisation, it is superfluous to speak, especially when we recollect that the Hellenic states, having no political unity, were only held together by the aggregate of spontaneous uniformities, in language, religion, sympathies, recreations, and general habits. We see both how Phaidon came to contract the wish, and how he acquired the power, to introduce throughout so much of the Grecian world a uniform scale. We also see that the Asiatic Dorians form the link between him and Phoenicia, from whence the scale was derived, just as the Eubœic scale came by all probability, through the Ionic cities in Asia, from Lydia. It is asserted by Ephorus, and admitted even by the ablest modern critics, that Phaidon first coined money “in Argos”;² other authors (erroneously believing that his scale was the Eubœic scale) alleged that his coinage had been carried on “in a place of Argos called Eubœa.” Now both these statements appear highly improbable, and both are transmissible to the same mistake—of supposing that the title by which the scale had come to be commonly known, must necessarily be derived from the place in which the coinage had been struck. There is every reason to conclude, that what Phaidon did was done in Argos, and nowhere else: his coinage and scale were the earliest known in Greece, and soon

CHAPTER V.

ÆTOLIO-DORIAN IMMIGRATION INTO PELOPONNÉSUS—
ELIS, LACONIA, AND MESSÉNIA.

It has already been stated that the territory properly called Elis, apart from the enlargement which it acquired by conquest, included the westernmost land in Peloponnesus, south of Achæia, and west of Mount Phœbos and Olympus in Arcadia—but not extending so far southward as the river Alphæus, the course of which lay along the southern portion of Pisania and on the borders of Triphylia. This territory, which appears in the *Odyssey* as "the divine Elis, where the Epœians hold sway,"¹ is in the historical times occupied by a population of *Ætolian* origin. The connection of race between the historical *Elieans* and the historical *Ætolians* was recognised by both parties, nor is there any ground for disputing it.²

That *Ætolian* invaders or immigrants into Elis would come from Naupaktos or some neighbouring point in the *Ætolian* Corinthian Gulf, is in the natural course of things—^{immigrants from Elis into Peloponnesus} and such is the course which Oxylos, the conductor of the invasion, is represented by the Homeric legend as taking. That legend (as has been already recounted) introduces Oxylos as the guide of the three Herakleidæ brothers—Timæus, Kleophantos, and Aristokleus—and as stipulating with them that in the new distribution about to take place of Peloponnesus, he shall be allowed to possess the *Elisian* territory, occupied with many holy privileges as to the celebration of the Olympic games.

In the preceding chapter, I have endeavoured to show that the settlements of the Dorians in and near the Argolic peninsula, so

¹ *Odys.* vii. 267.² *Ætolia*, p. 478.

far as the probabilities of the case enable us to judge, were not accomplished by any inland in this direction. But the localities occupied by the Dorians of Sparta, and by the Dorians of Messolonia in the territory called Mantua, lead us to a different conclusion. The easiest and most natural road through which immigrants could reach either of these two spots, is through the Elisian and Pisatid country. Colonel Leake observes¹ that the direct road from the Elisian territory to Sparta, ascending the valley of the Alphæus near Olympia to the source of its branch the Thurio, and from thence descending the Eurotas, affords the only way north towards that very inaccessible city: and both ancient and moderns have remarked the vicinity of the source of the Alphæus to that of the Eurotas. The situation of Stenoklêra and Andania, the original settlements of the Messenian Dorians, adjoining closely the Argolidan Parnassus, is only at a short distance

Dorians of
Sparta and
Messolonia
—
passing or
travelling
from the
Thurio, whence
the Eurotas
takes birth.

from the source of the Alphæus; being thus reached most easily by the same route. Dismissing the idea of a great collective Dorian armament, powerful enough to grasp at once the entire peninsula,—we may conceive two moderate detachments of hardy mountaineers from the wild regions to and near Ithra, attacking

were proceeding to the invasion of Elis. After having aided the
Elisians both to occupy Elis and to subdue the
Pisatid, these Dorians advanced up the valley of the
Alphæus in quest of settlements for themselves.
One of these bodies rigens into the sturdy, warlike,
and victorious Spartans; the other into the short-lived,
trampled, and struggling Messenians.

themselves to the Elisians their neighbours, who

Amidst the darkness which envelopes these original settlements, we seem to discern something like special causes in determining both of them. With respect to the Spartan Dorians, we are told that a person named Philomenus betrayed Sparta to them, persuading the sovereign to promise to retire with his people into the habitations of the Dorians in the north of the peninsula—and that he received as a recompense for this

¹ Leake, *North to Sparta*, vol. vi. ch. 25, p. 27; compare *Antiq.* iv. 51. The distance from Olympia to Sparta,

is marked on a plan which Pausanias gave at Olympia, *lib. vii. c. 2*,—about 17 English miles (French, 27, 28, &c.)

acceptable service Amyklia with the district around it. It is further stated—and this important fact there seems no reason to doubt—that Amyklia, though only twenty stadia or two miles and a half distant from Sparta, retained both its independence and its Achæan inhabitants long after the Dorian immigrants had acquired possession of the latter place, and was only taken by them under the reign of Eliaklon, one generation before the first Olympiad.¹ Without pretending to fill up by conjecture innumerable gaps in the statements of our authorities, we may from hence reasonably presume that the Dorians were indeed, to invade, and enabled to acquire, Sparta, by the ^{which he} invitation and assistance of a party in the ^{sought the} interior of the country. Again, with respect to the ^{settlement.} Messenian Dorians, a different but not less effective temptation was presented by the alliance of the Arcadians in the south-western portion of that central region of Peloponnesus. Especially the Herakleid leader, it is said, espoused the daughter² of the Arcadian king Kypselos, which procured for him the support of a powerful section of Arcolia. His settlement at Staphylia³ was at a considerable distance from the sea, at the north-east corner of Messenia,⁴ close to the Arcadian frontier; and it will be seen hereafter that this Arcadian alliance is a constant and material element in the disputes of the Messenian Dorians with Sparta.

We may then trace a reasonable sequence of events, showing how two bodies of Dorians, having first assisted the ^{arguments} ^{advanced at} ^{first in} ^{Sparta and} ^{Staphylia.} ~~Akela-Kleinas~~ to conquer the Pisatid, and thus finding themselves on the banks of the Alpheios, followed the upward course of that river, the one to settle at Sparta, the other at Staphylia⁵. The historian Ephoros, from whom our scanty fragments of information respecting these early settlements are derived—it is important to note that he lived in the age immediately succeeding the first foundation of Messed as a city, the restoration of the long-called Messenians, and the occupation of the fertile western half of Iacokia for their benefit, by Spartan colonies—imparts to these proceedings an immediate socialness of effect which does not properly belong to them; as

¹ Strabo, viii. pp. 334, 335; Pausan. vii. 2. 1; *Geograph. Hist. Story* of Klon, Pausan. vii. 13. 5.

² Strabo, ix. 2. 2; viii. 32, 1.

³ Strabo, i. vii. 2. 2, 3, 335; Strabo, *Geograph. Hist. Story* Messed as an inland colony; but the real cause is here been quite correct in being so.

If the Spartans had become at once possessed of all Laconia, and the Messenians of all Messenia; Panastina, too, speaks as if the Arcadians collectively had assisted and allied themselves with Knephontha. This is the general spirit which pervades his account, though the particular facts, in so far as we find any such, do not always harmonize with it. Now we are ignorant of the pre-existing divisions of the country either east or west of Mount Taygetos, at the time when the Dorians invaded it. But to treat the one and the other as integral kingdoms, handed over at once to two Dorian leaders, is an illusion borrowed from the old legend, from the historicizing fancies of Ephorus, and from the fact that in the well-known times this whole territory came to be really united under the Spartan power.

At what date the Dorian settlements at Sparta and Stenyklêra were effected we have no means of determining. Yet that there existed between them in the earliest times a degree of fraternity which did not prevail between Laconians and Argives, we may fairly presume from the common temple, with joint religious services, of Artemis Limnatis (or Artemis on the Marsh) erected

on the confines of Messenia and Laconia.¹ Our first distinct view of the two, at all approaching to distinctness, ^{from classical} ^{Sparta.}

seems to date from a period about half a century earlier than the first Olympiad (776 a.c.),—about the reign of king Thibides of the Eurythionid or Agid line, and the introduction of the Lykurgian discipline. Thibides stands in the list as the eighth king dating from Eurythionos. But how many of the seven kings before him are to be considered as real persons—or how much, out of the brief warlike expeditions ascribed to them, is to be treated as authentic history—I pretend not to define.

The earliest indistinguishable event in the internal history of Sparta is the introduction of the Lykurgian discipline; the earliest external events are the conquest of Amyrtia, Pharia, and Gerakothra, effected by king Thibides, and the first quarrel with the Messenians, in which that policy was slain. When we come to see how deplorably great was the confusion and ignorance which reigned with reference to a matter so pre-eminently important as Lykurgos and his legislation, we shall not be inclined to think

¹ Pausanias, *loc. cit.* §. 2. says that 44 cities of the Argives of the Messenians and Laconians.

these and Prokleides of Sparta—as far as we gather from statements, often vague and uncertified, resting on the authority of Ephorus. Both are said to have tried to place the pre-existing inhabitants of the country on a level with their own Dorian bands; both proceeded discontented and incurred obloquy, with their contemporaries as well as with posterity, by the attempt; nor did either permanently succeed. Krepheus was forced to concentrate all his Dorians in Spargilireia, while, after all, the discontent ended in his violent death. And Agis, the son of Euryphantides, is said to have reversed all the liberal initiatives of his father, so as to bring the whole of Laconia into bondage and dependence on the Dorians at Sparta, with the single exception of Amyklia. So odious to the Spartan Dorians was the conduct of Euryphantides, that they refused to acknowledge him as their chief, and conferred that honour upon Agis; the two lines of kings being called Agids and Euryphantids, instead of Euryphantids and Prokleids.¹ We see in these statements the same tone of mind as that which pervades the Pausaniasian notion of indomitable master of Ephorus,—the hero of an unknown period so coloured as to suit an ideal of haughty Dorian self-advancement.

Again as Euryphantides and Prokleides appear, in the picture of Ephorus, to carry their authority at once over the whole of Laconia, so too does Krepheus over the whole of Messenia,—over the entire south-western region of Peloponnesos, westward of Mount Taygetos and Cape Tamaris, and southward of the river Neda. He sends an army to Pylos and Rhion, the western and southern portions of the south-western promontory

¹ Compare the two statements from Ephorus, *Strabo*, vii. p. 275-280. Undoubtedly a portion of the population in Laconia was assimilated to the Dorians, as is clearly shown in the early 5th century history of the Dorians, *Herod.* i. 145. It is not possible to suppose an invasion of Dorians which having taken place, was followed by a counter-invasion of Dorians, as is suggested by the statement of Pausanias, *Strabo*, vii. p. 275-280. The Dorians, however, were not the only people who were assimilated to the Dorians in these instances, as is shown by the passage referred to.

For a new statement of the death of Euryphantides, attributed to Pausanias, as to the purpose of the attempt which he made to bring the whole of Laconia into bondage, see the statement of Pausanias, *Strabo*, vii. p. 275-280.

In his works which remain under that name (*Str.* vi. p. 141-142). Pausanias says that the Messenians, during the reign of Euryphantides, were driven out of the country, as shown, according to the statement of Pausanias, *Strabo*, vii. p. 275-280, and that the Messenians, during the reign of Euryphantides, were driven out of the country, as shown, according to the statement of Pausanias, *Strabo*, vii. p. 275-280.

Pausanias, however, says that the Dorians, during the reign of Euryphantides, were driven out of the country, as shown, according to the statement of Pausanias, *Strabo*, vii. p. 275-280.

of Polyronides, treating the entire territory as if it were one sovereignty, and levelling the inhabitants to submit under equal laws.¹ But it has already been observed, that this supposed oneness and indivisibility is not less uncorroborated in regard to Messenia than in regard to Laconia. How large a proportion of the former territory these kings of Spargilides may have ruled, we have no means of determining, but these were certainly portions of it which they did not rule, not merely during the reign of Tlékleus at Sparta, but still later, during the first Messenian war. For not only we are informed that Tlékleus established three townships, *Politona*, *Echeia*,² and *Tragium*, near the Messenian Gulf and on the course of the river Nefen, but we read also a farther matter of evidence in the roll of Olympic victors. Every competitor for the prize at one of these great festivals was always entered as member of some autonomous Hellenic community, which constituted his title to approach the lists: if successful, he was proclaimed with the name of the community to which he belonged. Now during the first ten Olympiads seven winners are proclaimed as *Messenians*; in the eleventh Olympiad we find the names of Oxythentis Korkonens, — Oxythentia, not of Korkonens in Ithotia, but of Korkon in the western bend of the Messenian Gulf, some miles on the right bank of the Parnon, and a

The kings of Messia did not possess all Messia.

¹ Ephorus ap. Strabo, viii. p. 331. De. *Wald* well observes (Hist. of Greece, ch. vi. p. 202, 2nd edit.). "The Messenians, Polyronides long to have retained the independence, and to have been occupied by serving mercenary for one faction or the other of Sparta; but despatches of Sparta are mentioned as allies of the Messenians in their struggle with Sparta in the latter half of the seventh century B.C."

For this assertion see Thirlwall when Messia viii. p. 245. I agree with him as to the matter of fact; I see no proof that the kingdom of Spargilides ever ruled over what is called the Messenian Pyra; but, of course, if they did not rule yet, it before the second Messenian war, they never acquired it. And as according to the passage in Strabo, it will not be hard to prove anything to the point, for Strabo is speaking, not of the Messenian Pyra, but of the *Tragionum Pyra*; he takes pains to show that Messia had nothing to do

with the Messenian Pyra. — Strabo delivers us up to the inhabitants of Tragion near Lagones; compare p. 345.

² Strabo, viii. p. 331. Concerning the situation of Sparta in the Messenian Gulf, see Pausanias, ix. 24, 2; Strabo, viii. p. 321; and the observations of Colonel Leake, *Travels in Greece*, ch. 2, vol. i. p. 249-250. He places it near the modern *Politona*, incorrectly so named.

³ See Mr. Clinton's *Chronological Tables* for the year 713 B.C.; 2. *After* in the *Chronological Table* referred to in the history of the Parnon with the other kingdoms of Greece, in Messia. But this is inadmissible, on two grounds: 1. The occurrence of a Messianic competitor in that early day of the Olympic games. The first Messian victor is put under Oxythentia, because he is the subject of the epigram; and all Messian and Messenian Polyronides; then some victors from Corinth, Megara, and Epistaurion; then

we may see that the Lacedæmonians regarded the Olympic games as a portion of their own antiquities. Moreover, it is certain both that the dignity of the festival increased simultaneously with their ascendancy,¹ and that their peculiar habits were very early introduced into the practice of the Olympic competitors. Probably the three bands of co-operating invaders, Æolians and Spartans and Messenians, Dorians, may have adopted this festival as a periodical recreation of mutual union and fraternity; from which arose the games became an attractive centre for the western portion of Peloponnesia, before they were much frequented by people from the eastern, or still more from extra-Peloponnesian, Hellas. For it cannot be altogether accidental, when we read the names of the first twelve proclaimed Olympic victors (occupying nearly half a century from 776 B.C. downwards), to find that seven of them are Messenians, three Æolians, one from Dyris in Achaia, and one from Korinth; while after the twelfth Olympiad, Corinthians, and Megarians and Ephyseans begin to occur; later still, extra-Peloponnesian victors. We may reasonably infer from hence that the Olympic ceremonies were at this early period chiefly frequented by visitors and competitors from the western regions of Peloponnesia, and that the attendance to them from the more distant parts of the Hellenic world did not become considerable until the first Messenian war had closed.

Having thus set forth the conjectures, to which our very scanty knowledge points, respecting the first establishment of the Æolian and Dorian settlements in Elio, Laconia, and Messenia, connected as they are with the steadily-increasing dignity and frequentation of the Olympic festival, I proceed in the next chapter to that memorable circumstance which both determined the character and brought about the political ascendancy, of the Spartans separately: I mean the laws and discipline of Lykurgos.

Of the pre-existing inhabitants of Laconia and Messenia, whom we are accustomed to call Achæans and Pylians, so little is known, that we cannot at all measure the difference between them and their Dorian invaders, either in dialect, in habits, or

¹ The earlier antiquities of the competition at Olympia was adopted from the Spartan practice, according to the old Olympic, as is testified by the

epigram on Dodona, the Megarian. Fickling in that point, the Olympic competitors had sufficient scope of allusion. (Theophr. l. c.)

is intelligent. There appear no traces of any difference of dialect among the various parts of the population of

*Various

of southern
Pelopon-
nese—how
far different
from the
Doric.*

Laconia: the Messenian allies of Athens, in the Peloponnesian war, speak the same dialect as the Helots, and the same also as the Argonauts calculate from Corinth: all Doric.¹ Nor let us to suppose that the

Doric dialect was at all peculiar to the people called Dorians. As far as can be made out by the evidence of inscriptions, it seems to have been the dialect of the Phocians, Dolphiens, Lokrians, Molians, and Achæans of Philistia: with respect to the latter, the inscriptions of Thermaï in Achæa Philistia afford a proof the more curious and the more urgent of native-dialect, because the Philistæ were both immediate neighbours and subjects of the Thessalians, who speak a variety of the Æolic. So too, within Peloponnesus, we find evidence of Doric dialect among the Achæans in the south of Peloponnesus—the Dryopis inhabitants of Herakleia²—and the Eleuthero-Læones, or Læonian townships (composed of Pericli and Halon), emancipated by the Romans in the second century A.D. Concerning the speech of that population whom the invading Dorians found in Laconia, we have no means of judging: the presumption would rather be that it did not differ materially from the Doric. Theophrastus designates the Corinthians, whom the invading Dorians attacked from the hill Solygeia, as being Molians, and Strabo speaks both of the Achæans as an Æolic nation and of the Æolic dialect as having been originally predominant in Peloponnesus.³ But we do not readily see what means of information either of these authors possessed respecting the speech of a time which must have been four centuries anterior even to Theophrastus.

Of that which is called the Æolic dialect there are three marked and distinguishable varieties—the Lesbian, the Thessalian, and the Boeotian; the Thessalian forming a mean term between the other two. Athens has shown that the ancient grammatical critics are accustomed to affirm parallelisms, as belonging to the Æolic dialect generally, which in truth belong only to the Lesbian variety of it, or to the poems

of Athens and Sappho, which these critics attentively studied. Lesbian *Melle*, Thasian *Melle*, and Dorian *Melle* are all different : and if, abstracting from these differences, we confine our attention to that which is common to all three, we shall find little to distinguish this abstract *Melle* from the abstract Doric, or that which is common to the many varieties of the Doric dialect.¹ These two are sisters, presenting both of them more or less the Latin side of the Greek language, while the relationship of either of them to the Attic and Ionic is more distant. Now it seems that (putting aside Attic) the speech of all Greece,² from Paros and Mount Olympus to Cape Malea and Cape Arcina, consisted of different varieties either of the Doric or of the *Melle* dialect ; this being true (so far as we are able to judge) not less of the shortest Arcadians than of the rest. The Laconian dialect contained more specialities of its own, and approached nearer to the *Melle*, and to the *Malea*, than any other variety of the Dorian : it stands at the extreme of what has been classified as the strict Dorian—that is, the furthest removed from Ionic and Attic. The Krete towns marked also a strict Dorian ; as well as the Leucadæmon colony of Tarantum, and seemingly most of the Italic Greeks, though some of them are called Achæan colonies. Most of the other varieties of the Doric dialect (Phœlian, Lesbian, Delphian, Achæan of Peloponnesus) exhibit a form departing less widely from the Ionic and Attic : Argos and the towns in the Argolic peninsula seem to form a stopping-stone between the two.

These positions represent all our scanty information respecting these varieties of Cretan speech which are not known to us by written works. The little presumption which can be raised upon them favours the belief that the Dorian invaders of Laconia and Messenia found there a dialect little different from that which they brought with them—a conclusion which it is the more necessary to state distinctly, since the work of G. Müller has caused an exaggerated estimate to be formed of the distinctive peculiarities whereby Dorian was parted off from the rest of Hellen.

CHAPTER VI.

LAW AND DISCIPLINE OF LYKURGUS AT SPARTA.

PLUTARCH begins his biography of Lykurgus with the following concise words :—

"Concerning the lawgiver Lykurgus we can assert absolutely nothing which is not controverted : there are different stories in respect to his birth, his travels, his death, and also his mode of proceeding, political as well as legislative; least of all is the time in which he lived agreed upon."

*Lykurgus—
characteristics
of Plutarch
presenting
him.*

And this conclusion is but too well borne out by the unsatisfactory nature of the accounts which we read, not only in Plutarch himself, but in those other authors out of whom we are obliged to make up our idea of the memorable Lykurgian system. If we examine the sources from which Plutarch's life of Lykurgus is deduced, it will appear that—accepting the poets Alkman, Tyrtæus, and Simonides, from whom he has borrowed less than we could have wished—he has no authorities older than Xenophôn and Plato : Aristotle is cited several times, and is unquestionably the best of his witnesses, but the greater number of them belong to the century subsequent to that philosopher. Neither Herodotus nor Ephorus is named, though the former furnishes some brief but interesting particulars—and the latter also (as far as we can judge from the fragments remaining) entered at large into the proceedings of the Spartan lawgiver.¹

Lykurgus is described by Herodotus as uncle and guardian to king Leobôtes, of the Eurythæmidæ or Aglææ of Sparta; and this would place him, according to the received chronology, about 550 years before the first recorded Olympiad (about B.C. 776).² All the

² Herodot. l. vi. c. 126, c. 127.

Plutarch gives this as the statement of the Spartan authorities themselves.

other accounts, on the contrary, seem to represent him as a younger brother, belonging to the other or Frochleid line of Spartan kings, though they do not perfectly agree respecting his parentage. While Simonides stated him to be the son of Prytanis, Diotychidas described him as grandson of Prytanis, son of Eumenes, brother of Polydeides, and such as well as guardian to Charilaus—thus making him descend in descent from Hilekides! This latter account was adopted by Aristotle, coinciding, according to the received chronology, with the date of Iphitus the Elieus, and the first celebration of the Olympic games by Lykurgos and Iphitus conjointly,* which Aristotle accepted as a fact. Lykurgos, on the hypothesis here mentioned, would stand about B.C. 680, a century before the recorded Olympiads. Eusebius and Apollodorus placed him "not a few years earlier than the first Olympiad". If they meant hereby the epoch commonly assigned as the Olympiad of Iphitus, their date would coincide pretty nearly with that of Herodotus; if on the other hand they meant the first recorded Olympiad (B.C. 776), they would be found not much removed from the opinion of Aristotle. An unequivocal proof of the inextricable confusion in ancient times respecting the epoch of the great Spartan legislator is belatedly afforded by Timæus, who supposed

* *Plutarch, Lycurgus*, c. 1. According to *Plutarch, Solon*, *Life*, *Book*, &c. of Lykurgos was made, not son, of Eumenes.

Lykurgos, *son*, *of* *Eumenes*, *Lykurgos*, *as* *guardian* *of* *Charilaus*, *Plutarch*, *Life*, *c.* 1. (1) *Lykurgos*, *c.* 14, 15. See O. Müller (*Hist.* of *Greece*, i. p. 75).

Plutarch also, with Eusebius and Pausanias, *Plutarch*, *Life*, *c.* 1. p. 126. It appears that there existed a sort of Olympic epoch, upon which the events of the Olympic games were recorded, together with the names of Iphitus and Lykurgos as the joint authors and promoters of it. Aristotle inferred this to be genuine, and reported it as an evidence of the fact which is proposed to certify; and O. Müller is also disposed to admit it as genuine—that is, an unnecessary void for those to which it pertains to verify. I come to a different conclusion; that the event existed, I do not doubt; but that the legislation upon it was actually not done in writing, is at least

B.C. 680, would be at variance with the probable probability resulting from Herodotus' chronology. But this ancient and venerable testimony related to Olympic in the days of Ptolemy, he could hardly have assigned to Lykurgos the epoch which we have read in his writings.

The assertion in Müller's *History* of the Spartan Laws, that Lykurgos, Iphitus, and Eumenes, "drawing up the fundamental laws of the Olympic nation," are supported by any sufficient evidence. In the later time of established empire of the Olympic festival, the Elieus did undoubtedly exercise the power which he described; but transmitted with any posterior regulation of Iphitus and Lykurgos, is a very important correction. As the mention of a similar event was produced throughout Greece by the Spartans as founders of the Olympic festival in the temple of the Roman Pantheon (Strabo, vii. p. 322).

that there had existed two persons named Lykurgos, and that the acts of both had been ascribed to one. It is plain from hence that there was no certainty attainable, even in the third century before the Christian era, respecting the date or parentage of Lykurgos.

Thucydides, without mentioning the name of Lykurgos, informs us that it was "400 years and somewhat more" anterior to the close of the Peloponnesian war;¹ when the Spartans emerged from their previous state of desperate internal disorder, and entered upon "their present polity". We may fairly presume that this alludes to the Lykurgian discipline and constitution, which Thucydides must thus have conceived as introduced about B.C. 580—550—coinciding with something near the commencement of the reign of king Tisikles. In as far as it is possible to form an opinion, such evidence as even so scanty and so discordant, I incline to adopt the opinion of Thucydides as to the time at which the Lykurgian constitution was introduced at Sparta. The state of "anarchy" and good order which that constitution brought about—combined with the healing of great previous internal divisions, which had tended much to enfeeble them—is represented (and with great plausibility) as the grand cause of the victorious career beginning with king Tisikles, the conqueror of Amyklæ, Pharis, and Geronthæ. Therefore it would seem, in the absence of better evidence, that a date, connecting the fresh stimulus of the new discipline with the reign of Tisikles, is more probable than any speak either later or earlier.²

¹ Thucyd. l. i. § 18.

² Mr. Clinton bases the legislation of Lykurgos, "in conformity with Thucydides," at about 571 B.C., and his remark at 480 B.C., about thirty-five years previous (Pauli Notæ, v. l. c. v. §. 221); he also places the beginning of Tisikles at B.C. 572. It will be seen, *supra*, p. 479.

In Pauli Notæ, Mr. Clinton collects and discusses the various statements respecting the date of Lykurgos; and says the latter at Thucyd. l. i. § 18, and Thucydides, p. 479—481.

The difference in these statements need, after all, be taken as they stand, for they cannot be reconciled except by the help of arbitrary suppositions,

which only succeed us by producing a still more confused state than we are in reality. I agree with Mr. Clinton in thinking that the opinion of Thucydides is likely to be taken as the best authority. But I am greatly dissent from his proceeding, which he is conscious will involve, according to Mr. Clinton, and almost all other writers who regard the parentage of Lykurgos, when that father calls Lykurgos the guardian and maker of Tisikles of the Myrtenasthai list. Mr. Clinton says—"From the secretary of the Lykurgian Lykurgos was selected as the elder house (the Perikles). It is manifest that the process went to prevent" (p. 481); and he then goes on to select the

O. Müller,¹ after glancing at the strange and improbable circumstances handed down to us respecting Lycurgus, observes "that we have absolutely no account of him as an individual person". This remark is perfectly just, but another remark made by the same distinguished author, respecting the Lycurgean system of laws, appears to me erroneous—and requires more especially to be noticed, inasmuch as the conclusion deduced from it pervades a large portion of his valuable history of the Dorians. He affirms that the laws of Sparta were considered the true Doric institutions, and that their origin was identical with that of the people: Sparta is, in his view, the full type of Dorian principles, institutions, and sentiments—and is so treated throughout his entire work.² But such an opinion is at once gratuitous (for the passage of Pindar cited in support of it is scarcely of any value) and contrary to the whole tenor of ancient evidence. The institutions of Sparta were not Dorian, but peculiar to herself;³ distinguishing her not less from Argos, Corinth, Megara, Epidaurus, Sikyon, Korcyra, or Elis, than from Athens or Thebes. Krito was the only other portion of Greece in which there prevailed institutions in many respects analogous, yet still distinct from those two states which form the real work and plank of Spartan legislation, viz., the military discipline and the rigorous private training. These

two of Herodotus, agreeable to the proposition of Mr. J. Millard.

This proceeding seems to me least suitable. The text of Herodotus is partly well, and is not contradicted by anything to be found elsewhere in Herodotus itself; moreover, we have here a positive guarantee of its accuracy, for Mr. Millard himself admits that it existed in the days of Herodotus just as we now read it (Hæran, II. p. 11). For what right then do we alter it, or what do we gain by doing so? The only right to do so is the supposition that there must have been uniformity of belief and means of subsistence, notwithstanding conflicting facts and persons of the Greek and Greek antiquaries; but Herodotus was a Greek among Greeks of the fifth and fourth B.C. century; an assumption which I hold to be incorrect. And all we gain is, an theory unaidedly produced by

arbitrarily putting words into the mouth of one of our witnesses.

If we are prone to Herodotus to have been erroneously informed, it is right to do so; but the laws are proved for altering his deposition. It affords a clear proof that there were very different opinions as to the laws of Sparta, in which of the two lines of Herodotus the Spartan lawgiver believed; and that there was an enormous difference as to the time by which he lived.

¹ History of the Dorians, I. p. 1.

² History of the Dorians, II. p. 1, 2. Mr. Millard's proposition is in no way Millard's work; not a plausible valuable observation. "The Dorians Lycurgean Constitution Lycurgean System of Laws," *Classical Review*, 1851, vol. 1, p. 11.

of Sparta.

were doubtless Dorians in Kolos, but we have no proof that these peculiar institutions belonged to them more than to the other inhabitants of the island. That the Spartans had an original organisation and tendencies, common to them with the other Dorians, we may readily conceive; but the Lycurgean constitution impressed upon them a peculiar tendency which took them out of the general march, and rendered them the least fit of all states to be cited as an example of the characteristics of Dorianism. One of the essential causes, which made the Spartan institutions work so impressively upon the Grecian mind, was their perfect singularity, combined with the conspicuous ascendancy of the state in which they were manifested; while the Kroton communities, even admitting their partial resemblance (which was chiefly in the institution of the *Synitia*, and was altogether more in form than in spirit) to Sparta, were too insignificant to attract notice except from speculative observers. It is therefore a mistake on the part of O. Müller to treat Sparta as the type and representative of Dorianism generally, and very many of the positions advanced in his History of the Dorians require to be modified when this mistake is pointed out.

The first capital fact to notice respecting the institutions ascribed to Lycurgus is the very early period at which they had their commencement: it seems ^{highly} ^{probable} impossible to place this period later than 800 B.C. We do not find, nor have we a right to expect, trustworthy history in reference to events so early. If we have one foot on historical ground, inasmuch as the institutions themselves are real, the other foot still floats in the unshiftable region of myth, when we strive to comprehend the generating causes: the mist yet prevails which hinders us from distinguishing between the god and the man. The light in which Lycurgus appeared, to an intelligent Greek of the fifth century before the Christian æra, is so cloudy, yet briefly depicted, in the following passage of Herodotus, that I cannot do better than translate it:—

"In the very early times (Herodotus observes) the Spartans were among themselves the most lawless of all Greeks, ^{very rude} and unapproachable by foreigners. Their transition ^{from chaos} to good legal order took place in the following manner. When Lycurgus, a Spartan of consideration, visited Delphi to

counted the oracle, the instant that he entered the sanctuary, the Pythian priestess exclaimed,—

"Thus art thou, Lycurgus, to my fit shrine, beloved by Zeus and by all the Olympic gods. Is it as God or as man that I am to address thee in the spirit? I hesitate—and yet, Lycurgus, I incline more to call thee a god!"

(So spoke the Pythian priestess.) "Moreover, in addition to these words, some affirm that the Pythia revealed to him the order of things now established among the Spartans. But the Lacedæmonians themselves say, that Lycurgus, when guardian of his nephew Labotas king of the Spartans, introduced these institutions out of Crete. No sooner had he obtained this guardianship than he changed all the institutions into their present form, and took severity against any transgression of it. Next, he constituted the military divisions, the *Ephoratus* and the *Trishets*, as well as the *Spartia* or public men: he also, further, appointed the *sphers* and the *areia*. By this means the Spartans passed from bad to good order: to Lycurgus, after his death, they built a temple, and they still worship him reverentially. And as might naturally be expected in a productive soil, and with an innumerable number of men, they immediately took a start forward, and flourished so much that they could not be content to remain tranquil within their own limits," &c.

Such is our oldest statement (borrowed from Herodotus) respecting Lycurgus, attributing to him that entire order of things which the writer witnessed at Sparta. Thucydides also, though not mentioning Lycurgus, agrees in stating that the system among the Lacedæmonians, as he saw it, had been adopted by them four centuries previously, had rescued them from the most intolerable anarchy, and had immediately conducted them to prosperity and success.¹ Hellenicus, whose writings a little preceded those of Herodotus, not only did not (any more than Thucydides) make mention of Lycurgus, but can hardly be thought to have attached any importance to the name; since he attributed the constitution of Sparta to the first kings, Rhythmus and Prochlus.²

But these later writers, from whom Plutarch chiefly compiled his biography, profess to be far better informed on the subject of

¹ Herodot. i. 64–66; Thucyd. i. 12.

² Hellenic, viii. p. 122.

Lykurgus, and enter more into detail. His father, we are told, was assassinated during the growing state of barbarism; his elder brother Polydorus died early, leaving a pregnant widow, who made to Lykurgus propositions that he should marry her and become king. But Lykurgus, repudiating the offer with indignation, revealed the birth of his young nephew Charilaos, held up the child publicly in the agora as the future king of Sparta, and immediately relinquished the authority which he had provisionally assumed. However, the widow and her brother Leukidas raised scandalous accusations against him, of designs menacing to the life of the infant king,—accusations which he deemed it proper to obviate by a temporary absence. Accordingly he left Sparta and went to Krita, where he studied

Captivity of Lykurgus—his long absence from Sparta.

Exposure of Lykurgus—his long absence from Sparta.

the polity and customs of the different states; next he visited Ionia and Egypt, and (as some authors affirmed) Libya, Iberia, and even India. While in Ionia, he is reported to have obtained from the descendants of Krokodylos a copy of the Homeric poems, which had not up to that time become known in Peloponnesus: there were not wanting authors, indeed, who said that he had conversed with Homer himself.¹

Meanwhile the young king Charilaos grew up and assumed the sceptre, as representing the Proklid or Harygonid family. But the reins of government had become more relaxed, and the disorders worse than even, when Lykurgus returned. Finding that the two kings as well as the people were weary of so disastrous a condition, he set himself to the task of applying a corrective, and with this view consulted the Delphian oracle: from which he received strong assurances of the divine encouragement, together with one or more special injunctions (the primitive Statutes of the constitution) which he brought with him to Sparta.²

He is sent to the Delphian oracle to obtain the Statute.

He then suddenly presented himself in the agora, with thirty of the most distinguished Spartans, all in arms, as his guards and pageants. King Charilaos, though at first terrified, when informed

¹ Herodotus, *lib. 2. c. 105.*

² For an instructive review of the text as well as the meaning of this ancient Statute, see *Ulpian*, *De Statu Spartano*, published since

the first edition of this History. The substance of his charges of guiltiness against his son Charilaos, and the exact circumstances are well so exactly given, that I may use it extensively in the explanation of subsequent

Such was the Spartan political constitution as fixed by Lykurgus; but a century afterwards (as Plutarch's account runs), under the kings Polydeides and Theopompus, two important alterations were made. A rider was then attached to the old Lykurgian Rhetra, by which it was provided that "in case the people decided incorrectly, the senate with the kings should reverse their decision";¹ while another change, perhaps intended as a

22—30 does not take sufficient account of the distinction between the passing of votes in the senate and in the king's court. In the senate, the votes were equal; but in the king's court, it is right to suppose that the king was to exercise a casting vote, and a casting vote was not a vote at all. The king's court was not a senate, and the king was not a senator. The king's court was a court of appeal, and the king was a judge. The king's court was not a senate, and the king was not a senator. The king's court was a court of appeal, and the king was a judge. The king's court was not a senate, and the king was not a senator. The king's court was a court of appeal, and the king was a judge.

31—32 does not take sufficient account of the distinction between the passing of votes in the senate and in the king's court. In the senate, the votes were equal; but in the king's court, it is right to suppose that the king was to exercise a casting vote, and a casting vote was not a vote at all. The king's court was not a senate, and the king was not a senator. The king's court was a court of appeal, and the king was a judge. The king's court was not a senate, and the king was not a senator. The king's court was a court of appeal, and the king was a judge.

33—34 does not take sufficient account of the distinction between the passing of votes in the senate and in the king's court. In the senate, the votes were equal; but in the king's court, it is right to suppose that the king was to exercise a casting vote, and a casting vote was not a vote at all. latter as well as the extent of privileges which it was to exercise ; concerning the whole by the creation of the temples of Zens Heliosios and Athens Heliosios. The view of the subject presented by Plutarch as well as by Plato,¹ as if the senate were an entire assembly, does not consist with the pictures of the old epic. Hence we may more naturally imagine that the Lykurgian political constitution, apart from the sphere who were afterwards tacked to it, presents only the old features of the heroic government of Greece, defined and regularised in a particular manner. The presence of two co-existent and co-ordinate kings, indeed, travelling in hereditary descent and both belonging to the gens of Herakleides, is something peculiar to Sparta—the origin of which receives no other explanation than a reference to the twin sons of Aristodemos, Korymbosios and Proklos. These two primitive ancestors use a type of the two lines of Spartan kings ; for they are said to have passed their lives in perpetual discussions, which was the habitual state of the two contemporaneous kings at Sparta. While the co-existence of the pair of kings, equal in power and constantly thwarting each other, had often a baleful effect upon the course of public measures, it was nevertheless a security to the state against successful violence,² ending in the establishment of a despotism, on the part of any ambitious individual among the royal line.

Privileges of Sparta—
that
constant
discussion
—a security
to the state
against
despotism.

During five successive centuries of Spartan history, from Polydoros and Theopompas downward, no such violence was attempted by any of the kings,³ until the times of Agis III. and Kleomenes III. (243 B.C. to 190 B.C.). The importance of Greece had at this last-mentioned period irretrievably declined, and the independent political action which she once possessed had become subordinate to the more powerful forces either of the Median mountaineers (the reddest among her own sons) or to Epirotic, Macedonian, and Asiatic fastigates, preparatory to the final

³ The conspiracy of Parrhasios, after the temple of Artemis, was against the liberty of combined Hellas, to establish the federal empire of Hellas under the

Parthenon, rather than against the established Lykurgian government ; though undoubtedly one object of his project was to enable the Helles to revolt, and Aristodemus treats him as especially guilty to such down the power of the Lykurgos (Plato, *Legg.* i. 2, 3; compare Thucyd. i. 120-122; Aristotle, *Pol.* ii. 2).

assumption by the Romans. But amongst all the Grecian states, Sparta had declined the most; her secondary was totally gone, and her peculiar training and discipline (in which she had chiefly excelled) had degenerated in every way. Under these unfavourable circumstances, two young kings, Agis and Kleomenes—the former a generous enthusiast, the latter more violent and ambitious—conceived the design of restoring the Lysurgian constitution to its supposed primitive purity, with the hope of reviving both the spirit of the people and the secondary of the state. But the Lysurgian constitution had been, even in the time of Xenophon,¹ in part, as *titel*, not fully realised in practice—much less was it a reality in the days of Kleomenes and Agis; moreover it was an *titel* which admitted of being coloured according to the fancy or feelings of those reformers who professed, and probably believed, that they were aiming at its genuine restoration. What the reforming kings found most in their way was, the uncontrolled authority, and the conservative dispositions, of the *ephoroi*—which they naturally contrasted with the original wisdom of the kingly power, when kings and senate stood alone. Among the

various ways in which men's ideas of what the primitive constitution had been, were modified by the feelings of their own time (we shall presently see some other instances of this), is probably to be reckoned the assertion of Kleomenes respecting the first appointment of the *ephoroi*. Kleomenes affirmed that the *ephoroi* had originally been nothing more than subalterns and deputies of the kings chosen by the latter to perform for a time their duties during the long absence of the Messenian war. Starting from this humble position, and profiting by the dissensions of the two kings,² they had in process of time, especially by the addition of the *ephor* Asterkyos, found means first to constitute themselves an independent board, then to usurp to themselves more and more of the kingly authority, until they at last reduced the kings to a state of intolerable humiliation and impotence. As a proof of the primitive relation between the kings and the *ephoroi*, he alluded to that which was the custom at Sparta in his own time. When the *ephoroi* sent for either of the kings, the

¹ Xenophon, *Hæcædæ*, lib. vi. c. 12. et *Agædæ* (the *ephoroi* lay out in

² *Plutarch*, Agis, c. 25. There are several other instances, &c.

The direct political powers of the kings were thus greatly curtailed; yet importance in many ways was still left to them. They possessed large royal domains in many of the townships of the Perioeci: they received frequent seasonal presents, and when victims were offered to the gods, the skins and other portions belonged to them as purgation;¹ they had their votes in the senate, which, if they were absent, were given on their behalf by such of the other senators as were most nearly related to them: the adoption of children received its formal accomplishment in their presence—and conflicting claims at law, for the head of an orphaned orphan house, were adjudicated by them. But above all, their root was deep in the religious feelings of the people. Their pre-eminent lineage connected the entire state with a divine paternity. They, the chiefs of the Herakleids, were the special trustees of the will of Sparta from the gods—the composition of the Dorian being only sanctified and blessed by Zeus for the purpose of establishing the children of Herakles in the valley of the Eurotas.² They represented the state in its relations with the gods, being by right priests of Zeus Lacedæmonius (the Zeus of the god and the country combining into one) and of Zeus Uranius, and offering the annually sacrifices necessary to ensure divine protection to the people. Though individual persons might sometimes be yet aside, nothing short of a new divine revelation could induce the Spartans to step out of the genuine lineage of Herythandæ and Prokles. Moreover, the remarkable mourning ceremony which took place at the death of every king, seems to indicate that the two kingly families—which counted themselves Achæans,³ not Dorians—were considered as the great common head of union

that prevailed that the Spartan constitution should always interpret the king in every expedition (Plutarch, l. vi. 22).

¹ The table-supper (dinner) which took place the morning victims offered to public sacrifices at Athens is presented for us a special form of the public sacrifice in the sacred economy of that city: see Herakle, Public Economy of Athens, Ed. 2, p. 124, Eng. Trans.; Corpus Inscriptionum, No. 127.

⁴ Herakle, 2. 22. See the account in Plutarch of the alternative advantages of Lysander to make the king's family absolute by setting forward a king who would for the use of Sparta (Plutarch, Lysand. 2. 22-23).

like, we may readily believe that some of them continued to act after the period of extreme and disqualifying quality—which, though the extraordinary respect of the Lacedæmonians for old age would doubtless tolerate it, could not fail to impair the influence of the body as a consistent element of government.

The brief sketch here given of the Spartan government will show, that though Greek theorists found a difficulty in determining under what class they should arrange it;¹ it was in substance a close, unambiguous, and well-ordered oligarchy—including within it as subordinate those portions which had once been dominant, the kings and the senate, and softening the oligarch, without shaking the aristocrat, of the system, by its annual change of the ruling sphere. We must at the same time distinguish the government from the Lyrurgian discipline and education, which doubtless tended much to equalize rich and poor, in respect to practical life, habits, and enjoyments. Herodotus (and seemingly also Xenophon) thought that the form just described was that which the government had originally received from the hand of Lyrurgus. Now, though there is good reason for supposing otherwise, and for believing the sphere to be a subsequent addition—yet the mere fact, that Herodotus was so informed at Sparta, points our attention to one important attribute of the Spartan polity, which it is proper to bring into view. This attribute is, its unparalleled steadiness for four or five successive centuries, in the midst of governments like the Grecian, all of which had undergone more or less of fluctuation.

No considerable revolution—not even any palpable or formal change—occurred in it from the days of the Minorian war down to those of Agis III.: in spite of the irremovable blow which the power and territory of the state sustained from Epaminondas and the Thebans, the form of government nevertheless remained unchanged. It was the only government in Greece which could trace an unbroken possible descent from a high antiquity and from its real or supposed

¹ The sphere was sometimes considered as a governing element, because every Spartan citizen had a share of governing sphere; sometimes as a controlled element, because in

the exercise of their power they were subject to state regulation and no responsibility; see *Polity. Legg.* p. 2. 11; *Aristot. Polit.* ii. 4. 11; ix. 1. 4. 1.

founder. Now this was one of the main circumstances (among others which will hereafter be mentioned) of the astonishing ascendancy which the Spartans acquired over the Hellenic mind, and which they will not be found at all to deserve by any superior ability in the conduct of affairs. The readiness of their political sympathies—exhibited at one time by putting down the tyrants or despots, at another by overthrowing the democracies—stood in the place of ability, and even the recognised failings of their government were often covered by the sentiment of respect for its early commencement and uninterrupted continuance. If such a feeling acted on the Greeks generally,¹ much more powerful was its action upon the Spartans themselves in inspiring that haughty exclusiveness for which they stood distinguished. And it is to be observed that the Spartan mind continued to be cast on the old-fashioned mode, and unresponsive of modernising influences, longer than that of most other people of Greece. The ancient legendary faith, and devoted submission to the Delphic oracle, remained among them unshaken, at a time when various influences had considerably undermined it among their fellow-Hellens and neighbours. But though the unchanged faith and forms of the government thus contributed to its imposing effect, both at home and abroad, the causes of internal degeneracy were not the less really at work, in undermining its efficiency. It has been already stated that the number of qualified citizens went on continually diminishing, and even, of this diminished number a larger proportion than before were needy, since the landed property tended constantly to concentrate itself in fewer hands. There grew up in this way a body of discontent, which had not originally existed, both among the poorer citizens, and among those who had lost their franchise as citizens; thus aggravating the danger arising from Perikles and Kleon, who will be presently noticed.

We pass from the political constitution of Sparta to the civil rank and distribution, commercial relations, and lastly the peculiar system of habits, education and discipline, said to have been established among the Lacedæmonians by Lycurgus. Here again we shall find ourselves imperfectly informed as to the

¹ A specimen of the way in which, in *Industria*, Gr. vii. (Pausanias), p. 226, this tendency was traced, may be seen.

existing institutions, and surrounded by confusion when we try to explain how these institutions arose.

It seems however ascertained that the Dorians in all their settlements were divided into three tribes—the Hyllids, the Pamphyli, and the Dymanoi: in all Dorian cities, moreover, there were distinguished Herakleid families from whom chiefs were chosen when new colonies were formed. These three tribes can be traced at Argos, Sikyon, Epidaurus, Troezen, Megara, Korkyra, and seemingly also at Sparta.¹ The Hyllids recognised, as their ancestors and progenitor, Hyllus the son of Herakles, and were therefore in their own belief descended from Herakles himself: we may suppose the Herakleids, specially so called, comprising the two royal families, to have been the Elder Brothers of the tribe of Hyllus, the whole of whom are sometimes spoken of as Herakleids or descendants of Herakles.² But there seem to have been also at Sparta, as in other Dorian towns, non-Dorian inhabitants, apart from these three tribes and embodied in tribes of their own. One of these, the Aigialeis, said to have come from Thesos as allies of the Dorian invaders, is named by Aristotle, Pindar, and Herodotus³—while the Aigialeis at Sikyon, the tribe Hymanidai at Argos and Epidaurus, and others whose titles we do not know at Corinth, represent in like manner the non-Dorian portions of their respective communities.⁴ At Corinth the total number of tribes is said to have been eight.⁵ But at Sparta, though we seem to make out the existence of the three Dorian

¹ Herodot. v. 66; Strabo, lxx. v. 704; and Lucian, i. 5, 11; Diodor. ii. 3, 1; Herodot. ii. 104; and Lucian, lxx. viii.

² Thucyd. i. 2, speak of the Herakleids of Corinth.

³ The Troezen, Argos, & c., at Korkyra, and Pindar, Pyth. i. 41, v. 11, where the expression "descendants of Herakles" clearly comprehends more than the two royal families. Pindar, Pyth. v. 30; Herodot. ii. 104.

⁴ Herodot. iv. 146; Pindar, Pyth. v. 31; Lucian, Lucian, lxx. viii. 12; Argos, at Korkyra, and Thesos, at Troezen, or Herakles at Sparta, formed a family or house apart; Herodot. ii. 104.

⁵ Lucian, lxx. viii. 12; and Strabo, lxx. viii. 12; compare Herodotus, v. 104; and Strabo, lxx. viii. 12.

adopted into one of the three Dorian tribes; this is one of the considerations from the epigrammatic suggestion, that Sparta is the type of such Dorian cities. P. 2, 10. Epigrammatic suggestion (Herodot. v. 67) that I have done injustice to O. Müller is not according to his proof; but on attending the points now made, I can see no reason for modifying what is here stated in the text. The section of Herodotus worth notice, lxx. viii. 12, is in the text of the edition of Müller, lxx. viii. 12, as it is not merely a good, but more than one, for proof.

⁶ Herodot. v. 66-67; Strabo, lxx. viii. 12; and Lucian, lxx. viii. 12.

⁷ Pindar, Pyth. i. 41; and Strabo, lxx. viii. 12; compare Herodotus, v. 104; and Strabo, lxx. viii. 12.

the city—usually denoted native inhabitants of inferior political condition as contrasted with the full-privileged bourgeois who lived in the city, but it did not mark any precise or uniform degree of inferiority. It is sometimes so used by Aristotle as to imply a condition no better than that of the Helots, so that in a large sense, all the inhabitants of Laconia (Helots as well as the rest) might have been included in it. But when used in reference to Laconia, it bears a technical sense whereby it is placed in juxtaposition with the Spartans on one side, and with the Helots on the other: it means native freemen and proprietors, grouped in subordinate communities with more or less power of local management, but (like the subject towns belonging to Rome,

The situation of a *polis* was however very different in different cities of Greece. In Athens that class were well protected in person and property, constant and authoritative of them, there were at that time, the Xenodochi (resident aliens); but this point has been noticed long before the start of Arch. II.

The Periclean office from the *polis* is being a native of the city, subject by birth to the city law.

M. Kappeler, in his *Monographie des lois*, on Laconian affairs, vol. I, p. 10, represents much surprise at that which Aristotle in this book (especially *Polit.* and *Constitution*)—that in Sparta there was no class of free citizens in the Laconian *polis*. But he has two things—i.e. the citizens and Helots. He thinks that this question is "purely technical."

But I believe nothing more has been done, what is strictly stated by Aristotle as Spartan citizens (vol. II, p. 11). Aristotle calls the subject class in Sparta by the name of *Perioeci*. And in this case, the general presumption is for Aristotle the authority of Aristotle. For Sparta was a dominant or central city, including in its dependent area not only a considerable territory, but a considerable number of subject, almost-independent towns. In Sparta, as the evidence, such evidence as exists pointed out a town with its dependent territory, but without any national sovereignty. There was therefore no basis for the intermediate class called in Laconia *Perioeci*; just as Kappeler himself remarks (p. 10) about the Egean city of Mytilene. There were only the two classes of

free Spartan citizens, and semi-citizens, various in various modifications and subdivisions.

Recently following Meier, Kappeler, in his vol. II, p. 10, says that the authority of Aristotle on this point is contradicted by that of Demosthenes and Isocrates—authors who wrote especially on Athenian affairs. Now if we turn direct to such a source, I confess that I should prefer the testimony of Aristotle—considering that we have little or nothing respecting the other two. But in this case I do not think that we are driven to make a choice: Demosthenes (esp. *Atheniensis*, c. 1, p. 142) is not clear in terms, as that we cannot allow him to contradict Aristotle and Isocrates (upon whom Meier and Kappeler still say something, which does not necessarily contradict him, but admits of being explained away by placing the two witnesses in harmony with each other).

Isocrates says (esp. *Atheniensis*, c. 1, p. 142). The city centre (capital) of Sparta consists of three, or at least two, parts, viz. the Spartan territory. Now this word *territory* seems to be here used just as Aristotle would have used it, in contradistinction to the *polis* itself and vicinity: it is not distinguished from *polis* and *territory*, but comprehends both of them as different entities under a general term. The authority of Aristotle affords a reason for preferring to construe the passage in this manner, and the words appear to me to point at it clearly.

The office of the *Laconian* *Perioeci* was also noticed; see Kappeler (*op. cit.*, p. 10). Laced. *Perioeci*, c. 1, p. 142.

Zurich, and most of the old thirteen cantons of Switzerland) embodied in the Lacedæmonian aggregate, which was governed exclusively by its kings, senate, and citizens of Sparta.

When we come to describe the democracy of Athens after the revolution of Kleisthenes, we shall find the demes, or local townships and villages of Attica, incorporated as equal and constituent fractions of the isopolis called The Demos (or The City) of Athens, so that a citizen of Acharææ or Epilæion is at the same time a full Athenian citizen. But the relation of the Perizæic townships to Sparta is one of inequality and obediencè, though both belong to the same political aggregate, and make up together the free Lacedæmonian community. In this manner, Gressos and other places were townships of men personally free, but politically dependent on Argos—Akropolis on Tithos—Chamoneia on Oionomeneia—and various Thæsalian towns on Phæstos and Larion.¹ This condition carried with it a sentiment of degradation, and a painful recognition of that autonomy for which every Grecian community thirsted,² while being maintained through superior force, it had a natural tendency, perhaps without the deliberate wish of the reigning city, to degenerate into practical oppression. But in addition to this general tendency, the peculiar education of a Spartan, while it imparted force, fortitude, and regimental precision, was at the same time so rigorously peculiar, that it rendered him harsh, unaccommodating, and incapable of sympathizing with the ordinary march of Grecian feeling,—not to mention the repugnance and love of money, which is attested, by good evidence, as belonging to the Spartan character,³ and which we should hardly have expected to find in the people of Lyturgos. As Harpocration cut of their native city,⁴ and in relations with foreigners, the Spartans seem to have been more unpopular than other Greeks, and we may presume that a similar haughty roughness pervaded their

Special meaning of *Demos*, *Polis*, *Parochia* in *Laconia*.

³ Joseph. Bellum. vi. 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

challenges with their own Periklæi, who were bound to them certainly by no tie of affection, and who for the most part revolted after the battle of Leuktra as soon as the invasion of Laconia by Epaminondas enabled them to do so with safety.

Isokrates, taking his point of departure from the old Herakleid legend, with its instantaneous conquest and triple partition of all Doric Peloponnesians among the three Herakleid brothers, deduces the first origin of the Periklæi townships from internal seditions among the conquerors of Sparta. According to him, the period immediately succeeding the conquest was one of fierce intestine warfare in newly-conquered Sparta, between the Few and the Many,—the oligarchy and the demos. The former being victorious, two important measures were the consequences of their victory. They banished the defeated Many from Sparta into Laconia, retaining the residence in Sparta exclusively for themselves; they assigned to them the smallest and least fertile half of Laconia, monopolising the larger and better for themselves; and they disseminated them into many very small townships, or subordinate little communities, while they concentrated themselves entirely at Sparta. To these precautions for ensuring dominion they added another not less important. They established among their own Spartan citizens equality of legal privileges and democratical government, so as to take the greatest securities for internal harmony; which harmony, according to the judgment of Isokrates, had been but too effectually perpetuated, enabling the Spartans to achieve their dominion over oppressed Greece,—the sword of pismir¹ for the spoliation of the peaceful. The Periklæi townships (he tells us), while deprived of all the privileges of freemen, were exposed to all the trials, as well as to an unfair share of the dangers of war. The Spartan authorities put them in situations and upon enterprises which they deemed too dangerous for their own citizens; and what was still worse, the epheboi possessed the power of putting to death, without any form of preliminary trial, as many Periklæi as they pleased.²

¹ Isokrates, *Evagoras* (ix. vii. p. 288). Some editors, in placing this of the inferior Spartan hierarchy, refer also to a very conspicuous use of pismir in the tale and the latter allusion being an

old Indian myth about Agamemnon and the latter conspiracy.

² Isokrates, *Evag.* vii. (Pseudistomus) p. 129-130. The allusion in the text may be taken almost literally, that the latter

The statement here delivered by Isokrates, respecting the first origin of the distinction of Spartans and Perioeki, is nothing better than a conjecture, nor is it even a probable conjecture, since it is based on the historical truth of the Herakleid legend, and transports the disputes of his own time between the oligarchy and the demos into an early period to which such disputes do not belong. Nor is there anything, as far as our knowledge of Grecian history extends, to bear out his assertion that the Spartans took to themselves the least dangerous part in the field, and threw undue peril upon their Perioeki. Such dastardly temper was not among the aims of Sparta; but it is undeniably true, that as the number of citizens continually diminished, as the Perioeki came to constitute, in the later times, a larger and larger proportion of the Spartan force. Yet the power which Isokrates represents to have been vested in the ephors, of putting to death Perioeki without preliminary trial, we may fully believe to be real, and to have been exercised as often as the occasion seemed to call for it. We shall notice presently the way in which these magistrates dealt with the Helots, and shall see ample reason from thence to draw the conclusion, that whenever the ephors believed any man to be dangerous to the public peace, — whether an inferior Spartan, a Perioekus, or a Helot, — the most summary mode of getting rid of him would be considered as the best. Towards Spartans of rank and consideration they were doubtless careful and measured in their application of punishment; but the same anxiety for circumspection did not exist with regard to the inferior classes; moreover, the feeling that the exigencies of justice required a fair trial before punishment was inflicted, belongs to Athenian associations much more than to Sparta. How often any such summary executions may have taken place, we have no information.

We may remark that the account which Isokrates has here given of the origin of the Lacedæmon Perioeki is not essentially irreconcilable with that of Ephorus,¹ who recounted that Eurydemus and Prokles, on first settling Laconia, had granted to the pre-existing population equal rights with the Dorians—

¹ Isokrates "had got to death without their allies or dependent out of Laconia more than thirty years after the Peloponnesian war."
 This has very long lived at Athens. ² Ephorus, *Fragmenta*, 12, ed. Mure: *apud Athenienses* was a *city*, taken to stand *vid. p. 288*.

but that Agis, son of Eurythene, had deprived them of this equal position, and degraded them into dependent subjects of the latter. At least the two² narratives both agree in presenting that the Periclei had once enjoyed a better position, from which they had been extruded by violence. And the policy which Isokrates ascribes to the victorious Spartan oligarchs,—of driving out the daimon from concentrated residence in the city to dissipated residence in many separate and insignificant townships,—seems to be the expression of that proceeding which in his time was numbered among the most efficient precautions against refractory subjects,—the *Daskieia*, or breaking up of a town-aggregate into villages. We cannot ascribe to the statement any historical authority.³ Moreover the division of Laconia into six districts, together with its distribution into townships (or the distribution of settlers into pre-existing townships), which Ephorus ascribed to the first Dorian kings, are all deductions from the primitive legendary account, which described the Dorian conquest as achieved at one stroke, and must all be dismissed, if we suppose it to have been achieved gradually. This gradual conquest is admitted by O. Müller and by many of the oldest subsequent historians—who nevertheless seem to have the contrary supposition involuntarily present to their minds when they criticize the early Spartan history, and always unconsciously imagine the Spartans as masters of all Laconia. We cannot even assert that Laconia was ever under one government before the consummation of the successive conquests of Sparta.

² Dr. Arnold, in his *Illustration on the Spartan Constitution*, appended to the fifth volume of his *Tricorinthia*, p. 261, places greater confidence in the historical value of this narrative of Isokrates than I am inclined to do. On the other hand, Dr. H. O. Lewis, in his *Review of Dr. Arnold's Illustration* (*Philological Museum*, vol. II, p. 24), considers the "account of Isokrates of completely inconsistent with that of Ephorus," which, in my opinion, were, perhaps, rather the plot of the two stories narrated. In his *St. Louis* excellent article, most of the difficult points respecting the Spartan constitution will be found stated and discussed in a manner highly instructive.

Another point in the statement of Isokrates is, that the Dories of the time of the original conquest of Laconia were only 1000 in number (*St. v. French*, 2, 205). Dr. Arnold assigns this estimate as too small, and observes, "I cannot find Isokrates, in describing the conquest of the Peloponnesus at the original conquest, has alluded to the dispersion the actual numbers of the Dories in his first story" (*St. v. French*, 2, p. 205).

This seems to me a probable conjecture, and it illustrates as well the chances of data under which Isokrates or his informants laboured, as the method which they took to supply the deficiency.

Of the assertion of O. Müller—repeated by Schömann¹—that the difference of race was strictly preserved, and that the Perioikoi were always considered as Achæans²—I find no proof, and I believe it to be erroneous. Respecting Floria, Gnosthra, and Amyklæ, three Perioikic towns, Pausanias gives us to understand that the pre-existing inhabitants were expelled some long time after the Dorian conquest, and that a Dorian population replaced them.³ Without placing great faith in this statement, for which Pausanias could hardly have any good authority, we may yet accept it as representing the probability of the case and as counterbalancing the unsupported hypothesis of Müller. The Perioikic townships were probably composed either of Dorians entirely, or of Dorians incorporated in greater or less proportion with the pre-existing inhabitants. But whatever difference of race there may once have been, it was effaced before the historical times,⁴ during which we find no proof of Achæans, known as such, in Laconia. The Boeotians, the

themselves.

¹ *Antiquities*, Art. Floria, Gnosthra, Amyklæ, p. 1, § 1.

² Pausanias, *lib. 2, § 1*, (ii. 22, 1). The statement of Müller is to be found in *History of the Dorians*, *lib. 2, § 1*. He quotes a passage of Pausanias which is given in the text.

³ *lib. 2, § 1*, (ii. 22, 1). See also *lib. 2, § 1*, (ii. 22, 1) in the same opinion as Müller.

⁴ *lib. 2, § 1*, (ii. 22, 1). See also *lib. 2, § 1*, (ii. 22, 1) in the same opinion as Müller. It is noteworthy that the learned Pausanias, who I have before alluded to, in *lib. 2, § 1*, (ii. 22, 1) in the same opinion as Müller, also observed this position, respecting the Perioikoi. He appears to understand it to be a name which, we would hardly expect, at least a name which I did not intend them to possess; as if the majority of inhabitants in each of the Perioikic towns were Dorians—*ut per totam Laconiam populi distincti esse viderentur*.—*lib. 2, § 1*, (ii. 22, 1). I mean only to affirm that each of the Perioikic towns, such as Amyklæ, were wholly, or almost wholly, Dorian; and that some of them, particularly Amyklæ, had also may have been the comparative numbers gradually increased in each town of Dorian and non-Dorian inhabitants, there are no means of ascertaining. M. Kappeler, *op. cit.*

also that Amyklæ, Floria and Gnosthra, were probably never occupied by Achæans, and if this be true, it affords the general basis on the fact of which by comparison with I believe, his words in—*lib. 2, § 1*, (ii. 22, 1). See also *lib. 2, § 1*, (ii. 22, 1). It is evident to my three main facts position respecting a supposed identity of Dorians, and Achæans. The high authority of O. Müller has been adduced in this respect.

It is plain that Herodotus (Herodotus, *lib. 2, § 1*, (ii. 22, 1)) considered all the free inhabitants of Laconia, not as Achæans, but as Dorians. He believes in the story of the legend, that the Achæans, driven out of Laconia by the Dorians, occupied the territory in the north-west of Peloponnesus which was afterwards called *Laconia*—*expelling them from it the Dorians*.—*lib. 2, § 1*, (ii. 22, 1). What else may be the truth about this legendary statement—and whatever may have been the original proportions of Dorians and Achæans in Laconia—these two races had by the fifth century B.C. become assimilated in one nationality, called Dorians or Laconians, and were called Laconians or Laconians.

Epigra, and the *Takhyblak*, all of whom belong to Sparta, seem to be the only examples of separate races (partially distinguishable from Dorians) known after the beginning of authentic history. The Spartans and the Perioikoi constituted one political aggregate, and that too so completely united together in the general opinion (speaking of the times before the battle of Leuctra), that the peace of Antalkidas, which guaranteed autonomy to every separate Greek city, was never so construed as to divorce the Perioikoi from Sparta. Both are known as *Lacedaemonians* or *Lacedaemonians*, and Sparta is regarded by Herodotus only as the first and bravest among the many and brave *Lacedaemonian* cities.¹ The victors at Olympia are proclaimed not as Spartans, but as *Lacedaemonians*—a title alike borne by the Perioikoi. And many of the numerous winners whose names we read in the Olympic lists as *Lacedaemonians* may probably have belonged to Amyklai or other Perioikic towns.

The Perioikic hoplites constituted always a large—in later times a preponderant—numerical proportion of the *Lacedaemonian* army, and must undoubtedly have been trained, more or less perfectly, in the peculiar military tactics of Sparta; since they were called upon to obey the same orders as the Spartans in the field,² and to perform the same evolutions. Some cases appear, though rare, in which a Perioikos has high command in a foreign expedition. In the time of Aristotle, the larger proportion of *Lacedaemonians* (then meaning only the country westward of *Targina*, since the foundation of *Messini* by *Spartocleides* had been consummated) belonged to Sparta citizens,³ but the remaining

proportion, comprising both Spartans and Perioikoi, though well very unequal political franchises and very marked differences in individual training and habits. The laws were different in Messini, where the Spartans had no franchise; in Argos, Perioikoi and Spartans; in Syracuse, Perioikoi and Spartans; the extreme inequality of laws being never lower than.

¹ Herod. vii. 236.

² Herod. vii. 236. They did not receive pay for the Lykian expedition (but they seem to be called on to do so) while on campaign with it, or on their return to Sparta (p. 236).

³ Aristotle, *Polit.* ii. 4, 12. But only a few fragments from the *Constitution* of

the *Sparganopolis* are extant.

Herod. ii. 104. In the article above quoted in *Herodotus*, pp. 104, 105, the words "Perioikoi" are used in the meaning of the small towns of the Lacedaemonian territory, and distinguished from the Spartans, who did not hold of any territory within the limits of the Lacedaemonian state. In the same sense, they are used in the same connection as the members of the Lacedaemonian state, or the Spartans in Herodotus, before the foundation of the Messianian state. In the same sense, they are used in the same connection as the members of the Lacedaemonian state, or the Spartans in Herodotus, before the foundation of the Messianian state. In the same sense, they are used in the same connection as the members of the Lacedaemonian state, or the Spartans in Herodotus, before the foundation of the Messianian state.

smaller half must have been the property of the Perioikoi, who must besides have carried on most of the commerce of export and import—the metallurgic enterprise, and the distribution of internal produce—which the territory exhibited; since no Spartans ever modified in such occupations. And thus the peculiar training of Lykurgos, by throwing all these employments into the hands of the Perioikoi, opened to them a new source of importance which the dependent townships of Argos, of Thbes, or of Orchomenos would not enjoy.

The Helots of Laconia were Coloni or work bound to the soil, who tilled it for the benefit of the Spartans: proprietors actually—probably, of Perioikic properties also. They were the rustic population of the country, who dwelt, not in towns, but either in small villages¹ or in detached farms, both in the district immediately surrounding Sparta, and round the Perioikic Lacedæmon towns also. Of course these

¹ *Ekklaiæ*.—
essentially
villages.

were also Helots who lived in Sparta and other towns, and did the work of domestic slaves—but such was not the general character of the class. We cannot doubt that the Dorian conquest from Sparta found this class in the condition of villagers and detached rustics; but whether they were dependent upon pre-existing Achaean proprietors, or independent like much of the Arcadian village population, is a question which we cannot answer. In either case, however, it is easy to conceive that the village lands (with the cultivators upon them) were the most easy to appropriate for the benefit of masters resident at Sparta; while the towns, with the district immediately around them, furnished both dwelling and maintenance to the outgoing detachments of Dorianæ. If the Spartans had succeeded in their attempt

that they could direct taxation both to the Helots and to the Perioikic proprietors, who were the improved way to being larger landed proprietors. And though the principle of taxation, in the sense there was practised, according to Aristotle in the words of Aristotle:

"The Spartans likewise the Helots being the largest landed-proprietors, take care not to tax them directly and take payment of property-tax"—i.e., they took indirectly at each other's expense. If the Spartans had been the only persons who paid directly or

property-tax, this diversion of Achaean lands would have had no meaning. In principle, the tax was assessed both on those larger proprietors, and on the smaller proprietors of the Perioikic villages. The Spartans helped each other to create the tax-proprietors.

The village character of the Helots is distinctly marked by Livy, xvi. 17, in describing the introduction of the Helots into the Peloponnese: "Helotum gentium ad eam rem bene constituta constituta, agrorum gentes vestimenta vestimenta, pecuniam, domos, vineas, et cetera ad se habuerunt."

of Grecian language and dialect—points of marked superiority over the foreigners who formed the slave population of Athens or Chios. They seem to have been nearly inferior to any village population of Greece; while the Grecian observer sympathised with them more strongly than with the bought slaves of other states—not to mention that their homogeneous aspect, their numbers, and their employment in military service, rendered them more conspicuous to the eye.

The service in the Spartan house was all performed by members of the *Hilot* class; for there seem to have been few, if any, other slaves in the country. The various anecdotes which are told respecting their treatment at Sparta breathe less of cruelty than of ostentatious scorn¹—a sentiment which we are nearly surprised to discover among the citizens of the non-titled. But the great mass of the *Hilots*, who dwell in the country, were objects of a very different sentiment on the part of the Spartan *epheboi*, who knew their heavy, strong, and standing discipline, and yet were forced to employ them as an essential portion of the state army. The *Hilots* commonly served as light-armed, in which capacity the Spartan hoplites could not dispense with their attendance. At the battle of Platæa, every Spartan hoplite had seven *Hilots*,² and every Peloponnesian hoplite one *Hilot* to attend him;³ but even in camp, the Spartan arrangements were framed to guard against any sudden mutiny of these light-armed

immEDIATE want of money, and he spent in this manner 200 talents. His thousand *Hilots* must then have been in a condition to find 200 talents each, which was a very considerable sum. *Plutarch, Alcibiades*, c. 32.

¹ I stick to the statement that *Hilots* were employed in ploughing in a state of discipline, in order to enable in the winter a contingent of experienced lightest footsoldiers (*Plutarch, Lysander*, c. 10; also *Arrian* before the *Coronea*, *Strabo*, v. 12, p. 492).

² *Ibid.*, ii. 18. The Spartans at Thermopylæ were to have been attended each by only one *Hilot* (*ibid.*).

³ *Strabo* seems to consider that the light-armed who attended the Peloponnesian hoplites at Platæa were not *Hilots* (*Strabo*, ii. 1, §. 14). However, this

was distinctly said that they were so, but I am so ready for admitting two different classes of light-armed in the Spartan military force.

The education which *Hilots* gave of the number of *Periæci* and *Hecebreæ* *Alcibiades* presents upon very narrow working data. Among these it is to be noticed the supposition that narrow rules meant the district of Sparta as distinguished from Laconia, which is contrary to the passage in *Plutarch* (*ibid.* 20), namely, upon the *Periæci* being the territory of the state generally.

⁴ *Plutarch, Ages. Lys.*, c. 18, §. 4. *Strabo*, *De laconia*, *Epheboi*, c. 1. *Epheboi*, *Quæ de Thermopyl.*, c. 10, p. 35. *Strabo*, in *describing* about 200 light-armed *Hilots* (*ibid.* p. 492) *describes* the *Alcibiades*, *ibid.*

companions, while at home the citizen habitually kept his shield disjoined from its locking-ring to prevent the possibility of its being snatched for the like purpose. Sometimes select Hoplites were clothed in heavy armour, and then served in the ranks, receiving remuneration from the state as the reward of distinguished bravery.¹

But Sparta, even at the maximum of her power, was more than once endangered by the reality, and always beset with the apprehension, of Helotic revolt. To prevent or suppress it, the ephors submitted to insert express stipulation for aid in their treaties with Athens—to invite Athenian troops into the heart of Lacedæmon—and to practice combinations of cunning and atrocity which even yet stand without parallel in the long list of pretensions for justifying unjust dominion. It was in the eighth year of the Peloponnesian war, when the Helots had been called upon for signal military efforts in various ways, and when the Athenians and Messenians were in possession of Pylos, that the ephors felt especially apprehensive of an outbreak. Anxious to single out the most forward and daring Helots, as the men from whom they had next to dread, they issued proclamation that every member of that class who had rendered distinguished services should make his claims known at Sparta, promising liberty to the most deserving. A large number of Helots came forward to claim the boon: not less than 2000 of them were approved, formally manumitted, and led in solemn procession round the temples, with garlands on their heads, as an inauguration to their coming life of freedom. But the treacherous gulfed only marked them out as victims for the sacrifice: every man of them forthwith disappeared,—the manner of their death was an untold mystery.

For this dark and bloody deed Thucydides is our witness,² and Thucydides describing a contemporary matter into which he had inspired. Upon any less evidence we should have hesitated to believe the statement; but standing as it does close above all suspicion, it speaks volumes as to the infamous character of the Lacedæ-

¹ Thucyd. i. 101; ii. 80; v. 54—55. See also *Hærodotus* vi. 136, and *Strabo*.

² Thucyd. ii. 36. It is an exciting picture by every measure possible.

Spartan government, while it lays open to us at the same time the intensity of their fears from the Helots. In the consummation of this fatal refinement of brute men, a large number of auxiliaries and instruments must have been concerned; yet Thucydides with all his inquiries could not find out how any of them perished: he tells us that no man knew. We see here a fact which demonstrates unequivocally the impenetrable mystery in which the proceedings of the Spartan government were wrapped,—the absence not only of public discussion, but of public curiosity,—and the perfection with which the ephors reigned over the will, the hands, and the tongues of their Spartan subjects. The Venetian Council of Ten, with all the facilities for nocturnal drawing which their city presented, could hardly have accomplished so vast a coup d'état with such invisible means. And we may judge from hence, even if we had no other evidence, how little the helots of a public assembly could have excited either the temper of mind or the march of government at Sparta.

Other proceedings, ascribed to the ephors, against the Helots, are conceived in the same spirit as the incident just recounted from Thucydides, though they do not carry with them the same certain attestation. It was a part of the institutions of Lykurgos (according to a statement which Plutarch pretends to have borrowed from Aristotle) that the ephors should every year declare war against the Helots, in order that the murder of them might be rendered innocent; and that active young Spartans should be armed with daggers and sent about Laconia, in order that they might, either in solitude or at night, assassinate such of the Helots as were considered formidable.¹ This last measure passed by the name of the *Krypteia*, yet we find some difficulty in determining to what extent it was ever carried. That the ephors, indeed, would not be restrained by any scruples of justice or humanity, is plainly shown by the murder of the 2000 Helots above noticed. But this latter incident really answered its purpose; while a standing practice such as that of the *Krypteia*, and a formal notice of war given beforehand, would provoke the reaction of despair rather than enforce tranquillity. There seems indeed good evidence that the

¹ Plutarch, *Lycurg.* c. 58; Herodotus *Penia*, p. 108, ed. Osg.

Krypteia was a real practice,¹—that the ephors kept up a system of police or espionage throughout Lacedæmon by the employment of active young citizens, who lived a hard and solitary life, and suffered their motions to be as little detected as possible. The ephors might naturally enough take this method of keeping watch both over the Peræian townships and the Helot villages, and the assassination of individual Helots by these policemen or Krypteia would probably pass unnoticed. But it is impossible to believe in any standing murderous order, or deliberate general assassination of Helots, for the purpose of intimidation, as Aristotle is alleged to have represented—for we may well doubt whether he really did make such a representation, when we see that he takes no notice of this measure in his *Polities*, where he speaks at some length both of the Spartan constitution and of the Helots. The well-known hatred and fear, entertained by the Spartans towards their Helots, has probably coloured Plutarch's description of the Krypteia, so as to exaggerate those unpunished murders which occasionally happened into a constant phenomenon with express design. A similar deduction is to be made from the statement of Myrto of Pellæ,² who alleged that they were beaten every year without any special fault, in order to put them in mind of their slavery—and that those Helots, whose superior beauty or stature placed them above the visible stamp of their condition, were put to death; whilst such masters as neglected to keep down the spirit of their vigorous Helots were punished. That severity, for which the ephors were so remarkable, seems enough of itself to refute the assertion that they publicly proclaimed war against the Helots; though we may well believe that this unhappy class of men may have been noticed as objects for police observation in the annual ephoric oath of office. Whatever may have been the treatment of the Helots in later times, it is at all events hardly to be supposed that any regulation hostile to them can have emanated from Lycurgus. For the dangers arising from that source did not become serious until after the Messenian war—or indeed until after the gradual

¹ Plut., *Life*, l. p. 102; the words of the *Isagoge* in the *Polities* seem not to signify Spartan custom. Compare the same sentence, *l. p. 103*, where *not suspect, without reason*,

the explanation of the word *governer*.

² Myrto, *ap. Athenæ*, xiv. p. 407. Aristotle tells *Athenians* that not strictly or necessarily meant, "to put to death".

diminution of the number of Spartan citizens had made itself felt.

The manumitted Helots did not pass into the class of Periochi, —for this purpose a special grant, of the freedom of ^{Manum.} some Periochi township, would probably be required, ^{Hel. Helots.} —but constituted a class apart, known at the time of the Peloponnesian war by the name of Neodamidae. Being persons who had earned their liberty by signal bravery, they were of course regarded by the Spartans with peculiar apprehension, and, if possible, employed on foreign service,¹ or planted on some foreign soil as settlers. In what manner these freedmen employed themselves, we had no distinct information; but we can hardly doubt that they quitted the Helot village and field, together with the rural costume (the leather cap and chitonis) which the Helot commonly wore, and the stigma of which exposed him to suspicion, if not to punishment, from his jealous masters. Probably they, as well as the disfranchised Spartan citizens (called Hypomeiones or Indidiores), became congregated at Sparta, and found employment either in various trades or in the service of the government.

It has been necessary to give this short sketch of the orders of men who inhabited Laconia, in order to enable us to ^{Political and social regulations referred to Lycurgus.} understand the statements given about the legislation of Lycurgus. The arrangements ascribed to that law-giver, in the way that Plutarch describes them, presuppose, and do not create, the three orders of Spartans, Periochi, and Helots. We are told by Plutarch that the disorders which Lycurgus found existing in the state arose in a great measure from the gross inequality of property, and from the licentious indulgence and unprincipled rapacity of the rich—who had drawn to themselves the greater portion of the lands in the country, leaving a large body of poor, without any lot of land, in hopeless misery and degradation. To this inequality (according to Plutarch) the reforming legislator applied at once a stringent remedy. He redistributed the whole territory belonging to Sparta, as well as the remainder of Laconia; the former in 9000 equal lots, one to each Spartan citizen; the latter ^{Portion of lands.} in 30,000 equal lots, one to each Periochian: of this

¹ Thucyd. i. 12.

alleged distribution I shall speak further presently. Moreover he forbade the use of gold and silver money, tolerating nothing in the shape of circulating medium but pieces of iron, heavy and scarcely portable; and he forbade¹ to the Spartan citizen every species of industries or money-making occupations, agriculture included. He further constituted—though not without strenuous opposition, during the course of which his eye is said to have been knocked out by a violent youth, named Alexander—the *Spartia* or public mess. A certain number of joint tables were provided, and every citizen was required to belong to some one *syssitia* or of these and habitually to take his meals at it²—no *syssitia* new member being admissible without a unanimous ballot in his favour by the previous occupants. Each provided from his lot of land a specified quota of barley-meal, wine, cheese and figs, and a small contribution of money for condiments: game was obtained in addition by hunting in the public forests of the state, while every one who sacrificed to the gods,³ went to his mess-table a part of the victim killed. From boyhood to old age, every Spartan citizen took his sober meals at this public mess, where all shared alike; nor was distinction of any kind allowed, except on signal occasions of service rendered by an individual to the state.

These public *Syssitia*, under the management of the *Polimarchæ*, were connected with the military distribution, the *Polimarchæ* constant gymnastic training, and the rigorous discipline of detail, enforced by *Lykurgos*. From the early age of seven years, throughout his whole life, as youth and man no less than as boy, the Spartan citizen lived habitually in public, always either himself under drill, gymnastic and military, or a critic and spectator of others—always under the letters and observances of a rule partly military, partly monastic—estranged from the independence of a separate home—seeing his wife, during the first years after marriage, only by stealth, and maintaining little familiar relation with his children. The supervision not only of his fellow-citizens, but also of uneducated slaves or captives maintained by the state, was perpetually acting upon him: his

descriptions of gymnastic contests, the youths were instructed in the dance dances employed in festivals of the god, which contributed to impart to them methodical and harmonious movements. Hunting in the woods and mountains of Laconia was encouraged, as a means inuring them to fatigue and privation. The nourishment supplied to the youthful Spartans was purposely kept inefficient, but they were allowed to make up the deficiency not only by hunting, but even by stealing whatever they could lay hands upon, provided they could do so without being detected in the fact; in which latter case they were severely chastised.¹ In reference simply to bodily results,² the training at Sparta was excellent, combining strength and agility with universal aptitude and endurance, and steering clear of that mistake by which Thales and other cities impaired the effect of their gymnastics—the attempt to create an athletic habit, suited for the games but suited for nothing else.

Of all the attributes of this remarkable community, there is none more difficult to make out clearly than the condition and character of the Spartan women. Aristotle asserts that in his time they were imperious and vainly, without being really so brave and useful in moments of danger as other Grecian females;³ that they possessed great influence over the men, and even exercised much ascendancy over the course of public

opinion of
Aristotle.

regards them for extreme endurance, unlike the child, who are equivalent of the man, to double upon their comparative bodily strength and ability to endure the extreme fatigue and suffering that often fall to the lot of female warriors; and that they may decide who is the most brave and best able to lead a war-party in case of emergency."—*Arist.*, p. 115, 40.

The strength or power of endurance (Aristot. *Pol.* ii. c. 2-12) which formed one of the prominent objects of the Spartan training, Aristotle has already pointed to that of the Mæotic Indians.

¹ Xenophon, *Anab.* i. c. 14; and *De Reip.* lib. v. c. 2; Aristotle, *Pol.* (ii. c. 12, 13, 14); p. 271. It is there likewise expressed by Aristotle, I suppose, in which Aristotle alludes when he speaks of the rather severe

discipline at Sparta, which in its natural sense would be the reverse of the truth, p. 272.

² Aristotle, *Pol.* vii. c. 1, 2.—The remark is curious—viz. all who cultivate freedom also cultivate slavery (Aristot. the author of the *Polity*); the *Polity*, Aristotle, ed. 2, lib. vii. c. 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

³ Aristotle, *Pol.* ii. c. 1, 2; *Polity*, Aristotle, p. 271. Aristotle alludes to the condition of the Spartan women on the occasion of the discussion of slavery by the Thracians as an evidence of the claims respecting their want of courage. His judgment in this regard seems hard upon them, and he probably had formed no correct and correct notions of what their courage under such circumstances ought to

affairs; and that nearly half the landed property of Laconia had come to belong to them. The exemption of the women from all control formed, in his eye, a pointed contrast with the rigorous discipline imposed upon the men,—and a contrast hardly less pointed with the condition of women in other Greek cities where they were habitually confined to the interior of the house, and seldom appeared in public. While the Spartan husband went through the hard details of his domestic life, and dined on the plainest fare at the *Phidolion* or mess, the wife (it appears) maintained an ample and luxurious establishment at home, and the desire to provide for such outlay was one of the causes at that love of money which prevailed among men forbidden to enjoy it in the ordinary ways. To explain this antithesis between the treatment of the two sexes at Sparta, Aristotle was informed that Lycurgus had tried to bring the women no less than the men under a system of discipline, but that they made so obstinate a resistance as to compel him to desist.¹

The view here given by the philosopher, and deserving of course careful attention, is not easy to reconcile with that of Xenophon and Plutarch, who look upon the Spartan women from a different side, and represent them as worthy and homogeneous companions to the men. The Lycurgean system (as these authors describe it), considering the women as a part of the state, and not as a part of the house, placed them under training hardly less than the men. Its grand purpose, the maintenance of a vigorous breed of citizens, determined both the treatment of the younger women, and the regulations as to the intercourse of the sexes. "Female dances are good enough (Lycurgus thought) ^{to keep} ^{the} ^{young} ^{women} to sit at home spinning and weaving—but who can expect a splendid offspring, the appropriate mission ^{of} ^{the} ^{free} ^{woman} and duty of a free Spartan woman towards her country, from mothers brought up in such occupations?"² Pursuant to these views, the Spartan damsels underwent a bodily training analogous to that of the Spartan youth—being formally exercised, and

have taken, as the result of their position in the building. We may add that their violent demonstrations on their young women, they will have shown quite as much from the army of

we consider what an event the appearance of a conquering enemy into Sparta was.

¹ Aristotle, *Polit.* ii. 4, 2, 3, 21.

² Xenophon, *Mem. Lac.* i. 2-4; Plutarch, *Lycurg.* c. 28-31.

contending with each other in running, wrestling, and boxing agreeably to the forms of the *Gymnasia agones*. They seem to have worn a light tunic, cut open at the skirts, so as to leave the limbs both free and exposed to view—hence Ptolemy speaks of them as completely uncovered, while other critics in different quarters of Greece heaped similar reproach upon the practice, as if it had been perfect nakedness.¹ The presence of the Spartan youths, and even of the kings and the body of citizens, at these exercises, lent elevation to the scene. In like manner, the young women marched in the religious processions, sang and danced at particular festivals, and witnessed as spectators the exercises and undertakings of the youths; so that the two sexes were perpetually intermingled with each other in public, in a way foreign to the habits, as well as repugnant to the feelings, of other Grecian states. We may well conceive that such an education imparted to the women both a demonstrative character and an eager interest in masculine accomplishments, so that the expression of their praise was the strongest stimulus, and that of their reproach the bitterest humiliation, to the youthful troop who heard it.

The age of marriage (which in some of the unregulated cities of Greece was so early as to deteriorate visibly the breed of citizens)² was delayed by the Spartan law, both in women and men, until the period supposed to be most consistent with the perfection of the offspring. And when we read the restriction which Sparta custom imposed upon the intercourse even between married persons, we shall conclude without hesitation, that the public intermixture of the sexes in the way just described led to no such laxities, between persons not married, as might be likely to arise from it under other circumstances.³ Marriage was almost universal among the citizens, induced by general opinion at least,

¹ Strabo, *Asiaca*, lib. viii. Choroeb. *Diogen. Laert.* ii. 9. The earliest authorities, as old as the great Republic, shew that the Spartan women were not uncovered (see *Julian Preface*, vii. 102).

² It is scarcely worth while to notice the political situation of Orléans and Providence.

³ How completely the practice of gymnastic and military training the young women, according to that of

the other sex, was approved by Plato, may be seen from his injunctions in his *Republic*.

⁴ *Aristot. Polit.* vii. 14. 1.

⁵ It is certain (observe Dr. Thirlwall, speaking of the Spartan married women) that in this respect the Spartan women were as pure as those of any people, perhaps of any nation, except. (*History of Greece*, ed. 1811, vol. i. p. 171.)

O. Müller¹ remarks—and the evidence, as far as we know it, bears him out—that love marriages and genuine affection towards a wife were more familiar to Sparta than to Athens; though in the former marital jealousy was a sentiment neither indulged nor recognised—while in the latter it was intense and universal.²

To resemble the careful gymnastic training, which Xenophanes and Plutarch mention, with that uncontrolled luxury and relaxation which Aristotle condemns in the Spartan women, we may perhaps suppose, that in the time of the latter the women of high position and wealth had contrived to emancipate themselves from the general obligation, and that it is of such particular cases that he chiefly speaks. He dwells especially upon the increasing tendency to accumulate property in the hands of the women,³ which seems to have been still more conspicuous a century afterwards in the reign of Agis III. And we may readily imagine that one of the employments of wealth thus acquired would be to purchase exemption from laborious training,—an object more easy to accomplish in their case than in that of the men, whose services were required by the state as soldiers. If what steps so large a proportion as two-fifths of the landed property of the state came to be possessed by women, he partially explains to us. There were (he says) many rich heiresses,—the dowries given by fathers to their daughters were very large,—and the father had unlimited power of testamentary bequest, which he was disposed to use to the advantage of his daughter over his son. Perfect equality of bequest or inheritance between the two sexes, without any preference for females, would accomplish a great deal: but besides this, we are told by Aristotle that there was in the Spartan mind a peculiar sympathy and yielding disposition towards women, which he ascribes to the warlike temper both of the citizen and of the state—Aris bearing the pole

their surviving sons in dishonour and defeat were the bitter sufferers; while those whose sons had perished maintained a bearing comparatively cheerful.¹

Such were the leading points of the memorable Spartan discipline, strengthened in its effect on the mind by the absence of commercialism with strangers. For no Spartan could go abroad without leave, nor were strangers permitted to stay at Sparta; they came thither, it seems, by a sort of allowance, but the vastness of the process called *mesphy*² was always available to remove them, nor could there arise in Sparta that class of resident natives or aliens who constituted a large part of the population of Athens, and seem to have been found in most other Grecian towns. It is in this universal schooling, training and drilling imposed alike upon boys and men, youths and virgins, rich and poor, that the distinctive attribute of Sparta is to be sought—not in her laws or political constitution.

Lycurgus (or the individual to whom this system is owing,

Lycurgus

portion of human virtue—that which is called forth in a state of war;¹ the citizens being converted into a sort of garrison, always under drill, and always ready to be called forth either against Helots at home or against enemies abroad. Such exclusive tendency will appear less astonishing if we consider the very early and immature period at which the Lycurgean institutions arose, when none of those guarantees which afterwards maintained the peace of the Hellenic world had as yet become effective—no constant habits of intercourse, no custom of meeting in Amphitryeny from the distant parts of Greece, no common or largely frequented festivals, no multiplication of proxenia (or standing tickets of hospitality) between the important cities, no pacific or industrious habits anywhere. When we contemplate the general insecurity of Grecian life in the sixth or eighth century before the Christian era, and especially the precarious condition of a small band of Doric conquerors, in Sparta and its district, with undisciplined Helots on their own lands and Achæans established all around them—we shall not be surprised that the language which Brasidas in the Peloponnesian war addressed to his army in reference to the original Spartan settlement, was still more powerfully present to the mind of Lycurgus four centuries earlier—"We are a few in the midst of many enemies; we can only maintain ourselves by fighting and conquering!"

Under such circumstances, the exclusive aim which Lycurgus proposed to himself is easily understood; but what is truly surprising, is the violence of his means² and the success of the result. He realized his project of creating in the 8000 or 9000 Spartan citizens unswerving habits of obedience, hardihood, self-denial, and military aptitude—complete subjection on the part of each individual to the local public opinion, and preference of death to the abandonment of Spartan maxims—intense ambition on the part of every one to distinguish himself within the prescribed sphere of duties, with little ambition for anything else. In what

manner so ignores a system of individual training can have been first brought to bear upon any community, mastering the masses of the thoughts and actions from boyhood to old age—a work far more difficult than any political revolution—we are not permitted to discover. Nor does even the influence of an earnest and energetic Haskeloid man—seconded by the still more powerful working of the Delphic god behind, upon the strong plastic malleability of the Spartan mind—sufficiently explain a phenomenon so remarkable in the history of mankind, unless we suppose them aided by some combination of co-operating circumstances which history has not transmitted to us,¹ and preceded by disorders so exaggerated as to render the citizens glad to escape from them at any price.

Reporting the anti-Lycurgean Sparta we possess no positive information whatever. But although this unfortunate gap cannot be filled up, we may yet master the negative probability of the case sufficiently to see that in what Plutarch has told us (and from Plutarch the modern views have, until lately, been derived), there is indeed a basis of reality, but there is also a large superstructure of romance,—in not a few particulars essentially misleading. For example, Plutarch treats Lycurgus as introducing his reforms at a time when Sparta was mistress of Laconia, and distributing the whole of that territory among the Perioeci. Now we know that Laconia was not then in possession of Sparta, and that the partition of Lycurgus (assuming it to be real) could only have been applied to the land in the immediate vicinity of the latter. For even Amyklæ, Pharis, and Geraniæ were not conquered until the reign of Thibidas, posterior to any period which we can reasonably assign to Lycurgus: nor can any such distribution of Laconia have really occurred. Further we are told that Lycurgus banished from Sparta coined gold and silver, useless professions and frivolities, eager pursuit of gain, and ostentatious display. Without dwelling upon the improbability that any one of these anti-Spartan characteristics should have existed at so early a period as the sixth century before the Christian era, we may at least be certain that coined silver was not then to be found, since

According to the Delphic Apollo.

it was first introduced into Greece by Pericles of Argos in the preceding century, as has been stated in the preceding section.

But amongst all the points stated by Plutarch, the most suspicious by far, and the most misunderstanding, because endless calculations have been built upon it, is the alleged redistribution of landed property. He tells us that Lycurgus found fearful inequality in the landed possessions of the Spartans; nearly all the land in the hands of a few, and a great multitude without any land; that he rectified this evil by a redistribution of the Spartan district into 9000 equal lots, and the rest of Laconia into 30,000, giving to each citizen as much as would produce a given quota of barley, &c.; and that he wished moreover to have divided the movable property upon similar principles of equality, but was deterred by the difficulties of carrying his design into execution.

Now we shall find on consideration that this new and equal partition of lands by Lycurgus is still more at variance with fact and probability than the two former alleged proceedings. All the historical evidences exhibit decided inequalities of property among the Spartans—inequalities which tended continually to increase; moreover, the earlier authors do not conceive this evil as having grown up by way of abuse out of a primordial system of perfect equality, nor do they know anything of the original equal redistribution by Lycurgus. Even as early as the poet Alkman (A.D. 800—680) we find bitter complaints of the oppressive inequality of wealth, and the degradation of the poor men, cited as having been pronounced by Aristodemus at Sparta: "Wealth (said he) makes the man—no poor person is either accounted good or honored."¹ Next, the historian Hellanicus certainly knew nothing of the Lycurgean redistribution—for he ascribed the whole Spartan polity to Eurytheneus and Prokles, the original founders, and hardly noticed Lycurgus at all. Again, in the brief but impressive description of the Spartan lawgiver by Herodotus, several other institutions are alluded

taking the condition of that city as it stood in the time of Agis III. (say about 330 B.C.), we know that its citizens had become few in number, the bulk of them miserably poor, and all the land in a small number of hands. The old discipline and the public mass (so far as the rich were concerned) had degenerated into mere forms—a numerous body of strangers or non-citizens (the old xenodochy, or prohibition of resident strangers, being long discontinued) were domiciled in the town, forming a powerful unmixed interest; and lastly, the dignity and ascendancy of the state amongst its neighbours were altogether ruined.

It was insupportable to a young enthusiast like king Agis, as well as to many ardent spirits among his contemporaries, to contrast this degradation with the previous glories of their country; nor did they see any other way of reconstructing the old Sparta except by again admitting the disfranchised poor citizens, redistributing the lands, cancelling all debts, and restoring the public mass and military training in all their strictness. Agis endeavoured to carry through these subversive measures (such as no foreigner in the extreme democracy of Athens would ever have ventured to glance at), with the consent of the senate and public assembly, and the acquiescence of the rich. His sincerity is attested by the fact, that his own property, and that of his female relatives, among the largest in the state, was cast as the first sacrifice into the common stock. But he became the dupe of unprincipled conspirators, and perished in the unravel-ling attempt to realize his scheme by persuasion. His successor Kleomenes afterwards accomplished by violence a change substantially similar, though the intervention of foreign arms speedily overthrew both himself and his institutions.

Now it was under the state of public feeling which gave birth to these projects of Agis and Kleomenes at Sparta, that the historic fancy, unknown to Aristotle and his predecessors, first gained ground, of the absolute equality of property as a primitive institution of Lycurgus. How much such a belief would favour the schemes of innovation is too obvious to require notice; and without supposing any deliberate imposture, we cannot be astonished that the predispositions of enthusiastic patriots

interpreted according to their own partialities as old unrecorded legislation from which they were separated by more than five centuries. The Lykurgian discipline tended steadily to suggest to men's minds the idea of equality among the citizens,—that is, the negation of all inequality not founded on some personal attribute,—inasmuch as it withdrew the habits, enjoyments, and capacities of the rich to those of the poor; and the inequality thus existing in idea and tendency, which seemed to proclaim the wish of the founder, was strained by the later reformers into a positive institution which he had at first repelled, but from which his dogmatical followers had recoiled. It was thus that the fables, sayings, and indirect suggestions of the present assumed the character of recollections out of the early, obscure, and distant historical past. Perhaps the philosopher Ephorus of Berytheia (friend and companion of Diogenes,¹ disciple of Zeno the Stoic, and author of works now lost both on Lykurgos and Solonides and on the constitution of Sparta) may have been one of those who gave currency to such an hypothesis. And we shall readily believe that, if advanced, it would find easy and sincere credence, when we recollect how many similar delusions have obtained vogue in modern times far more favourable to historical accuracy—how much false colouring has been attached by the political feeling of recent days to matters of ancient history, such as the Saxon Wittenamote, the Great Charter, the rise and growth of the English House of Commons, or even the Poor Law of Elizabeth.

When we read the division of lands really proposed by king Agis, it is found to be a very close copy of the original division.

¹ Ephorus, *Hecataeus*, cap. 2—3, with the note of Boissacot, p. 151; *the Cyrene*, cap. 2; *Diogenes*, l. p. 141.

² Ephorus also (quoted) has some sayings of Diogenes, according with those of Diogenes, (l. c.); compare *the text*, Agis, p. 2.

³ Perhaps believed that Lykurgos had introduced equality of landed property, not only in the district of Sparta and throughout Laconia; his opinion is probably borrowed from those same writers, of the third century before the Christian era, who in describing the great reforms here, the last historical authentic authorities, Lykurgos

his larger surroundings, Plata, Koroia, Epakros, Kallithea, and perhaps the Kræon polity in the old Laconianæ, the main features of the two being in the eyes of different inequality of property in Sparta, great inequality of property in Plata, among which differences, (l. c.), p. 41—42.

⁴ The remark of Ephorus enlarges the difference of opinion, of the writer, as mentioned, with those living in the third century before the Christian era. The former comment, *Sparta* and *Epakros* institutions, because they did not consider equality of landed property as a feature in old Sparta.

assigned to Lykurgus. He parcels the lands bounded by the four limits of Peloponnes, Sellasia, Males, and Targeton, into 4000 lots, one to every Spartan; and the lands beyond these limits into 18,000 lots, one to each Perianthus; and he proposes to constitute in Sparta fifteen *Phaidria* or public name-titles, some including 400 individuals, others 200,—thus providing a place for each of his 4800 Spartans. With respect to the division originally assigned to Lykurgus, different accounts were given. Some considered it to have set out 8000 lots for the district of Sparta, and 38,000 for the rest of Laconia;¹ others affirmed that 6000 lots had been given by Lykurgus, and 3000 added afterwards by king Polypheus; a third tale was, that Lykurgus had assigned 4000 lots, and king Polypheus as many more. This last scheme is much the same as what was really proposed by Agis.

In the preceding argument respecting the redivision of land assigned to Lykurgus, I have taken that version as it is described by Plutarch. But there has been a tendency, in some able modern writers, while admitting the general fact of such redivision, to reject the account given by Plutarch in some of its main circumstances. That, for instance, which is the capital feature in Plutarch's narrative, and which gives soul and meaning to his picture of the lawgiver—the equality of partition—is now rejected by many as incorrect, and it is supposed that Lykurgus made some new agrarian regulations tending towards a general equality of landed property, but not an entirely new partition; that he may have resumed from the wealthy men lands which they had unjustly taken from the conquered Achæans, and thus provided allotments both for the poorer citizens and for the subject Laconians. Such is the opinion of Dr. Thirlwall, who at the same time admits that the exact proportion of the Lykurgæan distribution can hardly be ascertained.²

Opinion that Lykurgus proposed some agrarian reform, but not an entire re-partition. Doubtful and unprovable.

¹ *Responsum* Polypheus, *see* Plutarch, *Lycurgus*, c. 8; *Memories*, v. 1; *Athenæ*, iv. p. 141; *Strabo*, *Libani*, *et al.* *ibid.* 147.

C. F. Hermann, on the contrary, assumes that the equal partition of Laconia into lots *πολλοὶς* and *καταστάσις* as "an essential condition" upon which the Laconians of the whole Lykurgæan system (Laconians and

sent the gratifying spectacle of a paternal inheritance recently distributed, with the brotherhood contested, naked and dying. Rank is the picture with which "*archibereux Quirion*" shares the dream of the patriotic Agis, whispering the treacherous message that the gods have promised his success in a similar attempt, and thus seducing him into that fatal revolutionary course, which is destined to bring himself, his wife and his aged mother in the danger and the hangman's rope.¹

That the golden dream just described was dreamt by some Spartan patriots is certain, because it stands recorded in Finlay's; that it was not dreamt by the authors of antiques preceding Agis, I have already endeavored to show; that the common feelings, of sickness of the present and yearning for a better future under the colours of a restored past, which filled the soul of this king and his brother reformers—combined with the breeding tendency between rich and poor which really was inherent in the Lycurgean discipline—were amply sufficient to begot such a dream and to prepare for it a place among the great deeds of the old lawgiver, so much concealed and so little known, —this too I hold to be unquestionable. Had there been any evidence that Lycurgus had interfered with private property, to the limited extent which Dr. Thirlwall and other able critics imagine—that he had resumed certain lands unjustly taken by the rich from the Achæans—I should have been glad to record it; but finding no such evidence, I cannot think it necessary to presume the fact simply in order to account for the story in Finlay's.²

¹ Finlay, Agis, c. 12-22.

² I need not make allusion to M. Kappeler's observation, that the general conclusion which I have endeavored to establish regarding the alleged Lycurgean restriction of property, applies to the immediately preceding chapter, by Thomas Larnach, *Class. Rev.* 15, p. 121.

The evidence, with perfect truth, that at the time when the first edition of these volumes was published, I was ignorant of the fact that Lycurgus and Kleôn had been called in question the equity of the Lycurgean regulations, is reported by Finlay's Finlay, the fact was first brought to my knowledge by the notice of these

two volumes in the *Waldenburger Allgemeine*, 1844, No. 21, p. 2, 3, 4.

Since the first edition I have read the history of Lycurgus (Dr. Kappeler's *Monographien* in *den Historischen und Literarischen Anzeiger*, 1844, p. 121) wherein the restriction asserted in Lycurgus is mentioned. He is especially the origin of the tale as a portion of history, in the social and political feelings present in the story of Agis (Agis and Kleôn) and the evidence also that it is in accordance with these and legitimate. That I have prepared of the arguments which he brings to support it are mentioned with those of the story regarding the social and political

The various items in that story all hang together, and must be understood as forming parts of the same comprehensive fact, or comprehensive 'history.' The fixed total of 8000 Spartans and 80,000 Lacedæmon lots; the equality between them, and the rest according from each, represented by a given quantity of mules and dry produce,—all these particulars are alike true or alike unverified. Upon the various numbers here given, many authors have raised calculations as to the population and produce of Lacedæmon, which appear to me destitute of any trustworthy foundation. Those who accept the history, that Lykurgus constituted the above-mentioned numbers both of citizens and of lots of land, and that he contemplated the maintenance of both numbers in inalienable property, are perplexed to assign the means whereby this adjustment was kept undisturbed. Nor are they much assisted in the solution of this embarrassing problem by the statement of Ptolemy, who tells us that the number remained fixed of itself, and that the succession ran on from father to son without either consolidation or multiplication of parcels, down to the period when foreign wealth flowed into Sparta, as a consequence of the successful conclusion of the Peloponnesian war. Shortly after that period (he tells us) a citizen named Epitadeus became spher—a ruffian and malignant man, who, having had a quarrel with his son, and wishing to cast him from the state's succession, introduced and obtained sanction to a new ^{story about the laws} Rheter, whereby power was granted to every father Epitadeus of a family either to make over during life, or to bequeath

constitution of Sparta, which I think either untrue or unverified. However, he tells us that Lykurgus made the constitution of the Spartan lots of land—which I believe to be just as little correct as their number.

Enough to the chance that I have seen has to be referred every reader's eye. We believe that Lykurgus either knew some something, nothing more than what is admitted, leading to neither equality of individual property.

Could anyone that this hypothesis. If we had earlier evidence, perhaps such facts might appear. But as the

evidence stands now, there is nothing clearer to show it. But are we not to see in the fragments of the laws, simply in order to make out that the Lykurgian system is only an imaginary one, and not a fact?

¹ Ptolemy (Chap. 2. §. 12) remarks that the number of the Spartans never exceeded 8000 citizens and 80,000 lots, while the number of citizens was in point of fact less than 8000. He therefore seems to regard the number of citizens as fixed at 8000, but the latter number larger supplied by allies, and most probably.

after death, his house and his estate to any one whom he chose.¹ But it is plain that this story (whatever be the truth about the family quarrel of Epitadeus) does not help us out of the difficulty. From the time of Lykurgus to that of this disinheritng epoch, more than four centuries must be reckoned : how had there been real causes at work sufficient to maintain inviolate the Herakleian number of lots and families during this long period, we see no reason why his new law, simply permissive and nothing more, should have overthrown it. We are not told by Plutarch what was the law of succession prior to Epitadeus. If the whole estate went by law to one son in the family, what became of the other sons, to whom inheritance acquisition in any shape was regulated as well as interdicted? If, on the other hand, the estate was divided between the sons equally (as it was by the law of succession at Athens), how can we defend the maintenance of an unchanged aggregate number of parcels?

Dr. Thirlwall, after having admitted a modified interference with private property by Lykurgus, so as to exact from the wealthy a certain sacrifice in order to create lots for the poor, and to bring about something approaching to equal-producing lots for all, observes :—"The average amount of the rent (paid by the cultivating Helots from each lot) seems to have been no more than was required for the frugal maintenance of a family with six persons. The right of transfer was as strictly confined as that of enjoyment: the patrimony was inalienable, inalienable, and descended to the eldest son; in default of a male heir, to the eldest daughter. The object seems to have been, after the number of the allotments became fixed, that each should be constantly represented by one head of a household. But the nature of the means employed for this end is one of the most obscure points of the Spartan system. . . . In the better times of the commonwealth, this seems to have been principally effected by adoptions and marriages with heiresses, which provided for the marriages of younger sons in families too numerous to be supported on their own hereditary property. It was then probably seldom necessary for the state to interfere, in order to direct the disposition of an estate, or the father of a rich

¹ Plutarch, *Agis*, c. 4.

heirloom, to a proper choice. But as all adoption required the sanction of the king, and they had also the disposal of the hand of orphan heiresses, there can be little doubt that the magistrate had the power of interposing on such occasions, even in opposition to the wishes of individuals, to relieve poverty and check the accumulation of wealth." (*Hist. Gr. ch. 5, vol. 1, p. 203*.)

I cannot concur in the view which Dr. Thirlwall here takes of the state of property, or the arrangements respecting its transmission, in ancient Sparta. Neither the equal modesty of possession which he supposes, nor the precautions for perpetuating it, can be shown to have ever existed among the warriors of Lacedæmon.

Landed property was of great consequence to the Spartans.

Our earliest information indicates the existence of rich men at Sparta: the story of king Aristos and Aglaja, in Herodotus, exhibits to us the latter as a man who cannot be supposed to have had only just "enough to maintain six persons frugally"—while his beautiful wife, whom Aristos coveted and entrapped from him, is expressly described as the daughter of opulent parents. Spartan and Boian the Tillyklads are designated as belonging to a distinguished race, and among the wealthiest men in Sparta.¹ Demosthenes was the only king of Sparta, in the days of Herodotus, who had ever gained a chariot victory in the Olympic games; but we know by the case of Lichas during the Peloponnesian war, Evagoras, and others, that private Spartans were equally successful;² and for one Spartan who won the prize, there must of course have been many who bred their horses and started their chariots unsuccessfully. It need hardly be remarked that chariot-competition at Olympia was one of the most significant evidences of a wealthy horse: nor were there wanting Spartans who kept horses and dogs without any exclusive view to the games. We know from Xenophon, that at the time of the battle of Leuctra, "the very rich Spartans" provided the horses to be mounted for the state-contrary.³ These and other proofs, of the existence of rich men at Sparta, are inconsistent with the idea of a body of citizens each possessing what was about enough for the frugal maintenance of six persons and no more.

1. Based on the following information, write a letter to the editor of the newspaper.

THEORY OF THE EARTH

3. Knappe, Hellen, vol. 4, 11; Knappe, das Meer, Kap. 7, 6; Mischke op. cit. Knappe, 19, 20, 24; Archaia, Poik. 3, 4, 5.

As we do not find that such was in practice the state of property in the Spartan community, so neither can we discover that the lawgiver ever tried either to make or to keep it so.

What he did was to impose a rigorous public discipline, with simple clothing and food, inconstant abstinence upon the rich and the poor (this was his special present to Greece, according to Theophrastus,¹ and his great point of contact with democracy, according to Aristotle); but he took no pains either to restrain the enrichment of the former, or to prevent the impoverishment of the latter. He meddled little with the distribution of property, and such neglect is one of the capital deficiencies for which Aristotle censures him. That philosopher tells us, indeed, that the Spartan law had made it dishonourable (he does not say, presumptuously forbidden) to buy or sell landed property, but that there was the fullest liberty both of donation and bequest: and the same results (he justly observes) ensued from the practice tolerated as would have ensued from the practice discontinued—since it was easy to disguise a real sale under an ostensible donation. He notices pointedly the tendency of property at Sparta to concentrate itself in few hands, unopposed by any legal hindrance: the fathers married their daughters to whomsoever they chose, and gave dowries according to their own discretion, generally very large: the rich families moreover intermarried among one another habitually and without restriction.

Now all these are indicated by Aristotle as cases in which the law might have interfered, and ought to have interfered, but did not—for the great purpose of disseminating the benefits of landed property as much as possible among the mass of the citizens. Again, he tells us that the law encouraged the multiplication of progeny, and granted exemptions to rich citizens as had three or four children—but took no thought how the numerous families of poorer citizens were to live, or to maintain their qualification at the public tables, most of the lands of the state being in the hands of the rich.² His censure, and condemnation of that law, which made the backbone of the

¹ Theophr. l. 8; Aristotle, *Polit.* iv. 1. ² Aristotle, *Polit.* ii. 2, 11–14; v. 4, 4; viii. 1, 8.

Spartan citizen dependent upon his continuing to furnish his quota to the public table—here been already adverted to; as well as the pointed love of money¹ which he notes in the Spartan character, and which must have tended continually to keep together the richer families among themselves: while amongst a community where industry was unknown, no poor citizen could ever become rich.

If we duly weigh these criticisms, we shall see that equality of possessions neither existed in fact, nor even entered into the scheme and mechanism of the lawgiver at Sparta. And the picture which Dr. Thirlwall has drawn of a body of citizens each possessing a lot of land about adequate to the frugal maintenance of six persons—of adoptions and marriages of heires arranged with a deliberate view of providing for the younger

Abstract: The purpose of this study was to determine if there were differences in the prevalence of dental caries between two groups of children who had been exposed to fluoride toothpaste and those who had not. A total of 100 children aged 6-12 years were recruited from two primary schools in London. The first group had been exposed to fluoride toothpaste for at least 12 months prior to the study. The second group had never used fluoride toothpaste. All children underwent a clinical examination by a qualified dentist. The results showed that the prevalence of dental caries was significantly lower in the group exposed to fluoride toothpaste compared to the control group.

The project will be more than 400 years if the original drawings for the tower in Lyons are more than 200 years old. But the date will be determined by data from the excavation work.

If there's a good book for really a start, it is something about women's participation in the history of mankind and Indians we cannot be Indians if we could at least to be understood that there is something about the history of mankind.

epidemic in the tropics, and not much against it. But an overwhelming Moore and others, it will be seen. And not only to those very slender evidence in the tropics—there is a distinct balance of evidence against it.

Having been convinced the individual transmission of AIDS is rare even at a level of 100,000 and 10,000 per

from equality of landed property—the citizens as spontaneously disposed to uphold this equality by giving to unpropitiated men the benefit of adoptions and heiress-marriages—and the magistrate as interfering to enforce this latter purpose, even in cases where the citizens were themselves unwilling. All our evidence exhibits to us both decided inequality of possessions and inclinations on the part of rich men, the reverse of those which Dr. Thirlwall indicates; nor will the process of interference which he ascribes to the magistrate be found sustained by the chapter of Herodotus on which he seems to rest them.¹

To conceive correctly, then, the Lycurgus system, as far as clearly and want of evidence will permit, it seems to me that there are two current misconceptions which it is essential to

¹ Thirl. vi. 77, in commenting the celebrated sentence of the Lycurgus chapter, "the Spartans think every man a citizen, and therefore no man is exempted from the common laws, so as not to be a truly Spartan citizen, but the Spartans are not so," writes, "the Spartans are not so, because they are not all citizens, and therefore no man is exempted from the common laws, so as not to be a truly Spartan citizen, but the Spartans are not so."

Dr. Thirlwall then continues, "the Spartans are not so, because they are not all citizens, and therefore no man is exempted from the common laws, so as not to be a truly Spartan citizen, but the Spartans are not so." Dr. Thirlwall then continues, "the Spartans are not so, because they are not all citizens, and therefore no man is exempted from the common laws, so as not to be a truly Spartan citizen, but the Spartans are not so."

Dr. Thirlwall then continues, "the Spartans are not so, because they are not all citizens, and therefore no man is exempted from the common laws, so as not to be a truly Spartan citizen, but the Spartans are not so." Dr. Thirlwall then continues, "the Spartans are not so, because they are not all citizens, and therefore no man is exempted from the common laws, so as not to be a truly Spartan citizen, but the Spartans are not so."

Dr. Thirlwall then continues, "the Spartans are not so, because they are not all citizens, and therefore no man is exempted from the common laws, so as not to be a truly Spartan citizen, but the Spartans are not so." Dr. Thirlwall then continues, "the Spartans are not so, because they are not all citizens, and therefore no man is exempted from the common laws, so as not to be a truly Spartan citizen, but the Spartans are not so."

Dr. Thirlwall then continues, "the Spartans are not so, because they are not all citizens, and therefore no man is exempted from the common laws, so as not to be a truly Spartan citizen, but the Spartans are not so." Dr. Thirlwall then continues, "the Spartans are not so, because they are not all citizens, and therefore no man is exempted from the common laws, so as not to be a truly Spartan citizen, but the Spartans are not so."

disorder. One of these is, that the system included a repartition of landed property, upon principles of exact or approximate equality (distinct from that appropriation which belonged to the Dorians conquest and settlement), and provisions for perpetuating the number of distinct and equal lots. The other is, that it was first brought to bear when the Spartans were masters of all Laonia. The illusion created by the old legend—which depicts Laonia as all one country, and all conquered at one stroke—yet survive after the legend itself has been set aside as bad evidence: we cannot conceive Sparta as subsisting by itself without domination over Laonia, nor Amyklia, Pharis and Geranos, as really and truly independent of Sparta. Yet, if these towns were independent in the time of Lykurgos, much more confidently may the same independence be affirmed of the portions of Laonia which lie lower than Amyklia down the valley of the Eurotas, as well as of the eastern coast, which Herodotus expressly states to have been originally associated with Argos.

Discarding then these two suppositions, we have to consider the Lykurgan system as brought to bear upon Sparta and its immediate circumjacent district, apart from the rest of Laonia, and as not modelling systematically with the partition of property, whatever that may have been, which the Dorians conquered established at their original settlement. Lykurgos does not try to make the poor rich, nor the rich poor; but he imposes upon both the same subjugating drill—the same habits of life, gentlemanlike silence, and unshaken strength—the same food, clothing, labours, privations, and toils, penance, and subordination. It is a lesson instructive at least, however unsatisfactory, to political students—that with all this equality of dealing, he was in creating a community in whom not barely the love of pre-eminence, but even the love of money, stood powerfully and specially developed.¹

How far the power of the primitive Sparta extended we have no means of determining; but its limits down the valley of the Eurotas were certainly narrow, inasmuch as it did not reach so far

² *Alcibiades* Plutarchus, B. 4, c. 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

in Amyclia. Nor can we tell what principles the Dorian conquests may have followed in the original allotment of lands within the limits of that position. Equal apportionment is not probable, because all the individuals of a conquering band are seldom regarded as possessing equal claims; but whatever the original apportionment may have been, it remained without any general or avowed disturbance until the days of Agis III. and Kleomenes III. Here then we have the primitive Sparta, including Dorian warriors with their Helot subjects, but no Perioeci. And it is upon these Spartans separately, perhaps after the period of aggrivated disorder and lawlessness noticed by Herodotus and Thucydides, that the painful but invigorating discipline above sketched must have been originally brought to bear.

The gradual conquest of Laconia, with the acquisition of additional lands and new Helots, and the formation of the order of Perioeci, both of which were a consequence of it—is to be considered as posterior to the introduction of the *Ligeia* system at Sparta, and as resulting partly from the increased force which that system imparted. The career of conquest went on, beginning from Telekles, for nearly three centuries—with some interruptions indeed, and in the case of the Messenian war, with a desperate and even protracted struggle—so that in the time of Thucydides, and for some time previously, the Spartans possessed two-fifths of Peloponnesus. And this series of new acquisitions and victories disguised the really weak point of the Spartan system, by rendering it possible either to plant the poorer citizens as Perioeci in a conquered township, or to supply them with lots of land, of which they could receive the produce without leaving the clip—so that their numbers and their military strength were prevented from declining. It is even affirmed by Aristotle, that during these early times they augmented the number of their citizens by fresh admissions, which of course implies the acquisition of additional lots of land.¹ But successful war (he uses an expression substantially borrowed from the same philosopher) was necessary to their salvation: the establishment

among the cities of the Peloponnese as one of the hundred ;¹ the distinction between a dependent city and a village not being very strictly drawn. The festival of the Hyacinthia,² celebrated at the great temple of the Amyclian Apollo, was among the most solemn and venerated in the Spartan calendar.

It was in the time of Alcarnauds the son of Telekles that the Spartans conquered Helos, a maritime town on the left bank of the Saronic, and reduced its inhabitants to bondage—from whose name,³ according to various authors, the general title *Helots*, belonging to all the south of Laconia, was derived. But of the conquest of the other towns of Laconia—Oreosium, Akris, Therapne, &c.—or of the eastern land on the coast of the Argolic Gulf, including Brasie and Epidaurus Lirisia, or the island of Kythira, all which at one time belonged to the Argolian confederacy, we have no account.

Scanty as our information is, it just enables us to make out a progressive increase of force and dominion on the part of the Spartans, resulting from the organisation of Lykurgos. Of this progress a further manifestation is found, besides the conquest of the Achæans in the south by Telekles and Alcarnauds, in their successful opposition to the great power of Pisidius the Argolian, related in a previous chapter. We now approach the long and arduous efforts by which they accomplished the subjugation of their brethren the Messenian Dorians.

³ It is to be true (as Pausanias states) that the Argolians sold Helos to the

Spartans; but most probably have been given by war, perhaps from Epidaurus (Lirisia), or Pisidius, who then were formed part of the Argolian confederacy.

CHAPTER VII.

FIRST AND SECOND MESSENIAN WARS.

THAT there were two long contests between the Lacedæmonians and Messenians, and that, in both, the former were completely victorious, is a fact sufficiently attested. And if we could trust the statements in Pausanias—our chief and almost only authority on the subject—we should be in a situation to reconstruct the history of both these wars in considerable detail. But unfortunately the incidents narrated in that writer have been gathered from sources which are, even by his own admission, unworthy of credit—from Rhianus, the poet of Erida in Eritia, who had composed an epic poem on Aristomenes and the second Messenian war, about B.C. 320—and from Myron of Priene, a prose author whose date is not exactly known, but belonging to the Alexandrine age, and not earlier than the third century before the Christian æra. From Rhianus we have no right to expect trustworthy information, while the accuracy of Myron is much depreciated by Pausanias himself—on some points even too much, as will presently be shown. But apart from the mental habits either of the prose writer or the poet, it does not seem that any good means of knowledge were open to either of them, except the poems of Tyrtæus, which we are by no means sure that they ever consulted. The account of the two wars, extracted from these two authors by Pausanias, is a string of ballads, several of them indeed highly poetical, but destitute of historical substance or sufficiency; and O. Müller has justly observed, that “absolutely no reason is given in them for the subjection of Messenians.”¹ They are accounts

Authority
for the his-
tory of the
Messenian
wars.

¹ History of the Romans, i. 1, 16. It seems that Rhianus had from a fragment of the last account given a history of the Messenian wars both, constituting the debate between

unworthy of being transcribed in detail into the pages of general history, nor can we pretend to do anything more than verify a few leading facts of the war.

The poet Tyrtæus was himself engaged on the side of the Spartans in the second war, and it is from him that we learn the few indisputable facts respecting both the first and the second. If the Messenians had never been re-established in Peloponnesus, we should probably never have heard any farther details respecting these early contests. That re-establishment, together with the first foundation of the city called Messenæ on Mount Ithakæ, was among the capital wounds inflicted on Sparta by Epaminondas, in the year B.C. 369—between 300 and 350 years after the conclusion of the second Messenian war. The descendants of the old Messenians, who had remained for so long a period without any fixed position in Greece, were incorporated in the new city, together with various Helots and miscellaneous settlers who had no claim to a similar genealogy. The gods and heroes of the Messenian race were reverentially invoked at this great ceremony, especially the great hero Aristomenes;¹ and the sight of Mount Ithakæ, the ark of the newly established citizens, the hatred and apprehension of Sparta, operating as a powerful stimulus to the creation and multiplication of what are called traditions, sufficed to expand the few facts known respecting the struggles of

chiefly

the time
after the
foundation
of Messenæ
by Epaminondas.

the old Messenians into a variety of details. In almost all these stories we discover a colouring unknown to Sparta, contrasting forcibly with the account given by Isocrates in his *Discourse* called *Archidamæus*, wherein we read the view which a Spartan might take of the ancient conquests of his forefathers. But a clear proof that these Messenian stories had no real basis of truth, is shown in the contradictory statements respecting the principal hero Aristomenes; for some place him in the first, others in the second, of the two wars. Diodorus and Myrtæus both placed him in the first; Ephorus in the second. Though

¹ Aristomenes and Aristomachus. Very probably it was taken from Ephorus, though this we do not know.

² For the statements of Pausanias respecting Myrtæus and Archidamæus, see in. 4. Besides Myrtæus and Ephorus, however, he seems to have treated

and statements from contemporary Messenians and Lacedæmonians; at least on some occasions he states and contradicts the two contradictory stories (ii. 4. 1. 13. 5. 17).

³ Pausan. iv. 11. 1-3; Diodor. vi. 11.

Tyrone gives it as his opinion that the account of the latter is preferable, and that Aristomenes really belongs to the second Messenian war; it appears to me that the one statement is as much worthy of belief as the other, and that there is no sufficient evidence for deciding between them—a conclusion which is substantially the same with that of Wooding, who thinks that there were two persons named Aristomenes, one in the first and one in the second war.¹ This inevitable confusion respecting the greatest name in Messenian antiquity, shows how little any genuine stream of tradition can have been recognised.

Pausanias states the first Messenian war as beginning in B.C. 743 and lasting till B.C. 734—the second as beginning in B.C. 685 and lasting till B.C. 668. Neither of these dates rests upon any assignable positive authority; but the time assigned to the first war seems probable, while that of the second is apparently too early. Tyrone authenticates both the duration of the first war, twenty years, and the valiant services rendered in it by the Spartan king Theopompos.² He says moreover

Dates of
the first
war—B.C.
743-734.

¹ See *Winkler, Pragen, &c.* viii. vol. iv. p. 50: in his summary of Messenian events (p. 57) he suggests it as a matter on which others differed, whether Aristomenes belonged to the first or second war. *Classical Antiquary*, (1861) p. 103 places him in the first, the most ancient of writers, by representing him as having killed Theopompos.

² *Paralipomena* (ed. Elmsl. &c.) i. 1.
—*Classical Antiquary*, compares in Messenian matters Sparta with India, *Thucydides*, after *Pausanias*, gives other facts.

Under this description of human warfare peace can be shown to be contrary to some sufficient evidence. I consider it only as necessary to a conclusion, that the difficulty is to be solved.

Tyrone is supported in his manner of giving judgment, and also in his story (13/4 to 14/5) given by *Winkler* (ed. *Pragen*, &c. ii. 103) *Classical Antiquary*, i. 1, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

said about Tyrone: he says that the Messenians suffered that their hero Aristomenes had killed the Spartan king Theopompos, whereas the Lacedæmonians told that he had only wounded the king. According to both accounts, then, it would appear that Aristomenes belonged to the first Messenian war, not to the second.

² *Tyrone, Pragen, &c.* i. 13/4. But Tyrone might not to be understood to affirm directly for Pausanias, *Mr. Elmsl.* and *Winkler* all think that Theopompos never put a blow to the war: his language might mean with the exception of Theopompos had been slain in the war—On the Theopompos therefore always slain.

For we might be authorized by saying—"It was through Pausanias that the Spartans were converted and humbled, so it was through Lord Nelson that the French fleet was destroyed in the last war," though both of them perished in the same campaign.

Tyrone therefore does not contradict the assertion, that Theopompos was slain by Aristomenes, nor can he

(speaking during the second war), "the fathers of our fathers conquered Messini"; thus loosely indicating the relative date of the war.

The Spartans (as we learn from Isokrates, whose words date from a time when the city of Messini was only a recent foundation) professed to have seized the territory, partly in revenge for the impiety of the Messenians in killing their own king the Herakleid Kroepheutis, whose relative had appealed to Sparta for aid—partly by sentence of the Delphic oracle. Such were the causes which had induced them first to invade the country, and they had conquered it after a struggle of twenty years.¹ The Lacedæmonian explanations, as given in Pausanias, seem for the most part to be counter-statements arranged after the time when the Messenian version, evidently the interesting and popular account, had become circulated.

It has already been stated that the Lacedæmonians and Messenians had a joint border temple and sacrifice in honour of Artemis Limnatis, dating from the earliest times of their establishment in Peloponnesus. The site of this temple near the upper course of the river Neda, in the mountainous territory north-east of Kalamata, but west of the highest ridge of Taygetus, has recently been exactly verified—and it seems in those early days to have belonged to Sparta. That the quarrel began at one of these border sacrifices was the statement of both parties, Lacedæmonians and Messenians. According to the latter, the Lacedæmonian king Tisikles had a vision for the Messenians, by dressing up some youthful Spartans as virgins and giving them figgers; whereupon a contest ensued, in which the Spartans were worsted and Tisikles slain. That Tisikles was slain at the temple by the Messenians was also the account of the Spartans; but they affirmed that he was slain in attempting to defend some young Lacedæmonian maidens, who were sacrificing at the temple, against outrageous violence from the Messenian youth.²

¹ Isokrates did not live during the first Messenian war, which is the purpose for which Pausanias quotes him (p. 6).

² Isokrates *Antidosis*, B. v. p. 281—282.

³ Isokrates (p. 3, 277) gives a similar account of the events and contains evidence of the Messenian origin of the temple of Artemis Limnatis. His version, unfortunately agreeing with that of the Lacedæmonians, seems to be borrowed from Isokrates, the

In spite of the death of this king, however, the war did not actually break out until some little time after, when Alkibiades and Theopompus were kings at Sparta, and Antiochus and Andreolus, sons of Philotas, kings of Macedonia. The immediate cause of it was, a private altercation between the Macedonian Polydorchus (viceroy at the fourth Olympiad, B.C. 384) and the Spartan Euphrates. Polydorchus having been grossly injured by Euphrates, and his claim for redress having been rejected at Sparta, took revenge by aggressions upon other Lacedæmonians. The Macedonians refused to give him up; though one of the two kings, Andreolus, strongly insisted upon this. Polydorchus, and Antiochus and his son, were against him, and insisted that Antiochus was earnestly against the war.

the opposite sense of the majority and of his brother Antiochus, that a treaty arose, and he was slain. The Lacedæmonians, now resolving upon war, struck the first blow without any formal declaration, by surprising the border town of Amphala, and putting its defenders to the sword. They further overran the Macedonian territory, and attacked some other towns, but without success. Euphrates, who had now succeeded his father Antiochus as king of Macedonia, summoned the forces of the country and moved on to the war against them with courage and boldness. For

[illegible]

I now tell that Colonel Tucker (Pittsburgh, Pa.) reports that the investigations conducted by President Nixon in 1971 proving that the temple of Jonestown, Guyana was almost near the spot where they were killed. The authorities were much with me on such a point, though the arguments which he have supplies do not seem to me convincing.

ruined to the ground: the rest of the country being speedily reconquered, each of the inhabitants as did not flee either to Aradus or to Rhodes were reduced to complete starvation.

Such is the abridgement of what Pausanias¹ gives us the narrative of the first Messenian war. Most of his details bear the evident stamp of mere late romance; and it will easily be seen that the sequence of events presents no plausible explanation of that which is really indubitable—the result. The twenty years' war and the final abandonment of Ithaca is attested by Tyrtæus beyond all doubt, as well as the harsh treatment of the conquered—"like men were down by heavy barbed spears," says the Spartan poet, "they were compelled to make over to their masters an entire half of the produce of their fields, and to come in the park of war to Sparta, themselves and their wives, as menials at the houses of the kings and principal persons". The result of their destruction, against a poem so oppressive, goes by the name of the second Messenian war.

Had we possessed the account of the first Messenian war as given by Myrtilus and Diakorus, it would evidently have been very different from the above, because they included Aristomenes in it, and to him the leading parts would be assigned. As the narrative now stands in Pausanias, we are not introduced to that great Messenian hero—the Achilles of the Epic of Rhæmus²—until the second war, in which his gigantic proportions stand prominently forward. He is the great champion of his country in the three battles which are represented as taking place during this war: the first, with indefinite result, at Dæra; the second, a signal victory on the part of the Messenians, at the Bear's Grave; the third, an equally signal defeat, in conse-

¹ See Pausan. li. 5-24.

² An allusion to Aristomenes is to be found in Messenian legends on the authorities where Pausanias has followed in his history of the Messenian Wars. II. 11. 1. 1. 1. 1. 1.

³ It would evidently be to the above, p. 340 to suppose that in the history of the Messenian wars, as Pausanias has them before us, we possess the true history of these events.

⁴ Tyrtæus, Fragment 1, 2 (Schwabe).

⁵ P. Herodotus mentions the treatment of the Messenians after the first war as well as the capture of the city. It became after the second (Cleisthenes for Cleon, Cleon for Cleon, etc.) a negotiation which the Messenians words of Tyrtæus render indubitable.

⁶ This is the express comparison introduced by Pausanias, li. 1, 1, 1.

the conduct of Aristomachus, advised by the prophet Theokles, they maintained this strong position for eleven years. At length they were compelled to abandon it. Yet as in the case of Iphiklos the final defeating circumstances are represented to have been, not any superiority of bravery or organisation on the part of the Lacedæmonians, but treacherous betrayal and stratagem, according to the fatal decree of the gods. Unable to maintain Elia longer, Aristomachus, with his sons and a body of his countrymen, forced his way through the assailants and quitted the country—some of them retreating to Aronilla and Elia, and finally migrating to Rhodus. He himself passed the remainder of his days in Rhodes, where he dwelt along with his son-in-law Damagitos, the ancestor of the noble Rhodian family called the Diagorids, celebrated for its numerous Olympic victories.

Such are the main features of what Pausanias calls¹ the second Messenian war, or of what ought rather to be called the Aristomachian of the post Iliadic. That after the foundation of Herakleia, and the recall of the exiles by Epaminondas, further and arduous were found for many tales respecting the prowess of the ancient hero whom they invoked² in their Eliaian—also well calculated to interest the fancy, to vivify the patriotism, and to inflame the anti-Spartan antipathies, of the new inhabitants—there can be little doubt. And the Messenian members of that day may well have sung in their public provincial sacrifices,³ how "Aristomachus pressed the flying Lacedæmonians down to the mid-plain of Staphykidra and up to the very summit of the mountain". From such stories (traditions they might not to be denominated) Eliaians may doubtless have borrowed; but if proof were wanting to show how completely he looked at his materials

¹ This narrative in Pausanias, ix. 2, 1-2.

² According to one tradition, nothing in Messenia, the Spartans supposed that they had killed Aristomachus in war against Herakles—of what period we do not know (Pausanias, ix. 2, 1).

³ Paus. ix. 2, 1. Pausanias also, ix. 2, 1, tells of a certain Lacedæmonian Aristomachus who was killed in the war. The justice will be noticed in his time.

Compare also Pausanias, ix. 2, 1, 2, 3, 4.

¹ Pausanias (ix. 2, 1) says that the story is told in the 10th book of the Iliad.

² He is called either Aristomachus or Aristomachus.

According to one story, the Spartans were said to have got possession of the person of Aristomachus and killed him; they found in him a body found (Pausanias, ix. 2, 1).

Regarding the language of Tyrtæus, we can say nothing. But that he was a schoolmaster (if we are constrained to employ an unsuitable term) is highly probable—for in that day, minstrels who composed and sang poems were the only persons from whom the youth received any mental training. Moreover his sway over the youthful mind is particularly noted in the compliment paid to him in after-days by king Leonidas—"Tyrtæus was as adept in taming the souls of youth."¹ We see enough to satisfy us that he was by birth a stranger, though he became a Spartan by the subsequent recompense of citizenship conferred upon him—thus he was sent through the Delphian oracle—that he was an impressive and efficacious minstrel—and that he had moreover sagacity enough to employ his talents for present purposes and diverse ends; being able not merely to maintain the languishing courage of the buffed warrior, but also to soothe the discontent of the restive. That his strains, which long maintained undiminished popularity among the Spartans,² contributed much to determine the ultimate issue of this war, there is no reason to doubt; nor is his name the only one to attest the susceptibility of the Spartan mind in that day towards music and *musical* poetry. The first establishment of the Karneian ^{festival} ~~festival~~ ^{games of the} festival, with its musical competition at Sparta, falls ^{Spartan} during the period assigned by Pausanias to the second Messenian war: the Lesbian harper Terpander, who gained the first recorded prize at this solemnity, is affirmed to have been sent for by the Spartans pursuant to a mandate from the Delphian oracle, and to have been the means of appeasing a rebellion. In like manner, the Kreusan Thaletas was invited thither during a pestilence, which his art (as it is pretended) contributed to heal (about 690 B.C.); and Alkman, Krokiron, Polymnestes, and Sadesias, all foreigners by birth, found favourable reception, and acquired popularity by their music and poetry. With the exception of Sadesias, who is a little later, all these names fall in the same century as Tyrtæus, between 690 B.C.—610 B.C. The fashion which the Spartans ~~continued~~ continued for a long time to maintain is ascribed chiefly to the genius of Terpander.³

² *See Pausanias, On the Games*, pp. 1124,
³ *Pausanias—Prog.* vii. c. 12. *ibid.*, 1242, 1243.

The training in which a Spartan passed his life consisted of exercises warlike, social, and religious, blended together. While the individual, strengthened by gymnastic, went through his painful lessons of fatigue, endurance, and aggression, the citizens collectively were kept in the constant habit of simultaneous and regulated movement in the warlike march, in the religious dance, and in the social procession. Music and song, being constantly employed to direct the measure and keep alive the spirit of these multitudinous movements, became associated with the most powerful feelings which the habitual self-expression of a Spartan permitted to arise, and especially with those sympathies which are communicated at once to an assembled crowd. Indeed the musician and the singer were the only persons who ever addressed themselves to the feelings of a Lacedæmonian assembly. Moreover the simple music of that early day, though destitute of artistic merit and superseded afterwards by more complicated combinations, had nevertheless a pronounced ethical character.

Powerful
against
effect of
the old
Dorian
music.

It wrought much more powerfully on the impulses and resolutions of the hearers, though it tickled the ear less gratefully, than the scientific compositions of afterwards. Further, each particular style of music had its own appropriate mental effect—the Phrygian note imparted a wild and molting stimulus; the Dorian note created a settled and deliberate resolution, exempt alike from the dispiriting and from the impetuous sentiments.¹ What is called the Dorian note seems to be in reality the old native Greek note as contradistinguished from the Phrygian and Lydian—these being the three primitive notes, subdivided and combined only in later times, with which the first Grecian musicians became conversant. It probably acquired its title of Dorian from the musical celebrity of Sparta and Argos, during the seventh and sixth centuries before the Christian era; but it belonged as much to the Arcadians and Achæans as to the Spartans and Argives. And the marked ethical effects, produced both by the Dorian and

² See the treatise of Plutarch, *De Musica*, *capitulum* v. 17, in *lib. de Mus.* p. 144. (Paris, 1811, p. 144.)

The modified *Lydia* Dr. Martin *Pythag.* professes to be exactly the same as *Phrygia*, in fact of *Indication* *capitulum* 14, in *lib. de Mus.* p. 144. (Paris, 1811, p. 144.)

the Phrygian masks in ancient times, are facts perfectly well-attested, however difficult they may be to explain upon any general theory of masks.

That the impression produced by Tyrtaeus at Sparta, therefore, with his martial music, and emphatic exhortations to bravery in the field, as well as union at home, should have been very considerable, is perfectly consistent with the character both of the age and of the people; especially as he is represented to have appeared personally to the injunction of the Delphian oracle. From the scanty fragments remaining to us of his elegiac and anapaestic, however, we can satisfy ourselves only of two facts: first, that the war was long, obstinately contested, and dangerous to Sparta as well as to the Messenians; next, that other parties in Peloponnesus took part on both sides, especially on the side of the Messenians. So frequent and harassing were the aggressions of the

latter upon the Spartan territory, that a large portion of the border land was left uncultivated: scarcity ensued, and the proprietors of the deserted farms, driven to despair, pressed for a redistribution of the landed property in the state. It was in opposing these discontents that the poem of Tyrtaeus called *Ekeasta*, "legal order," was found signally beneficial.¹ It seems certain that a considerable portion of the Arcadians, together with the Pisians and the Triphylians, took part with the Messenians; there are also some statements numbering the Elians among their allies, but this appears not probable. The state of the case rather seems to have been, that the old quarrel between the Elians and the Pisians respecting the right to provide at the Olympic games, which had already burst forth during the preceding century in the reign of the Argive Phidias, still continued. Unwilling dependents of Elis, the Pisians and Triphylians took part with the subject Messenians, while the masters at Elis and Sparta made common cause, as they had before done against Phidias.²

Phaedon, king of Pisa, revolting from Elis, acted as commander of his countrymen in co-operation with the Messenians; and he is further noted for having, at the period of the 84th Olympiad (544 B.C.), marched a body of troops to Olympia, and there

years after the close of the first, and lasting, according to Pausanias, seven years; according to Plutarch, more than twenty years.)

Many of the Meneziæ who abandoned their country after this second conquest are said to have found shelter and sympathy among the Arcadians, who admitted them to a new home and gave them their daughters in marriage; and who moreover punished severely the treason of Aristocratis, king of Orchomenus, in abandoning the Meneziæ at the battle of the Trench. That perfidious leader was put to death, and his race exterminated, while the crime as well as the punishment was further commemorated by an inscription, which was to be seen near the altar of New Lykæa in Arcadia. The inscription doubtless

Aristocratis: Mr. Clinton (P. R. p. 185) is disappointed with Pausanias for this supposition, but he himself admits that the same thing, far in order to reconcile the addition with Pausanias, he introduces a supposition quite different from what is asserted by either of them; i. e. a false supposition by Plutarch and Pausanias together. This hypothesis of Mr. Clinton appears to me probable and reasonable. Aristocratis himself could hardly be supposed quite different, and I imagine that he was here related by an erroneous authority. See Mr. Clinton, P. R. ed. new, vol. xii. to the end.

Plutarch, De Superstitione, Vitæ p. 185; Pausanias, iv. 12, 13; v. 11, 12.

The date of the second Meneziæ war, and the interval between the second and the first, are points respecting which also there is irreconcilable discrepancy of statement; we can only think of some probability: see the preceding section, and compare to G. Müller (Parerga, i. 7, 12) and to Mr. Clinton, Just. Mart. vol. i. Appendix A. p. 105.

According to Plutarch, the second war lasted ten years, and this war there was an interval between the first and the second war of 20 years. Pausanias, in contrast an interval of eighty years; according to Plutarch an interval of thirty years. The last sentence in the passage of Pausanias, wherein that point, respecting the second war, occurs:—The leaders of our fathers conquered Aristocratis.

Mr. Clinton adheres very tenaciously to the view of Pausanias. He supposes that the real date is only six years before 369—363. And I agree with Clinton (Plutarchi de Superstitione Vitæ p. 185, 186, 187, 188, 189, 190, 191) in thinking that an interval of thirty-nine years is too short to suit the phrase of *longo* interval. According to the second view, Clinton, it might not be hard proper to say, "The leaders of our fathers started on the war between 379 and the peace of Arcadia"; we should rather say, "The leaders of our fathers started on the Arcadian war and the Seven Years' war". An age is marked by its nature and seems clearly marked—in three between Aristocratis and the first years of age.

According to I. de Bæze with G. Müller, against Mr. Clinton, I also agree with him in thinking that the first war which we possess of the date of the second Meneziæ war is the Meneziæ war, according to Pausanias; the last Meneziæ war, according to Plutarch, which Aristocratis entered, preceding the whole of the war, which would then be brought down much later than the date assigned by Pausanias, not now at the date of that named by Plutarch and Clinton; the exact year of the conquest, however, we have no means of knowing.

Clinton, in his observations on the fragments of the last Books of Eusebius, thinks that that historian placed the beginning of the second Meneziæ war in the 12th Olympiad (p. 105, 106, Eusebii, Justini, Edition, p. 105, 106).

the Spartans, but it is probable that different and successive allotments were made, according as the various portions of territory, both to the east and to the west of Tappeta, were conquered. Of all this we have no information.¹

Imperfectly as these two Messenian wars are known to us, we may see enough to warrant us in making two remarks. Both were tedious, protracted, and painful, showing how slowly the results of war were then gathered, and adding one additional illustration to prove how much the rapid and instantaneous conquest of Laconia and Messenia by the Dorians, which the Herakleid legend sets forth, is contradicted by historical analogy. Both were characterised by a similar defensive proceeding on the part of the Messenians—the occupation of a mountain difficult of access, and the fortification of it for the special purpose of resistance—Ithaki (which is said to have had already a small town upon it) in the first war, Eira in the second. It is reasonable to infer from hence that neither their principal town Sounion-Mira, nor any other town in their country, was strongly fortified so as to be calculated to stand a siege; that there were no walled towns among them analogous to Mykenæ and Tiryns on the eastern portion of Peloponnesus; and that perhaps what were called towns were, like Sparta itself, clusters of unfortified villages. The subsequent state of Helotism into which they were reduced is in consistency with this dispersed village residence during their period of freedom.

The relations of Pia and Elis form a suitable counterpart and sequel to those of Messenia and Sparta. Unwilling subjects themselves, the Pisatians had lent their aid to the Messenians—and their king Parakleto, one of the leaders of this combined force, had gained as great a temporary success as to dispossess the Helians of the agorotheta or administration of the games for one Olympic season, in the 36th Olympiad. Though again reduced to their condition of subjects,

¹ Aristotiles says, *de rebus antiquis* (Hesperia, vide sup. *Antiquities*, *de re antiqua*, lib. 14, c. 1).

In the *Agonothetai* (festival) in King Polydeuk, leader of the Spartans during the first Messenian war, he is

asked, whether he is really taking arms against his brethren, in which he replies, "No; I am only marching to the unoccupied portions of the territory." *Pausanias*, *Agonothetai*, *Laconia*, p. 321.—*de re antiqua*, *Agonothetai*.

they manifested dispositions to renew the revolt at the 45th Olympiad, under Damophila, the son of Pankaleia, and the Elians marched into their country to put them down, but were persuaded to retire by protestations of submission. At length, shortly afterwards, under Pyrrhos, the brother of Damophila, a serious revolt broke out. The inhabitants of Dyrrhachium and the other villages in the Flacii, united by those of Makistos, Skilas and the other towns in Triphylia, took up arms to throw off the yoke of Elis; but their strength was inadequate to the undertaking. They were completely conquered; Dyrrhachium was dismantled, and the inhabitants of it obliged to flee the country, from whence most of them emigrated to the colonies of Epikourus and Apollonia in Epirus. The inhabitants of Makistos and Skilas were also chased from their abodes, while the territory became more thoroughly subject to Elis than it had been before. These incidents seem to have occurred about the 50th Olympiad, or B.C. 566; and the domination of Elis over her Perioikid territory was thus as well secured as that of Sparta.¹ The separate demarcinations both of Pisa and Triphylia became more and more merged in the overruling name of Elis: the town of Lepreum alone, in Triphylia, seems to have maintained a separate name and a sort of half-autonomy down to the time of the Peloponnesian war, not without perpetual struggles against the Elians.² But towards the period of the Peloponnesian war, the political interests of Lacedæmon had become considerably

changed, and it was to her advantage to maintain the independence of the subordinate states against the superior; accordingly, we find her at that time upholding the autonomy of Lepreum. From what cause the domination of the Triphylian towns by Elis which Herodotus mentions as having happened in his time, arose, we do not know; the fact seems to indicate a continual yearning for their original independence, which was still commemorated, down to a much later

¹ *Plutarch*, vi. 12, 1; v. 1, 2; v. 10, 2; *Strabo*, vii. 1, 10—101.

² The temple in honour of Hera at Lepreum was first founded by the Lyones out of the spoils of this expedition (*Plutarch*, v. 10, 10).

³ *Thucyd.* v. 11. Even Lepreum is

characterised as Elisian, *Strabo*, vii. 1, 10; *Strabo*, vii. 1, 10; *Strabo*, vii. 1, 10.

⁴ Even in the 4th Olympiad an inhabitant of Dyrrhachium is mentioned as being at the Lyones, under the domination of — as Lyones from

puted, by the ancient Amphictyony at Samos in Triphylia, in honour of Poseidon—a common religious festival frequented by all the Triphylian towns and celebrated by the inhabitants of Elis, who sent vocal proclamation of a formal truce for the holy period.¹ The Lacedæmonians, after the close of the Peloponnesian war had left them unprotected heads of Greece, formally upheld the independence of the Triphylian towns against Elis, and seem to have continued their endeavours to attach themselves to the Arcadian aggregate, which, however, was never fully accomplished. Their dependence on Elis became less and uncertain, but was never wholly shaken off.²

¹ *Amphictyony*—presided by the *Phylakes* of Arcadia—the *Eke* in the *Elis Olympiad*; see *Strabo*, lib. 7. *Amphictyony*—which shows that the independence of the Triphylian towns was not entirely abandoned independent of Elis in the *Elis Olympiad*, as *Strabo* alleges (lib. 7. p. 305).

² *Strabo*, lib. 10; *Strabo*, lib. 7.

³ *Strabo*, lib. 7; *Strabo*, lib. 7; *Strabo*, lib. 7.

⁴ It was about this period probably that the *Elis* of the *Elis Olympiad*, Triphylia, was at *Elis*, was first introduced (*Strabo*, lib. 7).

CHAPTER VIII.

CONQUESTS OF SPARTA TOWARDS ARCADIA AND
ARGOLIS.

I HAVE described in the last two chapters, as far as our imperfect evidence permits, how Sparta came into possession both of the southern portion of Laconia along the coast of the Eurymachus down to its mouth, and of the Messenian territory westward. Her progress towards Arcadia and Argolis is now to be sketched, so as to conduct her to that position which she occupied during the reign of Peloponides at Athens, or about 500—540 B.C.,—a time when she had reached the maximum of her territorial possessions, and when she was confessedly the commanding state in Hellas.

The central region of Peloponnesus, called Arcadia, had never received any immigrants from without. Its indigenous inhabitants—a strong and hardy race of mountaineers, the most numerous state of

Hellenic tribes in the peninsula, and the constant hire

for mercenary troops¹—were among the rudest and poorest of Greeks, retaining for the longest period their original subdivision into a number of petty hill-villages, each independent of the other; while the union of all who bore the Arcadian name (though they had some common sacrifices, such as the festival of the Lykæan Hera, of Despoina, daughter of Poseidon and Demeter, and of Artemis Hymanis²) was more loose and ineffective than that of Greeks generally, either in or out of Peloponnesus. The

Many of the Greeks in Arcadia continued, but only with names, but known in the days of Pausanias (vii. 2. 4.)

Archaic villages were usually denominated by the names of regions, coincident with certain official subdivisions—the *Antona*, the *Parosani*, the *Mamali* (adjoining *Mamoti Mamali*), the *Enatoli*, the *Algeia*, the *Skiriti*,¹ &c. Some considerable towns however there were—aggregations of villages or *domes* which had been once autonomous. Of these the principal were *Tegae* and *Mantinea*, bordering on *Laconia* and *Argolis*—*Orchomenos*, *Phoenia*, and *Symphylia*, towards the north-east, bordering on *Acadia* and *Phoen*—*Kleite* and *Herma*, westward, where the country is divided from *Elis* and *Triphylia* by the woody mountains of *Pholoe* and *Erymanthos*—and *Platagia*, on the south-western border near to *Messenia*. The most powerful of all were *Tegae* and *Mantinea*²—contemporary towns, nearly equal in force, dividing between them the cold and high plain of *Triopolitis*, and separated by one of those capricious torrents which only escape through catastrophe. To regulate the efflux of this water was a difficult task, requiring friendly co-operation of both the towns; and when their frequent quarrels brought on a quarrel, the more aggressive of the two invaded the territory of its neighbour as one means of annoyance. The power of *Tegae*, which had grown up out of nine constituent townships originally separate,³ appears to have been more ancient than that of its rival; as we may judge from its splendid heroic pretensions connected with the name of *Echemon*, and from the poet conceded to its people in joint Peloponnesian armaments, which was second in distinction only to that of the *Lacedaemonians*.⁴ If it be correct, as *Strabo* asserts,⁵ that the incorporation of the town

* *Stenobothrus*, L. sp. *Stenobothrus* is represented among the oldest genera of *Stenobothridae* (Pavlov, L. 194). Both *Stenobothrus* and *Stenobothridae* had originally comprised very long tail stipes, and had lower incisors on a lower mandible lower down.

which Megalopolis was afterwards built.¹ But at this period, Sparta, as the political chief of Hellas—having a strong interest in keeping all the Grecian towns, small and great, as much isolated from each other as possible, and in checking all schemes for the formation of local confederacies—stood forward as the protectress of the autonomy of these smaller Arcadian towns, and drove back the Mantinians within their own limits.² At a somewhat later period, during the ascendancy of her power, a few years before the battle of Leuctra, she even proceeded to the extreme length of breaking up the unity of Mantineia itself, causing the walls to be razed, and the inhabitants to be again parcelled into their five original Demes—a violent arrangement which the turn of political events very soon reversed.³ It was not until after the battle of Leuctra, and the depression of Sparta, that any measures were taken for the formation of an Arcadian political confederacy;⁴ and even then the jealousies of the separate cities rendered it incomplete and short-lived. The great permanent change, the establishment of Megalopolis, was accomplished by the ascendancy of Epaminondas. Forty petty Arcadian townships, among those situated to the west of Mount Monalio, were aggregated into the new city; the jealousies of Tegea, Mantineia, and Kleitor were for a while suspended; and citizens came from all of them, as well as from the districts of the Mavroli and Partheni, in order to impart to the new establishment a genuine Pan-Arcadian character.⁵ It was thus that there arose for the first time a powerful city on the borders of Laconia and Messenia, ridding the Arcadian townships from their dependence on Sparta, and imparting to them political interests of their own, which rendered

Tegea and Mantineia the most powerful Arcadian towns before the breaking up of Mantineia.

¹ Thucyd. i. 10, 45, 47.

³ Joseph. Antiq. v. 2, 1–4; Strabo. vii. 10.

⁴ Joseph. Antiq. vi. 2, 10–11; vi. 1, 20–22.

⁵ Pausan. vii. 27, 1. No notice is mentioned from Epaminondas, though three of the petty townships mentioned

in connection to Orchomenos were included in the new city. The first interest, the neighbouring cities of Orchomenos and Mantinea, was Mavroli (Ibid. vi. 2, 11–15). Orchomenos and Mavroli both represent the political independence of Argolis.

The action of Epaminondas, to the Messenians, strongly affects the independence of the city, especially v. 20–22. The townships, called Partheni, &c. &c. Arcadian, and v. 27, 1, were also, &c.

them both a check upon their former chief and a support to the re-established Messenians.

It has been necessary thus to bring the attention of the reader for one moment to events long posterior in the order of time (Megalopoli was founded in 370 B.C.), in order that he may understand, by contrast, the general course of those incidents of the earlier time, where direct accounts are wanting. The

northern boundary of the Spartan territory was formed by some of the many small Arcadian townships or districts, several of which were successively conquered by the Spartans and incorporated with their dominion, though at what precise time we are unable to say. We are told that Charilaos, the reputed nephew and ward of Lykurgos, took Megara, and that he also invaded the territory of Tegea, but with singular ill-success, for he was defeated and taken prisoner;¹ we also hear that the Spartans took Phigalia by surprise in the 20th Olympiad, but were driven out again by the neighbouring Arcadian Oriskomenoi.² During the second Messenian war the Arcadians are represented as cordially succouring the Messenians; and it may seem perhaps singular, that while neither Mantinea nor Tegea are mentioned in this war, the more distant town of Oriskomenos, with its king Aristokrates, takes the lead. But the facts of the contest come before us with so partial a colouring, that we cannot venture to draw any positive inference as to the time to which they are referred.

Olissos³ and Karyatas seem to have belonged to the Spartans in the days of Alkman: moreover the district called Skiritis, bordering on the territory of Tegea,—as well as Delcinia and Malaisia, to the westward, and Karyas to the eastward and south-eastward, of Skiritis—forming all together the entire northern frontier of Sparta, and all occupied by Arcadian inhabitants—had been conquered and made part of the Spartan territory⁴ before 600 B.C. And Herodotus tells us that at this period the Spartan kings Leda and Megakles contemplated nothing less

¹ Pausan. *lib. 2. §. 1*; *lib. 7. §. 1*; *lib. 8. §. 1*.

² Pausan. *lib. 8. §. 1*.

l. p. 154.

⁴ That the Skiritis were Arcadians is well known. *Strabo*, *l. 8. §. 1*; *lib. 8. §. 1*.

⁵ *Strabo*, *l. 8. §. 1*; the possession of Delcinia was disputed with Sparta, in the days

502-500

than the conquest of native Arcadia, and sent to ask from the Delphian oracle a blessing on their enterprise.¹ The priestess dissuaded their wishes as extravagant in reference to the whole of Arcadia, but encouraged them, though with the usual equivocations of language, to try their fortunes against Thebes. Flushed with their course of previous success, not less than by the favourable construction which they put upon the words of the oracle, the Lacedæmonians marched against Thebes with such entire confidence of success, as to carry with them chains for the purpose of binding their expected prisoners. But the result was disappointment and defeat. They were repulsed with loss; and the prisoners whom they left behind, bound in the very chains which their own army had brought, were constrained to servile labour on the plain of Thebes—the words of the oracle being thus literally fulfilled, though in a sense different from that in which the Lacedæmonians had first understood them.²

For one whole generation, we are told, they were constantly unsuccessful in their campaigns against the Thebans, and this strenuous resistance probably prevented them from extending their conquests farther among the petty states of Arcadia.

At length in the reign of Anaxandrides and Aristô, the successors of Leda and Hegesicles (about 660 B.C.), the Delphian oracle, in reply to a question from the Spartans—
 which of the gods they ought to propitiate in order to become victorious—enjoined them, to find and carry to Sparta the bones of Orestis, son of Agamemnon. After a vain search, since they did not know where the body of Orestis was to be found, they applied to the oracles
 They are directed by the oracle to bring the bones of Orestis, the son of Agamemnon.

of her consecutive translation, by the Lacedæmonians: see Pritchard, *Monuments*, v. 1, Plutarch, *Phœnicians*, 11, 12.

Supposing Karys the border town of Sparta, where the Lacedæmonians were defeated, *Thuc.* v. 5, 10; *Plutarch*, *Phœnicians*, 11, 12; *Plutarch*, *Phœnicians*, 11, 12; *Plutarch*, *Phœnicians*, 11, 12; *Plutarch*, *Phœnicians*, 11, 12.

The tradition with which Karys and the Peloponnesus revealed against Sparta after the battle of Leuctra, also before the junction of Lacedæmon by the Thebans, enables them apparently to compare Greek antiquities of Sparta, without any hindrance of time. *Josephus*, *Antiq.* vi. 1, 11–12; vii. 1.

11. Lacedæmonians the Peloponnesians have found a part of the territory of Messenians in the state of Lacedæmonians. *Plutarch*, *Phœnicians*, 11, 12; *Plutarch*, *Phœnicians*, 11, 12; *Plutarch*, *Phœnicians*, 11, 12; *Plutarch*, *Phœnicians*, 11, 12.

14. *Thuc.* v. 5, 10; *Plutarch*, *Phœnicians*, 11, 12; *Plutarch*, *Phœnicians*, 11, 12; *Plutarch*, *Phœnicians*, 11, 12.

for more specific directions, and were told that the son of Agamemnon was buried at Tegea itself, in a place "where two blasts were blowing under powerful constraint,—where there was stroke and counter-stroke, and destruction upon destruction". These mysterious words were elucidated by a lucky accident. During a truce with Tegea, Lichas, one of the chiefs of the 300 Spartan chosen youth who acted as the movable police of the country under the ephors, visited the place, and entered the forge of a blacksmith—who mentioned to him, in the course of conversation, that in staking a well in his outer court he had recently discovered a coffin containing a body seven cubits long; attended at the sight, he had left it there undisturbed. It struck Lichas that the gigantic ratio of stature could be nothing else but the corpse of Orestes, and he felt assured of this when he reflected how accurately the indications of the oracle were verified; for there were the "two blasts blowing by constraint" in the two bellows of the blacksmith: there was "the stroke and counter-stroke" in his hammer and anvil, as well as the "destruction upon destruction" in the murderous weapons which he was forging. Lichas said nothing, but returned to Sparta with his discovery, which he communicated to the authorities, who, by a concerted scheme, banished him under a pretended criminal accusation. He then again returned to Tegea, under the guise of an exile, prevailed upon the blacksmith to let to him the premises, and when he found himself in possession, dug up and carried off to Sparta the bones of the venerated hero.¹

From and after this fortunate acquisition, the character of the contest was changed; the Spartans found themselves constantly victorious over the Tegeans. But it does not seem that these victories led to any positive result, though they might perhaps serve to enforce the practical conviction of Spartan superiority; for the territory of Tegea remained unimpacted, and its autonomy never restrained. During the Persian invasion Tegea appears as the willing ally of Lacedæmon, and as the second military power in the Peloponnese;² and we may fairly presume that it was chiefly the

Their operations against Tegea to some more successful; nevertheless Tegea remained free.

¹ Herod. i. 66-68.

² Herod. ix. 28.

strengths resistance of the Trogians which prevented the Lacedæmonians from extending their empire over the larger portion of the Arcadian circumference. These latter always maintained their independence, though acknowledging Sparta as the preëminent power in Peloponnesus, and placing her orders implicitly as to the disposal of their military force. And the influence which Sparta thus possessed over all Arcadia was one ruin. Her power, never seriously shaken until the battle of Leuctra; which took away her previous means of ensuring success and plunder to her various followers.

Having thus related the extension of the power of Sparta on her northern or Arcadian frontier, it remains to mention her acquisitions on the eastern and north-eastern side, towards Argos. Originally (as has been before stated) not merely the provinces of Kyrenia and the Thyreatis, but also the whole coast down to the promontory of Malis, had either been part of the territory of Argos or belonged to the Arcadian confederacy. We learn from Herodotus,

Extension of
Spartan
power
towards
Argos—
extension of
Thyreatis
by Sparta.

that before the time when the embassy from Clearchus king of Lydia came to solicit aid in Greece (about 547 B.C.), the whole of this territory had fallen into the power of Sparta; but how long before, or at what precise epoch, we have no information. A considerable victory is said to have been gained by the Argians over the Spartans in the 37th Olympiad or 609 B.C., at Mylae, on the road between Argos and Troezen.¹ At that time it does not seem probable that Epauria could have been in the possession of the Spartans—so that we must refer the acquisition to some period in the following century; though Pausanias places it much earlier, during the reign of Theopompus²—and Hesychius connects it with the first establishment of the festival called Gymnopaedia at Sparta in 473 B.C.

About the year 547 B.C., the Argives made an effort to reconquer Thyrea from Sparta, which led to a notable long warlike in the annals of Grecian history. It was agreed between the two powers that the possession of this territory should

be determined by a contest of 300 select champions on each side: the armies of both retiring, in order to leave the field clear. So untroubled, and so equal was the valor of these two chosen companies, that the battle terminated by leaving only three of them alive—Alkibiades and Chromatas among the Argives, Othryadeis among the Spartans. The two Argive warriors hastened home to report their victory, but Othryadeis remained on the field, carried off the arms of the enemy's dead into the Spartan camp, and kept his position until he was joined by his countrymen the next morning. Both Argos and Sparta claimed the victory for their respective champions, and the dispute after all was decided by a general conflict, in which the Spartans were the conquerors, though not without much slaughter on both sides. The brave Othryadeis, ashamed to return home as the single survivor of the 300, fell upon his own sword on the field of battle.¹

This defeat decided the possession of Thyrea, which did not again pass, until a very late period of Grecian history, under the power of Argos. The preliminary death of 300, with its uncertain issue, though well-established as to the general fact, was represented by the Argives in a manner totally different from the above story, which seems to have been current among the Lacedæmonians.² But the most remarkable circumstance is, that more than a century afterwards—when the two powers were negotiating for a renewal of the then expiring truce—the Argives, still hankering after this their ancient territory,

¹ Herod. i. 82; Strabo, vii. p. 324.

² The Argives claimed all Argos & Thyrea as Persides, son of Alcibiades, killing Othryadeis (Pausan. ii. 36, § 1; ii. 38, § 1; Strabo, l. c. p. 324) and the champions in Thyrea as Persides, i. 82. The narrative of Chromatas, in Paus. i. 26, § 2, is, however, the same. The Argives, however, did also, in Pausan. Persides, i. 82, § 1, is different in every respect.

Pausanias found the Othryadeis in possession of the Argives (ii. 36, § 1). They told him that they had recovered it by negotiation; when as to where it is lost there, it seems to have passed back to Argos before the close

of the reign of Cleomenes III. as Pausanias l. c. § 1, Polyb. iv. 24.

Strabo, vii. p. 324, Persides, son of Alcibiades, to the south of Thyrea (Polyb. i. 82). Strabo, in the other passage, p. 324, mentions that from Persides, it is traced to Lacedæmonians. Compare Strabo, vii. p. 324, § 1, § 2.

Strabo, placing this deed at a much earlier date (Polyb. i. 82, § 1), mentions the first foundation of 300 Othryadeis at Sparta, to the south of Thyrea, and that they were sent to accompany the Argives. Pausanias (ii. 36, § 1) places it still further back to the reign of Thermopylus.

desired the Lacedæmonians to submit the question to arbitration; which being refused, they next stipulated for the privilege of trying the point in dispute by a duel similar to the former, at any time except during the prevalence of war or of epidemic disease. The historian tells us that the Lacedæmonians acquiesced in this proposition, though they thought it absurd,¹ in consequence of their anxiety to keep their relations with Argos at that time smooth and pacific. But there is no reason to imagine that the real duel, in which Othrypsidis contended, was considered as absurd at the time when it took place or during the age immediately succeeding. It fell in with a sort of chivalrous popularity which is noticed among the aristocrats of the early Greeks,² and also with various legendary exploits, such as the single combat of Echsemas and Myline, of Melanthos and Xanthos, of Menelaos and Paris, &c. Moreover the heroism of Othrypsidis and his countrymen was a popular theme for poets not only at the Spartan gymnæpeia,³ but also elsewhere, and appears to have been frequently celebrated. The absurdity attached to this proposition, then, during the Peloponnesian war—in the minds even of the Spartans, the most old-fashioned and unchanging people in Greece—is to be ascribed to a change in the Grecian political mind, at and after the Persian war. The habit of political calculation had made such decided progress among them, that the leading states especially had become familiarized with something like a statesmanlike view of their resources, their dangers, and their obligations. How lamentably deficient this sort of sagacity was during the Persian invasion will appear when we come to describe that imminent crisis of Grecian independence: but the events of those days were well calculated to sharpen it for the future, and the Greeks of the Peloponnesian war had become far more refined political schemers than their forefathers. And thus it happened that the proposition to settle a territorial dispute by a duel of chosen champions, admirable

Alternative in Greek tradition, as to the grounds of accepting disputed by some.

¹ Thucyd. i. 11. Tels de Lacedæmonien ne se soumettent point à l'arbitrage, mais se proposent de décider leur querelle par un combat singulier, à tout moment, excepté pendant la guerre ou la peste.

² Herodot. vi. 2. Compare the

challenges which Herodotus alludes to here with propositions to the Spartans by Menelaos, through a herald, just before the battle of Pelion (ii. 40).

³ Aristotle. iv. p. 124.

and even becoming a century before, came afterwards to be deemed as childish.

The inhabitants of Kyrenia are stated by Herodotus to have been Ionians, but completely derided through their long subjection to Argos, by whom they were governed as Perioeci. Pausanias gives a different account of their race, which he traces to the eponymous hero Kyrenas son of Poseidon : but he does not connect them with the Kyrenians whom he mentions in another place as a portion of the inhabitants of Aradolia.¹ It is evident, that even in the time of Herodotus, the traces of their primitive descent were nearly effaced. He says they were "Oronates and Perioeci" to Argos ; and it appears that the inhabitants of Oronos also, whom Argos had reduced to the same dependent condition, traced their eponymy here to an Ionic stock—Oronos was the son of the Attic Erechthon.² Strabo seems to have conceived the Kyrenians as comprising originally, not only the frontier district of Argolis and Laonia, wherein Thyrea is situated, but also the north-western portion of Argolis, under the ridge called Lykothron, which separates the latter from the Aradolian territory of Stymphalos.³ This ridge was near the town of Oronos, which lay on the border of Argolis near the mouth of Phlomis ; so that Strabo thus helps to confirm the statement of Herodotus, that the Oronates were a portion of Kyrenians, held by Argos along with the other Kyrenians in the condition of dependent allies and Perioeci, and very probably also of Ionic origin.

The conquest of Thyrea (a district valuable to the Laconians, as we may presume from the large booty which the Argives got from it during the Peloponnesian war)⁴ was the last territorial acquisition made by Sparta. She was now possessed of a continuous dominion, comprising the whole southern portion of the Peloponnesus, from the southern bank of the river

¹ Herod. vii. 33; Pausan. vii. 2, 3.

² Pausan. vii. 2, 3. Maseaud (Géographie de Grèce) and others, notwithstanding, took it, as Strabo does, to connect the Kyrenians of Aradolia and Argolis, though Herodotus follows the latter with Ionians; he gives to this name much greater importance and extension than his evidence bears out.

³ Strabo, vii. p. 379.—I Thiers (Géographie de Grèce) and others, however, connect them with the Lykothron, which he says lay to the north-west of the ridge of Lykothron, for the ridge of Lykothron ran between the river and Lykothron; he connects with others without importance.

⁴ Thucyd. ii. 85.

Solon on the western coast, to the northern boundary of Thyræitis on the eastern coast. The area of her territory, including as it did both Laconia and Messenia, was equal to two-fifths of the entire peninsula, all governed from the single city, and for the exclusive purpose and benefit of the citizens of Sparta. Within all this wide area there was not a single community pretending to independent agency. The townships of the Perioeci, and the villages of the Heilots, were each individually unimportant; nor do we hear of any one of them pretending to treat with a foreign state. All consider themselves as nothing else but subjects of the Spartan sphere and their subordinate citizens. They are indeed discontented subjects, hating as well as fearing their masters, and not to be treated if a favorable opportunity for some revolt presents itself. But no individual township or district is strong enough to stand up for itself, while combinations among them are prevented by the habitual watchfulness and unceasing precautions of the sphere, especially by that jealous secret police called the Krypteia, to which allusion has already been made.

Fact again, showing of the northern portion of Peloponnesus, from sea to sea, by the Spartans, before 468 B.C.

Not only therefore was the Spartan territory larger and its population more numerous than that of any other state in Hellas, but its government was also more completely centralized and more strictly shaped. Its source of weakness was the discontent of its Perioeci and Heilots, the latter of whom were not (like the slaves of other states) imported barbarians from different countries, and speaking a broken Greek, but genuine Hellenes—of one dialect and lineage, sympathizing with each other, and as much entitled to the protection of Zeus Hellenikos as their masters—from whom indeed they stood distinguished by no other line except the perfect training, individual and collective, which was peculiar to the Spartans. During the period on which we are at present dwelling, it does not seem that this discontent comes sensibly into operation; but we shall observe its manifestations very unequivocally after the Persian and during the Peloponnesian war.

Great concentration of power in Sparta, at that early time.

To each auxiliary cause of Spartan preeminence we must add another—the excellent military position of Sparta, and the

unassailable character of Laconia generally. On three sides that territory is washed by the sea, with a coast remarkably dangerous and destitute of harbours;¹ hence Sparta had nothing to apprehend from this quarter until the Persian invasion and its consequences—one of the most remarkable of which was, the astonishing development of the Athenian naval force. The city of Sparta, far removed from the sea, was admirably defended by an almost impenetrable northern frontier, composed of those districts which we have observed above to have been conquered from Arcadia—Karyatis, Skiritis, Maleitis, and Pedunetania. The difficulty as well as danger of marching into Laconia by these mountain passes, noticed by Karpida, was keenly felt by every enemy of the Lacedæmonians, and has been powerfully stated by a first-rate modern observer, Colonel Leake.² No site could be better chosen for holding the key of all the penetrable passes than that of Sparta. This well-protected frontier was a substitute more than sufficient for fortifications to Sparta itself, which always maintained, down to the times of the despot Kleda, its primitive

¹ Karpida, *Hellas*, iv. 3, 4: *ἀσφαλὲς αὖτε ἀκατάβατον τὸ πᾶν*.

² *Hellas*, iii. 1, 2, 30; *Perip. of Greece*, vol. p. 106; *Leake, Greece in Ruins*, vol. iii. s. 11, p. 11.

"It is in the strength of the frontier, and the consequent very large extent of country included within them, that we must trace the primary cause of the Lacedæmonian power. These included the passes, when strengthened by a solid military discipline, and put in action by an audacious spirit, first to struggle over their weaker neighbours of Messenia, by the little-known strength to conquer the strongest republic of a nation, and at length for centuries to hold an acknowledged military superiority over every other state in Greece.

"It is remarkable that all the principal passes into Laconia lead to one point, the point is Sparta: is that which shows us more how well the position of that city was chosen to the centre of the province, and how well it was adapted, especially as long as it continued to be unruled, to maintain a perpetual vigilance and readiness for defence, which are the chief means of a state's security.

"The natural approaches into the plain of Sparta are only two; one by the

upper Kephissos, as the course of that river above Sparta may be termed. The other by the little large branch stream, now the Kephissos, which, as I have already stated, joins the Kephissos opposite to the north-western extremity of Sparta. And the natural approaches to Sparta from the northward lead to one or the other of these two rivers. On the side of Messenia, the naturally penetrable of Kephissos Toposon, which joins Mount Lykaon at the foot of Lykaonia, now the great Kephissos, furnished a natural leader of the inland road, uniting the city of Argos and Epidaurion, and which—whether from the Chronicle of Arcadia to the south-westward of the modern Kephissos, from the mountainous plain, from the plain of the Perachia, or from Phara, near Helandria—all descended into the valley of the upper Argos, and conducted to Sparta by Pelopon. There was indeed a branch of the inland mountain road which ascending into the Spartian plain at the modern Kephissos, and which kept here a very frequent communication between Sparta and the lower part of Messenia, but, like the other direct passes into Pelopon, it was much more difficult and dangerous than those which I have called the natural entrances of the province.

aspect of a group of adjacent hill-villages rather than a regular city.

When, along with such territorial advantages, we contemplate the personal training peculiar to the Spartan citizens, as yet undisturbed in their work, — combined with the effect of that training upon Greek sentiment, in inspiring awe and admiration, — we shall not be surprised to find, that during the half-century which elapsed between the year 690 B.C., and the final conquest of Thessalia from Argos, Sparta had acquired and begun to exercise a recognised ascendancy over all the Greek states. Her military force was at that time superior to that of any of the rest, in a degree much greater than it afterwards came to be; for other states had not yet attained their maximum, and Athens in particular was far short of the height which she afterwards reached. In respect to discipline as well as numbers, the Spartan military force had even at this early period reached a point which it did not subsequently surpass, while in Athens, Thebes, Argos, Arcadia, and even Elis (as will be hereafter shown), the military training in later days received greater attention, and improved considerably. The Spartans (pursues Aristotle) brought to perfection their gymnastic training and their military discipline, at a time when other Greeks neglected both the one and the other: their early superiority was that of the trained man over the untrained, and ceased in after-days when other states came to subject their citizens to systematic courses of analogous character or tendency. This fact—the early period at which Sparta attained her maximum of discipline, power and territory—is important to bear in mind when we are explaining the general ascendancy which her ascendancy met with in Greece, and which her subsequent acts would certainly not have enabled her to earn. That ascendancy first began, and became a habit of the Greek mind, at a time when Sparta had no rival to come near her—when she had completely shut herself out of Argos—and when the vigour of the Lycurgean discipline had been manifested

¹ Aristotle, *Polit.* viii. 2, 3. "The first object of the Lycurgean laws, that all should participate in the same training, was to make the citizens all fit, and thus to produce an equal and vigorous system."

International history: at this early date when Sparta was the only state that gave such a training to its citizens, it was the only state that was able to do so."

What remains fixed in the system is, first, the small number, though varying within certain limits, of the elementary company called *Enomoty*,¹ trained to act together, and composed of men nearly of the same age,² in which every man knew his place: secondly, the scale of divisions and the hierarchy of officers, each rising above the other,—the *Enomotarch*, the *Pentekonkte*, the *Lochage*, and the *Polemarch*, or commander of the *Mora*,—each having the charge of their respective divisions. Orders were transmitted from the king, as commander-in-chief, through the *Polemarch* to the *Lochage*,—from the *Lochage* to the *Pentekonkte*, and then from the latter to the *Enomotarch*, each of whom caused them to be executed by his *Enomoty*. As all these men had been previously trained to the duties of their respective stations, the Spartan infantry possessed the arrangements and aptitudes of a standing army. Originally they seem to have had no cavalry at all,³ and when cavalry was at length introduced into their system, it was of a very inferior character, no provision having been made for it in the *Lykurgian* training. But the military force of the other cities of Greece, even down to the close of the *Peloponnesian* war, enjoyed little or no special training, having neither any small company like the *enomoty*, consisting of particular men drilled to act together—nor fixed and disciplined officers—nor triple scale of subordination and subdivision. Gymnastic and the use of arms made a part of education everywhere, and it is to be presumed that no Grecian hoplite was entirely without some practice of marching in line and military evolutions, inasmuch as the obligation to serve was universal and often enforced. But such practice was casual and unequal, nor had any individual of Argos or Athens a fixed military place and duty. The citizen took arms among his tribe, under a *Tetrarch* chosen from it for the occasion, and was placed in a rank or line wherein neither his place nor his immediate neighbours were predetermined. The tribe appears to have been the only

¹ *enomoty* (literally man, but Xenophon tells us that each man had four lots, each lot having two participants, and each participant two substitutes (Xen. Lac. II. 4). The names of these divisions repeat the names but the numbers varied.

² This is implied in the fact, that the men under *Enomoty*, or under *Enomoty* five years of age, were often detached by a father to serve as the light troops of the army (Xen. Lac. IV. 4, 11-12).

³ Xenophon, Lac. VI. 4, 12.

have been founded chiefly upon what he and his audience witnessed on the coast of Asia Minor, where chariots were more employed, and where the country was much more favourable to them.¹ We have no historical knowledge of any military practice in Peloponnesian antiquity to the hoplites with close ranks and pretended spaces.

One Peloponnesian state there was, and one alone, which declined to acknowledge the superiority or brotherhood of Lacedæmonia. Argos never forget that she had once been the chief power in the Peloponnesus, and her feeling towards Sparta was that of a jealous, but impotent, competitor. By what steps Argos came to recover the feeling of the Peloponnesians towards her is not clear.

Argos was unable to make out, nor was we trace the succession of her kings subsequent to Phidias. It has been already stated that about 680 B.C. the Argives gained a victory over the Spartans at Mycenæ, and that they expelled from the post of Nauplia its pre-existing inhabitants, who found shelter, by favour of the Lacedæmonians, at the post of Motichæ in Messenia.² Demochares was then king of Argos. Pausanias tells us that Melites the son of Lebidæ was the last descendant of Themison who succeeded to this dignity; he being condemned and deposed by the people. Plutarch however states that the family of the Hæschleids died out, and that another king, named Agis, was chosen by the people at the instigation of the Delphian oracle.³ Of this story, Pausanias appears to have known nothing. His language implies that the kingly dignity ceased with Melites—wherein he is undoubtedly mistaken, since the title existed (though probably with very limited functions) at the time of the Persian war. Moreover there is some ground for presuming that the king of Argos was even at that time a Hæschleid—since the Spartans offered to him a third part of the command of the Hælicæ fleet, conjointly with their own two kings.⁴ The con-

¹ Xenoph. Hellen. vi. 1, 12.

² Pausan. ix. 24, 25, 26, 27.

³ Pausan. ix. 24, 27. Plutarch says Phidias never was expelled entirely, but that he remained at Nauplia until the Persian expedition, B.C. 480, when he was expelled. Lebidæ, king of Argos, is also named by Plutarch as having been expelled and succeeded by Agis, about 680 B.C. This statement seems to me not much to be trusted.

⁴ Plutarch (Mæc. Evanes), iii. 4, 12.

Identical Lebidæ, son of Melites, named by Pausanias, with Lebidæ son of Phidias, named by Herodotus as one of the rulers for the daughter of Alcibiades the Megarian (ii. 127) and by them before that Melites must have been deposed and succeeded by Agis, about 680 B.C. This statement seems to me not much to be trusted.

⁵ Herodot. vii. 140.

quest of Thyroëthia by the Spartans deprived the Argives of a valuable portion of their Perioëthia, or dependent territory. But Oron and the remaining portion of Thyroëthia¹ still continued to belong to them: the plain round their city was very productive; and, except Sparta, there was no other power in Peloponnesus superior to them. Mykæna and Tiryns, nevertheless, seem both to have been independent states at the time of the Persian war, since both sent contingents to the battle of Plataeæ, at a time when Argos held aloof and rather favoured the Persians.

At what time Kleonæ became the ally or dependent of Argos, we cannot distinctly make out. During the Peloponnesian war it is mentioned in that character along with Oron;² but it seems not to have lost its autonomy about the year 479 B.C., at which period Pindar represents the Kleonæans as providing and distributing prizes at the Nemean games.³ The grove of Nemea was less than two miles from their town, and they were the original presidents of this great festival—a function of which they were subsequently robbed by the Argives, in the same manner as the Platæans had been treated by the Eleians with reference to the Olympic Agôn. The extinction of the autonomy of Kleonæ, and the acquisition of the presidency of the Nemean festival by Argos, were doubtless simultaneous, but we are unable to mark the exact time. For the statement of Eschylus, that the Argives celebrated the Nemean festival as early as the 62d Olympiad, or 568 B.C., is contradicted by the more valuable evidence of Pindar.⁴

games.

¹ Herodotus, viii. 131.

² Herodotus distinguishes two places called Oron; one a village in the Argive territory, the other a town between Corinth and Mægares; but I doubt whether there ever were two places so called: the town or village mentioned in Argos seems the only place Oron, viii. p. 131.

³ Pindar, v. 21, vii. 21, 22.

⁴ The Kleonæans also said to have aided the Argives in the destruction of Mykæna, especially with the Danaans; from hence, however, we cannot infer anything as to their dependence at that time (Herodotus, viii. p. 131).

⁵ Pindar, Nemean, l. 42. Eschylus made Kleonæan captives prisoners (Nemean, l. 10). Kleonæan? or Argives, &c.

⁶ See *Classical Dissertation* Agamemnon, 21, 2.

The fourth Nemean Ode of Pindar is on this subject, particularly good evidence, inasmuch as it is composed by, and supposed to be sung by, Kleonæan, a native of Argos. But there have very recently been disputes between Dindorf and Wilkins on the subject of the genuineness of this festival. Pindar would never, on such an occasion have mentioned expressly the Kleonæans as presiding.

The statements of the Scholia on Pindar, that the Corinthians at one time supplanted the Nemean games, or that they were at all celebrated at Eleusis, seem unimpeached (Schol. Pind. Arg. 2nd, and Nemean, l. 40).

Of Corinth and Sikyon it will be more convenient to speak when we survey what is called the Age of the Tyrants or Despots; and of the inhabitants of Achæia (who occupied the southern coast of the Corinthian Gulf, westward of Sikyon as far as Cape Araxos, the north-western point of Peloponnesus), a few words exhaust our whole knowledge, down to the time at which we are arrived. These Achæans are given to us as representing the ante-Dorian inhabitants of Laconia, whom the legend affirms to have retired under Theseus to the northern parts of Peloponnesus, from whence they expelled the pre-existing Ionians and occupied the country. The race of their kings is said to have lasted from Theseus down to Agamemnon¹—how long we do not know. After the death of the latter, the Achæan towns formed each a separate republic, but with periodical festivals and meetings at the Temple of Nem Hæmaria, affording opportunity of settling differences and arranging their common concerns. Of these towns, twelve are known from Herodotus and Strabo—Pelion, Ægira, Ægæ, Bora, Halioi, Ægium, Mycenæ, Paten, Thana, Olonea, Dymæ, Triton.² But there must originally have been some other autonomous towns besides these twelve; for in the third Olympiad, Icarus of Hyperbæia was proclaimed as victor, and there seems good reason to believe that Hyperbæia, an old town of the Homeric Catalogue, was in Achæia.³ It is affirmed that, before the Achæan occupation of the country, the Ionians had dwelt in independent villages, several of which were subsequently aggregated into towns; thus Paten was formed by a confluence of seven villages, Dymæ from eight (one of which was named Tenthea), and Ægium also from seven or eight. But all these towns were small, and some of them underwent a further junction one with the other; thus Ægæ was joined with Ægira, and Olonea with Dymæ.⁴ All the authors seem disposed to recognize twelve cities, and no more, in Achæia; for Polybius, still adhering to that number, substitutes Leontium and Karyæia

² Herodotus, l. ii. c. 102; Strabo, vii. p. 266.

³ Strabo, l. vi. p. 10; Ptolemy, vii. p. 266.

⁴ Herodotus, l. ii. c. 102. Pausanias seems to have forgotten this statement.

When he tells us that the name of Hyperbæia was changed for that of

Ægira, during the time of the Ionian

conquest of the country (Str. vii. p. 10).

Strabo, vii. c. 102, says that the two Achæan

towns occupied the same place, and that

Strabo wrongly identifies them.

⁴ Strabo, vii. pp. 265, 266, 267.

in place of *Sige* and *Ekypos*; *Pausanias* gives *Korymbia* in place of *Patos*.¹ We hear of no facts respecting these Achæan towns until a short time before the Peloponnesian war, and even then their part was inconsiderable.

The greater portion of the territory comprised under the name of Achæa was mountain, forming the northern descent of those high ranges, passable only through very difficult gorges, which separate the country from Arcadia to the north, and which threw out various spurs approaching closely to the Gulf of Corinth. A strip of flat land, with white-lapis soil, often very fertile, between these mountains and the sea, formed the plain of each of the Achæan towns, which were situated for the most part upon steep overhanging embasements overhanging it. From the mountains between Achæa and Arcadia, numerous streams flow into the Corinthian Gulf, but few of them are perennial, and the whole length of coast is represented as harbourless.²

CHAPTER IX.

CORINTH, SIKYÔN, AND MEGARA—AGE OF THE CORINTHIAN
DESPOTS.

I HAVE thus brought down the history of Sparta to the period marked by the reign of Peisistratus at Athens; at which time she had attained her maximum of territory, was undoubtedly the most powerful state in Greece, and enjoyed a proportionate degree of deference from the rest. I now proceed to touch upon the three Dorian states on and near to the Isthmus—Corinth, Sikyôn, and Megara, as they existed at this same period.

Even amidst the scanty information which has reached us, we trace the marks of considerable maritime energy and commerce among the Corinthians, as far back as the eighth century B.C. The foundation of Korkyra and Syracuse, in the eleventh Olympiad, or 734 B.C. (of which I shall speak further in connection with Grecian colonisation generally), by expeditions from Corinth, affords proof that they knew how to turn to account the excellent situation which connected them with the sea on both sides of Peloponnese. Moreover Thucydides,¹ while he notices them as the chief liberators of the sea in early times from pirates, also tells us that the first great improvement in ship-building—the construction of the trireme, or ship of war, with a full deck and triple banks for the oars—was the fruit of Corinthian ingenuity. It was in the year 700 B.C., that the Corinthian Amasichlos built four triremes for the Sarcians, the first which those islanders had ever possessed. The notice of this fact attests as well the importance attached to the new invention, as the humble scale on which the naval force in those early days was equipped. And it is a fact of

¹ Thucyd. i. 12.

Early com-
merce and
expansion
of the Co-
rinthians

2

not less moment in proof of the maritime vigour of Corinth in the seventh century B.C., that the earliest naval battle known to Thucydides was one which took place between the Corinthians and the Egecyrians, B.C. 684.¹

It has already been stated that the line of Herakleid kings in Corinth subsides gradually, through a series of empty names, into the oligarchy dominated Bacchiads or Bacchiads, ^{oligarchy} under whom our first historical knowledge of the city ^{of the Bacchiads.} begins. The persons so named were all accounted dependants of Herakleia, and formed the governing caste in the city; intermarrying usually among themselves, and choosing from their own number an annual *prytanis*, or president, for the administration of affairs. Of their internal government we have no accounts, except the tale respecting Archias the founder of Syracuse,² one of their number, who had made himself as detested by an act of brutal violence terminating in the death of the beautiful youth Akastos, as to be forced to expatriate. That such a man should have been placed in the distinguished post of chief of the colony of Syracuse gives us no favourable idea of the Bacchiad oligarchy: we do not however know upon what original authority the story depends, nor can we be sure that it is accurately recounted. But Corinth under their government had already become a powerful commercial and maritime city.

Megara, the last Dorians state in this direction eastward, and contemporaneous with Aitolia at the point where the ^{body} ^{remains of} ^{Megara.} ^{the} ^{ancient} ^{city} ^{of} ^{Megara} ^{is} ^{situated} ^{on} ^{the} ^{Thessalian} ^{plain,} is supposed to have been originally settled by the Dorians of Corinth, and to have remained for some time a dependency of that city. It is further said to have been at first merely one of five separate villages—Megara, Harona, Poliros, Kynosura, Triphidairos—inhabited by a mixed population, and generally on friendly terms, yet sometimes dominated by quarrels, and on those occasions carrying on war with a degree of ferocity and divisions confidence which reverses the proverbial affirmation respecting the sanguinary character of maritime

¹¹ Thucyd. i. 10. ¹² Thucyd. i. 10. ¹³ Thucyd. i. 10. ¹⁴ Thucyd. i. 10. ¹⁵ Thucyd. i. 10. ¹⁶ Thucyd. i. 10. ¹⁷ Thucyd. i. 10. ¹⁸ Thucyd. i. 10. ¹⁹ Thucyd. i. 10. ²⁰ Thucyd. i. 10.

the three above-mentioned towns,—Corinth, Sikyon, and Megara—underwent during the course of this same century a similar change of government. In each of them a despot established himself: Orthagoras in Sikyon; Kypselos in Corinth; Theagelos in Megara.

Unfortunately we have too little evidence as to the state of things by which this change of government was pre-^{pared at the}ceded and brought about, to be able to appreciate fully ^{despotic} its bearing.

But what draws our attention to it more particularly is, that the like phenomenon seems to have occurred contemporaneously throughout a large number of cities, continental, insular and colonial, in many different parts of the Grecian world. The period between 680 and 540 B.C. witnessed the rise and downfall of many despots and despotic dynasties, each in its own separate city. During the succeeding interval between 540 and 330 B.C., new despots, though occasionally springing up, become more rare. Political dispute takes another turn, and the question is raised directly and ostensibly between the many and the few—the people and the oligarchy. But in the still later times which follow the birth of Charonides, in proportion as Greece, declining in civic not less than in military spirit, is driven to the constant employment of mercenary troops, and harrassed by the ever-raging interference of foreigners—the despot with his standing foreign body-guard becomes again a characteristic of the time; a tendency partially counteracted, but never wholly subdued, by Antisthenes and the Athenian league of the third century B.C.

It would have been instructive if we had possessed a faithful record of these changes of government in some of the more considerable of the Grecian towns. In the absence of such evidence, we can do little more than collect the brief ^{known} sentences of Aristotle and others respecting the various ^{changes of} ^{government} which professed them. For as the like change of ^{in Greece} government was common, near about the same time, to cities very different in locality, in race of inhabitants, in tastes and habits, and in wealth, it must partly have depended upon certain general causes which admit of being assigned and explained.

In a preceding chapter I tried to elucidate the heroic government of Greece, so far as it could be known from the epic poems—a government founded (if we may employ modern phraseology)

upon divine right as opposed to the sovereignty of the people, but requiring, as an essential condition, that the king shall possess force, both of body and mind, not unworthy of the exalted trust to which he belongs.¹ In this government the authority, which pervades the whole society, all resides in the king. But on important occasions it is exercised through the form of publicity: he consults, and even discusses, with the council of chiefs or elders—he communicates after such consultation with the assembled Agora,—who hear and approve, perhaps hear and dissent, but are not understood to exercise an option or to reject. In giving an account of the Lykurgian system, I remarked that the old primitive Rhodon (or cluster of compact) indicated the existence of three main elements; a king of superhuman lineage (in this particular case two co-ordinate kings)—a senate of twenty-eight old men, besides the kings who sat in it—and an Ekklisia or public assembly of citizens, convened for the purpose of approving or rejecting propositions submitted to them, with little or no liberty of discussion. The elements of the heroic government of Greece are thus found to be substantially the same as those existing in the primitive Lykurgian constitution; in both cases the predominant force residing in the kings, and the functions of the senate, still more those of the public assembly, being comparatively narrow and restricted; in both cases the royal authority being upheld by a certain religious sentiment, which tended to exclude rivalry and to ensure submission by the people up to a certain point, in spite of misconduct or delinquency in the reigning individual. Among the principal Spartan tribes this government subsisted down to the third century A.D.,² though some of them had passed out of it, and were in the habit of electing annually a president out of the gens to which the king belonged.

Starting from these points, common to the Greek heroic government, and to the original Lykurgian system, we find that in the Greek cities generally the king is replaced by an oligarchy, consisting of a limited number of families—while at Sparta the kingly authority, though greatly curtailed, is never abolished. And the different turn of events at

¹ See a striking passage in Plutarch, *Pericles*, c. 2, p. 80.

² Plutarch, *Pyrrhus*, c. 2. Aristot. *Politic.* lib. ii. c. 1.

Sparta admits of being partially explained. It so happened that for five centuries neither of the two coordinate lines of Spartan kings was ever without some male representatives, so that the sentiment of divine right, upon which their pre-eminence was founded, always proceeded in an undeviating channel. That sentiment never wholly died out in the tenacious mind of Sparta, but it became sufficiently subdued to occasion a demand for guarantees against abuse. If the senate had been a more numerous body, composed of a few principal families, and comprising men of all ages, it might perhaps have extended its powers as much as to check those of the king. But a council of twenty-eight old men, chosen indiscriminately from all Spartan families, was essentially an adjunct and secondary force. It was insufficient even as a restraint upon the king—still less was it competent to become his rival; and it served indirectly even as a support to him, by preventing the formation of any other privileged order powerful enough to be an overmatch for his authority. This insufficiency on the part of the senate was one of the causes which occasioned the formation of the usually reserved Council of Five, called the Ephors; originally a defensive board like the Roman Tribunes, intended as a restraint upon abuse of power in the kings, but afterwards expanding into a permanent and irresponsible Executive Directory. Assisted by endless dissensions between the two coordinate kings, the Ephors marshalled upon their power on every side, limited them to certain special functions, and even rendered them accountable and liable to punishment, but never aspired to abolish the dignity. That which the royal authority lost in extent (to borrow the just remark of king Theopompus¹) it gained in durability. The descendants of the twice Eurythapide and Prokle continued in possession of their double aspires from the earliest historical times down to the revolution of Agis III. and Kleomenes III.—generals of the military force, growing richer and richer, and renowned as well as influential in the state, though the Directory of Ephors were their superiors. And the Ephors became in time quite as despotic, in reference to internal affairs, as the kings could ever have been before them. For the Spartans

¹ *Ælian. Var. Hist.* v. 8, 2.

mind, deeply possessed with the feelings of command and obedience, remained comparatively insensible to the ideas of control and responsibility, and even aware to that open discussion and censure of public measures or officers which such ideas imply. We must recollect that the Spartan political constitution was both simplified in its character and aided in its working by the comprehensive range of the Lycurgean discipline with its rigorous equal pressure upon rich and poor, which availed many of the causes elsewhere productive of sedition—habituating the proud and most refractory citizen to a life of unvarying obedience—satisfying such demand as existed for system and regularity—rendering Spartan personal habits of life much more equal than even democratic Athens could parallel; but contributing at the same time to engender a contempt for talkers, and a dislike of methodical and prolonged speech, which of itself sufficed to exclude all regular interference of the collective citizens, either in political or judicial affairs.

Such were the facts at Sparta. But in the rest of Greece the primitive hereditary government was modified in a very different manner: the people outgrew, much more decidedly, that feeling of divine right and personal reverence which originally gave authority to the king. Willing submission ceased on the part of the people, and still more on the part of the inferior chiefs; and with it ceased the hereditary royalty. Something like a system or constitution came to be demanded.

Of this discontinuance of kingship, so universal in the political march of Hellas, one main cause is doubtless to be sought in the smallness and concentrated violence of each distinct Hellenic society. A single chief, perpetual and irresponsible, was never essential for the maintenance of union. In modern Europe, for the most part, the different political societies which grew up out of the Roman empire embraced each a considerable population and a wide extent of territory. The monarchical form presented itself as the only known means of union between the parts: the only visible and imposing symbol of a national identity. Both the military character of the Teutonic invaders, as well as the traditions of the Roman empire which they dismembered, tended towards the

Europe

establishment of a monarchical chief. The abolition of his dignity would have been looked upon as equivalent, and would really have been equivalent, to the breaking up the nation; since the maintenance of a collective union by means of general assemblies was so burdensome, that the kings themselves vainly tried to enact it by force, and representative government was then unknown.

The history of the middle ages—though exhibiting constant resistance on the part of powerful subjects, frequent deposition of individual kings, and occasional changes of dynasty—contains few instances of any attempt to maintain a large political aggregate united without a king, either hereditary or elective. Even towards the close of the last century, at the period when the federal constitution of the United States of America was first formed, many persons regarded¹ as an impossibility the application of any other system than the monarchical to a territory of large size and population, as as to combine union of the whole with equal privileges and securities to each of the parts. And it might perhaps be a real impossibility among any rude people, with strong local peculiarities, difficult means of communication, and habits of representative government not yet acquired. Hence throughout all the large nations of medieval and modern Europe, with few exceptions, the prevailing sentiment has been favourable to monarchy; but wherever any single city or district, or cluster of villages, whether in the plains of Lombardy or in the mountains of Switzerland, has acquired independence—wherever any small fraction has severed itself from the aggregate—the opposite sentiment has been formed, and the natural tendency has been towards some modification of republican government;² out of which Ireland, as in Greece, a despot has often

¹ See this subject discussed in the celebrated collection of letters, called the *Federalist*, written in 1787, during the time when the federal constitution of the United States of America was under discussion—Letters, 9, 10, 16, by Mr. Madison.

³ David Hume, in his Essay XV.

(vol. I. p. 105, ed. 1793), after remarking "that all kinds of government, free and despotic, seem to have undergone an equal tendency, as compared with mankind's great change in the latter, with regard both to the original character of the government, and growth to size."

⁴ But though all kinds of government be improved in various things, yet monarchical government seems to have made the greatest advances towards perfection. It may now be supposed of civilized nations, what

been engendered, but always through some unnatural mixture of force and fraud. The feudal system, evolved out of the disordered state of Europe between the eighth and thirteenth centuries, always presumed a permanent vassal, vested with large rights of a natural personal and proprietary character over his vassals, though subject also to certain obligations towards them: the immediate vassals of the king had subordinate vassals of their own, to whom they stood in the same relation: and in this hierarchy¹ of power, property, and territory blended together, the rights of the chief, whether king, duke, or baron, were conceived as constituting a status apart, and neither conferred originally by the grant, nor revocable at the pleasure of those over whom they were awarded. This view of the essential nature of political authority was a point in which the three great elements of modern European society—the Teutonic, the Roman, and the Christian—all concurred, though each in a different way and with different modifications; and the result was, a variety of attempts on the part of subjects to compromise with their chief, without any idea of substituting a delegated executive in his place. On particular points of these feudal associations there grew up gradually towns with a concentrated population, among whom was seen the remarkable combination of a republican feeling, demanding collective and responsible management in their own local affairs, with a necessity of union and subordination towards the great monarchical whole; and hence again arose a new force tending both to maintain the form, and to presterminate the march of kingly government.² And it has been found

was formerly said in praise of negative ideas, that they are a government of laws, not of men. They are based respectively on order, justice, and common to all, including slaves. Property is taken away, industry encouraged; the wife benefits; and the prince lives according to his subjects, like a father among his children. There are no laws, and every man for his neighbour, and the husband should protect, assist, and assist, in Europe; and the king is not to be made, but to be made, that there have been in the whole the thousand monarchies or tyrannies, as the people would have called them; not of these there has not been one, and even Philip II. of Spain, so bad as Christian, Caligula,

Max, Domitian, who were four in twelve amongst the Roman emperors, it must however be confessed, that though despotic governments have monopolised space & position even in antiquity and modernity, there are still much inferior. Our modern despots and tyrants have, more liberality and moderation than the ancient, but have not as yet been able to overcome entirely the disadvantages of that form of government.

See the *Letters of M. Guizot*, *Chambre d'Orateurs*, *Madame*, *Letter* II. vol. II. p. 171, edit. 1837.

causes peculiar to those societies, whilst in the Hellenic societies such causes had no place—in order that we may approach Hellenic phenomena in the proper spirit, and with an impartial estimate of the feeling universal among Greeks towards the idea of a king. The primitive sentiment entertained towards the heroic king died out, passing first into indifference, next—after experience of the despot—into determined antipathy.

To an historian like Mr. Mitford, full of English ideas respecting government, this anti-monarchical feeling appears of the nature of insanity, and the Greek communities like madmen without a keeper: while the greatest of all benefactors is the hereditary king who conquers them from without—the second best is the home despot who rules the acropolis and puts his fellow-citizens under control. There cannot be a more certain way of misinterpreting and distorting Greek phenomena than to read them in this spirit, which reverses the maxims both of prudence and morality current in the ancient world. The hatred of kings as it stood among the Greeks (whatever may be thought about a similar feeling now) was a pre-accident virtue, flowing directly from the noblest and wisest part of their nature. It was a consequence of their deep conviction of the necessity of universal legal restraint; it was a direct expression of that regulated sociality which required the control of individual passion from every one without exception, and most of all from him to whom power was confided. The conception which the Greeks formed of an unrequitable One, or of a king who could do no wrong, may be expressed in the pregnant words of Herodotus: "He subverts the customs of the country: he violates women: he puts men to death without trial." No other conception of the probable tendencies of kingship was justified either by a general knowledge of human nature, or by political experience as it stood from Salamis downwards: no other feeling than abhorrence could be entertained for the character as conceived: no other than a man of unprincipled ambition would ever seek to invest himself with it.

Our larger political experience has taught us to modify this

1 Mitford, III. 15. Compared to cruel tyrants, and furious passions, cruelties to despots.

opinion, by showing that under the conditions of monarchy in the best governments of modern Europe the enormities described by Herodotus did not take place—and that it is possible, by means of representative constitutions acting under a certain force of manners, customs, and historical recollection, to obviate many of the weaknesses likely to flow from proclaiming the duty of peremptory obedience to an hereditary and irresponsible king, who cannot be changed without extra-constitutional force. But such larger observation was not open to Aristotle, the wisest as well as the most cautious of ancient theorists: nor if it had been open, could he have applied with assurance its lessons to the governments of the single cities of Greece. The theory of a constitutional king, especially, as it exists in England, would have appeared to him impossible: to establish a king who will reign without governing—in whose name all government is carried on, yet whose personal will is in practice of little or no effect—except from all responsibility, without making use of the exception—receiving from every one unmeasured demonstrations of homage, which are never translated into act except within the bounds of a known law—surrounded with all the paraphernalia of power, yet acting as a passive instrument in the hands of ministers marked out for his choice by indications which he is not at liberty to resist. This remarkable combination of the fiction of supernatural grandeur and honour with the reality of an inviolable strait-waistcoat, is what an Englishman has in his mind when he speaks of a constitutional king. The events of our history have brought it to pass in England, amidst an aristocracy the most powerful that the world has yet seen—but we have still to learn whether it can be made to exist elsewhere, or whether the occurrence of a single king, at once able, aggressive, and resistive, may not suffice to break it up. To Aristotle, certainly, it could not have appeared otherwise than unintelligible and impossible: not likely even in a single case—but altogether inconceivable as a permanent system, and with all the diversities of temper inherent in the successive members of an hereditary dynasty. When the Greeks thought of a man exempt from legal responsibility, they conceived him as really and truly such, in deed as well as in name, with a defenceless community exposed to his oppressions; and their fear and hatred of him were increased by their reverence for a govern-

ment of equal law and free speech,¹ with the ascendancy of which their whole hopes of security were associated,—in the democracy of Athens more perhaps than in any other portion of Greece. And this feeling, as it was one of the best in the Greek mind, so it was also one of the most widely spread,—a point of unanimity highly valuable amidst so many points of dissension. We cannot construe or criticise it by reference to the feelings of modern Europe, still less to the very peculiar feelings of England, respecting kingship : and it is the application, sometimes explicit and sometimes tacit, of this unassailable standard, which renders Mr. Mitford's appreciation of Greek politics so often incorrect and unfair.

When we try to explain the course of Grecian affairs, not from the circumstances of other societies, but from those of the Greeks themselves, we shall see good reason for the discontinuance as well as for the dislike of kingship. Had the Greek mind been as stationary and unimproving as that of the Orientals, the discontent with individual kings might have led to no other change than the deposition of a bad king in favour of one who promised to be better, without ever extending the views of the people to any higher conception than that of a personal government. But the Greek mind was of a progressive character, capable of conceiving and gradually of realising extended social combinations. Moreover it is in the nature of things that any government—regal, oligarchical or democratical—which embraces only a single city, is far less stable than if it embraced a wider surface and a larger population. When that semi-religious and

Change which led to the growth of that sentiment.

¹ Thucydides (ii. 37) states plainly the wish of a democracy, as contrasted in Greece; the sentiment is lost:—

οἱ δὲ ῥητορὶς ὑπερβαίνειν οὐκ ἔστιν· ὅτι, ὡς οἱ ῥητορὶς, οὐδὲν ἄλλο ἔστιν ἢ τὸ, οἱ ἄλλοι ἀνθρώποις ὡς οἱ ἄλλοι ἀνθρώποις.

Compare Herod. ii. 171. See also the discussion in Livy, viii. 15, 16, 17, and 18, in which the rule of the king is discussed in connection with the appointment of laws: compare also iv. 1, 2, 3. The passage quoted is a king according to law: in, in his judgment, no king at all: 'O pater pater, non est rex: sed rex est, qui legem habet, non qui legem facit.' (Liv. viii. 15, 16, 17, 18.)

most, no king at all: 'O pater pater, non est rex: sed rex est, qui legem habet, non qui legem facit.' (Liv. viii. 15, 16, 17, 18.)

Respecting Livy's account, see Livy—Roman History and Civil Society—an account of Livy's account, see Livy, viii. 15, 16, 17, 18. Thucyd. ii. 37; (Thucyd. ii. 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

See also Livy, viii. 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

mechanical calculations, which made up for the personal deficiencies of the heroic king, became too feeble to serve as a working principle, the petty prince was in too close contact with his people, and too handsily furnished out in every way, to get up a prestige or delusion of any other kind. He had no means of exercising their imaginations by that combination of pomp, seclusion, and mystery, which Herodotus and Xenophon so well appreciate among the artifices of kingship.¹ As there was no more footing upon which a perpetual chief could rest his power, so there was nothing in the circumstances of the community which rendered the maintenance of such a dignity necessary for stable and effective union.² In a single city, and a small dependent community, collective deliberation and general rules, with temporary and responsible magistrates, were practicable without difficulty.

To maintain an irresponsible king, and then to contrive arrangements which shall cut him the benefits of responsible government, is in reality a highly complicated system, though, as has been remarked, we have become familiar with it in modern Europe. The more simple and obvious change is, to substitute one or more temporary and responsible magistrates in place of the king himself. Such was the course which affairs took in Greece. The inferior chiefs, who had originally served as council to the king, found it possible to supersede him, and to alternate the functions of administration among themselves; retaining probably the occasional convocation of the general assembly, as it had existed before, and with as little practical efficacy. Such was in substance the character of that mutation which occurred generally throughout the Greek states, with the exception of Sparta: kingship was abolished, and an oligarchy took its place—a council ^{Change to oligarchical government.} deliberating collectively, deciding general matters by the majority of votes, and selecting some individuals of their

¹ The Government of Persia in the first Median king is Herodotus, I. 95, evidently an outline drawn by Greek imagination; also the Government of Persia, ed. L. 2, 20; ed. L. 2, 21-24; ed. L. 2, . . . of which also Herodotus (Ibid.) speaks. This describes the Government of Persia which was a monarchy, and not a republic as the Greeks

thought, &c.

² David Hunt, Essay, &c., On the Rise and Progress of the Arts and Sciences, p. 10, ed. 1768. The effects of the gradual improvement of industry upon the nature of the government, and the transition to hereditary monarchy, are explained in David Hunt, Constitution and Liberty of the State in Great Britain, &c. 1768.

own body as temporary and accountable administrators. It was always an oligarchy which arose on the debasement of the hereditary kingdom. The age of democratical movement was not the distant, and the condition of the people—the general body of peasant—was not immediately altered, either for better or worse, by the revolution. The small number of privileged persons, among whom the kingly attributes were distributed and put in rotation, were those nearest in rank to the king himself; perhaps members of the same large gens with him, and pretending to a common divine or hereditary descent. As far as we can make out, this change seems to have taken place in the natural course of events and without violence. Sometimes the kingly lineage died out and was not replaced; sometimes, on the death of a king, his son and successor was acknowledged¹ only as archon—or perhaps set aside altogether to make room for a Pnyta or president out of the men of rank around.

At Athens, we are told that Kodros was the last king and that his descendants were recognised only as archons for life. After some years, the archons for life were replaced by archons for ten years, taken from the body of Eupatrids or nobles; subsequently, the duration of the archonship was further shortened to one year. At Corinth, the ancient kings are said to have passed in the manner into the oligarchy of the Bacchiads, out of whom an annual Pnytas was chosen. We are only able to make out the general fact of such a change, without knowing how it was brought about—our first historical acquaintance with the *Offian* cities beginning with these oligarchies.

Such oligarchical governments, varying in their details but analogous in general features, were common throughout the cities of Greece Proper as well as of the colonies, throughout the

seventh century B.C. Though they had little immediate tendency to limit the mass of the freemen, yet when we compare them with the antecedent hereditary government, they indicate an important advance—the first adoption of a deliberate and preconcerted system in the management of public affairs.¹ They exhibit the first evidence of new and important political ideas in the Greek mind—the separation of legislative and executive powers; the former vested in a collective body, not merely deliberating but also finally deciding—while the latter is confined to temporary individual magistrates, responsible to that body at the end of their period of office. We are first introduced to a community of citizens, according to the definition of Aristotle—men qualified, and thinking themselves qualified, to take turns in command and obedience. The collective sovereign, called The City, is then constituted. It is true that this first community of citizens comprised only a small proportion of the men personally free; but the ideas upon which it was founded began gradually to dawn upon the minds of all. Political power had lost its hereditary character, and had become an attribute legally communicable as well as detachable to certain definite souls: and the ground was thus laid for those thousand questions which agitated so many of the Grecian cities during the ensuing three centuries, partly respecting its apportionment, partly respecting its employment,—questions sometimes raised among the members of the privileged oligarchy itself, sometimes between that order as a whole and the non-privileged Masses. The seeds of those popular movements, which called forth so much profound emotion, so much bitter antipathy, so much energy and talent, throughout the Grecian world, with different modifications in each particular city, may thus be traced back to that early revolution which created the primitive oligarchy upon the ruins of the hereditary kingdom.

¹ Aristotle, *Polit.* iii. 2, 3, 4, and 5, has shown the early kings had lost their hereditary character, and were chosen annually, which evidence (see also *ibid.* ii. 4) is confirmed by the fact, that the king was elected annually, and not for life.

Book ii. 2, however, the great

object for which the Athenians began to limit the mass of the freemen, in the seventh century, was the desire to secure a more equal and ultimately decided character of government, and a greater participation of the mass in the management of the state.

Such changes indicate an advance in the Greek mind.

hire a troop of retainers and seize the acropolis. And there were examples, though rare, of a fourth variety—the literal descendant of the ancient kings—who, instead of suffering himself to be restricted or placed under control by the oligarchy, found means to subjugate them, and to exert by force an ascendancy as great as that which his forefathers had enjoyed by consent. To these must be added, in several Grecian states, the *Phylarchæ* or *Diarchæ*, a citizen formally invested with supreme and irresponsible power, placed in command of the military force, and armed with a standing body-guard, but only for a time named, and in order to deal with some urgent peril or serious internal dissension.¹ The person thus created, always enjoying a large measure of confidence, and generally a man of ability, was sometimes so successful, or made himself so essential to the community, that the term of his office was prolonged, and he became practically despot for life; or even if the community were not disposed to concede to him this permanent ascendancy, he was often strong enough to keep it against their will.

Such were the different modes in which the numerous Greek despots of the seventh and sixth centuries B.C. acquired their power. Though we know thus much in general terms from the brief statements of Aristotle, yet unhappily we have no contemporary picture of any one of these oligarchies, so as to give us the means of appreciating the change in detail. Of the persons who, possessing inherited kingly dignity, stretched their paternal power so far as to become despots, Aristotle gives us *Phalaris* of *Acragas* as an example, whose reign has been already named. Of those who made themselves despots by means of official power previously held under an oligarchy, he names *Phalaris* at *Agrigenton* and the despots at *Milæta* and other cities of the *Ionian* Greeks: among others who raised themselves by becoming demagogues, he specifies *Pericles* in the *Attican* town of *Leontini*, *Erythra* at *Corinth*, and *Pleistarchus* at *Athens*;² of *Phylarchæ* or

Aristotle refers to one of the oligarchies

between the people—properly so called, the general mass of freemen—and the oligarchy : indeed the demagogue-dispute is interesting as the first evidence of the growing importance of the people in political affairs. The demagogue stood forward as representing the feelings and interests of the people against the governing few, probably availing himself of some special case of ill-usage, and taking pains to be conciliatory and generous in his own personal behaviour. When the people by their armed aid had enabled him to overthrow the existing rulers, they had thus the satisfaction of seeing their own chief in possession of the supreme power, but they acquired neither political rights nor increased securities for themselves. What measure of positive advantage they may have reaped, beyond that of seeing their previous oppressors humiliated, we know too little to determine ; but even the worst of despots was more formidable to the rich than to the poor ; and the latter may perhaps have gained by the change, in comparative importance, notwithstanding their share in the rigorous and exactions of a government which had no other permanent foundation than armed force.

A remark made by Aristotle deserves special notice here, as illustrating the political advance and education of the Greek communities. He draws a marked distinction between the early demagogues of the seventh and sixth centuries, and the later demagogues, such as he himself, and the generations immediately preceding, had witnessed. The former was a military chief, daring and full of resources, who took arms at the head of a body of popular insurgents, put down the government by force, and made himself the master both of those whom he deposed and of those by whose aid he deposed them: while the latter was a speaker, possessed of all the talents necessary for moving an audience, but neither inclined to, nor qualified for, armed attack—accomplishing all his purposes by pacific and constitutional methods. This valuable change—substituting discussion and the vote of an assembly in place of a

that goodwill between the donor and the government. Community and policy leaders like old disparities was a local initiative. Temporary, directed donors as the disparity will get down.

Athens a short time before the Persian war, as a development of the seed planted by Solon.

As far as our imperfect information enables us to trace, these early oligarchies of the Greek states, against which the first corrupting despots contended, contained in themselves more regulative elements of inequality, and more mischievous barriers between the component parts of the population, than the oligarchies of later days. What was true of Hellas as an aggregate, was true, though in a less degree, of each separate community which went to compose that aggregate. Each included a variety of clans, tribes, religious brotherhoods, and local or professional sections, very imperfectly cemented together: so that the oligarchy was not (like the government so denominated in subsequent times) the government of a rich few over the less rich and the poor, but that of a peculiar order, sometimes a Patrician order, over all the remaining society. In such a case the subject Many might number opulent and substantial proprietors as well as the governing Few; but these subject Many would themselves be broken into different heterogeneous fractions not heartily sympathizing with each other, perhaps not intermarrying together, nor partaking of the same religious rites. The country-population, or villagers who tilled the land, seem in these early times to have been held in a painful dependence on the great proprietors who lived in the fortified towns, and to have been distinguished by a dress and habits of their own, which often drew upon them an unfriendly nickname. These town proprietors often composed the governing class in early Greek states; while their subjects consisted—1. Of the dependent cultivators living in the district around, by whom their lands were tilled. 2. Of a certain number of small self-working proprietors (*hecteyres*), whose possessions were too scanty to maintain more than themselves by the labour of their own hands on their own plot of ground—existing either in the country or the town, as the case might be. 3. Of those who lived in the town, having not land, but exercising handicraft, arts, or commerce.

The governing proprietors went by the name of the *Gignary* or *Gebnary*, according as the Doric or Ionic dialect might be used in describing them, since they were found in states belonging

to one race as well as to the other. They appear to have constituted a close order, transmitting their privileges to their children, but admitting no new members to a participation. The principle called by Greek writers a *Timocracy* (the apportionment of political rights and privileges according to comparative property) seems to have been little, if at all, applied in the earlier times. We know no example of it earlier than Solon. So that by the natural multiplication of families and mutation of property, there would come to be many individual citizens possessing no land at all,¹ and perhaps worse off than those small freeholders who did not belong to the order; while some of these latter freeholders, and some of the artisans and traders in the towns, might at the same time be rising in wealth and importance.

General
view of the
Grecian—
a close
order of
citizens as
just pro-
prietors.

Under a political classification such as this, of which the repulsive inequality was aggravated by a rude state of manners, and which had no flexibility to meet the changes in relative position amongst individual inhabitants, discontent and anarchy were unavoidable. The earliest despot, usually a wealthy man of the disfranchised class, became champion and leader of the malcontents.² However oppressive his rule might be, at least it was an oppression which bore with indiscriminate severity upon all the fractions of the population; and when the hour of reaction against him or against his successor arrived, so that the common enemy was expelled by the united efforts of all, it was hardly possible to revive the pre-existing system of exclusion and inequality without some considerable alterations.

As a general rule, every Greek city-community included in its population, independent of bought slaves, the three *Classes of elements* above noticed,—considerable land-proprietors *the people*, with rustic dependents, small self-working proprietors, and town-artisans,—the three elements being found everywhere in different proportions. But the progress of events in Greece, from the seventh century B.C. downwards, tended continually to devalue the comparative importance of the two latter; while in those early days the ascendancy of the former was at its maximum, and

¹ Like various members of the Polish or Hungarian nobles in recent times.

² Thucyd. i. 32.

altered only to decline. The military force of most of the cities was at first in the hands of the great proprietors, and formed by them. It consisted of cavalry, themselves and their retainers, with houses fed upon their lands. Such was the primitive oligarchical militia, as constituted in the seventh and sixth centuries B.C.¹ at Chalkis and Eretria in Euboea, as well as at Kalypolis and other cities in Ionia, and as it continued in Thessaly down to the fourth century B.C. But the gradual rise of the small proprietors and town-artisans was marked by the substitution of heavy-armed infantry in place of cavalry. Moreover a further change not less

rise of the heavy-armed infantry and of the free military citizen took the supremacy in all cities.

important took place, when the resistance in Persia led to the great multiplication of Grecian ships of war, manned by a host of seamen who dwelt congregated in the maritime towns. All these movements in the Grecian communities tended to break up the close and exclusive oligarchies with which our first historical knowledge commences; and to conduct them, either to oligarchies rather more open, embracing all men of a certain amount of property—or else to democracies. But the transition in both cases was usually attained through the interlude of the despot.

In enumerating the distinct and unharmonious elements of which the population of these early Grecian communities was made up, we must not forget one further element which was to be found in the Dorian states generally—men of Dorian origin. The Dorians were in all cases immigrants and conquerors, establishing themselves along with and at the expense of the prior inhabitants. Upon what terms the co-habitation was established, and in what proportions invaders and invaded came together—we have little information. Important as this circumstance is in the history of these Dorian communities, we know it only as a general fact, without being able to follow its results in detail. But we are enough to satisfy ourselves that in those revolutions which overthrew the oligarchies both at Corinth and Sikyon—perhaps also at Megara—the Dorians

¹ *Antiqu. Pol.* iv. 1, 2, 11, 12. *Memorie, Fragm. v. Epistolographica*, *Antiqu. Rom. Pol.* *Fragm.* vii. p. 125; *Strabo*, v. p. 42.

We learn from the narrative of Herodotus that the tribe to which Kleisthenes¹ himself (and of course his progenitors Orthagoras and the other Orthagorids also) belonged, was distinct from the three Dorian tribes, who have been already named in my previous chapter respecting the Lykurgean constitution at

Sparta—the Hyllidæ, Pamphyli, and Dymanidæ. We also learn that these tribes were common to the Sikyonians and the Argians. Kleisthenes, being in a state of bitter hostility with Argos, tried in several

ways to abolish the points of community between the two. Sikyon, originally decided by settlers from Argos, was included in the "lot of Minerva," or among the towns of the Argive confederacy. The coherence of this confederacy had become weaker and weaker, partly without doubt through the influence of the predecessors of Kleisthenes; but the Argives may perhaps have tried to revive it, thus placing themselves in a state of war with the latter, and inducing him to disconnect palpably and violently Sikyon from Argos. There were two anchors by which the connection held—first, legendary and religious sympathy; next, the civil rites and domestications current among the Sikyonian Dorians: both of them were torn up by Kleisthenes. He changed the names both of the three Dorian tribes, and of that non-Dorian tribe to which he himself belonged: the last he called by the complimentary title of *Archeidæ* (ancestors of the people); the first three he styled by the insulting names of *Hyræ*, *Oreæ*, and *Chæreæ*, from the three Greek words signifying a boar, an ox, and a little pig. The extreme bitterness of such an insult can only be appreciated when we deny to ourselves the reverence with which the tribes in a Greek city regarded the hero from whom their name was borrowed. That these new designations, given by Kleisthenes, involved an intentional degradation of the Dorian tribes as well as an assumption of superiority for his own, is affirmed by Herodotus, and seems well deserving of credit.

But the violence of which Kleisthenes was capable in his anti-Argive antipathy is manifested still more plainly in his proceedings with respect to the hero Alcidas and to the legendary sentiment of the people. Something has already been said in a

¹ Herod. i. 65.

former chapter¹ about this remarkable incident, which must however be here again briefly noticed. The hero Admetos, whose chapel Hierokles himself saw in the Sikyonian agoræ, was common both to Argos and to Sikyón, and was the object of special reverence at both. His figure in the legend as king of Argos, and as the guardian and heir of Polykos king of Sikyón. He was the unhappy leader of the two sieges of Thebes, so famous in the ancient epics. The Sikyonians listened with delight both to the exploits of the Argives against Thebes, as celebrated in the recitations of the epical rhapsodes, and to the successful tale of Admetos and his family misfortunes, as sung in the tragic choros. Kleisthenes not only forbade the rhapsodes to come to Sikyón, but further resolved to expel Admetos himself from the country—such is the literal Greek expression,² the hero himself being believed to be actually present and dwelt among the people. He first applied to the Delphian oracle for permission to carry this banishment into direct effect; but the Pythian priestess returned an answer of indignant refusal,—“Admetos is king of the Sikyonians, but there art a ruffian.” Thus baffled, he put in practice a stratagem calculated to induce Admetos to depart of his own accord.³ He sent to Thebes to beg that he might be allowed to introduce into Sikyón the hero Melanippos; and the permission was granted. Now Melanippos—being celebrated in the legend as the principal champion of Thebes against Admetos and the Argives besiegers, and as having slain both Mikleios the brother, and Tylos the son-in-law, of Admetos—was personally odious to the latter. Kleisthenes brought this anti-national hero into Sikyón, assigning to him consecrated ground in the prytaneion, or government-house, and even in that part which was most strongly fortified⁴ (for it seems that Admetos was conceived as likely to assail and to battle with the intruder); moreover he took away both the tragic choros and the sacrifices from Admetos, assigning the former to the god Dionysos, and the latter to Melanippos.

The religious manifestations of Sikyón being thus transferred

from Alcides to his mortal foe, and from the coast of Argolis in the siege of Thebes to that of the Thebans, Alcides was presumed to have voluntarily retired from the field. And the purpose which Kleisthenes contemplated, of breaking the community of feeling between Sikyia and Argos, was in part accomplished.

A ruler who could do such violence to the religious and legendary sentiment of his community may well be supposed capable of inflicting that deliberate insult upon the Dorian tribes which is implied in their new appellations. As we are uninformd, however, of the state of things which preceded, we know not how far it may have been a retaliation for previous insult in the opposite direction. It is plain that the Dorians of Sikyia maintained themselves and their ancient tribes quite apart from the remaining community; though what the other constituent portions of the population were, or in what relation they stood to these Dorians, we are not enabled to make out. We hear indeed of a dependent rural population in the territory of Sikyia, as well as in that of Argos and Epidauria, analogous to the *Hekots* in Laconia. In Sikyia this class was termed the *Karyolophoi* (*cloak-men*) or the *Katholophoi*, from the thick woollen mantle which they wore, with a *shepota* sewn on to the skirt: in Argos they were called *Gynakoi*, from their not possessing the military panoply or the use of regular arms: in Epidauria, *Kontipoi* or the *Dusty-footed*.¹ We may conclude that a similar class existed in Corinth, in Megara, and in each of the Dorian towns of the Argolis Akra. But besides the Dorian tribes and these rustic, there must probably have existed non-Dorian proprietors and town-residents, and upon them we may suppose that the power of the Orthagorides and of Kleisthenes was founded, perhaps more friendly and indulgent to the rustic sort than that of the Dorians had been previously. The moderation which Aristotle ascribes to the Orthagorides generally is belied by the proceedings of Kleisthenes. But we may probably believe that his proceedings, content with maintaining the real predominance of the non-Dorian over the

As an analogy to this name of *Kontipoi*, we may notice the ancient name of leather pulled *Contes* of *Par* given in England, *Parapros*.

self was then revived in Skythia, since it existed in the time of Herodotus.

Of the war which Kleisthenes helped to conduct against Klerka, for the protection of the Delphian temple, I shall speak in another place. His death and the cessation of his dynasty seem to have occurred about 580 B.C., as far as the chronology can be made out.¹ That he was put down by the Spartans (as E. F. Herman, O. Müller, and Dr. Thirlwall suppose)² can be hardly admitted consistently with the narrative of Herodotus, who mentions the continuance of the harrowing names imposed by him upon the Dorians tribes for many years after his death. Now, had the Spartans forcibly interfered for the suppression of his dynasty, we may reasonably presume that, even if they did not restore the decided preponderance of the Dorians in Skythia, they would at least have rescued the Dorian tribes from this obvious ignominy. But it

¹ The chronology of Ctesias and his dynasty is perplexing. The contemporary affairs of Media at Ctesias is marked by 492 B.C., and this event three years the beginning of Ctesias to a period between 490-480. There we are told by Ctesias that the Median dynasty lasted 100 years, but it must have lasted probably somewhat longer, for the date of Kleisthenes can hardly be placed earlier than 590 B.C. The war against Klerka (492 B.C.) and the Persian victory (490 B.C.) had within 10 years put the marriage of his daughter Agastis with Megasthenes son of Klerka, he will rather than 480 B.C. 10 or 12 years for Kleisthenes the beginning the end of that marriage, whereas the chronological position of Agastis is 480 or 470 B.C. Whether the daughter whom Megasthenes gave in marriage to Perikles (about 460 B.C.) was also the offspring of that marriage, as Herodotus asserts, we do not know.

Megasthenes was the son of that Agastis who had married the daughter sent by Croesus of Lydia into Persia to secure the alliance of Cyrus, and whom Cyrus married as likely as to make the Persian monarch (about 540 B.C.) and the marriage of Megasthenes was the first generation after the subjugation of Lydia, and it must have been (about 540 B.C.). Now the reign of Croesus

extended from 560-540 B.C., and his deposition as the crown in Greece appears to have taken place about 540 B.C. If this chronology is admitted, the marriage of Megasthenes with the daughter of the Persian King must have taken place well considerably after 480 B.C. See the note, but not very satisfactory, note of Ctesias, at Herodotus, v. 30.

And I shall show grounds for believing, when I discuss the intercourse between Lydia and Greece, that Herodotus in his narrative of Media indicates very considerably the reign and succession of Croesus as well as of Kleisthenes. This is a conjecture of Skias which I think very just, and which is confirmed with some probability by what we find here stated about the succession of the Alkibiades. For it is evident that Herodotus here connects the adventures between Alkibiades and Croesus as having occurred one generation before the Persian war, and that the latter is the only time between Megasthenes and the daughter of Kleisthenes. That conjecture will thus stand about 480-470 B.C., which would be about the time of the supposed marriage of Megasthenes with the daughter of Croesus, describing the marriage of the prince and princess of the latter.

² Thirlwall, *History of Greece*, vol. i. p. 11; Thirlwall, *History of Greece*, vol. i. p. 11; Thirlwall, *History of Greece*, vol. i. p. 11; Thirlwall, *History of Greece*, vol. i. p. 11.

seems doubtful whether Kleisthenes had any son: and the extraordinary importance attached to the marriage of his daughter Agariê, whom he bestowed upon the Athenian Megakles of the great family Alkmeonidae, seems rather to evince that she was an heiress—not to his power, but to his wealth. There can be no doubt as to the fact of that marriage, from which was born the Athenian leader Kleisthenes, afterwards the author of the great democratical revolution at Athens after the expulsion of the Peisistrakids; but the lively and amusing details with which Herodotus has surrounded it bear much more the stamp of romance than of reality. Dress up apparently by some ingenious Athenian as a compliment to the Alkmeonid lineage of his city, which comprised both Kleisthenes and Periklês, the narrative commemorates a marriage-rivalry between that lineage and another noble Athenian house, and at the same time gives a mythical explanation of a phrase commonly proverbial at Athens—"Hippokleides don't care!"

Plutarch numbers Alkibiades of Sikyon¹ among the despots put down by Sparta: at what period this took place, or how it is to

¹ Plutarch, vi. 70—72. The location assigned to—*de Aegæis* (eventually) contains the allusion to it in the *Periplus* of Skylax, c. 31; *Geographica*, vi. 11; Strabo, iii. 48, ed. Bœttig.

The conversation of the authors of the histories of Kleisthenes from all parts of Greece, and the distinctive work and character of each, is perfectly well, as well as the Spartan law whereby Alkmeonidae holds both the tower at Kleisthenes and the hand of a sword which he was in the point of obtaining. It seems to be a story framed upon the model of various incidents in the old epic, especially the capture of Helen.

On one point, however, the authors of the three seem to have agreed: both the elegance of chronology and the historical position and feelings of the house Kleisthenes, the among the houses who possess themselves of Sikyon is considerably with the history of the latter, one to Lakhida, son of Phaidon the king of Argos. Now the history and Alkmeonidae belongs towards Argos, which Herodotus explains in another place to the progenitor Kleisthenes, whence it all but

impossible that the one of any king of Argos could have become a candidate for the hand of Agariê. I have already mentioned the violence which Kleisthenes did to the legendary ancestry of his native town, and the resulting manner which he put upon the Alkmeonidae tradition: all under the pretence of a strong anti-Spartan feeling. Next, as to ALKIBIADÊS: Phaidon king of Argos lived some time between 700—750; and his son was never known to be a candidate for the daughter of Kleisthenes, whose reign falls 600—550 B.C. (Herodotus never here in the usual manner in cases of difficulty, they compare a second and later Phaidon, whom they affirm that Herodotus has confounded with the first, or they alter the text of Herodotus by supposing in place of "son of Phaidon," "descendant of Phaidon." But neither of these suggestions goes upon my knee; the first of Herodotus is accurate and clear, and the second Phaidon is nowhere else authenticated. See Lœhrer and Wachter, *op. cit.*; compare also Part II. ch. 1 of this History.

² Plutarch, *De Grevi*, *Malaga*, c. 32, p. 404.

be connected with the history of Kleisthenes as given in Herodotus, we are unable to say.

Contemporaneous with the Cynagorides in Sikyon—but beginning a little later and closing somewhat earlier—we find the despots Kypselos and Periandros at Corinth. The former appears as the subverter of the oligarchy called the Bacchiads. Of the manner in which he accomplished his object we find no information; and this historical blank is inadequately filled up by various religious legends and stories, foreshadowing the rise, the harsh rule, and the dethronement, after two generations, of these powerful despots.

According to an idea deeply seated in the Greek mind, the destruction of a great prince or of a great power is usually signified by the gods beforehand, though either through hardness of heart or inadvertence no heed is taken of the warning. In reference to Kypselos and the Bacchiads, we are informed that Melos, the ancestor of the former, was one of the original settlers at Corinth who accompanied the first Dorian chief Alkidas, and that Alkidas was in vain warned by an oracle not to admit him.¹ Again too, immediately before Kypselos was born, the Bacchiads received notice that his mother was about to give birth to one who would prove their ruin: the dangerous infant escaped destruction only by a hair's breadth, being preserved from the intent of his destroyers by lucky concealment in a chest. Ledaia, the mother of Kypselos, was daughter of Amphion, who belonged to the gens or sept of the Bacchiads; but she was lame, and none of the gens would consent to marry her with that deformity. Erech, son of Erechonides, who became her husband, belonged to a different, yet hardly less distinguished, heroic genealogy. He was of the Laptios, descended from Ereos, and dwelling in the Corinthian deme called Petra. We see then that Kypselos was not only a high-born man in the city, but a Bacchiad by half-birth: both of these circumstances were likely to make exclusion from the government intolerable to him. He rendered himself highly popular with the people, and by their aid overthrew and expelled the Bacchiads, continuing as despot at Corinth for

¹ Pausan. II. 2, 2.

thirty years until his death (a.c. 834—835). According to Aristotle, he maintained throughout life the same constancy of behaviour by which his power had first been acquired; and his popularity was so effectually sustained that he had never any occasion for a body-guard. But the Corinthian oligarchy of the century of Herodotus (whose tale that historian has embodied in the action of the Corinthian survey *Boothia*² to the Spartans) gave a very different description, and depicted Kypselos as a cruel ruler, who banished, robbed, and murdered by wholesale.

His son and successor Pericles, though energetic as a warrior, distinguished as an encourager of poetry and arts, and even numbered by some among the seven wise men of Greece, is nevertheless uniformly represented as oppressive and inflexible in his treatment of subjects. The revolting stories which are told respecting his private life, and his relations with his mother and his wife, may for the most part be regarded as calumnies suggested by alien associations with his memory. But there seems good reason for imputing to him tyranny of the worst character. The imaginary machine of prostitution, so often acted upon by Greek despots, was traced back in ordinary belief to Pericles¹ and his contemporary Themistocles, despot of Miletus. He maintained a powerful body-guard, shed much blood, and was scrupulous in his exactions, a part of which was employed in votive offerings at Olympia. Such munificence to the gods was considered by Aristotle and others as part of a deliberate system, with the view of keeping his subjects both hard at work and poor. On one occasion we are told that he invited the women of Cleonæ to assemble for the celebration of a religious festival, and then stripped them of their rich attire and ornaments. By some later writers he is painted as the stern foe of everything like luxury and dissolute habits—enforcing industry, compelling every man to render account of his means of livelihood, and causing the progressors of Cleonæ to be thrown into the sea.²

Though the general features of his character, his cruel tyranny no less than his vigour and ability, may be sufficiently relied on, yet the particular incidents connected with his name are all uniformly fabulous. The most terrible of all seems to be the tale of his insupportable quarrel with his son and his brutal treatment of many noble Eorkyran youths, as related in Herodotus. Periander is said to have put to death his wife Melissa, daughter of Peisias, despot of Epilaurum. His son Lykophron, informed of this deed, contracted an invincible antipathy against him. Periander, after vainly trying both by rigour and by conciliation to conquer this feeling on the part of his son, sent him to reside at Eorkyra, then dependant upon his rule; but when he found himself growing old and disabled, he recalled him to Corinth, in order to ensure the continuance of the dynasty. Lykophron still obstinately declined all personal communication with his father, upon which the latter desired him to come to Corinth, and engaged himself to go over to Eorkyra. He terrified with the Eorkyranes at the idea of a visit from this formidable old man, that they put Lykophron to death—a deed which Periander avenged by sending three hundred youths of their noblest families, and sending them over to the Lydian king Alyattes at Sardis, in order that they might be educated and made to serve as eunuchs. The Corinthian vessels in which the youths were despatched fortunately touched at Semea in the way; where the Samians and Eubians, shocked at a proceeding which outraged all Hellenic sentiment, contrived to rescue the youths from the miserable fate intended for them, and after the death of Periander sent them back to their native island.

While we turn with displeasure from the political life of this man, we are at the same time made acquainted with the great extent of his power—greater than that which was ever possessed by Corinth after the extinction of his dynasty. Eorkyra, Ambrakia, Loukas, and Ambrakion, all Corinthian colonies, but in the next century independent states, appear in his time dependant on Corinth. Ambrakia is said to have been under the rule of another despot named Periander, probably also a Kypselid by birth. It seems

¹ Herodot. II. c. 62. He details at great length, the Herakleid Meliphetes, even length this tragical story. Cor. i. 11, p. 225.

well as by violent aggressions against the rich proprietors, whose cattle he destroyed in their pastures by the side of the river. We are not told by what previous conduct on the part of the rich this hatred of the people had been earned; but Theophrastus carried the popular feeling completely along with him, obtained by public vote a body of guards ostensibly for his personal safety, and employed them to overthrown the oligarchy.¹ Yet he did not maintain his power even for his own life. A second revolution destroyed and expelled him, on which occasion, after a short interval of temperate government, the people are said to have renewed in a still more marked way their antipathies against the rich; banishing some of them with confiscation of property, intruding into the houses of others with demands for forced hospitality, and even passing a formal *Patriarchia*—or decree to require from the rich who had lent money on interest the refunding of all past interest paid to them by their debtors.² To appreciate correctly such a demand, we must recollect that the practice of taking interest for money lent was regarded by a large proportion of early ancient society with feelings of unqualified reprobation. And it will be seen, when we come to the legislation of Solon, how much such violent reactionary feeling against the creditor was provoked by the unrelenting working of the harsh law determining his rights.

We hear in general terms of more than one revolution in the government of Megara—a disorderly democracy subverted by returning oligarchical elites, and these again unable long to maintain themselves;³ but we are alike unenformed as to dates and details. And in respect to one of these struggles we are admitted to the coverings of a contemporary and a witness—the Megarian poet Theophrastus. Unfortunately his dogmatic verses as we possess them are in a state so broken, incoherent, and interpolated, that we make out no distinct conception of the events which call them forth. Still less can we discover in the verses of Theophrastus that strength and peculiarity of pure Doric feeling, which, since the publication of O. Müller's *History of the Dorians*, it has been

Estimated
government
of Megara—
Theophrastus.

the fashion to look for so extensively. But we see that the poet was connected with an oligarchy of birth, and not of wealth, which had recently been subverted by the breaking in of the rustic population previously subject and degraded—that these subjects were content to submit to a single-headed despot, in order to escape from their former rulers—and that Things had himself been betrayed by his own friends and companions, stripped of his property and exiled, through the wrong-doing "of enemies whose blood he hopes one day to be permitted to drink."¹ The condition of the subject cultivators previous to this revolution he depicts in sad colours: they "dwelt without the city, clad in gossamer, and ignorant of judicial sentences or laws";² after it, they had become citizens, and their importance had been immensely enhanced. Thus (according to his impression) the vile breed has trampled down the noble—the bad have become masters, and the good are no longer of any account. The bitterness and humiliation which attend upon poverty, and the uselessness which wealth confers even upon the most worthless of mankind,³ are among the prominent subjects of his complaint. His keen personal feeling on this point would be alone sufficient to show that the recent revolution had no way overthrown the influence of property; in contradiction to the opinion of Walker, who infers without ground, from a passage of uncertain meaning, that the land of the state had been formally re-divided.⁴ The Megarian revolution, as far as we apprehend

¹ Things, vv. 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

³ Things, vv. 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

⁴ Things, vv. 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 66

There existed a certain sympathy and alliance between the despots of Corinth and Sikyon;¹ how far such feeling was further extended to Megara we do not know. The latter city seems evidently to have been more populous and powerful during the seventh and sixth centuries B.C. than we shall afterwards find her throughout the two brilliant centuries of Grecian history. Her colonies, found as far distant as Sicily and the Thracian Propontis on one side, and as Sicily on the other, suggest an extent of trade as well as naval force none but inferior to Athens; so that we shall be the less surprised when we approach the life of Solon, to find her in possession of the island of Salamis, and long maintaining it, at one time with every promise of triumph, against the entire force of the Athenians.

¹ Herod. ii. 170.

CHAPTER X.

IONIC PORTIONS OF HELLAS—ATHENS BEFORE SOLON.

HAVING traced in the preceding chapters the scanty stream of Peloponnesian history, from the first commencement of an authentic chronology in 776 a.n., to the maximum of Spartan territorial acquisition, and the general acknowledgement of Spartan primacy, prior to 547 a.n., I proceed to state as much as can be made out respecting the Ionic portion of Hellas during the same period. This portion comprehends Athens and Eubœa,—the Cyclades Islands,—and the Ionic cities on the coast of Asia Minor, with their different colonies.

In the case of Peloponnesians, we have been enabled to discern something like an order of real facts in the period alluded to—Sparta makes great strides, while Argos falls. In the case of Athens, unfortunately, our materials are less instructive. The number of historical facts, anterior to the Solonian legislation, is very few indeed: the interval between 776 a.n. and 684 a.n., the epoch of Draco's legislation a short time prior to Cylon's attempted usurpation, gives us merely a list of archons, devoid of all incident.

In compliment to the heroism of Cylon, who had sacrificed his life for the safety of his country, we are told that no person after him was permitted to bear the title of king.¹ His son Megacles, and twelve successors—Alcæmus, Archippus, Therappon, Phocion, Megakles, Diognetus, Phocleides, Archiphras, Therappon, Agamemnon, Alcippus, and Alcæmus—were all archons for life. In the second year of Alcæmus (778 a.n.), the dignity of archon was restricted to a duration of ten years: and seven of

Agamemnon,
Alcippus,
and Alcæmus—
were all archons
for life.

¹ Justin, l. i.

These ancestral archons are mentioned—*Clarus*, *Makrakis*, *Kleidias*, *Hippomenes*, *Leokrates*, *Apendras*, *Eryxias*. With *Kleias* who succeeded *Eryxias* the archonship was not only made annual, but put into commission and distributed among nine persons. These nine archons annually changed continues throughout all the historical period, interrupted only by the few intervals of political disturbances and foreign occupation. Down to *Kleidias* and *Hippomenes* (714 B.C.), the dignity of archon had continued to belong exclusively to the *Medontides* or descendants of *Medon* and *Kodrus*;¹ at that period it was thrown open to all the *Eupatridæ*, or order of nobility in the state.

Such is the series of names by which we step down from the level of legend to that of history. All our historical knowledge of Athens is confined to the annual archons; which series of eponymous archons, from *Kodrus* downwards, is perfectly trustworthy.² Above 683 B.C., the Attic antiquaries have provided us with a string of names, which we must take as we find them, without being able either to warrant the whole or to separate the false from the true. There is no reason to doubt the general fact that Athens, like so many other communities of Greece, was in its primitive times governed by an hereditary line of kings, and that it passed from that form of government into a commonwealth, first oligarchical, afterwards democratical.

We are in no condition to determine the civil classification and political constitution of Attica, even at the period of the archonship of *Kodrus*, 683 B.C., when authentic Athenian chronology first commences—much less can we pretend to any knowledge of the anterior centuries. Great political changes were introduced first by *Solon* (about 594 B.C.), next by *Kleisthenes* (508 B.C.), afterwards by *Aristotle*, *Perikles*, and *Ephialtes*, between the Persian and Peloponnesian wars: so that the old ante-Solonian—nay even the real Solonian—polity was thus put more and more out of date and out of knowledge. But all the information which we possess respecting that old polity is derived from authors who

lived after all or most of these great changes—and who, finding no records, nor anything better than current legends, explained the functions as well as they could by guesses more or less ingenious, generally attached to the dominant legendary names. They were sometimes able to found their conclusions upon religious usage, periodical ceremonies, or common sacrifices, still subsisting in their own time. These were doubtless the best evidences to be found respecting Athenian antiquity, these such practices often continued unaltered throughout all the political changes. It is in this way alone that we arrive at some partial knowledge of the ante-Solonian condition of Attica, though as a whole it still remains dark and unintelligible, even after the many illustrations of modern commentators.

Philochorus, writing in the third century before the Christian era, stated, that Kekrops had originally distributed Attica into twelve districts—Egkropia, Tetrapolis, Epeiria, Dekheia, Eleusis, Aphidna, Thessonia, Sauria, Kythron, Spilaiton, Ekiphria, Psalira—and that these twelve were consolidated into one political society by Theseus.¹ This partition does not compute the Megarid, which, according to other statements, is represented as united with Attica, and as having formed part of the distribution made by king Pandion among his four sons, Nireus, Ergon, Pallas, and Lykos—a story as old as Sappho's at least.² In other accounts, again, a quadruple division is applied to the tribes, which are stated to have been four in number, beginning from Kekrops—called in his time Ektrypia, Antekistheta, Aktia, and Psalia. Under king Erichonius, these tribes (we are told) received the names of Kreanta, Athia, Menegon, and Diakria³—under Erichonius, those of Dia, Akemata, Psestionion, Euphantion: at last, shortly after Erechthion, they were denominated after the four sons of his (son of Kreon's daughter of Erechthion, by Apollo), Gelanates, Hophtas, Mylkorea, Angelaia. The four Attic or Ionic tribes, under these last-mentioned names, continued to

¹ Philochorus ap. Strabo, ix. p. 509. See also Strabo, lib. x. p. 510. See also Strabo, lib. x. p. 510.

² Strabo, ix. p. 509. Philochorus and Aristotle credited the Megarid to

Theseus from the influence of Sparta as far as the Peloponnesus (see Strabo and Herodotus, lib. ii.) but there were many different ideas.

³ Strabo, lib. ix. p. 509–510.

from the classification of the citizens until the revolution of Kleisthenes in 508 B.C., by which the ten tribes were introduced, as we find them down to the period of Macedonian supremacy. It is affirmed, and with some etymological plausibility, that the denominations of these four tribes must originally have had reference to the occupations of those who bore them—the Hopliteæ being the warrior-class, the *Alkibioridæ* goatherds, the *Argadeis* artisans, and the *Gekleontes* (*Tekleontes*, or *Gekleontes*) cultivators. Hence some authors have ascribed to the ancient inhabitants of Attica¹ an actual primitive distribution into hereditary professions or castes, similar to that which prevailed in India and Egypt. If we should even grant that such a division into castes might originally have prevailed, it must have grown obsolete long before the time of Solon: but there seem no sufficient grounds for believing that it ever did prevail. The names of the tribes may have been originally borrowed from certain professions, but it does not necessarily follow that the reality corresponded to this derivation, or that every individual who belonged to any tribe was a member of the profession from whence the name had originally been derived. From the etymology of the names, be it ever so clear, we cannot safely surmise the historical reality of a classification according to professions. And this objection (which would be weighty even if the etymology had been clear) becomes irresistible when we add that even the etymology is not beyond dispute;² that the names themselves are written with a diversity which cannot be reconciled; and that the four professions named by Strabo omit the goatherds and include the priests; while those specified by Plutarch leave out the latter and include the former.³

Four basic tribes—
Hoplites,
Gekleontes,
Alkibioridæ,
Argadeis.

Not names
of castes or
professions.

¹ E.g., the *States of the four houses* after which these tribes were named, was ascribed by one story to be the primitive dwelling-places of Argives, like *Leontion*, *Phrygia*, or *Teukollia* (*Phrygia*, *Ant. Mithras*, i. 11, p. 114).

² Thus *Strabo* derives the etymology, not from *Alk* a goat, but from *Alk* the sign of Ares (*ibid.*, 114); he also gives *Tekleontes*, derived from an unknown *Tek* or *Te*, while the *Alkibioridæ* of *Strabo* connect with

Alkibioris and others in giving *Gekleontes*. *Plutarch* (*Solon*, 21) gives *Gekleontes*. In an *Athenian History* recently published by *Proklos* (*Solon*), it is stated that the *Alkibioridæ* were the warriors, while the *Alkibioridæ* were the cultivators. *Strabo*, ii. 11, p. 114, 115.

³ *Plutarch* (*Solon*, c. 21): *Strabo*, ii. 1, p. 114. *Demosthenes* (*Solon*, c. 11).

All that seems certain is, that these were the four ancient Ionic tribes (analogous to the Hyllai, Pamphyli, and Dynastai among the Dorians) which prevailed not only at Athens, but among several of the Ionic cities derived from Athens. The *Colactes* are mentioned in inscriptions now remaining belonging to Tege in Laconia, and all the four are named in those of Kydonia in the Propontis, which was a foundation from the Ionic Milesia.¹ The four tribes, and the four names (allowing for some variations of reading), are therefore historically verified. But neither the time of their introduction, nor their primitive import, are ascertainable matters; nor can any faith be put in the various constructions of the legends of *Iks*, *Kekkhena*, and *Kakrops* by modern commentators.

These four tribes may be looked at either as religious and common social aggregates, in which capacity each of them comprised three *Phratries* and ninety *Genes*; or as political aggregates, in which point of view each included three *Trittyes* and twelve *Naukraries*. Each *Phratry* contained thirty *Genes*; each *Trittye* comprised four *Naukraries*; the total numbers were thus 360 *Genes* and 48 *Naukraries*. Moreover each gene is said to have contained thirty heads of families, of whom therefore there would be a total of 10,800.

Comparing these two distributions one with the other, we may remark that they are distinct in their nature and proceed in opposite directions. The *Trittye* and the *Naukrary* are essentially fractional subdivisions of the tribe, and resting upon the tribe as their higher unity: the *Naukrary* is a local circumscription, composed of the *Naukrates* or principal households (so the etymology seems to indicate), who levy in each respective district the quota of public contributions which belongs to it, and superintend the disbursement,—provide the military force incumbent upon the district, being for each *naukrary* two horsemen and one ship,—and furnish the

¹ Boeckh, *Corp. Inscr. Græc.* vol. viii. 1026, 1031. The scholiast commentary on this last mentioned inscription, in which Boeckh vindicated the most interesting reading of the constitution by tradition, is as far satisfactory as any being.

C. F. Hermann, *Antiquities Græc.*

Antiquities Græcæ antiquæ, vol. ii. 26, gives a summary of all that can be known respecting these and analogous tribes. Orellana, *Corp. Inscr. Græcæ*, p. 124; Orellana, *Oratio de antiquitatibus Græcæ antiquæ*, pp. 378—383; *Philosophy*, *Classical Antiquities*, book, vol. ii. 24.

Each were the rights and obligations characterizing the gentile union.¹ The phratry union, binding together several gentes, was less intimate, but still included some mutual rights and obligations of an analogous character; especially a conservation of particular sacred rites, and mutual privileges of protection in the event of a phratry being slain. Each phratry was considered as belonging to one of the four tribes, and all the phratries of the same tribe enjoyed a certain periodical communion of sacred rites, under the presidency of a magistrate called the *Phylo-Bastros* or *Tribe King*, selected from the *Eupatids*: *Zens Gaius* was in this manner the patron god of the tribe *Glabours*. Lastly, all the four tribes were linked together by the common worship of *Apollo Patrus* as their divine father and guardian; for *Apollo* was the father of *Ius*, and the *Eponyms* of all the four tribes were named sons of *Ius*.

Thus also the primitive religious and social union of the population of Attica in its gradually ascending scale—as distinguished from the political union, probably of later introduction, represented at first by the *Triityes* and *Neokhories*, and in after times by the ten *Kleishmanas* tribes, subdivided into *Triityes* and *Demos*. The religious and family bond of aggregation is the earlier of the two : but the political bond, though beginning later, will be found to acquire constantly increasing influence throughout the greater part of this history. In the former, personal relation is the essential and predominant characteristic¹—local relations being subordinate : in the latter, property and residence become the chief considerations, and the personal element counts only as measured along with these accompaniments. All these phratrik and genlek associations, the larger as well as the smaller, were founded upon the same principles and tendencies of the Greek mind²—a consequence of the idea of worship with that of

3 Read the inscription inscription in Professor Ratz's work (Unter der Sonne von Afrika, p. 109 of the 1st ed., Leipzig, 1900), concerning the incident of that year, the point of departure, the Tropic of Cancer, and the names of the members, with the point and type of each individual. Compare (see, for example, Afrika, p. 10). About the peculiar religious ideas of the group called "Polygamy," see Herodotus, 2, 97.

analytical mind like Aristotle might discuss the difference between the gene and the family, so as to distinguish the former as the offspring of some special compact—still this is no fair test of the feelings usual among early Greeks. Nor is it certain that Aristotle himself, son of the physician Nicomachus, who belonged to the gene of the *Asklepiads*,¹ would have consented to disallow the procurative origin of all these religious families without any exception. The natural families of some changed from generation to generation, some extending themselves while others diminished or died out; but the gene received no alterations, except through the procreation, extinction, or subordination of these component families. Accordingly the relations of the families with the gene were in perpetual course of fluctuation, and the gentile ancestral genealogy, started as it doubtless was in the early condition of the gene, became in process of time partially chaotic and unstable. We hear of this genealogy but rarely, because it is only brought before the public in certain cases pre-eminent and venerable. But the household genes had their common rites, and common superhuman ancestor and genealogy, as well as the more celebrated: the scheme and ideal basis was the same in all.

Analogies, borrowed from very different people and parts of the world, prove how readily these enlarged and fictitious family unions assort with the ideas of an early stage of society. The Highland clan, the Irish sept,² the

³—see *Common Nations Travels in Northern Greece*, ch. 1, p. 30. The Greek word *tribe* seems to be adopted in *Alphabetic*; *Notes*, *La Trappe* in *Europe*, vol. 2, ch. 1, p. 26-27; chap. 1, p. 261; *Specimens* of the State of *England*, vol. 1, p. 100; and of *France's* situation of *France's* Works, 1740; *Common Nations*, the *Notes* in the *Travels*, v. 1, ch. 1 and 2.

So too, in the time of King Alfred in England, on the subject of marriage, the great brothers or husbands of the same could not make it rank in the position of distant relatives if these happen to be no blood relatives:—

"If a man, without a parental relation, fight and slay a man, then if he have no blood relatives, let there pass a third of the war: his wife, however a third part for a third let him live. If he have no maternal relatives, let his wife purchase pay half; he shall let him live."

If a man kill a man through manslaughter, if he have no relatives, let half be paid to the king, and to his great brothers. *Chronicle*, *London* *Letter* and *Travels* in *England*, vol. 1, p. 70-71. Again in the same work, *Common Nations*, vol. 1, p. 200, the idea of the *tribe*

American Indians, as well as the universal prevalence and efficacy of the ceremony of adoption in the Grecian and Roman world, exhibit to us I believe formally under certain circumstances originating in union and affections similar to those of kindred. Of this same nature were the Phratries and Gentcs at Athens, the Clans and Gentcs at Rome. But they were peculiarly modified by the religious imagination of the ancient world, which always traced back the past time to gods and heroes; and religion thus supplied both the common genealogy in their blood, and the privileged communion of special sacred rites as means of consecration and perpetuity. The Gentcs, both at Athens and in other parts of Greece, bore a patronymic name, the stamp of their believed common paternity : we find the Aeklogidae in many parts of Greece—the Alcmædæ in Thessaly—the Midyridæ, Polydidæ, Hæpiatidæ, Euxenidæ, at Argos—the Brachydæ at Mitylæ—the Neklidæ at Kô—the Iuvaidæ and Hytildæ at Olympia—the Akroetidæ at Argos—the Kinyradæ in Cyprus—the Penthilidæ at Mitylæ¹—the Telokryidæ at Sparta,—not less than the Kodridæ, Eumelpidæ, Phyltidæ, Lykouridæ, Teutidæ, Euxenidæ, Herychidæ, Hytildæ, &c., in Asia.² To each of these corresponded a mythical ancestor more or less known, and passing for the first father as well as the eponymous hero of the gens—Kodros, Eumelpos, Dotes, Phytalos, Hæpiakos, &c.

The population of Kleinbawda is 500 a.m. abolished the old tribes for civil purposes, and created ten new tribes—leaving the plantations and gardens unaltered, but introducing the local distribution according to families or unions, as the foundation of life new political tribes. A certain number of houses belong to each

of that goddess to Eleusis after the abduction of her daughter, and the first establishment of the Eleusinian ceremonies, specifies the spontaneous prince Eleusis, and the various chiefs of the place—Kekon, Triptolemos, Demeter, and Hecateus. It also notices the Eleusinian plain in the neighbourhood of Eleusis. But not the least allusion is made to Athens or to any concern of the Athenians in the presence or worship of the goddess. There is reason to believe that at the time when this hymn was composed, Eleusis was an independent town: what that time was, we have no means of settling, though Voss puts it as low as the 20th Olympiad.¹ And the proof hence derived is as much the more valuable, because the hymn to Demeter presents a coloring strictly special and local: moreover the story told by Solon to Croesus, respecting Tellos the Athenian who perished in battle against the neighboring townsmen of Eleusis,² assumes in like manner the independence of the latter in earlier times. Nor is it unimportant to notice, that even so low as 300 B.C. the observant visitor Dikarchus professes to detect a difference between the native Athenians and the Atticans, as well in physiognomy as in character and taste.³

In the history set forth to us of the proceedings of Theseus, no mention is made of these four Ionic tribes; but another and a totally different distribution of the people into Eupatriæ, Gekmek, and Demargi, which he is said to have first separated, is brought to our notice: Dionysius of Halicarnassus gives only a double division—Eupa-⁴trioi and Halicarnassus gives only a double division—Eupa-⁵trioi and dependent cultivators; corresponding to his idea of the patricians and clients in early Rome.⁶ As far as we can understand this triple distinction, it seems to be disparate and unconnected with the four tribes above-mentioned. The Eupa-⁷trioi are the wealthy and powerful men, belonging to the most distinguished families in all the various gentes, and principally living in the city of Athens, after the consolidation of Attica: from them are distinguished the middling and lower people, roughly classified into husbandmen and artisans. To the Eupa-⁸trioi is ascribed a religious as well as a political and social

ecclesiastical. They are represented as the source of all authority on matters both sacred and profane:¹ they doubtless comprised those genres, such as the *Delidae*, whose sacred incantations were looked upon with the greatest reverence by the people; and we may conceive *Banaispen*, *Kaloon*, *Diktila*, &c., as they are described in the Homeric hymn to *Dionysus*, in the character of *Eupatrides* of *Eleusis*. The knavish genres, and the knavish members of such gens, would appear in this classification confounded with that portion of the people who belonged to no gens at all.

From these *Eupatrides* exclusively, and doubtless by their selection, the nine sacred archons—probably also the Prytanes of the *Neokleroi*—were taken. That the senate of *Areopagus* was formed of members of the same order, we may naturally presume. The nine archons all passed into it at the expiration of their year of office, subject only to the condition of having duly passed the test of accountability; and they remained members for life. These are the only political authorities of whom we hear in the earliest imperfectly known period of the Athenian government, after the discontinuance of the king, and the adoption of the annual change of archons. The senate of *Areopagus* seems to represent the Homeric council of old men,² and there were doubtless, on particular occasions, general assemblies of the people, with the same formal and passive character as the Homeric *agora*—at least we shall observe traces of such assemblies superior to the Solonian legislation. Some of the writers of antiquity ascribed the first establishment of the senate of *Areopagus* to Solon, just as there were also some who considered *Lykurgos* as having first brought together the Spartan *Gerusia*. But there can be little doubt that this is a mistake, and that the senate of *Areopagus* is a principal institution, of immemorial antiquity, though its constitution, as well as its functions underwent many changes. It stood at first alone as a permanent and collegiate

general law being conceived only in its application to some particular case. Drako was the first Thesmothetes who was called upon to set down his Thesmoi in writing, and thus to invest them essentially with a character of more or less generality.

In the later and better-known times of Athenian law, we find these archons deprived in great measure of their powers of judging and deciding, and restricted to the task of first hearing the parties and collecting the evidence, next, of introducing the matter for trial into the appropriate dikastery, over which they presided. But originally there was no separation of powers; the archons both judged and administered, sharing among themselves those privileges which had once been united in the hands of the king, and probably accountable at the end of their year of office to the senate of Areopagus. It is probable also that the functions of that senate, and those of the prytanes of the council, were of the same double and confused nature. All of these functionaries belonged to the Eupatridæ, and all of them doubtless acted more or less in the narrow interest of their order: moreover there was ample room for favouritism, in the way of connivance, as well as antipathy, on the part of the archons. That such was decidedly the case, and that discontent began to be serious, we may infer from the duty imposed on the thesmothetæ Drako, B.C. 684, to put in writing the Thesmoi or Ordinances, so that they might be "shown publicly" and known beforehand.¹ He was

He did not meddle with the political constitution, and in his ordinances Aristotle finds little worthy of remark except the extreme severity² of the punishments awarded: petty thefts, or even proved idleness of life, being visited with death or disfranchisement.

But we are not to construe this remark as demonstrating any special infirmity in the character of Drako, who was not invested with the large power which Solon afterwards enjoyed, and cannot be imagined to have imposed upon the community

¹ See *Æschylus Agamemnon*, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

² Aristotle, *Pol.* ii. 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

a. 110, though Pollux (iii. 91) does not agree with him. Taylor, *Ant. Lib.* 110, 111.

According to the account of Drako, see *Æschylus Agamemnon*, 112, 113, 114, 115. The *Polymachus* account that Drako was the son of Solon, is not credible. Drako was hardly the grandson.

its own distinct ceremonial and procedure appointed by the gods themselves. That the religious feelings of the Greeks were connected in the most intimate manner with particular localities has already been often remarked; and Democritus proceeded agreeably to them in his arrangements for mitigating the indiscriminate condemnation of every man found guilty of homicide, which was unavoidable as long as the Areopagus remained the only place of trial. The man who either confessed, or was proved, to have shed the blood of another, could not be acquitted or condemned to less than the full penalty (of death or perpetual exile with confiscation of property) by the judges on the hill of Ares, whatever excuse he might have to offer: but the judges at the Palladium and Delphinion might hear him, and even absolve his plea, without contracting the taint of irregularity.

Local super-
stitions at
Athens
about trial
of homicide

applied to trials of particular localities, connected with the law of homicide, is so powerfully set forth, as in the speech of Ctesiphon against the banishment of Demos in *Yell. Lib.* v. 10.

It has been remarked by me that when I have stated in connection with the *Demosthenes* of *Androtion*, which involves Demos as being at the Areopagus and acquitted, although the homicide is confessed, however the acquittal is proved by Apollo in his behalf, that *Androtion* has deserved homicide as being unscrupulously false. *Androtion*, in fact, is false.

I think, however, that an attentive study of that very curious *Demos*, far from contradicting what is here said to the text, will further illustrate and confirm it.

The same fact represents two parties: first, the official prosecutors or accusing witnesses (the *Androtion*), who claim Demos as their victim, perpetrator, and witness even allowing to *Androtion*, the witness from the fact of his homicide in writing; next, Demos himself, who admits the fact, but pleads that he has committed it to avenge his father, under the sanction and even instigation of Apollo, who appears in the *Androtion* and *Androtion*.

Two points of view, regarding homicide, are here put in conflict: one represented by the *Androtion*, the other by a plea, being introduced with the sanction of Demos.

The divine sanctions of the *Androtion* are put in on the side, those of Apollo on the other: the former con-

firm that the latter interfere with them, and meddling with proceedings which do not belong to them—The latter to him, while they also hold out terrible warnings of the punishment which they will do respectively to Apollo, if they venture to give against them (v. 10-11).

And, as witnesses of Apollo, he is to protect the testimony against others from both sides, and to avoid giving offence to either. This is really a labor, as much as it is possible to be, consistent with justice and equity as all. The nature of the *Androtion* or *Androtion* was made to be equal, so that they at least, as *Androtion*, may not compromise either of the powerful antagonists and the spiritual of Demos himself, because *Androtion* himself has succeeded in his career, on the ground that his antagonists are with the judges rather than the temple, and that the power of *Androtion* comes with him for more than that of *Androtion*. This trial, assumed as the fact was held for blood with Demos, thus evidence against *Androtion*, homicide in a verdict of acquittal pronounced by Apollo as giving the same equal members of the *Androtion*.

Upon this the *Androtion* found the official sanction of *Androtion* and *Androtion*, which *Androtion* could not have to approve. They complete of having been, *Androtion* and *Androtion*, who tells them that they have not been so, because the same were equal: and that the *Androtion* found in favor of *Androtion*, because he had been telling

first shock from the hands of an ambitious Megastid who aspired to the despotism. Such was the phase (as has been remarked in the preceding chapter) through which, during the century now under consideration, a large proportion of the Greek governments passed.

Kylon, an Athenian patrician—who aspired, to a great family position, the personal celebrity of a victory at Olympia, as runner in the double stadium—conceived the design of seizing the acropolis and constituting himself despot. Whether any special event had occurred at home to stimulate this project, we do not know: but he obtained both encouragement and valuable aid from his father-in-law Theagenes of Megara, who, by means of his popularity with the people, had already subverted the Megarian oligarchy, and become despot of his native city. Previous to so hazardous an attempt, however, Kylon consulted the Delphian oracle, and was advised by the god in reply, to take the opportunity of "the greatest festival of Zeus" for seizing the acropolis. Such expression, in the natural interpretation put upon them by every Greek, designated the Olympic games in Peloponnesus. To Kylon, moreover, himself an Olympic victor, that interpretation seems recommended by an apparent peculiar propriety. But Theorydides, not indifferent to the credit of the oracle, reminds his readers that no question was asked nor any express direction given, where the intended "greatest festival of Zeus" was to be sought—whether in Attica or elsewhere—and that the public festival of the Diasia, celebrated periodically and solemnly in the neighbourhood of Athens, was also denominated the "greatest festival of Zeus Megistos". Probably no such exceptional scruples presented themselves to any one, until after the miserable failure of the conspiracy; least of all to Kylon himself, who, at the recurrence of the next ensuing Olympic games, put himself at the head of a force, partly furnished by Theagenes, partly composed of his friends at home, and took violent possession of the sacred rock of Athens. But the attempt excited general indignation among the Athenian people, who crowded in from the country to assist the archons and the pretors of the *Neokoroi* in putting it down. Kylon and his companions were blockaded in the Acropolis, where they soon found themselves in straits for want of water and provisions; and

though many of the Athenians went back to their homes, a sufficient body being, however, left to release the suppliants to the last extremity. After Kylon himself had escaped by stealth, and several of his companions had died of hunger, the remainder, renouncing all hope of defence, sat down as suppliants at the altar. The archon Megakles, on regarding the district, found these suppliants on the point of expiring with hunger on the sacred ground, and to prevent such a pollution, engaged them to

the altar, and made of his promises by means of the athenians.

quit the spot by a promise of sparing their lives. He seems however had they been removed into profane ground, than the promise was violated and they were put to death: some even, who, seeing the fate with which they were menaced, contrived to throw themselves upon the altar of the Venerable goddesses (or

Demeter) near the Areopagus, revived their death wounds in spite of that inviolable protection.¹

Though the conspiracy was thus put down, and the government upheld, these deplorable incidents left behind them a long train of animosity—profound religious remorse mingled with unquenched political antipathies. There still remained, if not a considerable Kylonian party, at least a large body of persons who resented the way in which the Kylonians had been put to death, and who became in consequence bitter enemies of Megakles the archon, and of the great family of the Alkmeonidae, to which he belonged. Not only Megakles himself and his personal adherents were denounced as enemies with a curse, but the curse was supposed to be transmitted to his descendants, and we shall hereafter find the wound re-opened, not only in the second and third generation, but also two centuries after the original event.² When we see that the impression left by the proceeding was so very serious, even after the length of time which had elapsed, we may well believe that it was sufficient, immediately afterwards, to poison altogether the tranquillity of the state. The Alkmeonidae and their partisans long defied their opponents, vaining any public trial. The discussions continued without hope of termination, until Solon, then enjoying a lofty reputation for sagacity and patriotism, as well as for bravery, persuaded them to submit to

¹ The narrative is given in Thucyd. i. 2. ² *Alkmeonidae*. See also the *Ant. Hist.* v. 11. *Alkmeonidae*. See also the *Ant. Hist.* v. 11.

judicial exigencies,—at a moment so far distant from the event, that several of the actors were dead. They were accordingly tried before a special jurisdiction of 200 Republican Myths of the dense Polytheism being their assessors. In defending themselves against the charge that they had stood against the reverence due to the gods and the consecrated rights of sepiens, they alleged that the Elysian supplicants, when persuaded to quit the holy ground, had tied a cord round the statue of the goddess and clung to it for protection in their march; but on approaching the altar of the Immortalis, the cord accidentally broke—and this critical event (so the accused persons argued) proved that the goddess had herself withdrawn from them by protesting hand and abandoned them to their fate.¹ Their argument, remarkable as an illustration of the feelings of the time, was not however accepted as an excuse. They were found guilty, and while such of them as were alive retired into banishment, those who had already died were disinterred and cast beyond the horizon. Yet their exile, continuing as it did only for a time, was not held sufficient to expiate the impiety for which they had been condemned. The Alimajehs, one of the most powerful families in Attica, long continued to be looked upon as a tainted race,² and in cases of public calamity were liable to be singled out as bearing by their sacrifices down even the judgment of the gods upon their conduct.³

The harassment of the gullible parties was not forced sufficient to restore integrity. Not only did postcolonial disorders prevail, but the religious susceptibilities and apprehensions of the African community also remained deplorably excited. They were covered with sorrow and despondency, new phantoms and

[illegible]

At the beginning, the village was founded by Flemish, the inhabitants brought with them the Dutch laws of inheritance. It is an anomaly that occurred in a part from the wife of the lord is the status of the goddess, which was situated with the village. Since 1945, the village was the trade market of the village.

Shawley dropped Poliostraca, which he considered to be distinct from the bivalve-bearing genus of Poliostra, equivalent to what the genus of *Orthis* is regarded as a distinct genus. (p. 100)

1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 2618, 2619, 2620, 2621, 2622, 2623, 2624, 2625, 2626, 2627, 2628, 2629, 2630, 2631, 2632, 2633, 2634, 2635, 2636, 2637, 2638, 2639, 2640, 2641, 2642, 2643, 2644, 2645, 2646, 2647, 2648, 2649, 2650, 2651, 2652, 2653, 2654, 2655, 2656, 2657, 2658, 2659, 2660, 2661, 2662, 2663, 2664, 2665, 2666, 2667, 2668, 2669, 2670, 2671, 2672, 2673, 2674, 2675, 2676, 2677, 2678, 26

heard supernatural manaces, and fill the cups of the gods upon
 Festivals them without statement.¹ In particular, it appears
 that the minds of the women (whose religious impulses
 were recognised generally by the ancient legislation as
 requiring watchful control) were thus disturbed and frantic.
 The sacrifices offered at Athens did not succeed in dissipating the
 epidemic, nor could the prophets at home, though they recognised
 that special purifications were required, discover what were the
 new ceremonies capable of appeasing the divine wrath. The
 Delphian oracle directed them to invite a higher spiritual
 influence from abroad, and this produced the memorable visit of
 the Krætan prophet and sage Epimenides to Athens.

The century between 690 and 600 B.C. appears to have been
 remarkable for the first diffusion and potent influence of distinct
 religious brotherhoods, mystic rites, and explanatory ceremonies,
 none of which (as I have remarked in a former chapter) find any
 recognition in the Homeric epic. To this age belongs Theſſias,
 Aristeus, Abanti, Pythagoras, Orpheus, and the earliest

provable agency of the Orphic sect.² Of the class of
 men here named, Epimenides, a native of Phæstia or
 Knossos in Kreta,³ was one of the most celebrated—
 and the old legendary connexion between Athens and
 Kreta, which shows itself in the tales of Theseus and
 Minos, is here again manifested in the recourse which

the Athenians had to this island to supply their spiritual need.
 Epimenides seems to have been connected with the worship of the
 Krætan Zeus, in whose favour he stood so high as to receive the
 denomination of the new Krætar (the Krætan having been the
 primitive ministers and organisers of that worship). He was said
 to be the son of the nymph Balis; to be supplied by the nymphs
 with constant food, since he was never seen to eat; to have
 fallen asleep in his youth in a cave, and to have continued in this
 state without interruption for fifty-seven years; though some
 asserted that he remained all this time a wanderer in the moun-
 tains, collecting and studying medicinal botany in the vicinity of

an Iatromathic, or Leech and Prophet combined. Such narratives mark the life ennobled by antiquity of Epimenides the Pontian,² who was now called in to heal both the epidemic and the mental affliction prevalent among the Athenian people, in the same manner as his countrymen and contemporary Thales had been, a few years before, invited to Sparta to appease a pestilence by the effect of his music and religious hymns.³ The favour of Epimenides with the gods, his knowledge of propitiatory ceremonies, and his power of working upon the religious feeling, was completely successful in restoring both health and mental tranquillity at Athens. He is said to have turned ^{epimaniacs} out some black and white sheep on the Areopagus, ^{city and} directing attendants to follow and watch them, and to ^{people} ^{Athena} erect new altars to the appropriate local deities on the spots where the animals lay down.⁴ He founded new shrines and established various local ceremonies; and more especially he regulated the worship paid by the women in such manner as to calm the violent impulses which had before agitated them. We know hardly anything of the details of his proceeding, but the general fact of his visit, and the salutary effects produced in removing the religious despondency which oppressed the Athenians, are well attested. reported at Athens to "Helen and Ileana" (Pavlos and Demeter). The general idea that he had depicted struck to the same two goddesses (Pavlos and Ileana). Theophrastus said that there were other old Athens (without mentioning themselves) to the same two goddesses. Pausanias, *Pericles*, *Gen.*, 10, 10, later speaks of a later worship of Helen and Ileana (Pavlos and Demeter), p. 101. I conclude that the idea which had other kinship than the first stated by Pausanias, that the first which was placed before the entrance of Athens, for the summer and the autumn to stand upon, was called by these names—Helen, Ileana, of the autumn, Ileana, that of the summer (A. B. 10). The connection between these two letters is not difficult to be explained. The other story told by Theophrastus, that the worship of Demeter, that of the autumn, was placed upon the autumn goddess, was directly connected to be known by Helen, and Ileana, especially like a common (A. B. 10, 10, 10).

ritual precepts, from the lips of a person supposed to stand high in the favour of Zeus, were the remedy which this unhappy disaster required. Moreover, Epimenides had the prudence to associate himself with Solon, and while he thus doubtless obtained much valuable advice, he assisted indirectly in exalting the reputation of Solon himself, whose career of constitutional reform was now fast approaching. He remained long enough at Athens to restore completely a more comfortable tone of religious feeling, and then departed, carrying with him universal gratitude and admiration, but withholding all other reward, except a branch from the sacred olive tree in the acropolis.¹ His life is said to have been prophetic and longed to the unusual period of 120 years, according to a statement which was current during the time of his younger contemporary Xenophanes of Kolophona.² The Karians even ventured to affirm that he lived 300 years. They credited him not merely as a sage and a spiritual power, but also as a poet—very long compositions on religious and mythical subjects being ascribed to him; according to some accounts, they even worshipped him as a god. Both Plato and Cicero considered Epimenides in the same light in which he was regarded by his contemporaries, as a prophet divinely inspired, and testifying the future under the of temporary century. But according to Aristotle, Epimenides himself professed to have received from the gods no higher gift than that of divining the unknown phenomena of the past.³

The religious mission of Epimenides to Athens, and its efficacious as well as leading influence on the public mind, deserve notice as characteristic of the age in which they occurred.⁴ If we transport ourselves two centuries forward to the Peloponnesian war, when national influences and positive habits of thought had acquired a durable hold upon the popular minds, and when practical discussions on political and judicial matters were familiar to every Athenian citizen,

whereas his real date is now upon the p.c.—a remarkable example of mere legend as to chronology.

⁵ Regarding the characterisation of this age, see the second chapter of the *Republic* of Aristotle above quoted by Plato, and substantiated by Plutarch and Xenophanes.

no such uncontrollable religious frenzy could well have subdued the entire public; while, if it had, no living man could have drawn to himself such universal veneration as to be capable of effecting a cure. Plato,¹ admitting the real healing influence of rites and ceremonies, fully believed in Epicurus as an inspired prophet during the past; but towards those who preferred claims to supernatural power in his own day, he was not so easy of faith. He, as well as Eriphilus and Theophrastus, treated with indifference, and even with contempt, the Orphicists of the later times, who advertised themselves as possessing the same potent knowledge of ceremonial rites, and the same means of guiding the will of the gods, as Epicurus had evinced before them. These Orphicists unquestionably numbered a considerable tribe of believers, and speculated with great effect, as well as with profit to themselves, upon the direst passions of rich men.² But they enjoyed no respect with the general public, or with those to whom authority the public habitually looked up. Degenerate as they were, however, they were the legitimate representatives of the prophet and purifier from *Erinnyes*, to whose process the Athenians had been so much indebted two centuries before; and their altered position was owing less to any falling off in themselves, than to an improvement in the mass upon whom they sought to operate. Had Epicurus himself come to Athens in those days, his visit would probably have been as much inspiring to all public purposes as a repetition of the stratagem of Phry, clothed and equipped as the goddess Athene, which had succeeded so completely in the days of Peisistratus—a stratagem which even Herodotus treats as incredibly absurd, although a century before his time, both the city of Athens and the Domain of Asia had obeyed, as a divine mandate, the orders of this magnificent and steady woman to restore Peisistratus.³

CHAPTER XI.

SOLONIAN LAWS AND CONSTITUTION.

We now approach a new era in Grecian history—the first known example of a genuine and disinterested constitutional reform, and the first foundation-stone of that great edifice, which afterwards became the type of democracy in Greece. The arduousness of the expatriated Solon dates in 594 B.C., thirty years after that of Draco, and about eighteen years after the conspiracy of Kylon (assuming the latter event to be correctly placed B.C. 612).

The lives of Solon by Plutarch and Diogenes (especially the former) are our principal sources of information ^{the} ^{Diogenes} ^{and Plutarch} ^{of Solon.} respecting this remarkable man, and while we thank them for what they have told us, it is impossible to avoid expressing disappointment that they have not told us more. For Plutarch certainly had before him both the original poems, and the original laws, of Solon, and the few transcripts, which he gives from one or the other, form the principal charm of his biography. But such valuable materials ought to have been made available to a more instructive result than that which he has brought out. There is hardly anything more to be deplored, amidst the lost treasures of the Grecian mind, than the poems of Solon; for we see by the remaining fragments, that they contained notions of the public and social phenomena before him, which he was compelled attentively to study—blended with the touching expression of his own personal feelings, in the poet alike honourable and difficult, to which the confidence of his countrymen had raised him.

Solon, son of Exekestides, was a Expatriated of middling fortune,¹ but of the parent heroic blood, belonging to the gens or family of

¹ Plutarch, Solon, l. 1; Diogen. Laert. iii. 1; Aelian. Pol. iv. 4. 15.

the Kodrke and Nalaka, and tracing his origin to the god Poseidon. His father is said to have distinguished his substance by prodigality, which compelled Solon in his earlier years to have recourse to trade, and in this pursuit he visited many parts of Greece and Asia. He was thus enabled to enlarge the sphere of his observation, and to provide material for thought as well as for composition. His poetical talents displayed themselves at a very early age, first on light, afterwards on serious subjects. It will be recollected that there was at that time no Greek prose writing, and that the acquisitions as well as the effusions of an intellectual man, even in their simplest form, adjusted themselves not to the limitations of the period and the contention, but to those of the hexameter and pentameter. Nor in point of fact do the verses of Solon aspire to any higher effect than we are accustomed to associate with an earnest, working, and advisory prose composition. The advice and appeals which he frequently addressed to his countrymen¹ were delivered in this way native, doubtless far less difficult than the elaborate pieces of subsequent writers or speakers, such as Theophrastus, Isokrates, or Demosthenes. His poetry and his reputation became known throughout many parts of Greece, so that he was classed along with Thales of Miletus, Bias of Priene, Pittakos of Mytilene, and Kleobulos of Clazomenae, Kleobulos of Lindos, Chelidon of Samothrace—altogether forming the constellation afterwards reckoned as the seven wise men.

The first particular event in respect to which Solon appears as an active politician is the possession of the island of Salamis, then disputed between Megara and Athens. Megara was at that time able to contest with Athens, and for some time to contend with success, the occupation of this important island—a remarkable fact, which perhaps may be explained by supposing that the inhabitants of Athens and its neighbourhood carried on the struggle with only partial aid from the rest of Attica. However this may be, it appears that the Megarians had actually established themselves in Salamis, at the time when Solon began his political career, and that the Athenians had experienced so much loss in the struggle,

¹ Pittakos, Solon, &c.

as to have formally prohibited any citizen from ever submitting a proposition for its rescission. Along with this dishonourable allegation, Solon counterstaked a state of ecstatic contentment, veiled into the agave, and there on the stone usually occupied by the official herald, pronounced to the surrounding crowd a short elegiac poem¹ which he had previously composed on the subject of Salamis. Baffling upon them the disgrace of abandoning the island, he wrought so powerfully upon their feelings, that they rescinded the prohibitory law :—" Rather (he exclaimed) would I forfeit my native city and become a citizen of Phlegonades, than be still named an Athenian, branded with the shame of surrendered Salamis !"² The Athenians again entered into the war, and conferred upon him the command of it—partly, as we are told, at the instigation of Peisistratus, though the latter must have been at this time (690—684 B.C.) a very young man, or rather a boy.³

The stories in Herodotus, as to the way in which Salamis was recovered, are contradictory as well as spurious, according to Solon various stratagems to deceive the Megarian occupiers. Unfortunately no authority is given for any of them. According to that which seems the most plausible, he was directed by the Delphic god first to propitiate the local heroes of the island ; and he accordingly crossed over to it by night, for the purpose of sacrificing to the heroes Perikhoros and Eukhoros on the Salaminian shore. Five hundred Athenian volunteers were then levied for the attack of the island, under the stipulation that if they were victorious they should hold it in property and citizenship.⁴ They were safely

¹ Herodotus, Solon, viii. It was a poem of 400 lines, genuine when composed.

² Herodotus tells us that "Solon read the verses to the people through the medium of the herald"—a statement not less dubious in itself than in accuracy, and which spoils the whole effect of the elegiac recitation, after which Solon is loudly extolled, &c.

³ Herodotus, i. c. 61. Diodorus, Liban. &c. Both Herodotus &c. say and some authors read by Herodotus, as before said to Peisistratus, as before said to the war against the Megarians, and even the capture of Salamis, the part of Megara. Now the first occupation of Peisistratus

was in 610 B.C., and we can hardly believe that he can have been prominent and successful in a war so late when forty years before.

It will be seen hereafter from the note on the intercourse between Solon and Cleomenes towards the end of this chapter that Herodotus, and perhaps other authors also, conceived the Salaminian legislation to date at a period later than it really does ; instead of 690, B.C., they placed it nearer to the occupation of Peisistratus.

⁴ Herodotus, Solon, implies also no acknowledgment of the right ownership of the island, but it seems almost

where the dome or *gym* *Philadeia* still worshipped *Philone* as its eponymous ancestor. Such a title was held sufficient, and *Solone* was adjudged by the free Spartans to *Attika*,¹ with which it ever afterwards remained incorporated until the days of *Macedonian* supremacy. Two centuries and a half later, when the orator *Demosthenes* urged the *Athenians* right to *Asopispolis* against *Philip* of *Macedon*, the legendary descent of the title was indeed put forward, but more in the way of protest or introduction to the substantial political grounds.² But in the year 600 B.C., the authority of the legend was more deep-seated and operative, and adequate by itself to determine a favourable verdict.

In addition to the conquest of *Salamis*, *Solone* increased his reputation by exposing the case of the *Delphian* temple against the extortionate proceedings of the inhabitants of *Kirke*, of which more will be said in a coming chapter; and the favour of the oracle was probably not without its effect in procuring for him that encouraging prophecy with which his legislative career opened.

State of
Athens im-
mediately
before the
legislation
of Solon.

It is on the occasion of *Solone's* legislation that we obtain our first glimpse—unfortunately but a glimpse—of the actual state of *Attika* and its inhabitants. It is a sad and repulsive picture, presenting in no political discord and private suffering combined.

Violent dissensions prevailed among the inhabitants of *Attika*, who were separated into three factions—the *Peisakia*, or men of the plain, comprising *Athens*, *Eleusis*, and the neighbouring territory, among whom the greatest number of rich families were included; the mountaineers in the east and north of *Attika*, called *Digraia*, who were on the whole the poorest party; and the *Parallia* in the southern portion of *Attika* from sea to sea, whose means and social position were intermediate between the two.³

¹ *Plutarch*, *Solon*, 15; compare *Aristotle*, *Ethic.* 1. 12. *Aristotle* is misled by the name of *Maroneia* (*Philadeia*, *Athens*, v. 3). *Strabo* also refers to his in *Plutarch* (*Strabo*, vi. 265).

According to the statement of *Strabo* the *Maroneia*, took the constitution and the *Athenians* had the same way of government; both shared the debt with their *kinsmen* the *Peisakia*. This statement however affects no

proof of my position of *Athenian* nation in origin.

The *Maroneia*, or *Maroneia*, stood in the place of *Maroneia* (*Strabo*, vi. 265), which formed a portion of the city of *Athens*.

² *Plutarch*, *Solon*, 15, p. 11.

³ *Plutarch*, *Solon*, 1. 12. The language of *Plutarch*, in which he refers to the *Peisakia* as representing the

of slavery as a legitimate status, and of the right of one man to sell himself as well as that of another man to buy him. Every debtor unable to fulfil his contract was liable to be adjudged as the slave of his creditor, until he could find means either of paying it or working it out; and not only he himself, but his minor sons and unmarried daughters and sisters also, whom the law gave him the power of selling.¹ The poor men thus borrowed upon the security of his body (to translate literally the Greek phrase) and upon that of the persons in his family. So severely

had these oppressive contracts been enforced, that many debtors had been released from freedom to slavery in Attica itself,—many others had been sold for exportation,—and some had only hitherto preserved their own freedom by selling their children. Moreover a great number of the smaller properties in Attica were under mortgage, signified (according to the formality usual in the Attic law, and continued down throughout the historical times) by a stone pillar erected on the land, inscribed with the name of the lender and the amount of the loan. The proprietors of these mortgaged lands, in case of an unfavourable turn of events, had no other prospect except that of irretrievable slavery for themselves and their families, either in their own native country robbed of all its delights, or in some barbarous region where the Attic accent would never meet their ears. Some had fled the country to escape legal adjudication of their persons, and earned a miserable subsistence in foreign parts by degrading occupations. Upon worst, too, this deplorable lot had fallen, by unjust condemnation and corrupt judges; the conduct of the rich, in regard to money saved and profane, in regard to matters public as well as private, being thoroughly unprincipled and rapacious.

The unrelieved and long-continued suffering of the poor under this system, plunged into a state of debasement not more tolerable than that of the Gallic plebs²—and the indignation of the rich in, whom all political power was then vested—are facts well attested by the poems of

¹ In the Frib, when unable to pay the tribute imposed by the Roman empire, the Gallic plebs, says Livy, sold their wives, daughters, and sons into slavery, and their land into debt. (Liv. Abul. p. 76.)

² About the selling of children by parents, to pay the taxes, in the later times of the Roman empire, see Justin, l. 1, c. 12; and Justin, l. 1, c. 13, ad. Part. 120.

³ Cicero. Nat. Nat. v. 11.

had been invoked to oppose, as depending in part from pestilence, so it had its cause partly in years of sterility, which must of course have aggravated the distress of the small cultivators. However this may be, such was the condition of things in 594 B.C., through meeting of the poor freemen and Thetes, and recommendation of the meddling citizens, that the governing oligarchy, unable either to enforce their private debts or to maintain their political power, were obliged to invoke the well-known wisdom and integrity of Solon. Though his vigorous protest (which devotion rendered him acceptable to the mass of the people) against the iniquity of the existing system, had already been proclaimed in his poems—they still hoped that he would serve as an auxiliary to help them over their difficulties. They therefore chose him, nominally as arbiter along with Philomeides, but with power in substance dictatorial.

It had happened in several Grecian states that the governing oligarchies, either by quarrels among their own members or by the general bad condition of the people under their government, were deprived of that hold upon the public mind which was essential to their power. Sometimes (as in the case of Pittacus of Mitylene anterior to the archonship of Solon, and often in the factions of the Italian republics in the middle ages)

Solon made
arbiters,
and by
making with
him persons
of high sta-
tion.

the collision of opposing forces had rendered society intolerable, and driven all parties to acquiesce in the choice of some reforming dictator. Usually, however, in the early Greek oligarchies, this ultimate crisis was anticipated by some ambitious individual, who availed himself of the public discontent to overthrow the oligarchy and usurp the powers of a despot. And so probably it might have happened in Athens, had not the recent failure of Kylon, with all its miserable consequences, operated

His refusal
to make
himself
despot.

as a deterring motive. It is curious to read, in the words of Solon himself, the temper in which his appointment was construed by a large portion of the community, but most especially by his own friends: bearing in mind that at this early day, so far as our knowledge goes, democratic government was a thing unknown in Greece—all Grecian governments were either oligarchical or despotic, the mass of the freemen having not yet tasted of constitutional privilege. He

own friends and supporters were the first to urge him, while relieving the prevalent discontent, to satisfy passions for himself personally, and seize the supreme power. They even "dild him as a machine, for dishing it out up the net when the fish were already snatched." The mass of the people, in despair with their lot, would gladly have seconded him in such an attempt; while many even among the oligarchy might have acquiesced in his personal government, from the mere apprehension of something worse if they resisted it. That Solon might easily have made himself despot abounds of little doubt. And though the position of a Greek despot was always perilous, he would have had greater facility for maintaining himself in it than Ptolemy possessed after him; so that nothing but the combination of prudence and virtue, which marks his lofty character, restricted him within the tract specially assigned to him. To the surprise of every one,—to the dissatisfaction of his own friends,—under the complaints alike (as he says) of various extreme and dissatisfied parties, who required him to adopt measures fatal to the peace of society,—he set himself honestly to solve the very difficult and critical problem submitted to him.

Of all grievances the most urgent was the condition of the poorer class of debtors. To their relief Solon's first measure, the memorable *Seisachtheia*, or shaking off of burthens, was directed. The relief which it effected was complete and immediate. It cancelled at once all those contracts in which the debtor had borrowed on the security either of his person or of his land: it forbade all future loans or contracts in which the person of the debtor was pledged as security: it deprived the creditor in future of all power to imprison, or enslave, or extort work from, his debtor, and confined him to an effective judgment at law authorizing the seizure of the property of the latter. It swept off all

the debt-
contracts,
or rather
law for
the poorer
debtors.

inflicted upon them by the Solonoths. It was to assist these weaker debtors, whose bodies were in no danger—^{debtors of the money-standard} yet without separating them entirely—that Solon resorted to the additional expedient of debasing the money-standard. He lowered the standard of the drachma in a proportion something more than 25 per cent., so that 100 drachmas of the new standard contained no more silver than 75 of the old, or 100 of the old were equivalent to 133 of the new. By this change the creditors of these more substantial debtors were obliged to submit to a loss, while the debtors acquired an exemption, to the extent of about 33 per cent.¹

Lastly, Solon decreed that all those who had been condemned by the archons to slavery (civil disfranchisement) should be restored to their full privileges of citizens—excepting however from this indulgence those who had been condemned by the Ephors, or by the Areopagus, or by the Prytanis (the four kings of the tribes), after trial in the Prytanion, on charges either of murder or treason.² So wholesome a measure of amnesty affords strong grounds for believing that the previous judgments of the archons had been intolerably harsh; and it is to be recollected that the Draconian ordinances were then in force.

Such were the measures of relief with which Solon met the dangerous discontent then prevalent. That the weaker men and leaders of the people—whose insolence and integrity he has himself severely denounced in his poems, and whose views in nominating him he had greatly disappointed³—should have detested propositions which robbed them without compensation of many legal rights, it is easy to imagine. But the statement of Plutarch, that the poor emancipated debtors were also dissatisfied, soon having expected that Solon would not only reach their debts, but also rebuke the soil of Attica, seems utterly incredible; nor

¹ Plutarch, Solon, c. 11. See the full exposition given of this debasement of the drachma in Aristotle's *Metaphysics*, c. 10, § 10.

² Aristotle, *Metaphysics*, iv. c. 10 that Solon not only debased the coin, but also altered the rights of gold money. I dissent from his opinion on this latter point, and have given my reasons for so doing in a notice of the valuable treatise in the *Classical Museum*, No. 1.

³ Plutarch, Solon, c. 12. In the general estimation of justice throughout the Greek cities, pronounced that by some of the judges, the judges afterwards or Prytanion, were made of men called the Prytanis or Prytanis (Aristotle, *Metaphysics*, iv. c. 10, § 10).

⁴ Plutarch, Solon, c. 12. With regard to the former two passages, still again quote the chapters, there are errors in.

is it confirmed by any passage now remaining of the Solonian poems.¹ Plutarch conceives the poor debtors as having in their minds the comparison with Lysimachus and the equality of property at Sparta, which (as I have already endeavored to show)² is a fiction; and even had it been true as matter of history long past and antiquated, would not have been likely to work upon the minds of the multitude of Attics in the forcible way that the biographer supposes. The Solonotheta must have exaggerated the feelings and diminished the fortunes of many persons; but it gave to the large body of Thetes and small proprietors all that they could possibly have hoped. We are told that after a short interval it became universally acceptable in the general public mind, and procured for Solon a great increase of popularity—all ranks concurring in a common wish of thanksgiving and harmony.³ One incident there was which constituted an entry of indignation. Three rich friends of Solon, all men of great family in the state, and bearing names which will hereafter appear in this history as borne by their descendants—Konda, Kleindea, and Hippandrea—having obtained from Solon some previous hint of his designs, pressed by it, first, to borrow money, and next, to make purchases of lands; and this selfish breach of confidence would have disgraced Solon himself, had it not been found that he was personally a great loser, having lent money to the extent of five talents.⁴

In regard to the whole measure of the Seimotheta, indeed, through the poems of Solon were open to every one, ancient authors gave different statements both of its purport and of its extent. Most of them construed it as having cancelled indiscriminately all money contracts; while Androtion and others thought that it did nothing more than lower the rate of interest and depreciate the currency to the extent of 33 per cent, leaving the letter of the contracts unchanged. How Androtion came to maintain such an opinion we cannot easily understand. For the fragments now remaining from Solon seem distinctly to relate to,

¹ Plutarch, Solon, c. 25.

² See above, part II. ch. vi.

³ Plutarch, l. c. Plutarchus, *De Solonis* apud Dindorf, p. 467.

⁴ The anecdote is noticed, but without specification of the names of the friends, in Plutarch, *Solon*, *De Solonis*, p. 467.

to be disguised. The *Seimchiketsu* of Solon, unjust so far, as it reminded previous agreements, but highly salutary in its consequences, is to be vindicated by showing that by no other way could the bonds of government have been held together, or the safety of the multitude alleviated. We are to consider, first, the great personal cruelty of these pre-existing contracts, which condemned the body of the free debtor and his family to slavery; next, the profound destitution created by such a system in the large mass of the poor, against both the judges and the creditors by whom it had been enforced, which rendered their feelings unmanageable, so soon as they came together under the sentiment of a common danger and with the determination to secure to each other mutual protection. Moreover, the law which vests a creditor with power over the person of his debtor, so as to convert him into a slave, is likely to give rise to a class of loans which inspire nothing but abhorrence—money lent with the foreknowledge that the borrower will be unable to repay it, but also in the conviction that the value of his person as a slave will make good the loan; thus reducing him to a condition of extreme misery, for the purpose sometimes of appalling, sometimes of enriching, the lender. Now the foundation on which the respect for contracts rests, under a good law of debtor and creditor, is the very reverse of this. It rests on the firm conviction that such contracts are advantageous to both parties as a class, and that to break up the confidence essential to their existence would produce extensive mischief throughout all society. The man whose reverence for the obligation of a contract is now the most profound, would have entertained a very different sentiment if he had witnessed the dealings of lender and borrower at Athens under the old *antidoketa* law. The oligarchy had tried their best to enforce this law of debtor and creditor with its disastrous series of contracts; and the only reason why they consented to invoke the aid of Solon was because they had lost the power of enforcing it any longer, in consequence of the newly awakened courage and emulation of the people. That which they could not do for themselves, Solon could not have done for them, even had he been willing. Nor had he in his position the means either of exempting or compensating those creditors who, separately taken, were open to no reproach; indeed, in following his proceedings,

we have plainly that he thought compensation due, not to the creditors, but to the past sufferings of the enslaved debtors, since he redeemed several of them from foreign captivity, and brought them back to their homes. It is certain that no measure, simply and exclusively prospective, would have sufficed for the emergency. There was an absolute necessity for overruling all that class of pre-existing rights which had produced so violent a social fever. While, therefore, to this extent, the Solonian law cannot be acquitted of injustice, we may confidently affirm that the injustice inflicted was an indispensable price paid for the maintenance of the peace of society, and for the final abrogation of a disastrous system as regarded insolvents.¹ And the feeling as well as the legislation favoured in the modern European world, by inserting beforehand all contracts for selling a man's person or that of his children into slavery, goes far to sanction practically the Solonian repudiation.

One thing is never to be forgotten in regard to this measure, combined with the concurrent amendments introduced by Solon in the law—it settled finally the question to which it referred. Never again do we hear of the law of debt and credit as disturbing Athenian tranquillity. The general sentiment which grew up at Athens, under the Solonian money-law and under the democratical government, was one of high respect for the sanctity of contracts. Not only was there never any demand in the Athenian democracy for new tables or a degradation of the money-standard, but a formal abrogation of any such projects was inserted in the solemn oath taken annually by the numerous *Dikasts*, who formed the popular judicial body called *Helias* or the *Heliastic Jurors*.

Solon's law finally settled the question—no subsequent amendment was admitted as to private debts—except for contracts entered upon after the enactment.

¹ That which Solon did for the Athenian people in regard to debt is less than what was demanded as the penalty given out the time of the expedition to the Ilium (B.C. 1184) by Minerva against the wrong of the contract, to dissolve them, though it does not seem to have been well received (Plutarch, *Solon*, c. 10). He gave up the abrogation of all the debt of slaves unable to pay, without exception—if the language of Demosthenes is to be trusted, which probably it cannot be.

In Thucydides justly observed regarding Solon, "He must be considered as an arbitrator to whom all the parties interested submitted their claims, while the general feeling was that they should be decided by him, not upon the footing of legal right, but according to his own sense of the public interest. It was in this spirit that he listened regarding his office, and he appears to have discharged it impartially and liberally." (History of Greece, ed. ed. vol. II. p. 47.)

purpose. But there is not the same animosity as to his promise to pay interest: on the contrary, the very creation of interest will be regarded by many in the same light in which the English law considers usurious interest, as tainting the whole transaction. But in the modern mind, principal and interest within a limited rate, have as grown together, that we hardly understand how it can ever have been pronounced unworthy of an honorable citizen to lend money on interest. Yet such is the declared opinion of Aristotle and other superior men of antiquity; while at Rome, Cato the censor went so far as to denounce the practice as a heinous crime.¹ It was comprehended by them among the worst of the tricks of trade—and they held that all trade, or profit derived from interchange, was tainted, as being made by one man at the expense of another; each parasite therefore could not be commended, though they might be tolerated to a certain extent as a matter of necessity, but they belonged essentially to an inferior order of citizens.² What is remarkable in Greece is, that the antipathy of a very early state of society against traders and money-lenders lasted longer among the philosophers than among the mass of the people—it harmonised more with the social ideal of the former than with the practical instincts of the latter.

In a rude condition, such as that of the ancient Germans described by Tacitus, loans on interest are unknown. Habitually careless of the future, the Germans were grieved both in giving and receiving presents, but without any idea that they thereby either imposed or contracted an obligation.³ To a people in this

misapprehension made in an early society, the very idea of the interest of a loan—interest disapproved of in itself.

¹ Aristotle, *Polit.* l. 2, c. 12; Cato ap. Gellius, *de Noct.* p. 28. Plaut. in the *Truculentus* de Long. p. 2, has Cato call all trading an interest; indeed he regards any private citizen to possess either gold or silver.

To illustrate the marked difference made in the early Roman law, between the action for the principal and that for the interest, Cicero in his *Appendix* at the end of this chapter the explanation given by M. von Mevius in the translation of the *Narr. and Antiqu.*—connected as it is by analogy with the *Religion* of the Romans.

² Aristotle, *Polit.* l. 2, c. 12. The same

opinion depending directly on the same source, and in Aristotle's words, *Philosophy*, de Civitate, c. 1, p. 1.

Although interest was a deeply the quality derived from the word *interest* the Latin expression for interest, which has given birth to the well-known doctrine of Aristotle—that money being naturally scarce, to extract anything from it must necessarily be contrary to nature (see *Philosophy*, de Civ. lib. 2, c. 12).

³ Tacit. *German.* c. 1. "Pecunia apud eos in omnia rebusque, spectantibus, illisque magis servatur quàm ut reddatur."

How much the interest of money was then regarded as an undue profit extracted from distress, is powerfully illustrated by the old Jewish law; the Jew being permitted to take interest from foreigners (whom the lawgiver did not think himself obliged to protect), but not from his own countrymen.¹ The Koran follows out this point of view consistently, and prohibits the taking of interest altogether. In most other nations, laws have been made to limit the rate of interest, and at Rome especially, the legal rate was successively lowered,—though it seems, as might have been expected, that the restrictive ordinances were constantly eluded. All such restrictions have been intended for the protection of debtors; an effect which large experience proves them never to

with the stability of their power to subvert. Compare *Pliny*, de *Capitulis*, *Mediceus*, c. 4, p. 122.

¹ *Levitic*, xvi. 33–35; *Deuter*, xxi. 10. This commandment was undoubtedly intelligible; yet M. Salomon (*Revue des Institutions de Moine*, iv. 35, 36, 37) quotes himself much to assure his reader that Jewish commercial parties. "One day brother thou shalt not lend upon usury, but with a strange thou shalt lend upon usury." It is of more importance to remark that this word here translated usury really means are interest for money, great or small—see the opinion of the Rabbins of seventy Jewish doctors, assembled at Paris in 1807, cited in M. Salomon's work, &c.

The Jewish law therefore, he believes did not, as some writers have felt and the rabbins themselves distinguished from the Jews, was as far as the Koran in prohibiting all taking of interest. That the restrictions were not much observed, we have one proof at least in the proceedings of Nebuchadnezzar on the building of the second temple—which presents so various a picture of many respects to the Jewish constitution, that it resembles the interest of a *Deus Prohibens*. Compare *the Jewish and Persian History*, part ii. c. 4, p. 100.

The lesson which the people underwent in the carrying on of this work, and the increased misery which they were reduced to, was to bring it to an speedy a conclusion, being very great. One was taken to relieve them from a much greater burden, the oppression of usury; which they then in great misery lay under, and had

much greater reason to complain of. For the rate, taking advantage of the weakness of the poorer sort, had reached heavy array of them, making them pay the hundred for all money lent them, that is, 1 per cent, for every month, which amounted to 12 per cent, for the whole year; so that they were forced to mortgage their lands, and sell their children into servitude, to have wherewith to pay bond for the support of themselves and their families, which being a manifest breach of the law of God, given them by Moses for that purpose, at the rate of bond to take money of any of their brethren, Nebuchadnezzar, on his leaving Babel, returned forthwith to remove so great an iniquity; he order whereby he had a general assembly of all the people, where having set forth unto them the nature of the offence, how great a breach it was of the Jewish law, and how heavy an oppression upon their brethren, and how much it might provoke the wrath of God against them, he moved it to be annulled by the general consent of the whole assembly, that all should return to their brethren whatsoever had been exacted of them upon money, and also release all the Jews, wherever they were, and those, which had been taken of them upon mortgage on the above-mentioned.

The manner of Nebuchadnezzar appears thus to have been not merely a *Reformation*, such as that of Babel, but also a *renewal* or *renewing* of interest paid by the debtor to pay the—consequence to the proceedings of the Magistrates concerning themselves from their oligarchy, as mentioned above, Chapter ix.

profits, unless it be called protection to render the obtaining of money on loan impracticable for the most distressed borrowers. But there was another effect which they did tend to produce—they softened down the primitive antipathy against the practice generally, and confined the odious name of usury to loans lent above the fixed legal rate.

In this way alone could they operate beneficially, and their tendency to counterwork the previous feeling was at that time not unimportant, considering as it did with other tendencies arising out of the industrial progress of society, which gradually exhibited the relation of lender and borrower in a light more unobscurely beneficial, and less repugnant to the sympathies of the bystander.¹

At Athens the more favourable point of view prevailed throughout all the historical times. The march of industry and commerce, under the mitigated law which prevailed subsequently to Solon, had been sufficient to bring it about at a very early period and to suppress all public antipathy against lenders at interest.² We may remark too that this more equitable tone of opinion grew up spontaneously, without any legal restriction on the rate of interest,—no such restriction having ever been imposed and the rate being expressly declared free by a law ascribed to Solon himself.³ The same may probably be said of the communities of Greece generally—at least there is no indication to make us suppose the contrary. But the feeling against lending money at interest remained in the bosom of the philosophical men long after it had ceased to form a part of the practical morality of the citizens, and long after it had ceased to be justified by the appearance of

This opinion was attacked by the philosophers, who had ceased to prevail in the community generally.

¹ In every law to limit the rate of interest, it is of course implied that the law has only sought to do, but not to do the maximum rate of which nature is to be left. The citizens at Rome followed out this proposition with perfect consistency: they passed no legislation for the restriction of the rate of interest, and at length they made a law to take any interest at all. — *Memorie, Antiquaire, de la Republique de Rome, et de l'Empire Romain*, (Paris, 1761, 1762). Whose shows that the

law, though passed, was not carried into execution.

² *Speech of Public Men, of Athens*, b. i. ch. vi. p. 125. Thinks differently—in my judgment, contrary to the evidence: the passages to which he refers (scarcely) that of Theophrastus are not unambiguous on this question, and there are other passages which go far to contradict it.

³ *Index post Theophrast. A. A. A.* p. 162.

(upon 1000 drachmas) 50; the poorest *Engleis* would pay (upon 1000 drachmas) 10 drachmas. And thus this mode of assessment would operate like a graduated income-tax, looking at it in reference to the three different classes—but as an equal income-tax, looking at it in reference to the different individuals comprised in one and the same class.¹

All persons in the state whose annual income amounted to less than 500 medimni or drachmas were placed in the fourth class, and they must have constituted the large majority of the community. They were not liable to any direct taxation, and perhaps were not at first even entered upon the taxable schedule, more especially as we do not know that any taxes were actually levied upon this schedule during the Solonian times. It is said that they were all called *Thites*, but this appellation is not well

¹ The excellent explanation of the Solonian property schedule and graduated rates, first given by Smith in the *Principles*, and afterwards by Mr. Adams in *J. A. S. N.*, has been followed, as stated above, upon this subject, but without any success. The statement of Pottas (p. 115) given in various languages, but based, I think, exclusively upon the late discovery of a lawless, does not mean the same which the *Principles* understand, the *Mythen*, or the *Engleis*, actually paid to the state, but the basis by which each was taxed, or which each was made to pay if called upon; or, if these the state desired and the object of a man's rated property, then making an equal proportion of it from each.

So we said I cannot agree with Smith. He shows the graduated scale of the third class, or *Engleis*, at 10 drachmas, not at 50. All the property belonging to the second class, a. 10, across to 1000, 200, and 500, and the incomes drawn from the old law, quoted in Demosthenes (see, especially, p. 107) is too variable to outweigh the convenience of this view.

However, the whole Solonian schedule, as shown and shown in the paper, that it is subject to the objection of all classes, and not only the lowest and the *Engleis* classes; for the schedule would be then, in all the three cases, a tribute and must therefore of the *Engleis* referred to in the *Principles*.

Now it is better shown—in the middle class, too, than in the first and second classes, that income, and that the graduated rates, if we follow the schedule of Smith, that the *Engleis* would pay 10 drachmas; for the law of 1000 drachmas at which the *Engleis* was rated in the schedule is 10, upon which is 100 drachmas. In order to make this difficult, Smith suggests a way both inconsistent and including into the same; he thinks that the income of each was converted into equal to multiplying by twelve, and that in the case of the richest class, or *Principles*, the schedule, as defined was entered in the schedule in the case of the second class, or *Engleis*, the value of the rate—and in the case of the third class, or *Engleis*, the value of the rate. Now this process seems to me rather complicated, and the employment of a fraction such as $\frac{1}{12}$ is certainly difficult and somewhat above the simple fraction of one-half very impossible; moreover Smith's own table is 10, upon which is 100 drachmas in the third class, what some appear to be the first or second.

Such a schedule, if correct, would not be a schedule, if there was any schedule or law, as shown in the paper, that it is subject to the objection of all classes, and not only the lowest and the *Engleis* classes; for the schedule would be then, in all the three cases, a tribute and must therefore of the *Engleis* referred to in the *Principles*.

as duties on imports, fell upon them in common with the rest; and we must recollect that these latter were, throughout a long period of Athenian history, in steady operation, while the direct taxes were only levied on rare occasions.

But though this fourth class, constituting the great numerical majority of the free people, were shut out from individual office, their collective importance was in another way greatly increased. They were invested with the right of choosing the annual archons, out of the class of Pentekostomedonai; and what was of more importance still, the archons and the magistrates generally, after their year of office, instead of being accountable to the senate of Areopagus, were made formally accountable to the public assembly sitting in judgment upon their past conduct. They might be impeached and called upon to defend themselves, punished in case of misbehaviour, and delivered from the usual honour of a seat in the senate of Areopagus.

Had the public assembly been called upon to act alone without aid or guidance, this accountability would have proved only nominal. But Solon converted it into a reality by another new institution, which will hereafter be found of great moment in the working out of the Athenian democracy. He created the *pro-bouleutic* or pre-considering senate, with intimate and special reference to the public assembly—to prepare matters for its discussion, to correct and superintend its meetings, and to ensure the execution of its decrees. The senate, as first constituted by Solon, comprised 400 members, taken in equal proportions from the four tribes,—not chosen by lot (as they will be found to be in the more advanced stage of the democracy), but elected by the people, in the same way as the archons then were,—persons of the fourth or poorest class of the census, though contributing to elect, not being themselves eligible.

But while Solon thus created the new pre-considering senate, thought of with and subsidiary to the popular assembly, he manifested no jealousy of the pre-existing Areopagitic senate of Areopagus.—He enlarged its powers, gave to that simple supervision over the execution of

Fourth or poorest class—archons chosen only by assembly—these magistrates not held accountable to Areopagus.

Pro-bouleutic senate of four hundred.

gency of the times: the idea of a frequent revision of laws, by a body of well-selected citizens, belongs to a far more advanced age, and could not well have been present to the minds of either. The wooden tables of Solon, like the tables of the Roman decemviri,¹ were doubtless intended as a permanent "*lex sacra publica privatus juris*".

If we examine the facts of the case, we shall see that nothing more than the bare foundation of the democracy of Athens as it stood in the time of Pericles, can reasonably be ascribed to Solon. "I gave to the people (Solon says in one of his short remaining fragments)² as much strength as sufficed for their needs, without either enlarging or diminishing their dignity: for those too who possessed power and were noted for wealth, I took care that no unworthy treatment should be reserved. I stood with the strong shield, cast over both parties, so as not to allow an unjust triumph to either." Again, Aristotle tells us that Solon bestowed upon the people as much power as was indispensable, but no more:³ the power to elect their magistrates and hold them to accountability: if the people had had less than this, they could not have been expected to remain tranquil—they

might hold the constitution of the Athenians, but the facts themselves are not disputed.

would have been in slavery and hostile to the constitution. Not less distinctly does Herodotus speak, when he describes the reaction subsequently operated by Kleisthenes—the latter (he tells us) found “the Athenian people excluded from everything.”¹ These passages seem positively to contradict the suggestion, in itself sufficiently improbable, that Solon is the author of the peculiar democratical institutions of Athens, such as the constant and numerous dikasts for judicial trials and revision of laws. The genuine and forward democratical movement of Athens begins only with Kleisthenes, from the moment when that distinguished Alkmeonid, either spontaneously or from finding himself worked in his party strife with Isagoras, purchased by large popular concessions the hearty co-operation of the multitude under very dangerous circumstances. While Solon, in his own statement as well as in that of Aristotle, gave to the people as much power as was strictly needed, but no more—Kleisthenes (in the significant phrase of Herodotus), “being vanquished in the party contest with his rival, took the people into partnership.”² It was, then, to the interests of the weaker section, in a strife of contending nobles, that the Athenian people owed their first admission to political ascendancy—in part, at least, to this cause, though the proceedings of Kleisthenes indicate a hearty and spontaneous popular sentiment. But such constitutional admission of the people would not have been so astonishingly fruitful in positive results, if the course of public events for the half century after Kleisthenes had not been such as to concentrate most powerfully their energy, their self-reliance, their mutual sympathies, and their ambition. I shall recount in a future chapter these historical causes, which, acting upon the Athenian character, gave such efficiency and expansion to the great democratical impulse communicated by Kleisthenes: at present it is enough to remark that that impulse commences properly with Kleisthenes, and not with Solon.

The real
Athenian
movement
begins with
Kleisthenes.

¹ Herodotus, v. 62. *the Alkmeonid Hippias, expelled the popular element, &c.*

² Herodotus, v. 62. 63. *After the defeat of Kleisthenes and Isagoras, Isagoras kept the people excluded from the city, &c.*

³ Aristotle, *Pol.* ii. 4. *the Alkmeonid Hippias, expelled the popular element, &c.*

the Alkmeonid Hippias, expelled the popular element, &c.

As to the actual democratical institution of the proceedings of Kleisthenes, see Aristotle, *Pol.* ii. 4. 11. 12. 13.

prerogatives and further strengthened by its indispensable ally—the pre-budætic or pre-considering senate. Under the Solonian constitution, this force was merely secondary and defensive, but after the renovation of Kleisthenes it became permanent and sovereign. It branched out gradually into those numerous popular dikasteries which so powerfully modified both public and private Athenian life, drew to itself the undivided reverence and submission of the people, and by degrees rendered the single magistracies essentially subordinate functions. The popular assembly, as constituted by Solon, appearing in modified efficiency and trained to the office of reviewing and judging the general conduct of a past magistrate—forms the intermediate step between the positive Hæmætic ages, and those omnipotent authorities and dikasteries which listened to Pericles or Demosthenes. Compared with these last, it has in it but a faint streak of democracy—and so it naturally appeared to Aristotle, who wrote with a practical experience of Athens in the time of the crisis; but compared with the first, or with the ante-Solonian constitution of Attica, it must doubtless have appeared a constitution extremely democratical. To impose upon the Epeisidæi either the necessity of being elected, or yet upon his trial of after-accountability, by the rabble of Athens (such would be the phrase in Epeisidæi society), would be a bitter humiliation to those among whom it was first introduced; for we must recollect that this was the most extensive scheme of constitutional reform yet propounded in Greece, and that despots and oligarchs shared between them at that time the whole Grecian world. As it appears that Solon, while constituting the popular assembly with its pre-budætic senate, had no jealousy of the senate of Areopagus, and indeed even enlarged its powers—we may infer that his good object was, not to weaken the oligarchy generally, but to improve the administration and to repress the misconduct and irregularities of the individual members; and that too, not by diminishing their powers, but by making some degree of popularity the condition both of their entry into office, and of their safety or honour after it.

body of 4000 hit various bodies of
lawyers for different courts and purposes
did not commence, probably, until

after the first reforms of Kleisthenes.
I shall revert to this point when I touch
upon the latter and his days.

It is, in my judgment, a mistake to suppose that Solon transferred the judicial power of the archons to a popular assembly. These magistrates still continued self-acting judges deciding and condemning without appeal—not mere presidents of an assembled jury, as they afterwards came to be during the next century.¹ For the general exercise of such power they were accountable after their year of office. Such accountability was the security against abuse—a very insufficient security, yet not wholly inoperative. It will be seen however presently that these archons, though strong to coerce, and perhaps to oppress, small and poor men, had no means of keeping down rebellious nobles of their own rank, such as Peisistratus, Lycurgus, and Megacles, each with his armed followers. When we compare the driven vigils of these ambitious competitors, ending in the despotism of one of them, with the vehement parliamentary strife between Themistocles and Aristocles afterwards, peacefully decided by the vote of the sovereign people and never disturbing the public tranquillity—we shall see that the democracy of the ensuing century fulfilled the conditions of order, as well as of progress, better than the Solonian constitution.

To distinguish this Solonian constitution from the democracy which followed it, is essential to a due comprehension of the progress of the Greek mind, and especially of Athenian affairs. That democracy was achieved by gradual steps, which will be

¹ The statement of Plutarch, that Solon gave an appeal from the decision of the archon to the judgment of the popular assembly (*Plutarch, Solon, 10*), is contradicted by most of the authorities. Though the Thucydidean usage is subject to question, it is the analogy of the Solonian judges of appeal collected by Boeckh (*Hist. of Greece, vol. ii. c. 20, § 1, p. 20*).

To suppose that the Thucydidean Solon would not really judge is equally false; and so that as it was, the suggestion of an appeal from the judgment of the archon is inconsistent with the known course of such procedure, and has apparently arisen in Plutarch's mind from confusion with the Roman process, which really was an appeal from the judgment of the consul to that of the people. Plutarch's comparison of Solon with

Peisistratus leads to this supposition—*and who delivers them, from the law of Solon, from a father only himself, from a husband, from a brother, from a friend, from a neighbour. The Athenian archon was first a judge without appeal; and afterwards, owing to his office, he became president of a tribunal, receiving only those propositions alone which brought the case to an issue in his decision; but the day and hour were to give him a judge without an appeal.*

It is hardly due to Plutarch to make him responsible for the absurd remark that Solon rendered his laws irrevocably obscure, in order that the Greeks might have more to do and greater power. He gives the remark, himself, only with the most expressive leave,—"it is said"; and he also well might doubt whether it was ever seriously intended even by the author, whatever he may have been.

hereafter described. Democritus and Alcibiades lived under it as a system consummated and in full activity, when the stages of its previous growth were no longer matter of exact memory; and the citizens then assembled in judgment were pleased to hear their constitution associated with the names either of Solon or of Cleisthenes. Their inquisitive contemporary Aristotle was not thus misled: but even common-place Athenians of the century preceding would have escaped the same delusion. For during the whole course of the democratical movement from the Persian invasion down to the Peloponnesian war, and especially during the changes proposed by Pericles and Ephialtes, there was always a strenuous party of resistance, who would not suffer the people to forget that they had already forsaken, and were on the point of forsaking still more, the orbit marked out by Solon. The illustrious Pericles underwent incessant attacks both from the orators in the assembly and from the comic writers in the theatre. And among these enemies on the political tendencies of the day, we are probably to number the complaint, breathed by the poet Euripides, of the demagogue into which both Solon and Draco had fallen—"I swear (said he in a fragment of one of his comedies) by Solon and Draco, whose wooden tablets (of laws) are now employed by people to roast their barley."¹ The laws of Solon respecting penal offences, respecting inheritances and adoption, respecting the private relations generally, &c., remained for the most part in force: his quadripartite census also continued, at least for financial purposes, until the archonship of Kleisthenes in 507 B.C.—so that Cleon and others might be warranted in affirming that his laws still prevailed at Athens: but his political

¹ Euripides ap. Photius, Solon, 15.—
 ὅτι καὶ Σόλων καὶ Δράκων, οἱ
 ἄνθρωποι οἱ τοὺς ὕμους τοὺς
 ἄνθρωποι.

Euripides praises the moderate democracy in early Athens, as compared with that under which he lived; but in the *Orat. 15*. (paraphrase) he contrasts the former with the names of Solon and Kleisthenes, while in the *Orat. 15*. (paraphrase) he contrasts the former as more suited to the

stage of Athens to those of Solon and Kleisthenes. In this latter version he describes pretty exactly the power which the people possessed under the Solonian constitution,—yet the words concerning an *ἐκκλησία* along with the *ἐπιστάτας*, which coincided with the terms of Aristotle—on legal subjects and officers, corresponding to *ἐκκλησία* to be understood as the *ἐκκλησία* of the *ἐκκλησία*.

Compare Aristotle, *15*. 15. p. 126 op. 202 (ed. 1) and p. 125 (ed. 2), and *Orat. 15*. p. 100—101 (ed. 1) and 100 (ed. 2).

and judicial arrangements had undergone a revolution,¹ not less complete and irreversible than the character and spirit of the Athenian people generally. The choice, by way of lot, of archons and other magistrates—and the distribution by lot of the general body of citizens or jurors into panels for judicial business—may be decidedly considered as not belonging to Solon, but adopted after the revolution of Kleisthenes;² probably the choice of senators by lot also. The lot was a symptom of pronounced democratical spirit, such as we must not seek in the Solonian institutions.

It is not easy to make out distinctly what was the political position of the ancient *Gentes* and *Phratriæ*, as Solon left them. The four tribes consisted altogether of *gentes* and *phratriæ*, inasmuch that no one could be included in any one of the tribes who was not also a member of some *gens* and *phratry*. Now the new pre-bocratic or pre-solonian senate consisted of 400 members,—100 from each of the tribes: persons not included in any *gens* or *phratry* would therefore have had no access to it. The conditions of eligibility were similar, according to ancient custom, for the nine archons—of course, also, for the senate of Areopagus. So that there remained only the public assembly, in which an Athenian not a member of these tribes could take part: yet he was a citizen, since he could give his vote for archons and senators, and could take part in the annual decision of their accountability, besides being entitled to claim redress for wrong from the archons in his own person—while the alien could only do so through the intervention of an availing citizen or *Proxenos*. It seems therefore that all persons not included in the four tribes, whatever their grade or fortune might be, were on the same level in respect to political privileges as the fourth and poorest class of the Solonian census. It has already been remarked, that even before the time of Solon, the number of Athenians not included in the *gentes* or *phratriæ* was probably considerable; it tended to become greater and greater, since these bodies grew denser and more populous, while the pulley of the new

Constitution
excluded the
Solonian
senate.

³ This appears to be the opinion of *Classen, v. p. 482, 483.*

The laws of Drueto on this subject, therefore, remained, but on other subjects, according to Planché, they were altogether abrogated; there is however room for supposing that the repeal cannot have been so sweeping as this biographer represents.

The Bolivian laws seem to have borne more or less upon all the great departments of human interest and duty. We find regulations political and religious, public and private, civil and criminal, commercial, agricultural, summary, and disciplinary. Bolivia provides punishment for crimes; restricts the professions and status of the citizens, prescribes detailed rules for marriage as well as for burial, for the common use of springs and wells, and for the mutual interest of contemporaneous farmers in planting or holding their properties. As far as we can judge from the imperfect manner in which his laws come before us, there does not seem to have been any attempt at a systematic order or classification. Some of them are more general and vague directions, while others again run into the extreme of speciality.

By far the most important of all was the enactment of the law of debtor and creditor which has already been adverted to, and the abolition of the power of fathers and brothers to sell their daughters and sisters into slavery. The prohibition of all contracts on the security of the body was itself sufficient to produce a vast improvement in the character and condition of the poorer population,—a result which seems to have been so sensibly obtained, from the legislation of Bolivia, that Bouché and some other ardent authors suppose him to have abolished villenage and conferred upon the poor tenants a property in their lands, annulling the seigniorial rights of the landlord. But this opinion rests upon no positive evidence, nor are we warranted in ascribing to him any stronger measure in reference to the land than the enactment of the previous mortgage.¹

¹ Planché, *Bolivia*, c. 17; Druet, *op. cit.* *Annuaire*, 7, p. 174, &c. The promulgation of the different enactments was not simultaneous, and we find in Druet's *op. cit.* *Annuaire*, p. 177, some notices not synchronous with the laws of Druet. It may have been intended by Druet, or perhaps might not seem to be in his intention, to indicate.

² *Annuaire*, *Bolivia*, c. 17; Druet, *op. cit.* *Annuaire*, 7, p. 174, &c. The promulgation of the different enactments was not simultaneous, and we find in Druet's *op. cit.* *Annuaire*, p. 177, some notices not synchronous with the laws of Druet. It may have been intended by Druet, or perhaps might not seem to be in his intention, to indicate.

The first pillar of his laws contained a regulation respecting exportable produce. He forbade the exportation of all produce of the Attic soil, except olive-oil, alone. And the sanction employed to enforce observance of this law deserves notice, as an illustration of the ideas of the time—the action was bound, on pain of forfeiting 100 drachmæ, to prosecute whomsoever came against every offender.¹ We are probably to take this prohibition in conjunction with other objects said to have been contemplated by Solon, especially the encouragement of artisans and manufacturers at Athens. Observing (we are told) that many new immigrants were just then flocking into Attica to seek an establishment, in consequence of its greater security, he was anxious to turn them rather to manufacturing industry than to the cultivation of a soil naturally poor.² He forbade the granting of citizenship to any immigrants, except to such as had quitted irrevocably their former abodes, and came to Athens for the purpose of carrying on some industrious profession; and in order to prevent idleness, he directed the senate of Areopagus to keep watch over the lives of the citizens generally, and punish every one who had no course of regular labour to support him. If a father had not taught his son some art or profession, Solon relieved the son from all obligation to maintain him in his old age. And it was to encourage the multiplication of these artisans, that he secured, or sought to secure, to the residents in Attica the exclusive right of buying and consuming all the headed produce except olive-oil, which was raised in abundance more than sufficient for their wants. It was his wish that the trade with foreigners should be carried on by exporting the produce of artisan labour, instead of the produce of land.³

¹ Plutarch, Solon, 34. The first law, however, is said to have related to the granting of a citizenship to wives and children (Harpocration, v. 20v).

² A law of Antenor (which Solon took care to belonging to the century after Solon, by the silence of his predecessors) by the number of slaves and other persons named in it, the number of its divisions in Attica, was first taken, under a penalty of 100 drachmæ for each law or enactment—except for sacred purposes, or in the interest of law

was per annum for the observance of the respective regulations. (see Harpocration, v. 20, p. 1274.)

³ Plutarch, Solon, 35. *oûd' eph'ek' eph'ek' eph'ek'.*

⁴ Plutarch, Solon, 35—36. According to Harpocration, Solon had intended that the regulations should punish every man who sold, who could not prove a requirement of the services of others, &c. (see Harpocration, v. 20, p. 1274.)

He was a philosopher, he was not a

This commercial prohibition is founded on principles substantially similar to those which were acted upon in the early history of England, with reference both to wool and to wool, and in other European countries also. In so far as it was at all operative it tended to lessen the total quantity of produce raised upon the soil of Attica, and thus to keep the price of it from rising,—a purpose less objectionable (if we assume that the legislator is to interfere at all) than that of our late Corn Laws, which were destined to prevent the price of grain from falling. But the law of Solon must have been altogether inoperative, in reference to the great articles of human subsistence; for Attica imported both largely and constantly, grain and salt provisions,—probably also wool and flax for the spinning and weaving of the women, and certainly timber for building. Whether the law was ever enforced with reference to figs and honey, may well be doubted; at least these productions of Attica were in after-times generally consumed and celebrated throughout Greece. Probably also in the time of Solon, the olive-trees of Laurium had hardly begun to be worked: these afterwards became highly productive, and furnished to Athens a commodity for foreign payments not less convenient than lucrative.¹

It is interesting to notice the anxiety, both of Solon and of Draco, to enforce among their fellow-citizens industrious and self-maintaining habits; and we shall find the same sentiment proclaimed by Pericles, at the time when Athenian power was at its zenith. Nor ought we to pass over this early manifestation in Attica of an opinion equitable and tolerant towards handicraftsmen, which in most other parts of Greece was regarded as comparatively dishonourable. The general tone of Grecian sentiment recognised no occupations so perfectly worthy of a free citizen except arms, agriculture, and athletic and musical exercises; and the proceedings of the Spartans, who

¹ This law is in effect, that Solon has ordered the wool from Attica.

² According to Pausanias, it is believed that the law was intended to prevent the export of wool from Attica, and thus to keep the price of it from rising. But this is a mistake, as the law is in effect, that Solon has ordered the wool from Attica.

³ According to Pausanias, it is believed that the law was intended to prevent the export of wool from Attica, and thus to keep the price of it from rising. But this is a mistake, as the law is in effect, that Solon has ordered the wool from Attica.

⁴ This is a mistake, as the law is in effect, that Solon has ordered the wool from Attica. The law is in effect, that Solon has ordered the wool from Attica.

kept aloof even from agriculture and left it to their Helots, were admired, though they could not be copied, throughout most part of the Hellenic world. Even minds like Plato, Aristotle, and Xenophanes concurred to a considerable extent in this feeling, which they justified on the ground that the sedentary life and unending house-work of the artisan were inconsistent with military spirit. The town-occupations are usually described by a word which carries with it contemptuous ideas, and though recognised as indispensable to the existence of the city, are held suitable only for an inferior and semi-privileged order of citizens. This, the received sentiment among Greeks, as well as foreigners, found a strong and growing opposition at Athens, as I have already said—corroborated also by a similar feeling at Corinth.¹ The trade of Corinth, as well as of Chalcis in Euboea, was extensive, at a time when that of Athens had scarce any existence. But while the despotism of Periander can hardly have failed to operate as a discouragement to industry at Corinth, the contemporaneous legislation of Solon provided for traders and artisans a new home at Athens, giving the first encouragement to that numerous town-population both in the city and in the Piræus, which we find actually residing there in the succeeding century. The multiplication of such town residents, both citizens and metics (i.e. resident persons, not citizens, but enjoying an honored position and civil rights), was a capital fact in the onward march of Athens, since it determined not merely the extension of her trade, but also the pre-existence of her naval force—and thus, as a further consequence, lent extraordinary vigour to her democratical government. It seems moreover to have been a departure from the primitive temper of Atticism, which tended both to pastoral residence and rural occupation. We have therefore the greater interest in noting the first mention of it as a consequence of the Solonian legislation.

To Solon is first owing the admission of a power of testamentary bequest at Athens, in all cases in which a man had no legitimate children. According to the pre-existing custom, we may rather

¹ Herodotus, ii. 137—137; compare Xenophanes, *Charmides*, c. 1.

The subsequent decline, however, which Aristophanes traces upon them, does not, however, and upon *Agamemnon* and

Agamemnon, prove that it was really Solon who caused its origin. On many occasions Plautus alludes to the old sentiment respecting the right of bequest against him.

doubtful.¹ Solon, it appears, was the first who gave power of superseding by testament the rights of agnates and gentiles to succession,—a proceeding in consonance with his plan of encouraging both industrious occupation and the consequent multiplication of individual acquisitions.²

It has been already mentioned that Solon forbade the sale of daughters or sisters into slavery by fathers or brothers; a prohibition which shows how much females had before been looked upon as articles of property. And it would seem that before his time the violation of a free woman must have been punished at the discretion of the magistrates; for we are told that he was the first who enacted a penalty of 100 drachms against the offender, and 20 drachms against the seducer of a free woman.³ Moreover it is said that he forbade a bride when given in marriage to carry with her any personal ornaments and appurtenances, except to the extent of three robes and certain measure of furniture not very valuable.⁴ Solon

Laws

to women.

Regulations
about
funerals.

further imposed upon women several restraints in regard to proceeding at the obsequies of deceased relatives. He forbade profuse demonstrations of sorrow, singing of composed dirges, and costly mortuary contributions. He limited strictly the quantity of meat and drink admissible for the funeral banquet, and prohibited nocturnal exit, except in a car and with a light. It appears that both in Greece and Rome, the feelings of duty and affection on the part of surviving relatives prompted them to various expense in a funeral, as well as to unmeasured effusions both of grief and conviviality; and the general necessity experienced for legal restrictions is attested by the remark of Plutarch, that similar

¹See the Constitution of Rome, De Jure Municipali Attentissima, pp. 16, 19; and Marquise Bouquet, De Solonis Legibus ap. Græc. Aitior., 24, 270.

The adopted son was not allowed to bequeath by will that property of which adoption had made him the possessor. It he left no legitimate children, the laws at law of the adopted claimed it as of right (Plutarch, *loc. cit.*; *Legibus*, p. 126; *com. Rutilian.* R. p. 114; *Sueton.* ad cap. p. 22—23).

²Plutarch, *Solon*, 21. *et* *quædam, æquæque sic iustis legibus.*

³According to *Aristides*, *Justi*, *Themist.* op. 12—13, the punishment enacted by Solon against the man who, in procuring, in such cases of seduction, was drunk.

⁴Plutarch, *Solon*, 16. These laws were independent of the laws of the Solon, by which the husband, when he married a woman, gave security, and bound it in the name of the wife's death; see *Sueton.* De Jure Mund. 22, p. 22.

prohibitions to those enacted by Solon were likewise in force at his native town of Chalcis.¹

Other penal enactments of Solon are not to be mentioned. His forbids absolutely and speaking with respect to the accept-

 living, either in a temple or before judges or archons, ^{language.}
 or at any public festival—on pain of a forfeit of three drachms to the person aggrieved, and two more to the public treasury. How mild the general character of his punishments was, may be judged by this law against foul language, not less than by the law before-mentioned against rape. Both the one and the other of these offences were much more severely dealt with under the subsequent law of democratical Athens. The promulgatory edict against

¹ Plutarch, l. c. The Solonian enactments on the subject of marriage were in a great degree copied in the twelve tables at Rome: see Cicero, De Leg. ii. 12, 13. He says it is right thing to put the rich and the poor on a level in respect to funeral expenses. Plutarch likewise speaks of it, and states the expense of funerals upon a graduated scale according to the amount of the deceased (Leg. ii. 12, 13).

Demosthenes (Dei. Halicarn. p. 1712) gives what he calls the Solonian law of funerals, different from Plutarch in several points.

Unquestionable account of what passed the temple you are sometimes mentioned in Greek law: see the several entries among the Mosaic laws (Levit. xix. 26; the Mosaic laws, however, had a tinge of Arabian feeling).

Compare an instructive description according to law of the Greek city of Chalcis in Asia Asia Minor, through the dress, the proceedings, and the time of solemn mourning, by men, women, and children, who had lost their relatives, are plainly prescribed under several passages (Levit. xix. 26; the Mosaic laws, however, had a tinge of Arabian feeling).

robust exposure bestowed in this day among the Greeks, in the celebration of marriage. (Demosthenes and Thucydides of an Indian Official, vol. i. ch. 12, p. 101-102.)

I do not believe that less country upon earth, in which a larger portion of the wealth of the community is spent in the consummation of marriage.

One of the evils which press most upon Indian society, is the expense which long ages has accumulated of superfluous large sums of money in marriage consummation. Instead of giving what they can to their children in educating them, and enabling them to provide for their families, parents everywhere had found it expedient to give them, and all they can have, to the children of marriage.

Every year both India and China are watered all the state and capital, and retained all the wealth, in the hands of the government which, under the influence of the children, become the most important children state, and by which risk in the consummation of society it is now to allow the children to be married with her. There is nothing which has been and will continue through life with us more proud and pleased as the cost of that marriage, it is known to be large for their children in life. It is their duty, their duty of society. Nothing is more more common than to see an individual in the hands of the state, spending all he has or can borrow, in the marriage of one out of many daughters, and leaving to Providence for the means of supporting the state.

speaking of a deceased person, though doubtless springing in a great degree from disinterested regard, is traceable also in part to that fear of the wrath of the departed which strongly possessed the early Greek mind.

It seems generally that Solon determined by law the duties —
 Rewards to the virtuous
 to the virtuous
 the virtuous
 to the virtuous
 for the public service, though we do not know what were his particular directions. We are told that he rewarded a sheep and a medimnos (of whatever barley) as equivalent, either of them, to a drachm, and that he also prescribed the prices to be paid for first-rate oxen intended for solemn occasions. But it astonishes us to see the large recompense which he awarded out of the public treasury to a victor at the Olympic or Isthmian games: to the former 500 drachmæ, equal to one year's income of the highest of the four classes on the census; to the latter 100 drachmæ. The magnitude of these rewards strikes us the more when we compare them with the fines on rape and evil speaking. We cannot be surprised that the philosopher Xenophanes noticed, with some degree of severity, the extravagant estimate of this species of excellence, current among the Greeks of his time.¹ At the same time, we must remember both that these Pan-Hellenic sacred games presented the chief visible evidence of peace and prosperity among the numerous communities of Greece, and that in the time of Solon, fictitious reward was still needed to encourage them. In respect to land and agriculture Solon proclaimed a public reward of five drachmæ for every wolf brought in, and one drachm for every wolf's cub: the extent of wild land has at all times been considerable in Attica. He also provided rules respecting the use of wells between neighbours, and respecting the planting in contentious olive-grounds. Whether any of these regulations continued in operation during the better-known period of Athenian history cannot be easily affirmed.²

In respect to theft, we find it stated that Solon repealed the punishment of death which Draco had annexed to that crime, and enacted as a penalty, compensation to an amount double the value of the property stolen. The simplicity

 is it to be treated, the property must, according to the law, be restored to Solon; he retained

² Plutarch, Solon, c. 11. See further, Xenophanes, *Mem.* (Diag. I. i. 35).

we may trace the influence of similar ideas in later Attic institutions. It is obvious that his demonstration is confined to that special case in which a secession has already broken out: we must suppose that Kylon has seized the Akropolis, or that Peisistratus, Megakles, and Iphicrates, are in arms at the head of their partisans. Assuming these leaders to be wealthy and powerful men, which would in all probability be the fact, the constituted authority—such as Solon now before him in Attica, even after his own organic amendments—was not strong enough to maintain the peace; it became in fact itself one of the contending parties. Under such given circumstances, the sooner every citizen publicly declared his adherence to some one of them, the earlier this suspension of legal authority was likely to terminate. Nothing was so mischievous as the indifference of the mass, or their disposition to let the combatants fight out the matter among themselves, and then to submit to the victor.¹ Nothing was more likely to encourage aggression on the part of an ambitious malcontent than the conviction, that if he could once overpower the small amount of physical force which surrounded the archons, and exhibit himself in armed possession of the Prytaneum or the Akropolis, he might immediately count upon passive submission on the part of all the freemen without. Under the state of feeling which Solon incalculates, the insurgent leader would have to calculate that every man who was not actively in his favour would be actively against him, and this would render his enterprise much more dangerous. Indeed he could then never hope to succeed, except on the double supposition of extraordinary popularity in his own persons, and wide-spread detestation of the existing government. He would thus be placed under the influence of powerful deterring motives; so that secession would be less likely to induce him into a course which threatened nothing but ruin, unless under such encouragement from the pre-existing public opinion as to make his success a result desirable for the community. Among the small political societies of Greece—especially in the age of Solon, when the number of despots in other parts of Greece seems to have been at its maximum—every government, whatever might be its form, was sufficiently weak to

¹ Was a case of such indifference manifested by the people of Argos in Eurarchus' life of Alcibiades, c. 27.

make its overthrow a matter of comparative facility. Unless upon the supposition that a band of foreign mercenaries—which would render the government's system of armed force, and which the Athenian legislator would of course never contemplate—there was no other stay for it except a positive and pronounced feeling of attachment on the part of the mass of citizens. Indifference on their part would render them a prey to every daring man of wealth who chose to become a conspirator. That they should be ready to come forward, not only with voices but with arms—and that they should be known beforehand to be so—was essential to the maintenance of every good Grecian government. It was salutary, in preventing mere personal attempts at revolution; and pacific in its tendency, even where the revolution had actually broken out—because in the greater number of cases the proportion of partisans would probably be very unequal, and the inferior party would be compelled to renounce their hopes.

Especially upon this Athenian city-governments, of some positive sentiment on the part of the citizens.

It will be observed that in this enactment of Solon, the existing government is ranked merely as one of the contending parties. The virtuous citizen is enjoined, not to come forward in its support, but to come forward at all events, either for it or against it. Positive and early action is all which is prescribed to him as matter of duty. In the age of Solon, there was no political idea or system yet current which could be assumed as an unquestionable datum—no conspicuous standard to which the citizens could be pledged under all circumstances to attach themselves. The option lay only between a mitigated oligarchy in possession and a despot in possibility; a contest wherein the affections of the people could rarely be counted upon in favour of the established government. But this neutrality in respect to the constitution was at an end after the conclusion of Kleisthenes, when the idea of the sovereign people and the democratical institutions became both familiar and precious to every individual citizen. We shall hereafter find the Athenians binding themselves by the most solemn and solemn oaths to uphold their democracy against all attempts to subvert it; we shall discover in them a sentiment not less positive and uncompromising in its direction,

Opposed in this respect between the age of Solon and the subsequent democracy.

then emerge in its inspirations. But while we notice this very important change in their character, we shall at the same time perceive that the wise precautionary recommendation of Balguy, to obviate edition by an early declaration of the important public between two contending leaders, was not lost upon them. Such,

The same
idea of
being out
in the sub-
sequent
Ostracism.

in point of fact, was the purpose of that salutary and protective institution which is called the Ostracism.

When two party leaders, in the early stages of the Athenian democracy, each powerful in adherents and influence, had become passionately embarked in bitter and prolonged opposition to each other, such opposition was likely to conduct one or other to violent measures. Over and above the hopes of party triumph, each might well fear that if he himself continued within the bounds of legality, he might fall a victim to aggressive proceedings on the part of his antagonist. To ward off this formidable danger, a public vote was called for to determine which of the two should go into temporary banishment, retaining his property and unshackled by any diagnosis. A number of citizens not less than 6000, voting secretly and therefore independently, were required to take part, pronouncing upon one or other of these candidates a sentence of exile for ten years. The one who remained because of course more powerful, yet less in a situation to be driven into anti-constitutional courses than he was before. I shall in a future chapter speak again of this wise precaution and vindicate it against some erroneous interpretations to which it has given rise. At present I merely notice its analogy with the previous Solonian law, and its tendency to accomplish the same purpose of terminating a fierce party-feud, by artificially calling in the votes of the mass of impartial citizens against one or other of the leaders—with this important difference, that while Solon assumed the hostile parties to be actually in arms, the ostracism averted that great public calamity by applying its remedy to the preliminary symptoms.

Exemption
of Solon to
make the
Homer
poems and
the Solon.

I have already considered, in a previous chapter, the directions given by Solon for the more orderly recital of the Homeric poems; and it is curious to contrast his reverence for the old epic with the unqualified repugnance which he manifested towards Thespis and the drama—then just nascent, and holding out little

promise of its subsequent excellence. Tragedy and comedy were now beginning to be grafted on the lyric and choric song. First one actor was provided to relieve the chorus; next two actors were introduced to sustain *solitary* characters and carry on a dialogue, in such manner that the songs of the chorus and the interlocation of the actors formed a continuous piece. Solon, after having heard Theopis acting (as all the early composers did, both tragic and comic) in his own comedy, asked him afterwards if he was not ashamed to pronounce such *distinctions* before so large an audience. And when Theopis answered that there was no harm in saying and doing such things merely for amusement, Solon indignantly exclaimed, striking the ground with his stick, "If then we come to praise and esteem such amusement as this, we shall quickly feel the effects of it in our daily transactions". For the authenticity of this anecdote it would be rash to vouch, but we may at least treat it as the protest of some early philosopher against the deception of the drama; and it is interesting as marking the incipient struggle of that literature in which Athens afterwards attained such untrivalled excellence.

It would appear that all the laws of Solon were proclaimed, inserted, and accepted without either discussion or resistance. He is said to have described them, not as the best laws which he could himself have imagined, but as the best which he could have induced the people to accept. He gave them validity for the space of ten years, during which period¹ both the senate collectively and the *citizens* individually were to observe them with fidelity; under penalty, in case of non-observance, of a golden statue as large as life to be erected at Delphi. But though the acceptance of the laws was accomplished without difficulty, it was not found so easy either for the people to understand and obey, or for the *lawyer* to explain them. Every day persons came to Solon either with praise, or criticism, or suggestions of various improvements, or questions as to the construction of particular enactments; until at last he became tired of this endless process of reply and vindication, which was either unsuccessful either in removing *obscurity* or in satisfying complaints. Perceiving that if he

² Plutarch, Solon, c. 2.

fact is attested by the poems of Solon himself, and the lines, in which he bids farewell to Phalokypnos on quitting the island, are yet before us. On the disposition of this poem his poem bestowed unqualified commendation.¹

Besides his visit to Egypt and Cyprus, a story was also current of his having conversed with the Lydian king Croesus at Sardis. The communication said to have taken place between them has been woven by Herodotus into a sort of novel tale which forms one of the most beautiful episodes in his whole history. Though this tale has been told and retold as if it were genuine history, yet as it now stands, it is irreconcilable with chronology—although very possibly Solon may at some time or other have visited Sardis, and seen Croesus as hereditary prince.²

¹ *Plutarch*, Solon, § 1; *Strabo*, v. 24. The statements of Herodotus that Solon travelled both to Egypt and that he died in Cyprus, are not worthy of credit (*Plut.*, *Solon*, § 1, *Strabo*).

² *Plutarch*, Solon, in this ancient notice relates the meeting of the two sages as being chronologically impossible. It is to be understood that the question all turns upon the authorities as derived to Herodotus and the alleged sequel, for that there may have been an interview between Solon and Croesus at Sardis at some period between B.C. 550 and 540, is possible, though not certain.

It is evident that Solon made no mention of any interview with Croesus in his poems; otherwise the dispute would have been settled at once. Now this, in a man like Solon, amounts to negative evidence of some value, for he alludes in his poems both Egypt and the prince Phalokypnos in Cyprus, and had there been any conversation or interview at that which Herodotus relates, between him and Croesus, he could hardly have failed to mention it.

Herodotus, *Lydian*, *Polign.*, and *Mr. Clinton*, vi. 37, in giving the chronological difficulties, and to give the historical character of this interview, say in his language "impossible." See Mr. Clinton's *§ 2* above, and Mr. *§ 2*, *Appendix*, v. 27, p. 104. The chronological difficulties are that Croesus was born in 560, one year before the expedition of Solon; he succeeded to the throne at the age of

thirty-five, in 535 B.C.; he was overthrown, and Sardis captured, in 546 B.C. by Cyrus.

Mr. Clinton, after Herodotus and the others, supposes that Croesus was long friendly with his father Haptesias, during the lifetime of the latter, and that Solon visited Lydia and conversed with Croesus during the last years of Haptesias. "We may suppose that Solon left Athens in B.C. 550, about twenty years after his ascending, and returned thence in B.C. 540, about five years before the capture of Sardis" (*§ 2*, p. 104). Upon which hypothesis we may remark—

1. The statements whereby Herodotus and Mr. Clinton endeavor to show that Croesus was long friendly with his father, do not sustain the conclusion. The passage of Herodotus, *Memorabilia*, which is produced to show that it was Haptesias and not Croesus who conversed with Solon, does not sustain Herodotus, who only states that Haptesias conversed with an aged Athenian named Solon (not Herodotus); this point being settled, that Croesus was depicted by Herodotus to give an impression and the plot of *Mr. Mayer* (*Introduction*, and Mr. Clinton) deriving the testimony to an insupportable extent when he states Haptesias to be a cousin of Solon by Haptesias. "It is clear that Solon is always represented," saying at all it will about Solon or the claim of the Solon family in this passage of Herodotus, which represents Croesus as presenting a sort of embassy under the name Haptesias, just as Cyrus the younger

But even if no chronological objections existed, the moral purpose of the tale is so prevalent, and pervades it so systematically from beginning to end, that these internal grounds are of themselves sufficiently strong to impeach its "credibility as a matter of fact, unless such doubts happen to be outweighed—which in this case they are not—by good contemporary testimony. The narrative of *Slidin* and *Greene* can be taken for

all its worthiness under discussion. And the supposition of *Frederick*, that it does not mean, readers who do it, *Frederick*, appears to me, when taken along with the context, to indicate a purpose or intention of misstatement, and not a disclaimer during life.

1. The hypothesis therefore that *Greene* was King of A.C. during the lifetime of his father, is one purely gratuitous, founded on an account of the chronological difficulties connected with the authors of *Frederick*. But it is quite insufficient for such a purpose. It does not save us from the necessity of attributing *Frederick* to some of his predecessors; there may perhaps have been an interview between *Slidin* and *Greene* in A.C. 177, but it cannot be the interview described by *Frederick*. That interview, when about thirty-two years after the publication of *Slidin's* first—at the maximum of the power of *Greene*, and after numerous complaints attacked by *Slidin* to this—was a time when *Greene* had a son old enough to be married and to command armies (*Frederick*, I, 200)—a son moreover indisputably providing the son of his father from property in adulthood. But in the death of his son, indicated by two years of mourning, which were passed and by further distress, *Frederick*, I, 40, by the slaying of one with the *Frederick*. That may, if we read the words of it as described in *Frederick*, cannot have lasted more than three or four years; so that the interview between *Slidin* and *Greene*, as *Frederick* indicated it, must be fairly stated to have occurred within seven generations of the capture of *Slidin*.

If we put together all these considerations, it will appear that the interview suggested by *Frederick* is a chronological impossibility; and *Frederick* (*Frederick*, vol. I, p. 270) is there in saying that the *Frederick* has *Slidin* into a state of his childhood or early years; he would have needed

with *Frederick*. If we suppose that the *Frederick* indicated with reference to his son, and not to his.

In my judgment, this is an ill-considered tale in which certain real characters—*Greene* and *Slidin*—and certain real facts—the great power and successful rule of the house to the victorious son of *Greene*—together with certain facts probably altogether fictitious, such as the life story of *Slidin*, the *Frederick* *Frederick* and the history, the handling of the subordinates with him as *Michael* *Greene*, the attractive presentation of *Slidin*, etc., are put together so as to convey an impressive moral lesson. The whole adventure of *Slidin* and the son of *Greene* is confined to language extremely beautiful and poetic.

Frederick treats the impressions and sentiments of this narrative as the last proof of the historical truth, and puts aside the chronological tables as arbitrary or true. Upon which reasoning Mr. *Oliver* has the following very just remarks:—"Frederick would have had a very important idea of the nature of historical evidence, if he could imagine that the truthfulness of a story to the character of *Slidin* was a better argument for its authenticity than the number of witnesses by whom it is attested. There are historical facts upon which it is a fiction would easily have had the skill to select the elements in the character of the father" (*Slidin*, 200).

To make this remark still more complete, it would be necessary to tell the reader "freedom and sense of justice" in addition to the "sense" of accepting witnesses. And it is a remark the more worthy of notice, inasmuch as Mr. *Oliver* has probably referred to the substance of *Frederick* *Slidin*, as being completely trustworthy, and that of *Slidin*—a substance of which he took no account in his evaluation of the historical weightiness of the story *Greene* *Slidin*.

nothing else but an illustrative fiction, borrowed by Herodotus from some philosopher, and clothed in his own peculiar beauty of expression, which on this occasion is more decidedly poetical than is habitual with him. I cannot transcribe, and I hardly dare to abridge it. The vain-glorious Creesus, at the summit of his conquests and his riches, endeavours to win from his visitor Solon an opinion that he is the happiest of mankind. The latter, after having twice proffered to him modest and mysterious Grecian oracles, at length reminds him that his vast wealth and power are of a tenure too precarious to serve as an evidence of happiness—that the gods are jealous and meddling, and often make the show of happiness a mere prelude to extreme disaster—and that no man's life can be called happy until the whole of it has been played out, so that it may be seen to be out of the reach of reverse. Creesus treats this opinion as absurd, but "a great judgment from God fell upon him, after Solon was departed—probably (observes Herodotus) because he flattered himself the happiest of all men". First he lost his favourite son Atys, a brave and intelligent youth (his only other son being dumb). For the Mystians of Cytropolis, being raised by a destructive and formidable wild bear which they were unable to subdue, applied for aid to Creesus, who sent to the spot a chosen hunting force, and permitted—though with great reluctance, in consequence of an alarming dream—that his favourite son should accompany them. The young prince was unexpectantly slain by the Phrygian wife Admetus, whom Creesus had sheltered and protected. Hardly had the latter recovered from the anguish of this misfortune, when the rapid growth of Cyrus and the Persian power induced him to go to war with them, against the advice of his wisest counsellors. After a struggle of about three years he was completely defeated, his capital Sardis taken by storm, and himself made prisoner. Cyrus ordered a large pile to be prepared, and placed upon it Creesus in fetters, together with fourteen

¹ Herod. l. vi. In Solon's lament upon the fall of Atys, all the allusions to an eagle, denote, as before, the king's fall. l. vi. Verse 19 Solon observes, "Atys is dead, whom you have sheltered, and whom you desire to have your heir."—Herodotus observes nothing.

The hunting-party, and the terrible wild bear upon whom the Mystians

cannot cope, appear to be borrowed from the legend of Job.

The whole name of Admetus, repeating after the accident in a tale of domestic misery, coming for death with extraordinary haste, appears to Creesus, and then killing himself on the pile of the young prince, is deeply tragic (Herod. l. vi—vii).

to himself more than a very moderate share of happiness; the danger from reactionary Monarchs, if at any time he had overpassed such limits; and the necessity of calculations taking in the whole of life, as a basis for rational comparisons of different individuals, and it embodied, as a practical consequence from these feelings, the often-repeated protest of moralists against vehement impulses and unrestricted aspirations. The more valuable this narrative appears, in its illustrative character, the less can we presume to treat it as a history.

It is much to be regretted that we have no information respecting events in Attica immediately after the Solonian laws and constitution, which were promulgated in 594 B.C., so as to understand better the practical effect of these changes. What we next hear respecting Solon in Attica refers to a period immediately preceding the first usurpation of Peisistratus in 560 B.C., and after the return of Solon from his long absence. We are here again introduced to the same allegorical dissensions as are reported to have prevailed before the Solonian legislation: the Peisakoi, or peasant proprietors of the plain round Athens, under Lykourgos; the Paraloi of the south of Attica, under Megakles; and the Diaktoi or mountaineers of the eastern coast, the poorest of the three classes, under Peisistratos, are in a state of violent intestine dispute. The account of Peisistratos represents Solon as returning to Athens during the height of this sedition. He was treated with respect by all parties, but his recommendations were no longer obeyed, and he was disqualified by age from acting with effect in public. He employed his best efforts to mitigate party animosities, and applied himself particularly to restrain the ambition of Peisistratos, whose ulterior projects he quickly detected.

The future greatness of Peisistratos is said to have been first portended by a miracle which happened, even before his birth, to his father Hippokrates at the Olympic games. It was realised, partly by his bravery and conduct, which had been displayed in the capture of Nisaea from the Megarians:

Story of Solon after his return from his long absence.

Story of Solon in Athens.

Story of his capture of Nisaea.

I thought, I do, I cannot find the evidence, and because it may possibly be true, and the Megarians may have been in some other way taken from Athens and Megara than that

himself upon the compassion and defence of the people, pretending that his political enemies had violently attacked him. He implored the people to grant him a guard, and at the moment when their sympathies were freely aroused both in his favour and against his supposed enemies, Aristo proposed formally to the Ekklesia (the pre-benetic senate, being composed of friends of Peisistratus, had previously authorised the proposition) that a company of fifty club-men should be assigned as a permanent body-guard for the defence of Peisistratus. To this motion Solon opposed a strenuous resistance,* but found himself overborne, and even trusted as if he had lost his senses. The poor were earnest in favour of it, while the rich were averse to expense their dissent; and he could only comfort himself after the fatal vote had been passed, by exclaiming that he was wiser than the former, and wiser determined than the latter. Such was one of the first known instances in which this memorable stratagem was played off against the liberty of a Grecian community.

The unbounded popular favour which had secured the passing of this grant was still further manifested by the absence of all precautions to prevent the limits of the grant from being exceeded. The number of the body-guard was not long confined to fifty, and probably their clubs were soon exchanged for sharper weapons. Peisistratus thus found himself strong enough to throw off the mask and seize the Akropolis. His leading opponents, Megakles and the Alkmeonidae, immediately fled the city, and it was left to the venerableness and undaunted patriotism of Solon to stand forward almost alone in a vain attempt to resist the usurpation. He publicly presented himself in the market-place, employing encouragement, remonstrance, and reproach, in order to rouse the spirit of the people. To prevent this disposition from coming (he told them) would have been easy; to shake it off now was more difficult, yet at the same time more glorious.^b But he spoke in vain, for all who were not actually favourable to Peisistratus listened only to their fears, and remained passive; nor did any one join Solon, when, as a last

appeal, he put on his armour and planted himself in military posture before the door of his house. "I have done my duty (he exclaimed at length); I have sustained to the best of my power my country and the law;" and he then renewed all former hope of opposition—though reviving the instances of his friends that he should flee, and returning for answer, when they asked him on what he relied for protection, "On my old age". Nor did he even think it necessary to repress the inspirations of his Muse. Some verses yet remain, composed seemingly at a moment when the strong hand of the new despot had begun to make itself sorely felt, in which he tells his countrymen—"If ye have endured sorrow from your own baseness of soul, impute not the fault of this to the gods. Ye have yourselves put force and deviation into the hands of these men, and have thus driven upon yourselves wretched slavery."

It is gratifying to learn that Paskutash, whose conduct throughout his despotism was comparatively mild, left Soliman untouched. How long this distinguished man survived the practical subversion of his own constitution, we cannot certainly determine; but according to the most probable statement he died during the very next year, at the advanced age of eighty.

We have only to regret that we are deprived of the means of following more in detail his noble and exemplary character. He represents the best tendencies of his age, combined with much that is personally excellent; the improved official sensibility; the thirst for enlarged knowledge and observation, not less potent in old age than in youth; the conception of regularized popular institutions, departing scarcely from the type and spirit of the governments around him, and calculated to found a new character in the Athenian people; a genuine and reflecting sympathy with the mass of the poor, anxious not merely to rescue them from the oppressions of the rich, but also to create in them habits of self-relying industry; lastly, during his temporary possession of a power altogether arbitrary, not merely an absence of all selfish ambition, but a rare illustration in solving the riddle between conflicting exigencies. In reading his poems we must always recollect that what now appears common-place was once new, so that in his comparatively unlettered age, the social papers which

he drew morose still fresh, and his enthusiasm as calculated to live in the memory. The poems composed on social subjects generally implicate a spirit of gentleness towards others and moderation in personal objects. They represent the good as irresistible, retributive, favouring the good and punishing the bad, though sometimes very tardily. But his compositions on special and present occasions are usually conceived in a more vigorous spirit; denouncing the oppressions of the rich at one time, and the timid behaviour to Pericles at another—and expressing in emphatic language his own proud consciousness of having stood forward as champion of the mass of the people. Of his early poems hardly anything is preserved. The few lines remaining seem to manifest a jovial temperament which we may well conceive to have been overclouded by such political difficulties as he had to encounter—difficulties arising successively out of the Megarian war, the Euxine ravages, the public despondency kindled by Ephialtes, and the task of arbitrating between a rapacious oligarchy and a suffering people. In one of his elegies addressed to Mnesarchus, he marked out the sixtieth year as the longest desirable period of life, in preference to the eightieth year, which that poet had expressed a wish to attain.¹ But his own life, as far as we can judge, seems to have reached the longer of the two periods; and not the least honourable part of it (the resistance to Pericles) occurs immediately before his death.

There prevailed a story, that his ashes were collected and scattered around the island of Salamis, which Plutarch treats as absurd—though he tells us at the same time that it was believed both by Aristotle and by many other considerable men. It is at least as ancient as the poet Knemon, who alluded to it in one of his comedies, and I do not feel inclined to reject it.² The inscription on the statue of Solon at Athens described him as a Salaminian: he had been the great means of acquiring the island for his country: and it seems highly probable that among the new Athenian citizens, who went to settle there, he may have received a lot of land and become enrolled among the Salaminians.

¹ Solon, Fragment 35, ed. Dugl. In this, or 27, Dr. Pearson, p. 126, thinks alludes that Solon was the first person to whom the application popular in later times deriving with it as nearly allegory was applied (Solon, Or. 27, Dr. Pearson, p. 126; p. 126, Solon).

APPENDIX.

The explanation which H. von Savigny gives of the *Nexi* and *Addicti* under the old Roman law of debts and credits (after he has related the disquisition of Niebuhr on the same subject), while it throws great light on the historical changes in Roman legislation on that important matter, sets forth at the same time the marked difference made in the procedure of Rome, between the demand of the creditor for repayment of principal, and the demand for payment of interest.

The primitive Roman law distinguished a debt arising from money lent (*pignus cum creditis*) from debts arising out of contract, delict, sale, &c., or any other source: the creditor on the former ground had a quick and easy process, by which he acquired the fullest power over the person and property of his debtor. After the debt on loan was either confessed or proved before the magistrate, thirty days were allowed to the debtor for payment: if payment was not made within that time, the creditor laid hold of him (*manus injectio*) and carried him before the magistrate again. The debtor was now again required either to pay or to find a surety (*poena*); if neither of these demands were complied with, the creditor took possession of him and carried him home, where he kept him in chains for two months; during which interval he brought him before the prætor publicly on three successive occasions. If the debt was not paid within those two months, the sentence of affliction was pronounced, and the creditor became empowered either to put his debtor to death, or to sell him for a slave (p. XL), or to keep him at forced work, without any restriction as to the degree of ill-treatment which might be inflicted upon him. The judgment of the magistrate authorized him, besides, to seize the property of his debtor wherever he could find any, within the limits sufficient for payment: this was one of the points which Niebuhr had doubted.

Such was the old law of Rome, with respect to the consequences of an action for money lent and received, for more than a century after the Twelve Tables. But the law did not apply this stringent personal proceeding to any debt except that arising from loan—and even in that

debt only to the principal money, not to the interest—which latter had to be claimed by a *per son* both more gentle and less efficient, applying to the property only and not to the person of the debtor. Accordingly it was to the advantage of the creditor to derive some means for satisfying his claim of interest under the same stringent process as his claim for the principal; it was also to his advantage, if his claim arose, not out of money lent, but out of sale, compensation for injury, or any other source, to give to it the form of an action for money lent. Now the *Nexum*, or *Nexi obligatio*, was an action—a fictitious loan—whereby this purpose was accomplished. The severe process which legally belonged only to the recovery of the principal money, was extended by the *Nexum* so as to comprehend the interest; and so as to comprehend also claims for money arising from all other sources (as well as from loan), wherein the law gave no direct recourse except against the property of a debtor. The Debitor *Nexum* was made liable by this legal action to pass into the condition of an *Adilectus*, either without having borrowed money at all, or for the interest as well as for the principal of that which he had borrowed.

The *Lex Poetelia*, passed about a.n. 338, liberated all the *Nexi* then under liability, and introduced the *Nexi obligatio* for ever afterwards (Gloss, *De Repudiis* l. 34; Livy, viii. 35). Here, as in the *Schuldscheide* of Sicily, the existing contracts were cancelled, at the same time that the whole class of similar contracts were forbidden for the future.

But though the *Nexi obligatio* was thus abolished, the old stringent remedy still continued against the debtor as loan, as far as the principal was borrowed, apart from interest. Some mitigations were introduced: by *Lex Julia*, the still more important provision was added, that the debtor by means of a *Cautio Damnum* might save his person from seizure. But this *Cautio Damnum* was coupled with conditions which could not always be fulfilled, nor was the debtor admitted to the benefit of it, if he had been guilty of carelessness or dishonesty. Accordingly the old stringent process, and the mitigation in which it ended, though it became less frequent, still continued throughout the course of Imperial Rome, and even down to the time of Justinian. The private prison, with alienated debtors working in it, was still the appendage to a Roman moneylender's house, even to the third and fourth centuries after the Christian era, though the practice seems to have become rarer and rarer. The status of the *Adilectus* Debitor, with its peculiar rights and obligations, is discussed by Gellius (vii. 3); and Julius Gellius (a.n. 185) observes—"Adilecti namque sunt et viri et mulieres adilecti, quia vinculo sunt detentum bonorum contentum". (ca. l.)

If the *Adiliter* was adjudged to several creditors, they were allowed by the Twelve Tables to divide his body among them. No example was known of this power having been ever carried into effect, but the law was understood to give the power distinctly.

It is useful to have before us the old Roman law of debtor and creditor, partly as a point of comparison with the ante-Roman practice in Action, partly to illustrate the difference drawn in an early state of society between the claim for the principal and the claim for the interest.

See the Abhandlung of Von Savigny in the Transactions of the Berlin Academy for 1828, p. 78—100; the subject is also treated by the same admirable exponent in his *System des heutigen Römischen Rechts*, vol. v. sect. 12, and in *Beilage* at 10, 11 of that volume.

The same peculiar stringent process, which was available in the case of an action for pecunia certis creditis, was also specially extended to the *verus*, who had paid down money to liquidate another man's debt; the debtor, if insolvent, became his *Adiliter*—this was the *Actio Expensæ*. I have already remarked in a former note, that in the *Justinian* law, a case analogous to this was the only one in which the *actio* remedy against the person of the debtor was always maintained. When a man had paid money to redeem a citizen from captivity, the latter, if he did not repay it, became the slave of the party who had advanced the money.

Walter (*Disquisitiones de Römischen Rechts*, sect. 581—512, 2nd ed.) calls in question the above explanation of Von Savigny, on grounds which do not appear to me sufficient.

How long the feeling continued, that it was immoral and inequitable to require any interest at all for money lent, may be seen from the following notice respecting the state of the law in France even down to 1788:—

"*Avant la Révolution Française* (le 1789) le prêt à intérêt n'était pas également admis dans les diverses parties du royaume. Dans les pays de droit écrit, il était permis de stipuler l'intérêt des deniers prêtés; mais la jurisprudence des parlements résistait souvent à cet usage. Suivant le droit commun des pays coutumiers, on ne pouvait stipuler aucun intérêt pour le prêt appelé en droit romain. On tenait pour maxime que l'argent ne produisait rien par lui-même, on tel prêt devait être gratuit: que la perception d'intérêt était une usure: à cet égard on admettait avec généralement les principes du droit canonique. De reste, la législation et la jurisprudence variaient suivant les localités et suivant la nature des contrats et des obligations." (*Ordonnances, Lois, Décrets, Arrêts, et Circulaires*, Paris, 1840; Note sur

le Décret de l'Assemblée Nationale concernant le Pêlé et l'intérêt, Août 17, 1793.)

The National Assembly declared the legality of all loans on interest, "suivant le taux déterminé par la loi," but did not then fix any special rate. "Le décret du 11 Avril, 1793, défendit la vente et l'achat de rentes." "La loi du 6 Floral, an III, déclara que l'or et l'argent sont marchandises ; mais elle fut opposée par le décret du 2 germinal suivant. Les articles 1908 et 1940 du Code Civil permettent le prêt à intérêt, mais au taux fixé ou autorisé par la loi. La loi du 3 Sept., 1807, a fixé le taux d'intérêt à 5 p. cent. en matière civile et à 4 p. cent. en matière commerciale."

The article on *Lending-houses*, in Teichmann's History of Inventions (vol. III. pp. 4—48), is highly interesting and instructive on the same subject. It traces the gradual raising in question, mitigation, and disappearance of the ancient antipathy against taking interest for money ; an antipathy long sanctioned by the ecclesiastical as well as by the jurists. Lending-houses, or *Monte de Piété*, were first commenced in Italy about the middle of the fifteenth century, by some Franciscan monks, for the purpose of enabling poor borrowers from the exorbitant exactions of the Jews: Pope Pius II. (Johann Hilber, one of the closest of the Popes, about 1458—1464) was the first who approved of one of them at Perugia, but even the papal sanction was long combated by a large proportion of ecclesiasticals. At first it was to be purely charitable ; not only neither giving interest to those who contributed money, nor taking interest from the borrowers—but not even providing fixed pay to the administrators: interest was tacitly taken, but the popes were a long time before they would formally approve of such a practice. "At Vienna, in order to avoid the reproach of avarice, the office was employed of not demanding any interest, but admonishing the borrowers that they should give a remuneration according to their plenty and ability." (p. 31.) The Dominicans, partisans of the old doctrine, called these establishments *Montes Negociarii*. A Franciscan monk, Bernardino, one of the most active promoters of the *Monte de Piété*, did not venture to defend, but only to excuse as an unavoidable evil, the payment of wages to the clerks and administrators: "*Speiandum et diligenter debetibus Bernardino fieri, si aliquis illos penitus deinde et gratia maxime charitatis et commoditatis libere penitus, sed plene apud et pauperum subditum equis de directorum temporis. Nec enim (inquid) tantum est videri bonorum, et gubernare et officiales, Monachi ministris necessarij, veluti laborum hunc causam gratis mittere: quod si remunerandi sint ac certe principalij, vel ipse Saggius, non*

and Houtman goods, brevi exhauster, et Jerusalem opprobriantibus tota palmarum religione abique peribit.] (p. 32.)

The Council of Trent, during the following century, pronounced its feelings of the legitimacy and usefulness of these beneficentuses, and this has since been understood to be the sentiment of the Catholic Church generally.

To trace this gradual change of moral feeling is highly instructive—the more so, as that general basis of sentiment, of which the sympathy against lending money on interest is only a particular case, will provide largely in society and direct the current of moral approbation and disapprobation. In some nations, as among the ancient Persians before Cyrus, this sentiment has been carried so far as to repudiate and despise all buying and selling. (Herodot. l. 181.) With many, the principle of reciprocity in human dealings appears, when conceived in theory, odious and contemptible, and goes by some bad name, such as *spine*, *with-holdness*, *calculatedness*, *political economy*, &c.; the only sentiment which they will admit in theory, is, that the man who has, ought to be ready at all times to give away to him who has not; while the latter is encouraged to expect and require such gratuitous donation.

CHAPTER XII.

EUBŒA—CYCLADES.

Among the Ionic portion of Hellas are to be reckoned (besides the islands Athens) Eubœa, and the numerous group of islands included between the southernmost Eubœan promontory, the eastern coast of Peloponnesus and the north-western coast of Kete. Of these islands some are to be considered as outlying prolongations, in a south-easterly direction, of the mountain-system of Asia; others, of that of Eubœa; while a certain number of them lie apart from either system, and seem referable to a volcanic origin.¹ To the first class belong Kete, Erythræ, Sarcophagæ, Pholœgandros, Mikon, Gyron, Syra, Paros, and Antiparos; to the second class, Andros, Tinos, Mykonos, Delos, Naxos, Anapros; to the third class, Kinsina, Milos, Thira. These islands passed amongst the ancients by the general names of Cyclades and Sporades; the former denomination being commonly understood to comprise those which immediately surrounded the sacred island of Delos,—the latter being given to those which lay more scattered and apart. But the names are not applied with uniformity or steadiness even in ancient times: at present, the whole group are usually known by the title of Cyclades.

The population of these islands was called Ionic—with the exception of Syra and Erythræ in the southern part of Eubœa, and the island of Erythræ, which were peopled by Dryopes;² the same tribe as those who have been already remarked in the Argolic peninsula; and with the exception also of Milos and Thira, which were colonies from Sparta.

² *ibid.*

city. The military force of Eretria was not much inferior; for in the temple of the Anagnathian Artemis, nearly a mile from the city, to which the Eretrians were in the habit of marching in solemn procession to celebrate the festival of the goddess, there stood an ancient column setting forth that the procession had been performed by no less than 2000 hoplites, 600 horsemen, and 80 chariots.¹ The date of this inscription cannot be known, but it can hardly be earlier than the 49th Olympiad or 600 B.C.—near about the time of the Solonian legislation. Chalkide was still more powerful than Eretria: both were in early times governed by an oligarchy, which among the Chalkidians was called the Hippobates or Horse-leaders—proprietors probably of most part of the plain called Leisairos, and employing the adjoining mountains as summer pasture for their herds. The extent of their property is attested by the large number of 4000 Hilarchoi or out-farmers, whom Athens quartered upon their lands, after the victory gained over them when they assisted the expelled Hippias in his efforts to regain the Athenian sceptre.²

Confining our attention, as we now do, to the first two centuries of Grecian history, or the interval between 770 B.C. and 480 B.C., there are scarce any facts which we can produce to ascertain the condition of these Ionic islands. Two or three circumstances, however, may be named which go to confirm our idea of their early wealth and importance.

1. The Homeric Hymn to Apollo presents to us the island of

Early Ionic
described as
rich,
cultivated
and
wealthy.

Diles as the centre of a great periodical festival in honour of Apollo, celebrated by all the chiefs, leaders and councillors, of the Ionic name. What the date of this hymn is, we have no means of determining.

Thucydides quotes it without hesitation as the production of Homer, and doubtless it was in his time universally accepted as such—though modern critics dissent in regarding both that and the other hymns as much later than the *Iliad* and *Odyssey*. Yet it cannot probably be later than 600 B.C. The description of the Ionic visitors presented to us in this hymn is

¹ But the extent and fertility of the Eretrian plain probably suffice for that aggregate population of 10,000 souls, which name implied in the account of Herodotus.

² Herod. l. c.
³ Herod. l. 17; Aristarchus, *Prolegomena*, and *Rehensio*, at *Nequeia*, l. 10—11; compare *Arcton*, *l. 10*, &c.

period was known to the men who took part in the Peloponnesian war. The hymn is exceedingly precious as an historical document, because it attests to us a transitory¹ and extensive association of the Ionic Greeks on both sides of the Ægean Sea, which the conquests of the Lydians first, and of the Persians afterwards, overthrew—a time when the hair of the wealthy Athenian was decorated with golden ornaments, and his tunic made of linen,² like that of the Milesians and Ephesians, instead of the rags and filthy costume and woollen clothing which he subsequently copied from Sparta and Peloponnesus—a time too when the Ionic name had not yet contracted that stain of effeminacy and cowardice which stood imprinted upon it in the time of Herodotus and Thucydides, and which grew partly out of the subjugation of the Asiatic Ionians by Persia, partly out of the antipathy of the Peloponnesian Greeks to Athens. The author of the Homeric hymn, in describing the proud Ionians who thronged in his day to the Delian festival, could hardly have anticipated a time to come when the name Ionic would become a reproach, such as the European Greeks, to whom it really belonged, were desirous of disclaiming.³

2. Another illustrative fact in reference both to the Ionians generally, and to Chalkis and Eretria in particular, during the century anterior to Peisistratus, is to be found in the war between these two cities respecting the fertile plain Lelantine⁴ which lay between them. In general, it appears, these two important towns maintained harmonious relations. But there were some occasions of dispute, and one in particular, wherein a formidable war ensued between them, several allies joining with each. It is remarkable that this was the only war known to Thucydides (anterior to the Persian conquest) which had claim above the dignity of a mere quarrel between neighbours; and in which so many different states manifested a disposition to interfere, as to impart to it a semi-Hellenic character.⁵ Respecting

the allies of each party on this occasion we know only, that the Milesians lent assistance to Eretria, and the Chalcians, as well as the Thessalians and the Chalcidic colonies in Thrace, to Chalkis. A temple, still visible during the time of Strabo, in the temple of the Hellenic Artemis near Eretria, recorded the covenant entered into mutually by the two belligerents, to abstain from missiles, and to employ nothing but hand weapons. The Eretrians are said to have been superior in horse, but they were unskilled in the battle: the tomb of Kleonandros of Pharsalos, a distinguished warrior who had perished in the cause of the Chalcidians, was erected in the agros of Chalkis. We know nothing of the date, the duration, or the particulars of this war; but it seems that the Eretrians were weakened, though their city always maintained its dignity as the second state in the island. Chalkis was decidedly the first, and continued to be flourishing, populous, and commercial, long after it had lost its political importance throughout all the period of Grecian independent history.

2. Of the importance of Chalkis and Eretria, during the seventh and part of the eighth century before the Christian era, we gather other evidences—partly in the numerous colonies founded by them (to which I shall allude in a subsequent chapter),—partly in the prevalence throughout a large portion of Greece, of the Euboean scale of weight and money. What the quantities and proportions of this scale were has been first shown by M. Roepke in his "Metrologie". It was of Eastern origin, and the gold collected by Darius in tribute throughout the vast Persian empire was ordered to be delivered in Euboeic talents.

Comparative
and colonies
of Chalkis
and Eretria
—the
scale of
money and
weight.

Thucydides on having collected as many
silver as each side of Pharsalos required.

1. Roepke, vol. p. 121. Herodotus, v. 10;
Thucyd. lib. ii. p. 102—evidence by
the evidence to Chalkis.

Roepke passed over from Athens to
Chalkis (in the middle of the fourth
century) and returned by the route of
Lepidion, in company of some thousand
soldiers, and gained a great victory
by the aid of the Eretrians. He was
according to the account, afterwards
king of Chalkis, who perished in
the war against Eretria respecting

Chalkis. But it appears that this
war took place in the fifth century.
Roepke, however, says that it was
as a "Spartan" description of Chalkis in
the war. See Roepke's Metrologie, lib. i.
p. 121.

This view of Roepke is Chalkis was
represented as the source of his political
importance, with and others very
familiar from the Athenian view. See
lib. p. 121, of Roepke.

1. See the earliest description of
Chalkis given by Herodotus in the
first volume of Roepke's Metrologie, p. 121, of
Roepke.

Its divisions—the talent equal to 60 minas, the mina equal to 100 drachmae, the drachma equal to 6 obols—were the same as those of the scale called *Æginæan*, introduced by Phidias of Argos. ¹ But the six obols of the Ætolian drachma contained a weight of silver equal only to five *Æginæan* obols, so that the Ætolian denominations—drachma, mina, and talent—were equal only to five-sixths of the same denominations in the *Æginæan* scale. It was the Ætolian scale which prevailed at Athens before the debasement

Three different
divisions—
Æginæan,
Ætolian, and
Attic—were
in use
with the
same silver.

introduced by Solon; which debasement (amounting to about 37 per cent., as has been mentioned in a previous chapter) created a third scale called the *Attic*, distinct both from the *Æginæan* and Ætolian—standing to the former in the ratio of 5 : 6, and to the latter in the ratio of 18 : 25. It seems plain that the

Ætolian scale was adopted by the Ionians through their intercourse with the Lydians² and other Asiatics, and that it became naturalized among their cities under the name of the Ætolian, because Chalkis and Eretria were the most actively commercial states in the *Ægean*—just as the superior commerce of *Ægina*, among the Dorian states, had given to the scale introduced by Phidias of Argos the name of *Æginæan*. The fact of its being so called indicates a time when those two Ætolian cities surpassed Athens in maritime power and extended commercial relations, and when they stood among the foremost of the Ionic cities throughout Greece. The Ætolian scale, after having been debased by Solon in reference to coinage and money, still continued in use at Athens for merchandise. The *Attic* mercantile mina retained its primitive Ætolian weight.³
